Technical Information
Liquiphant FTL63

Vibronic

Level switch for liquids specifically for the food and life sciences industries

Application

- Level switch for all liquids, for minimum or maximum detection in vessels, e.g. process tanks, storage tanks, and piping, even in hazardous areas
- Process temperature range: −50 to +150 °C (−58 to +302 °F)
- Pressures up to 64 bar (928 psi)
- Viscosities up to 10 000 mPa·s
- Ideal substitute for float switches; reliable function is not affected by flow, turbulence, air bubbles, foam, vibration, solids content or buildup

Benefits

- Easy commissioning with plug and play functionality
- Certified, hygienic design (3-A, EHEDG, ASME BPE)
- Proven conformity with materials standards, e.g. EC1935/2004, FDA, GB 4806, cGMP
- Heartbeat Technology via the free iOS/Android SmartBlue app
- With *Bluetooth*® wireless technology
- Optical process condition indication based on color change and bright LED display

About this document

Symbols

Safety symbols

DANGER

This symbol alerts you to a dangerous situation. Failure to avoid this situation will result in serious or fatal injury.

WARNING

This symbol alerts you to a potentially dangerous situation. Failure to avoid this situation can result in serious or fatal injury.

CAUTION

This symbol alerts you to a potentially dangerous situation. Failure to avoid this situation can result in minor or medium injury.

NOTICE

This symbol alerts you to a potentially harmful situation. Failure to avoid this situation can result in damage to the product or something in its vicinity.

Electrical symbols

Ground connection
Grounded clamp, which is grounded via a grounding system.

Protective earth (PE)
Ground terminals, which must be grounded prior to establishing any other connections. The ground terminals are located on the inside and outside of the device.

Symbols for certain types of Information

Permitted
Procedures, processes or actions that are permitted.

Forbidden
Procedures, processes or actions that are forbidden.

Tip
Indicates additional information

Reference to documentation

Reference to another section

1., 2., 3. Series of steps

Symbols in graphics

A, B, C ... View

1, 2, 3 ... Item numbers

Hazardous area

Safe area (non-hazardous area)

Communication-specific symbols

Bluetooth® wireless technology
Wireless data transmission between devices over a short distance via radio technology.

Graphic conventions

- Installation, explosion and electrical connection drawings are presented in simplified format
- Devices, assemblies, components and dimensional drawings are presented in reduced-line format
- Dimensional drawings are not to-scale representations; the dimensions indicated are rounded off to 2 decimal places
- Unless otherwise described, flanges are presented with sealing surface form EN 1091-1, B2; ASME B16.5, RF; JIS B2220, RF

Function and system design

Measuring principle

The sensor's vibrating fork vibrates at its natural frequency. As soon as the liquid covers the vibrating fork, the oscillation frequency decreases. The change in frequency causes the level switch to switch.

Point level measurement

Maximum or minimum detection for liquids in tanks or pipes in all industries. Suitable for leakage monitoring, pump dry-running protection or overfill prevention, for example.

Specific versions are suitable for use in hazardous areas.

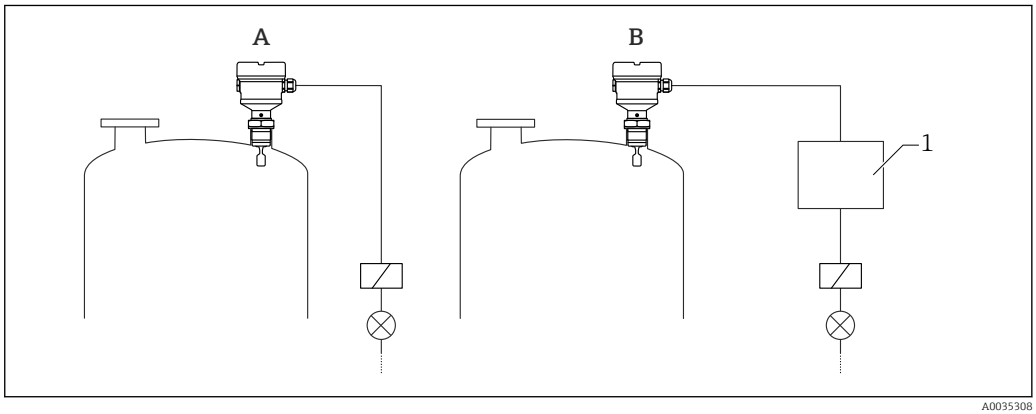
The level switch differentiates between the "covered" and "not covered" conditions.

Depending on the MIN (minimum detection) or MAX (maximum detection) modes, there are two possibilities in each case: OK status and demand mode.

OK status
- In MIN mode, the vibrating fork is covered, e.g. pump dry-run protection
- In MAX mode, the vibrating fork is not covered, e.g. overfill protection

Demand mode
- In MIN mode, the vibrating fork is not covered, e.g. pump dry-run protection
- In MAX mode, the vibrating fork is covered, e.g. overfill protection system

Measuring system



1 Example of a measuring system

A Device for direct connection of a load
B Device for connection to a separate switching unit or PLC
1 Switching unit, PLC etc.

Reliability

Device-specific IT security

The device settings and the diagnostic data can be read out via Bluetooth® wireless technology. Device settings cannot be changed via Bluetooth® wireless technology.

Input

Measured variable

The point level signal is triggered according to the operating mode (minimum or maximum detection) when the level exceeds or falls below the relevant point level.

