Certificate of Compliance

Certificate: 70087366 **Master Contract:** 160686

Project: 80174206 **Date Issued:** 2024-03-20

Issued To: **Endress + Hauser Flowtec AG**
Kagenstrasse 7
Reinach., Basel-Country, 4153
Switzerland

Attention: Minh Tuan Do

The products listed below are eligible to bear the CSA Mark shown with adjacent indicators 'C' and 'US' for Canada and US or with adjacent indicator 'US' for US only or without either indicator for Canada only.

Issued by: Anil Sodhi

Conditions of Acceptability:

Applicable to all Proline 300/500 Flowmeters:

- All equipment of the measurement system shall be included in the equipotential bonding. Along the intrinsically safe sensor circuits potential equalization must exist.
- The sensors may only be used for those process media, for which the wetted parts are known to be suitable.
- The equipment may have non-conductive surfaces which are a potential electrostatic charging hazard – see instructions for guidance.
- Antenna supplied by Endress+Hauser shall be used only. As an alternate, any passive omni-directional RF antenna with or without cable is permitted to be connected when meeting the following parameters:
  - The antenna shall have an impedance of at least 50Ω
  - The rated frequency range of the antenna shall not exceed 1710MHz … 6000MHz
  - The RF antenna or the RF antenna cable shall be fitted with a Type N connector plug (MIL-STD-348)
- The antenna bushing type H337 shall be mounted wrench tight to the transmitter enclosure to maintain the ingress protection of the enclosure.
- The coupling nut of the Type N plug connector shall be hand tightened only.
- The metal enclosure of the Antenna Bushing H337 shall be securely connected to local earth, typically via the enclosure to which it is connected.
- If the flowmeter system is connected to remote display type DKX001, the approval codes ‘dd’ for the flowmeter shall be paired to the approval code “bb” of the remote display as follows:

Approval code ‘dd’ of Proline Promass, Cubemass, Promag, Prosonic Flow, t-mass and Teqwave M	Approval code ‘bb’ of remote display DKX001/ODKX001 as covered by CSA 160686-70030937
CC, CD or CE	CE or CG
C1, C2, C3, C4, C7, C8	CI, CK or CL
CS	CS
CZ	CZ

- Only use battery Renata type lithium CR1632, 3V.
- The flameproof joints are not intended to be repaired.
- For Proline Promass 300/500, Proline Cubemass 300/500with order code ‘dd’ = C1, C2, C3, C4, C5 & C6:
  Zone 0 is only applicable to sensor with process medium in the measuring tube.
- For Proline t-mass 300/500 with order code ‘dd’ = C2, C4 & C6:
  Zone 0 is only applicable to sensor with process medium in the measuring tube.

Additional conditions applicable to Proline Promass 300/500 and Proline Cubemass 300/500:

- All transmitters certified for Class I, Division 1 are factory sealed and do not require external seals. These factory seals are only valid when used in -40°C or higher ambient temperatures.
- All sensors for the Proline Promass 300/500 flowmeter systems are assessed as dual seal devices. Refer to the markings on the sensor for the maximum working pressures.

Additional conditions applicable to Proline Promag 300/500:

- All transmitters certified for Class I, Division 1 are factory sealed and do not require external seals. These factory seals are only valid when used in -40°C or higher ambient temperatures. Remote enclosures assembled on the sensor certified for Class I, Division 1 are also factory sealed however they do not have an ambient temperature limitation.
- All sensors for the Proline Promag 300/500 flowmeter systems are assessed as single seal devices. Refer to the markings on the sensor for the maximum working pressures.
- For remote versions of Promag flowmeters with a flat gasket within the sensor terminal box, the user shall ensure that flat cover seals are not bent into the seal surface before securing the cover. Seals that are not flat shall be replaced.
- The Proline Promag 300/500 Flowmeter that may include non-conductive surfaces of sensor enclosure housing, shall be prevented from risk of electrostatic charging caused by friction and/or cleaning. The equipment nameplate shall bear the following warning: WARNING – POTENTIAL ELECTROSTATIC CHARGING HAZARD – SEE INSTRUCTIONS

Additional conditions applicable to Proline Prosonic Flow 300/500:

- All transmitters certified for Class I, Division 1 are factory sealed and do not require external seals. These factory seals are only valid when used in -40°C or higher ambient temperatures. Remote enclosures assembled on the sensor certified for Class I, Division 1 are also factory sealed however they do not have an ambient temperature limitation.
- The sensor for the Proline Prosonic Flow G 300/500 flowmeter system is assessed as dual seal devices. Refer to the markings on the sensor for the maximum working pressures.

