SupplyCare – SupplyCare Enterprise SCE30B

1 Type of Product

☐ Field device / signal processing device
☒ Software application for display and monitoring / asset management / handheld terminal etc.
☐ Modem / interface

Manufacturer	: Endress+Hauser GmbH+Co. KG, Hauptstrasse 1, D-79689 Maulburg
Product	: SupplyCare / SupplyCare Enterprise
Type and order code	: SCE30B

2 Software

Previous software version	: 2.05.02
New software version	: 2.06.01
How can the previous software version number be identified?	: The version number is available directly in the headline of the portal window. It also appears in the 'About' pop-up window which can be accessed directly in the application.
Description of the modification in comparison with the predecessor version	: The new version of SupplyCare has been modularized; the software function is now segmented in Basic, Advanced and Professional modules. SupplyCare now also provides a generic monitoring platform which caters for non-tank-related assets, i. e. other objects which can be monitored. The role & license administration has been improved & simplified.

In addition SupplyCare now includes:
- A wizard for an easy tank setup
- A possibility to deactivate tank limits (optional)
- A possibility to deactivate forecast calculation
- Handling of negative values to cater for object-monitoring
- Options for scaling of the inventory chart
- Improved Workplace user interface (only tab sheets with maintained master data are shown)

3   Compatibility

Is the new product software compatible with the previous version, installed device driver components and operating tools?

☒ Yes
☐ No, reason:

Note: Pre-requisite for the installation is SupplyCare Enterprise 2.05.02. There will be an automated operational sequence with the installation of the new software version. A backup of the existing database will be made before the installation of the new version of the software. The old software version will be deleted and replaced by the new version. The database will then be migrated and merged into the new version of SupplyCare Enterprise.

Is a software update generally recommended?

☒ Yes, reason:

Because the updated graphical user interface and the new functions improve and simplify the work with the application significantly.

☐ No, reason:

4   Instruction manual

Is a new instruction manual necessary due to the software modification?

☒ Yes
☐ No

The manual that corresponds to the new software version is:

Product	Manual type	Document identifier
SupplyCare Enterprise	Operating Instructions 71210839	BA00055S/00/EN/15.13
	Getting Started 71210833	BA00054S/00/A2/15.13

The current instruction manuals can be downloaded from the Internet:
http://www.endress.com
– area „DOWNLOAD"
– declaration of the product and kind of manual