Measuring range

Depends on the installation location and the pipe extension ordered
Maximum sensor length 3 m (9.8 ft)

Output

Output and input variants

Electronic inserts

2-wire AC (FEL61)
- Two-wire alternating current version
- Switches the load directly in the power supply circuit via an electronic switch

3-wire DC PNP (FEL62)
- Three-wire direct current version
- Switches the load via the transistor (PNP) and separate connection, e.g. in conjunction with programmable logical controllers (PLC)
- Ambient temperature −60 °C (−76 °F), optionally available to order
  Low-temperature electronic inserts are marked LT

Universal current connection, relay output (FEL64)
- Switches the loads via two potential-free change-over contacts
- Ambient temperature −60 °C (−76 °F), optionally available to order
  Low-temperature electronic inserts are marked LT

Direct current connection, relay output (FEL64DC)
- Switches the load via two potential-free change-over contacts
- Ambient temperature −60 °C (−76 °F), optionally available to order
  Low-temperature electronic inserts are marked LT

PFM output (FEL67)
- For separate switching unit (Nivotester FTL325P, FTL375P)
- PFM signal transmission; current pulses are superimposed on the power supply along the two-wire cabling
- Ambient temperature −50 °C (−58 °F), optionally available to order
  The low-temperature electronic inserts are marked LT

2-wire NAMUR > 2.2 mA/< 1.0 mA (FEL68)
- For separate switching unit, e.g. Nivotester FTL325N
- Signal transmission H-L edge 2.2 to 3.8/0.4 to 1.0 mA as per IEC 60917-5-6 (NAMUR) on two-wire cable
- Ambient temperature −50 °C (−58 °F), optionally available to order
  Low-temperature electronic inserts are marked LT

Output signal

Switching output

Preset switching delay times can be ordered:
- 0.5 s when the vibrating fork is covered and 1.0 s when it is uncovered (factory setting)
- 0.25 s when the vibrating fork is covered and 0.25 s when it is uncovered
- 1.5 s when the vibrating fork is covered and 1.5 s when it is uncovered
- 5.0 s when the vibrating fork is covered and 5.0 s when it is uncovered

COM interface

For connecting to modules VU120 or VU121 (no modifying effect)

Bluetooth® wireless technology (optional)

The device has a Bluetooth® interface. Device data and diagnostic data can be read out using the free SmartBlue app.

Ex connection data

See safety instructions (XA): All data relating to explosion protection are provided in separate Ex documentation and are available from the Downloads area of the Endress+Hauser website. The Ex documentation is supplied as standard with all devices approved for use in explosion hazardous areas.

2-wire AC (electronic insert FEL61)

- Two-wire alternating current version
- Switches the load directly in the power supply circuit via an electronic switch; always connect in series with a load
- Functional testing without level change
  A functional test can be performed on the device using the test button on the electronic insert.

Supply voltage

U = 19 to 253 V_{AC}, 50 Hz/60 Hz

Residual voltage when switched through: typically 12 V

Observe the following as per IEC/EN61010-1: Provide a suitable circuit breaker for the device, and limit the current to 1 A, e.g. by installing a 1 A fuse (slow-blow) in the phase (not the neutral conductor) of the supply circuit.

Power consumption

S ≤ 2 VA

Current consumption

Residual current when blocked: I ≤ 3.8 mA

The red LED flashes in the event of an overload or short-circuit. Check for an overload or short-circuit every 5 s. The test is deactivated after 60 s.

Load

- Load with a minimum holding power/rated power of 2.5 VA at 253 V (10 mA) or 0.5 VA at 24 V (20 mA)
- Load with a maximum holding power/rated power of 89 VA at 253 V (350 mA) or 8.4 VA at 24 V (350 mA)
- With overload and short-circuit protection

Behavior of output signal

- OK status: Load on (switched through)
- Demand mode: Load off (blocked)
- Alarm: Load off (blocked)

Terminals

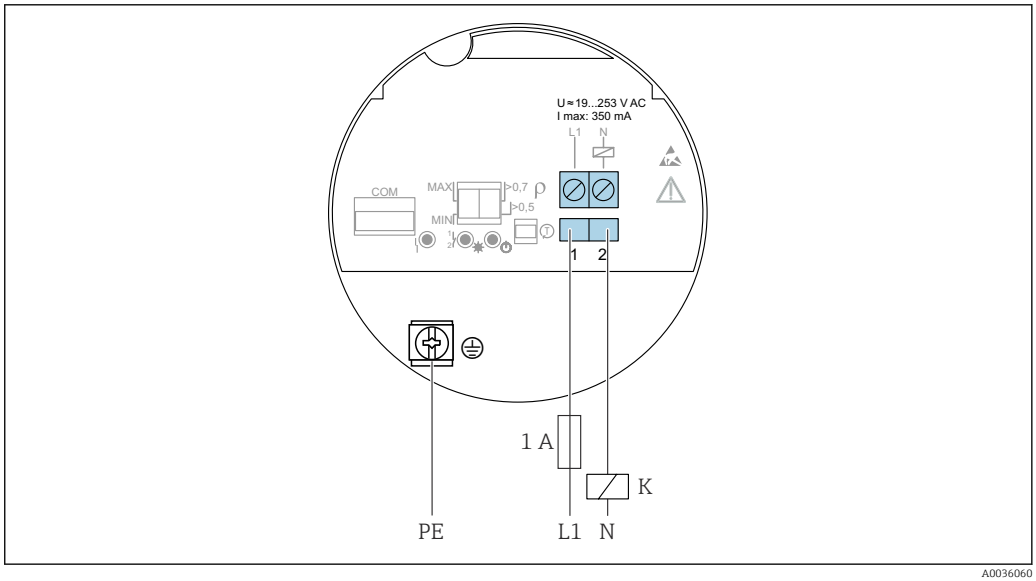
Terminals for cable cross-section up to 2.5 mm^2 (14 AWG). Use ferrules for the wires.