Additional conditions applicable to Proline t-mass 300/500:

- All transmitters certified for Class I, Division 1 are factory sealed and do not require external seals. These factory seals are only valid when used in -40°C or higher ambient temperatures. Remote enclosures assembled on the sensor certified for Class I, Division 1 are also factory sealed however they do not have an ambient temperature limitation.
- All sensors for the Proline t-mass 300/500 flowmeter systems are assessed as single seal devices. Refer to the markings on the sensor for the maximum working pressures.

Applicable for Proline transmitter hygienic SS enclosure housing G306:

- For the G306 enclosure when forming part of an Ex-Equipment, first the covers shall be made hand-tight and then an additional 45 degrees turn tightening shall be applied to them.
- The thread form of the threaded entries of the G306 enclosure when forming part of an Ex-Equipment shall be marked on the equipment or shall appear in the installation instructions.
- Transmitter shall not be installed vertically above the sensor.

approval options: cCSAus / CSA: CC, CD, CE, CM, CN, CS, CZ, C1, C2, C3, C4, C5, C6, C7, C8
IECEx / ATEX: BA, BB, BC, BD, BI, BJ, BL, BM, BN, BS, B7, B8,

Remote Display type DKX001

Proline 300/500 are intended to be connected to a remote display of Endress+Hauser type DKX001

Approval code: CC, CD, CE, C1, C2, C3, C4, C7, C8, BA, BB, BC, BD, B7, B8	Terminal No.: 81, 82, 83, 84	The connection circuit for Remote Display provides an intrinsically safe circuit with type of protection IS, Ex ia, AEx ia: Uo = 3.9V, Io = 1.5A (spark), 200mA (power), Po = 600mW, Ri = 2.6Ω, Co = 670µF, Lo = 0 Cable parameter L/R ≤ 0.024 mH/Ω for connection to Endress+Hauser Remote Display type DKX001
Approval code: CS, CZ, BS		U_N = 3.3V, I_N = 150mA
Approval code: CM, CN, C5, C6, BI, BJ, BL, BM, BN	Remote display type DKX001 is not intended to be connected to these transmitter electronics	

Service interface

Approval code: BA, BB, B7, C1, C2, C7	Terminal Service Interface	Service Interface shall only be installed: - in areas which are known to be non hazardous with a non intrinsically safe circuit U_N = 3.3 V, U_M = 250 V_{AC} or - to an intrinsically safe circuit with Ui = 10V, Ii = n.a., Pi = na., Ci = 200nF, Li = 0
Approval code: BC, BD, B8, CC, CD, CE, C3, C4, C8		Service Interface shall only be installed: - to an non intrinsically safe circuit with U_N = 3.3V, U_M = 250V_{AC} or - to an intrinsically safe circuit with Ui = 10V, Ii = n.a., Pi = na., Ci = 200nF, Li = 0
Approval code: BS, BI, BJ, BL, BM, BN, CS, CM, CN, CZ, C5, C6		U_N = 3.3V

This Installation Drawing applies to the flowmeters:

	flowmeter	flowmeter OEM version	replacement transmitter	replacement transmitter OEM version
Proline Prosonic Flow 300:	9G3B** – ddeffgh…	O9G3B** – ddeffgh…	9x3Bxx – ddeffgh…	O9x3Bxx – ddeffgh…
Proline Prosonic Flow 500:	9G5B** – ddeffghi*A…	O9G5B** – ddeffghi*A…	9x5Bxx – ddeffghi*A…	O9x5Bxx – ddeffghi*A…
	9P5B** – ddeffgh*B…	O9P5B** – ddeffgh*B…	9x5Bxx – ddeffghi*B…	O9x5Bxx – ddeffghi*B…

where **dd** = approval code, **e** = power supply code, **ff** = IO1 code, **g** = IO2 code, **h** = IO3 code, **i** = IO4 code