Overvoltage protection

Overvoltage category II

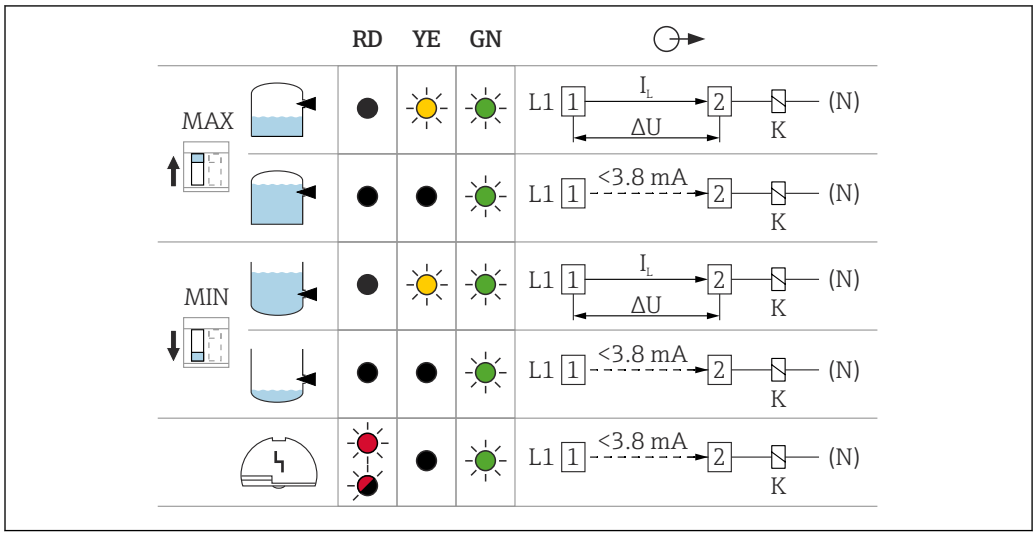
Terminal assignment

Always connect an external load. The electronic insert has integrated short-circuit protection.



2 *2-wire AC, electronic insert FEL61*

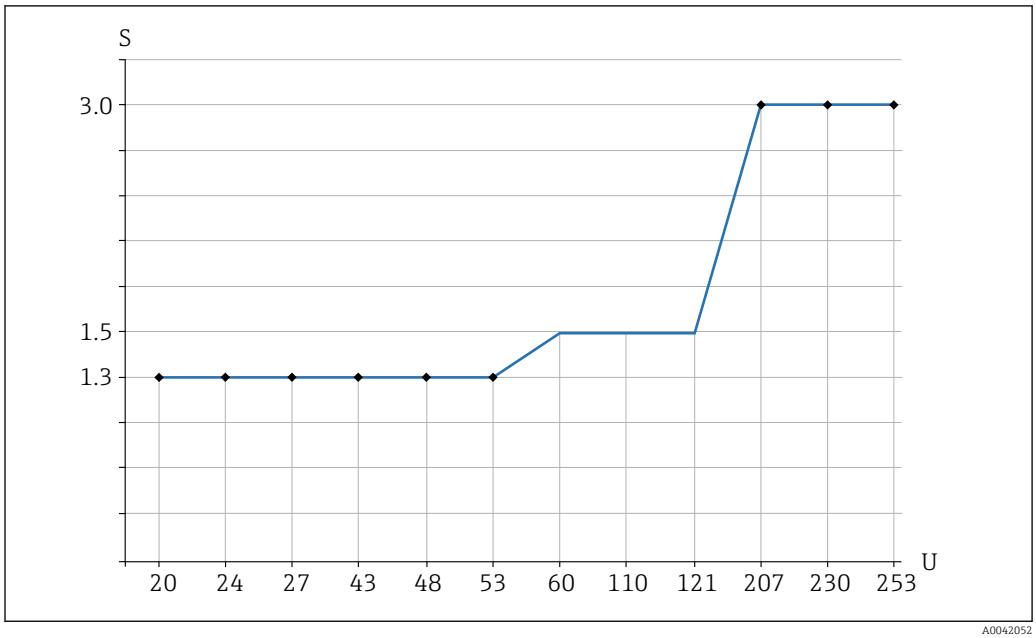
Behavior of switch output and signaling



3 *Behavior of switch output and signaling, electronic insert FEL61*

MAX DIP switch for setting MAX safety mode
MIN DIP switch for setting MIN safety mode
RD LED red for warning or alarm
YE LED yellow, switch status
GN LED green, operational status, device on
I_L Load current switched through

Selection tool for relays



4 *Recommended minimum holding power/rated power for load*

S Holding power/rated power in [VA]
U Operating voltage in [V]

AC mode

- Operating voltage: 24 V, 50 Hz/60 Hz
- Holding power/rated power: > 0.5 VA, < 8.4 VA
- Operating voltage: 110 V, 50 Hz/60 Hz
- Holding power/rated power: > 1.1 VA, < 38.5 VA
- Operating voltage: 230 V, 50 Hz/60 Hz
- Holding power/rated power: > 2.3 VA, < 80.5 VA

3-wire DC PNP (electronic insert FEL62)

- Three-wire direct current version
- Preferably in conjunction with programmable logic controllers (PLC), DI modules as per EN 61131-2. Positive signal at switching output of electronics module (PNP)
- Functional testing without level change
  A functional test can be performed on the device using the test button on the electronic insert or using the test magnet (can be ordered as an option) with the housing closed.

Supply voltage

WARNING

Failure to use the prescribed power supply unit.
Risk of potentially life-threatening electric shock!
- ▶ The FEL62 may only be powered by devices with reliable galvanic isolation in accordance with IEC 61010-1.

$U = 10$ to $55\ V_{DC}$

The device must be powered by a voltage supply categorized as "CLASS 2" or "SELV".

Comply with the following according to IEC 61010-1: Provide a suitable circuit breaker for the device and limit the current to 500 mA, e.g. by installing a 0.5 A fuse (slow-blow) in the power supply circuit.

Power consumption

$P \leq 0.5$ W

Current consumption

$I \leq 10$ mA (without load)

The red LED flashes in the event of an overload or short-circuit. Check for an overload or short-circuit every 5 s.

Load current

$I \leq 350$ mA with overload and short-circuit protection

Capacitance load

$C \leq 0.5$ µF at 55 V, $C \leq 1.0$ µF at 24 V

Residual current

$I < 100$ µA (for blocked transistor)

Residual voltage

$U < 3$ V (for switched through transistor)

Behavior of output signal

- OK status: Switched through
- Demand mode: Blocked
- Alarm: Blocked

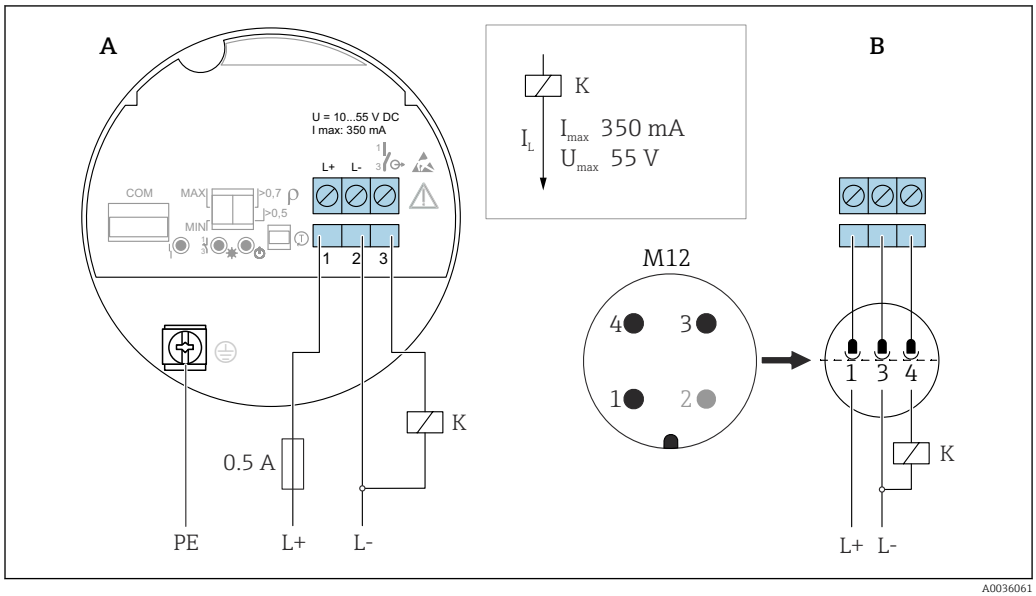
Terminals

Terminals for cable cross-section up to 2.5 mm^2 (14 AWG). Use ferrules for the wires.

Overvoltage protection

Overvoltage category I

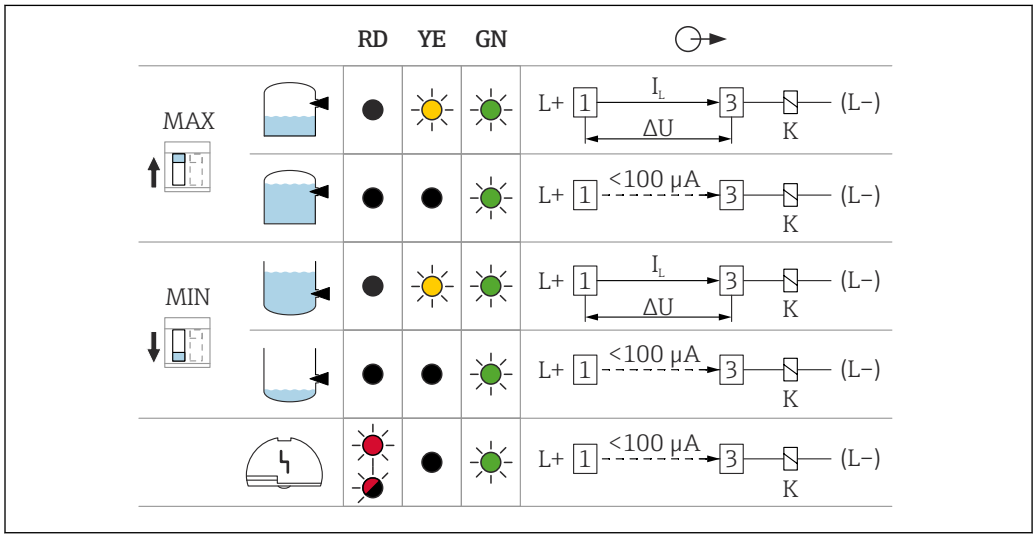
Terminal assignment



5 *3-wire DC-PNP, electronic insert FEL62*

A Connection wiring with terminals
B Connection wiring with M12 plug in housing according to EN61131-2 standard

Behavior of switch output and signaling



6 *Behavior of switch output and signaling, electronic insert FEL62*

MAX DIP switch for setting MAX safety mode
MIN DIP switch for setting MIN safety mode
RD LED red for warning or alarm
YE LED yellow, switch status
GN LED green, operational status, device on
I_L Load current switched through

Universal current connection with relay output (electronic insert FEL64)

- Switches the loads via two potential-free change-over contacts
- Two galvanically isolated change-over contacts (DPDT), both change-over contacts switch simultaneously
- Functional testing without level change. A functional test can be performed on the device using the test button on the electronic insert or using the test magnet (can be ordered as an option) with the housing closed.

⚠ WARNING

An error at the electronic insert can cause the permitted temperature for touch-safe surfaces to be exceeded. This presents a risk of burns.

► Do not touch the electronics in the event of an error!

Supply voltage

U = 19 to 253 V_{AC}, 50 Hz/60 Hz / 19 to 55 V_{DC}

Comply with the following according to IEC 61010-1: Provide a suitable circuit breaker for the device and limit the current to 500 mA, e.g. by installing a 0.5 A fuse (slow-blow) in the power supply circuit.