General notes to products:

1. **FOR COMPLETE INSTALLATION DRAWING SEE ADDITIONAL INSTALLATION DRAWINGS.**
   ASSIGNMENT OF INSTALLATION DRAWINGS:
   FES0259 -> ELECTRICAL PARAMETERS TO ALL ABOVE LISTED FLOWMETERS
   FES0321 -> THERMAL PARAMETERS TO FLOWMETERS PROSONIC FLOW G 300 AND PROSONIC FLOW G 500
   FES0351 -> THERMAL PARAMETERS TO FLOWMETERS PROSONIC FLOW P 500
2. Install per Canadian Electrical Code (CEC) resp. National Electrical Code (NEC) ANSI/NFPA 70 using threaded conduit or other wiring methods in accordance with articles 500 to 510.
3. The flowmeters Proline Prosonic Flow 300 and Proline Prosonic Flow 500 must be integrated into the potential equalisation system by means of earthing connection facilities or alternatively via pipe, but only if the ground connection via pipe according to national regulations can be assured.
4. Control room equipment shall not use or generate more than 250 V rms or VDC.
5. Cable glands shall be suitable for a temperature range of minimum specified Ta to maximum Ta + 20°C and shall be certified for the intended use.
6. Use supply wires suitable for 20°C above ambient temperature.
7. Proline Prosonic Flow G 300/500 is a Dual Seal devices. See nameplate for maximum working pressure.
8. WARNING - EXPLOSION HAZARD - SUBSTITUTION OF COMPONENTS MAY IMPAIR INTRINSIC SAFETY
   AVERTISSEMENT – RISQUE D'EXPLOSION – LA SUBSTITUTION DES COMPOSANTS RISQUE DE NUIRE À LA SÉCURITÉ INTRINSÈQUE DU PRODUIT
9. The equipment shall only be used for fluids where all process-wetted materials are adequately resistant to the fluid.
10. The cross-sectional area of the PE conductor connected to the protective earthing facilities located inside and outside the enclosure shall not exceed 4mm^2.
11. If the stainless steel label or tag is not bonded to earth, the maximum average capacitance of the nameplate or tag is 30pF bonded to a coated metallic enclosure. This shall be considered to determine suitability of the flowmeter in a specific application.
12. The Proline Prosonic Flow 300/500 Flowmeter is designed for the following range of environmental conditions:
    - Outdoor use
    - Environmental conditions:
      - Pollution Degree: 4 (Macro), 2 (Micro) for all version
      - Pollution Degree: 2 (Macro), 2 (Micro) for plastic transmitter enclosure with Ex ic sensor outputs
    - Overvoltage category II
    - Mode of operation: continuous
    - Altitude 2000m
13. If the polymeric sensor enclosure is used, do not install the in a location where subjected to external conditions which might cause a build-up of electrostatic charges. Cleaning of equipment shall be done only with a damp cloth.

Notes to XP / Ex db / AEx db:

1. Enclosures with Ex db / AEx db rated terminal compartment: Use only suitably certified Ex db / AEx db cable glands, appropriately ingress and temperature rated for their point of mounting. If conduit entries are used, seals must be installed immediately adjacent to the enclosure.
2. Enclosures with XP rating: Enclosures are factory sealed when using in ambient temperature of not lower than -40°C.
   Sensor enclosures with XP rating: Enclosures are factory sealed.
3. WARNING – AFTER DE-ENERGIZING, DELAY 10 MINUTES BEFORE OPENING ENCLOSURE IN TYPE OF PROTECTION EX D
   AVERTISSEMENT – APRÈS AVOIR COUPÉ 'ALIMENTATION, ATTENDRE 10 MINUTES AVANT D'OUVRIR UN BOITIER DE PROTECTION DE TYPE EX D
4. Unused cable entry shall be closed with approved sealing plugs or conduit seals that correspond to the type of protection.
5. Flameproof joints shall not be repaired.