Power consumption

S < 25 VA, P < 1.3 W

Connectable load

Loads switched via two potential-free change-over contacts (DPDT)

- I_{AC} ≤ 6 A, U~ ≤ AC 253 V; P~ ≤ 1 500 VA, cos φ = 1, P~ ≤ 750 VA, cos φ > 0.7
- I_{DC} ≤ 6 A to DC 30 V, I DC ≤ 0.2 A to 125 V

Additional restrictions for the connectable load depend on the selected approval. Pay attention to the information in the Safety Instructions (XA).

According to IEC 61010, the following applies: Total voltage from relay outputs and auxiliary power supply ≤ 300 V.

Use electronic insert FEL62 DC PNP for small DC load currents, e.g. for connection to a PLC.

Relay contact material: Silver/nickel AgNi 90/10

When connecting a device with high inductance, provide a spark quenching unit to protect the relay contact. A fine-wire fuse (depending on the connected load) protects the relay contact in the event of a short-circuit.

Both relay contacts switch simultaneously.

Behavior of output signal

- OK status: Relay energized
- Demand mode: Relay de-energized
- Alarm: Relay de-energized

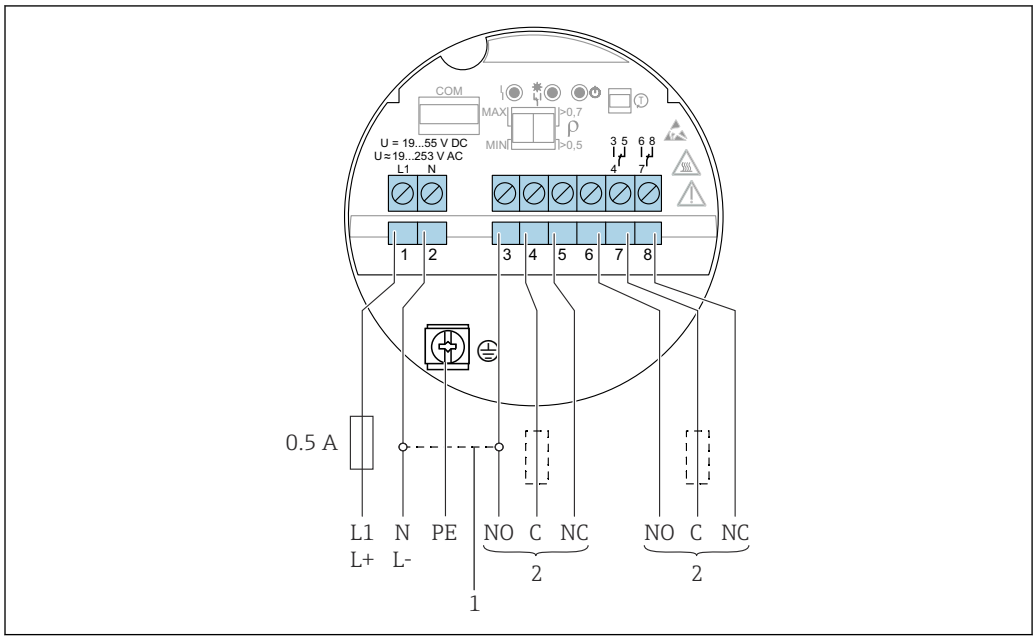
Terminals

Terminals for cable cross-section up to 2.5 mm^2 (14 AWG). Use ferrules for the wires.

Overvoltage protection

Overvoltage category II

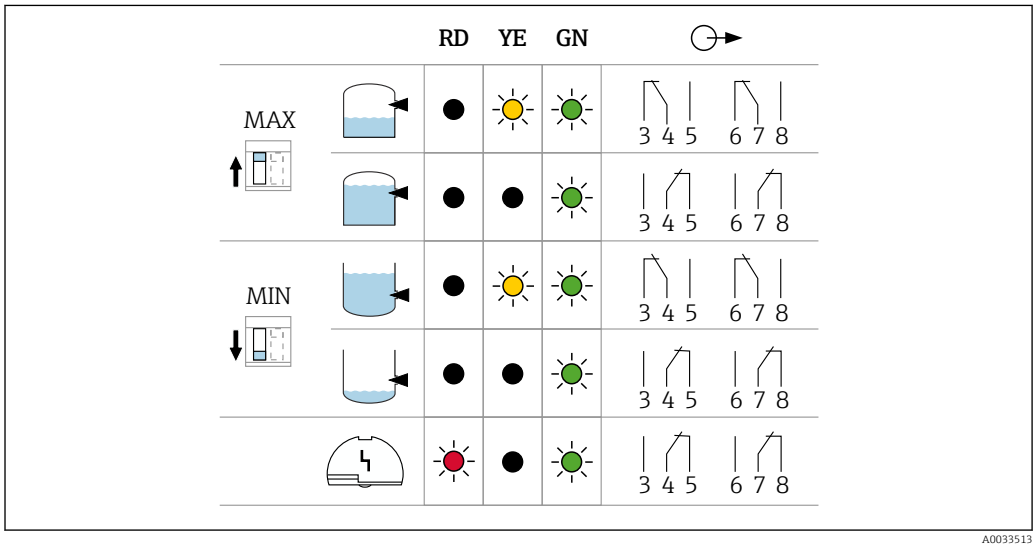
Terminal assignment



7 *Universal current connection with relay output, electronic insert FEL64*

1 When bridged, the relay output works with NPN logic
2 Connectable load

Behavior of switch output and signaling



8 *Behavior of switch output and signaling, electronic insert FEL64*

MAX DIP switch for setting MAX safety mode
MIN DIP switch for setting MIN safety mode
RD LED red for alarm
YE LED yellow, switch status
GN LED green, operational status, device on

Relay output DC connection (electronic insert FEL64 DC)

- Switches the loads via two potential-free change-over contacts
- Two galvanically isolated change-over contacts (DPDT), both change-over contacts switch simultaneously
- Functional testing without level change. A functional test can be performed on the entire device using the test button on the electronic insert or using the test magnet (can be ordered as an option) with the housing closed.

Supply voltage

U = 9 to 20 V_{DC}

The device must be powered by a voltage supply categorized as "CLASS 2" or "SELV".

Comply with the following according to IEC 61010-1: Provide a suitable circuit breaker for the device and limit the current to 500 mA, e.g. by installing a 0.5 A fuse (slow-blow) in the power supply circuit.

Power consumption

P < 1.0 W

Connectable load

Loads switched via two potential-free change-over contacts (DPDT)

- I_{AC} ≤ 6 A, U~ ≤ AC 253 V; P~ ≤ 1 500 VA, cos φ = 1, P~ ≤ 750 VA, cos φ > 0.7
- I_{DC} ≤ 6 A to DC 30 V, I DC ≤ 0.2 A to 125 V

Additional restrictions for the connectable load depend on the selected approval. Pay attention to the information in the Safety Instructions (XA).

According to IEC 61010, the following applies: Total voltage from relay outputs and auxiliary power supply ≤ 300 V

Electronic insert FEL62 DC PNP preferred for small DC load currents, e.g. connection to a PLC.

Relay contact material: Silver/nickel AgNi 90/10

When connecting a device with high inductance, fit a spark quenching unit to protect the relay contact. A fine-wire fuse (depending on the connected load) protects the relay contact in the event of a short-circuit.

Behavior of output signal

- OK status: Relay energized
- Demand mode: Relay de-energized
- Alarm: Relay de-energized

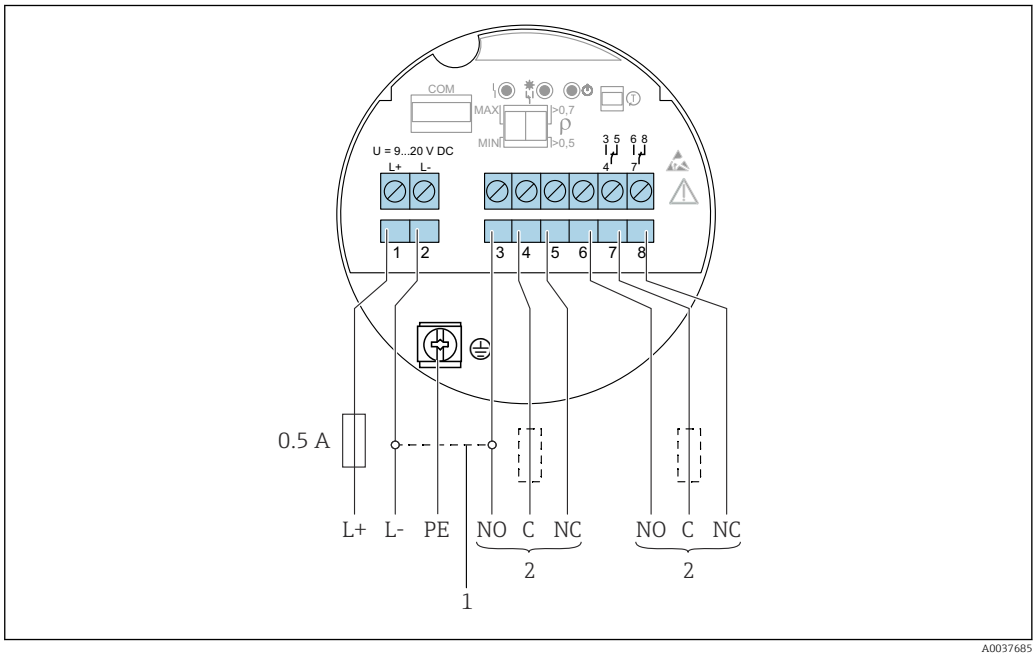
Terminals

Terminals for cable cross-section up to 2.5 mm^2 (14 AWG). Use ferrules for the wires.

Overvoltage protection

Overvoltage category I

Terminal assignment



9 *DC connection with relay output, electronic insert FEL64 DC*

1 *When bridged, the relay output works with NPN logic*
2 *Connectable load*

YE LED yellow, switch status
GN LED green, operational status, device on

PFM output (electronic insert FEL67)

- For connection to Endress+Hauser Nivotester switching units FTL325P and FTL375P
- PFM signal transmission; pulse frequency modulation, superimposed on the power supply along the two-wire cabling
- Functional testing without level change:
  - A functional test can be performed on the device using the test button on the electronic insert.
  - The functional test can also be prompted by disconnecting the supply voltage or triggered directly by the Nivotester FTL325P and FTL375P switching unit.

Supply voltage

$U = 9.5$ to 12.5 V_{DC}

The device must be powered by a voltage supply categorized as "CLASS 2" or "SELV".

Comply with the following according to IEC 61010-1: Provide a suitable circuit breaker for the device.

Power consumption

$P \leq 150$ mW with Nivotester FTL325P or FTL375P

Behavior of output signal

- OK status: MAX mode of operation 150 Hz, MIN mode of operation 50 Hz
- Demand mode: MAX mode of operation 50 Hz, MIN mode of operation 150 Hz
- Alarm: MAX/MIN mode of operation 0 Hz