Notes to Ex eb / AEx eb:

1. Enclosures with Ex eb / AEx eb rated terminal compartment: Use only suitably certified Ex eb / AEx eb cable glands, appropriately ingress and temperature rated for their point of mounting.
2. Unused cable entry shall be closed with approved sealing plugs that correspond to the type of protection.
3. To ensure the degree of protection is maintained, it shall be ensured that the cover seal of enclosures with flat seals is installed with no bends in the seal surface before securing the cover. Seals that are not flat shall be replaced.

Notes to IS / Ex i / AEx i:

1. When connecting the intrinsically safe circuits of explosion protection category "ia" of the measuring device to certified intrinsically safe circuits of explosion protection category "ib" with the explosion group IIC and IIB respectively, the explosion protection changes to Ex ib IIC and Ex ib IIB respectively. Intrinsically safe circuits of explosion protection category "ib" are suitable for areas which require EPL Gb apparatus.
2. The connection circuit for Remote Display type DKX001 provides an intrinsically safe circuit with type of protection IS, Ex ia, AEx ia. For assessment of installation see additional drawing "FES0259" as amendment to this control drawing.

Notes to Cl.II, Cl.III / Ex tb:

1. Class II Group G: The maximum temperature of process shall not exceed 165°C/329°F.
2. An additional assessment is required to enshure the suitability of the device to explosive gas-air and dust-air mixtures occurring simultaneously.
3. The housing may only be opened for a brief period. During this time the user shall ensure that dust does not enter the electronic housing.
4. A dust-tight conduit seal shall be used when installed in Class II & III environments.

Notes to Proline flowmeters using stainless steel enclosure (hygienic):

1. Covers shall be first closed hand-tight and then additionally 45 degrees turned for tightening.
2. The transmitter shall not be installed vertically above the sensor.

FES0319D

Notes to Remote Display type DKX001 and ODKX001:

1. Observe additional control drawing of Remote Display type DKX001, ODKX001 respectively if used.
2. Assignment of order codes to certificate of Remote Display type DKX001 or ODKX001 if ordered separately:

Model code of flowmeter with approval code dd =	**Model code of remote display type DKX001 and ODKX001** (refer to certificate CSA 160686-70030937)		
CD or CE	DKX001-(CE/CG)****	or	ODKX001-(CE/CG)*****
C2 or C4	DKX001-(CI/CK/CL)****	or	ODKX001-(CI/CK/CL)*****

Notes to External Antenna and Antenna Bushing H337:

1. An external antenna is not permitted for transmitters with terminal compartment in type of protection XP or Ex d.
2. Any passive omni-directional RF antenna with or without cable is permitted to be connected to the output connector socket Type N of the antenna bushing when meeting the following parameters:
   a) The antenna shall have an impedance of at least 50Ω.
   b) The rated frequency range of the antenna shall not exceed 1710MHz … 6000MHz.
   c) The RF antenna and the RF antenna cable shall be fitted with a Type N connector plug (MIL-STD-348).
   The antenna supplied by Endress+Hauser meets those requirements.
3. The antenna bushing shall be mounted wrench tight to the transmitter enclosure to maintain the ingress protection of the enclosure.
4. The coupling nut of the Type N connector plug shall be hand tightened only.
5. The enclosure of the antenna bushing shall be securely connected to local earth, typically via the enclosure to which it is connected.