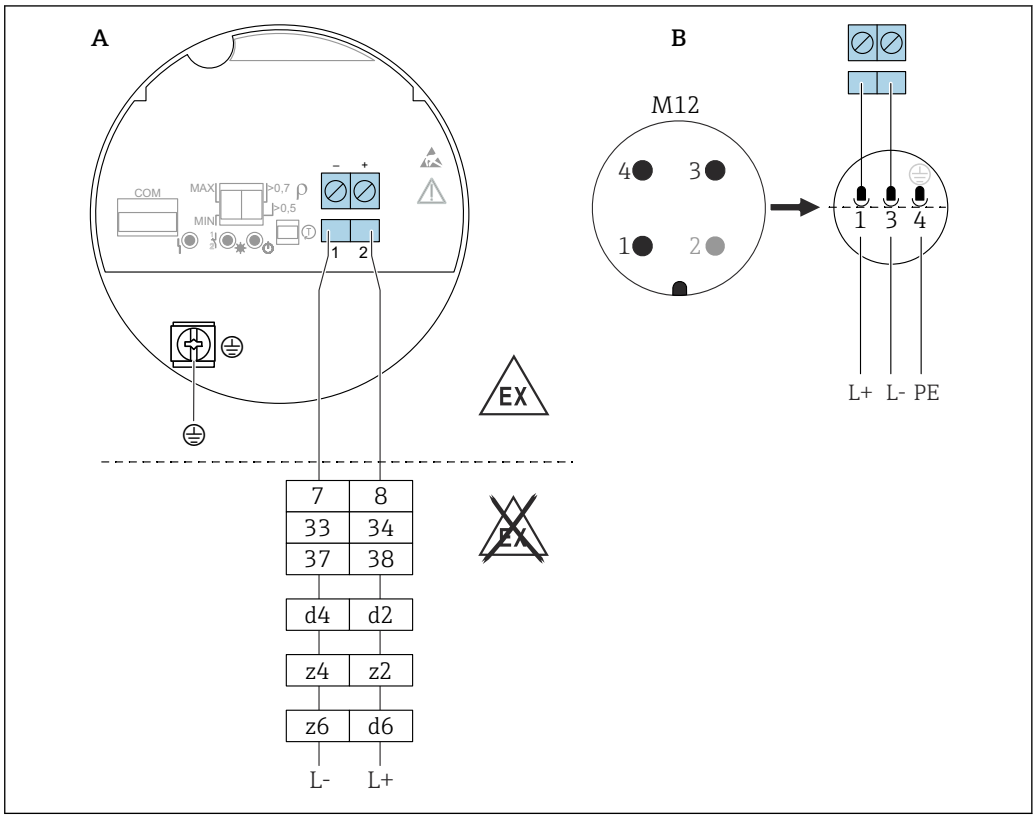
Terminals

Terminals for cable cross-section up to 2.5 mm^2 (14 AWG). Use ferrules for the wires.

Overvoltage protection

Overvoltage category I

Terminal assignment



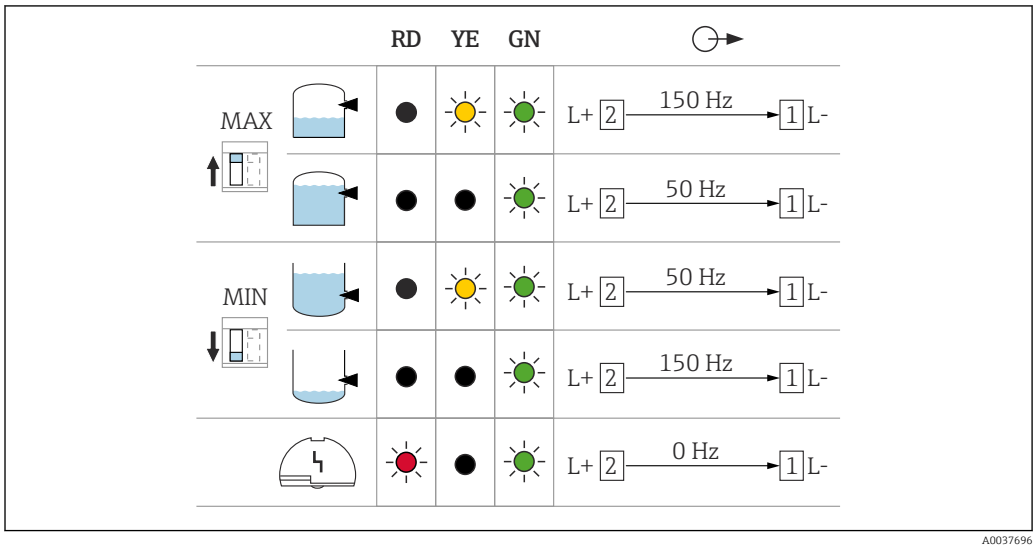
11 *PFM output, electronic insert FEL67*

A Connection wiring with terminals
B Connection wiring with M12 plug in housing according to EN61131-2 standard
7/ 8: Nivotester FTL325P 1 CH, FTL325P 3 CH input 1
33/ 34: Nivotester FTL325P 3 CH input 2
37/ 38: Nivotester FTL325P 3 CH input 3
d4/ d2: Nivotester FTL375P input 1
z4/ z2: Nivotester FTL375P input 2
z6/ d6: Nivotester FTL375P input 3

Connection cable

- Maximum cable resistance: 25 Ω per core
- Maximum cable capacitance: < 100 nF
- Maximum cable length: 1000 m (3281 ft)

Behavior of switch output and signaling



12 *Switching behavior and signaling, electronic insert FEL67*

MAX DIP switch for setting MAX safety mode
MIN DIP switch for setting MIN safety mode
RD LED red for alarm
YE LED yellow, switch status
GN LED green, operational status, device on

The switches for MAX/MIN on the electronic insert and the FTL325P switching unit must be set according to the application. Only then is it possible to perform the functional test correctly.

2-wire NAMUR > 2.2 mA/< 1.0 mA (electronic insert FEL68)

- To connect to isolating amplifiers according to NAMUR (IEC 60947-5-6), e.g. Nivotester FTL325N from Endress+Hauser
- To connect to isolating amplifiers of third-party suppliers according to NAMUR (IEC 60947-5-6), a permanent power supply for electronic insert FEL68 must be ensured
- Signal transmission H-L edge 2.2 to 3.8 mA/0.4 to 1.0 mA according to NAMUR (IEC 60947-5-6) on two-wire cabling
- Functional testing without level change. A functional test can be performed on the device using the test button on the electronic insert or using the test magnet (can be ordered as an option) with the housing closed.
  The functional test can also be triggered by interrupting the supply voltage or activated directly from the Nivotester FTL325N.