Notes:

This page applies to versions with extended order code covering:

9*3B** – dd… O9*3B** – dd… 9x3Bxx – dd… O9x3Bxx – dd…

with approval option cCSAus / CSA: dd = CD, CE, C2, C4

IECEx / ATEX: dd = BB, BD

Temperature table for versions with sensor insulated and not insulated

(for insulation refer to manual of Endress+Hauser Flowtec)

Size / DN	T_{med}		$T_{a,max}$	$T_{med,max}$ [°C]					
	min [°C]	max [°C]	[°C]	T6 (85°C)	T5 (100°C)	T4 (135°C)	T3 (200°C)	T2 (300°C)	T1 (450°C)
25 … 300	-50	90	40	40	40	90	90	90	90
			55	---	40	90	90	90	90
			60	---	---	90	90	90	90
		150 (1)	45 (1)	70	85	120	150	150	150
			55 (1)	---	85	120	150	150	150
			60 (1)	---	(85)	(120)	(150)	(150)	(150)

Notes:
(1) temperatures not applicable for versions with pressure sensor
(2) Ta,min = -40°C, -50°C respectively (see nameplate)
(3) values in brackets are applicable for installation where the transmitter is not installed above the sensor

Temperature table for versions with sensor insulated

(for insulation not in compliance to manual of Endress+Hauser Flowtec)

Size / DN	T_{max} to be measured at reference point at sensor neck [°C]					
	T6 (85C)	T5 (100°C)	T4 (135°C)	T3 (200°C)	T2 (300°C)	T1 (450°C)
all	55	69	72	74	74	74

Notes:
(1) for versions with pressure sensor, the pressure sensor shall not be insulated
(2) for safe use temperatures shall not exceed all of the following:
- temperature table for versions with sensor not insulated (refer to table above)
- temperature at reference point as listed in this table
- Ta,min = -40°C, -50°C respectively (see nameplate)
- for maximum medium temperatue and minimum medium temperature see nameplate

(3) versions with pressure sensor shall not exceed temperatures as listed in table beside for insulated and not insulated sensor
(4) location of reference point

Proline Prosonic Flow G 500

Notes:

This page applies to versions with extended order code covering: 9*5*** – dd*******A… O9*5*** – dd*******A… 9x5Bxx – dd*******A… O9x5Bxx – dd*******A…

with approval option cCSAus / CSA: dd = CN, C6
IECEx / ATEX: dd = BJ, BN

Sensor: Temperature table for versions with sensor insulated and not insulated

(for insulation refer to manual of Endress+Hauser Flowtec)

Size / DN	T_{med}		$T_{a,max}$	$T_{med,max}$ [°C]					
	min [°C]	max [°C]	[°C]	T6 (85°C)	T5 (100°C)	T4 (135°C)	T3 (200°C)	T2 (300°C)	T1 (450°C)
25 … 300	-50	90	40	40	40	90	90	90	90
			55	---	40	90	90	90	90
			60	---	---	90	90	90	90
		150 (1)	60 (1)	70	85	120	150	150	150

Notes:
(1) temperatures not applicable for versions with pressure sensor
(2) Ta,min = -40°C, -50°C respectively (see nameplate)
(3) for applicable version with maximum medium temperatue and minimum medium temperature see nameplate

Transmitter for all versions

Type of enclosure	$T_{a,max}$			
	Ordinary location (°C)	T6 (85°C)	T5 (100°C)	T4 (135°C)
aluminium	60	---	45	60
plastic	60	---	---	---

Notes: (1) aluminium enclosure: Ta,min = -50°C (for limitation see name plate)
plastic enclosure: Ta,min = -40°C

Sensor: Temperature table for versions with sensor insulated

(for insulation not in compliance to manual of Endress+Hauser Flowtec)

Size / DN	T_{max} to be measured at reference point at sensor neck [°C]					
	T6 (80°C)	T5 (100°C)	T4 (135°C)	T3 (200°C)	T2 (300°C)	T1 (450°C)
all	69	71	75	77	77	77

Notes:
(1) for versions with pressure sensor, the pressure sensor shall not be insulated
(2) for safe use temperatures shall not exceed all of the following:
- temperature table for versions with sensor not insulated (refer to table above)
- temperature at reference point as listed in this table
- Ta,min = -40°C, -50°C respectively (see nameplate)
- for maximum medium temperatue and minimum medium temperature see nameplate

(3) versions with pressure sensor shall not exceed temperatures as listed in table beside for insulated and not insulated sensor
(4) location of reference point