Supply voltage

$U = 8.2\ V_{DC} \pm 20\%$

The device must be powered by a voltage supply categorized as "CLASS 2" or "SELV".

Comply with the following according to IEC 61010-1: Provide a suitable circuit breaker for the device.

Power consumption

NAMUR IEC 60947-5-6

< 6 mW with I < 1 mA; < 38 mW with I = 3.5 mA

Connection data interface

NAMUR IEC 60947-5-6

Behavior of output signal

- OK status: Output current 2.2 to 3.8 mA
- Demand mode: Output current 0.4 to 1.0 mA
- Alarm: Output current < 1.0 mA

Terminals

Terminals for cable cross-section up to 2.5 mm² (14 AWG). Use ferrules for the wires.

Overvoltage protection

Overvoltage category I

Electronic insert FEL68 with Bluetooth module

The Bluetooth module for use in conjunction with the electronic insert FEL68 (2-wire NAMUR) must be ordered separately with the necessary battery.

The following versions can be optionally selected in the Product Configurator:
Application package: Heartbeat Verification + Monitoring for NAMUR output
Accessory mounted: Bluetooth for NAMUR output

The order number of the **Bluetooth module, including the required battery,** are subsequently displayed in the Product Configurator.

LED module VU120 (optional)

Supply voltage

U = 12 to 55 V_{DC},

U = 19 to 253 V_{AC}, 50 Hz/60 Hz

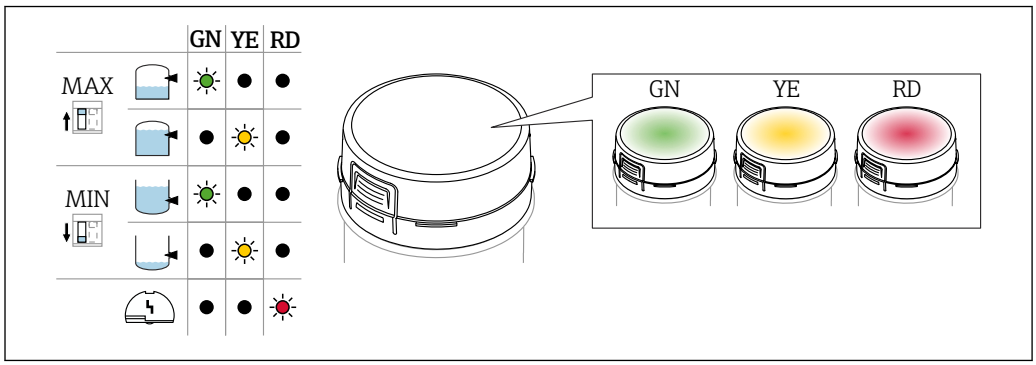
Power consumption

P ≤ 0.7 W, S < 6 VA

Current consumption

I_{max} = 0.4 A

Signaling of operational status



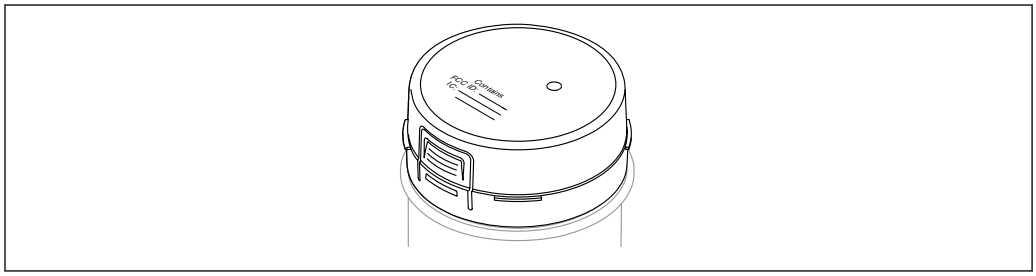
15 *LED module, the LED lights up in green (GN), yellow (YE) or red (RD)*

A brightly lit LED indicates the operational status (switch status or alarm status). The LED module can be connected to the following electronic inserts: FEL62, FEL64, FEL64DC.

See the accompanying Operating Instructions for more detailed information on connection and the switching states. Documentation currently available on the Endress+Hauser- website: www.endress.com → Downloads.

Bluetooth® module and Heartbeat Technology

Bluetooth® module VU121 (optional)



16 *Bluetooth® module VU121*

- The Bluetooth® module can be connected via the COM interface to the following electronic inserts: FEL61, FEL62, FEL64, FEL64 DC, FEL67, FEL68 (2-wire NAMUR).
- The Bluetooth® module is only available in conjunction with the Heartbeat Verification + Monitoring application package.
- The Bluetooth® module with battery is suitable for use in hazardous areas.
- In conjunction with electronic insert FEL68 (2-wire NAMUR), the Bluetooth® module must be ordered separately with the required battery.
- The yellow LED on electronic insert FEL68 is disabled if the Bluetooth® module is connected.

For additional information about the connection, see the Operating Instructions for the device. Documentation currently available on the Endress+Hauser- website: www.endress.com → Downloads.

Batteries – use and handling

For energy-related reasons, Bluetooth® module VU121 requires a special battery when operated with electronics insert FEL68 (2-wire NAMUR).

The battery is categorized as dangerous goods when transported by air and must not be installed in the device when shipped.

Replacement batteries can be purchased from a specialist retailer.

Replacement batteries

Only the following types of AA 3.6 V lithium batteries made by the manufacturers listed below are suitable as replacement batteries:
- SAFT LS14500
- TADIRAN SL-360/s
- XENOENERGY XL-060F

Isolation lug in battery compartment

NOTICE

Premature discharge of the battery due to removing the isolation lug
Removing the isolation lug from the battery compartment of the Bluetooth® module will cause the battery to be discharged prematurely, regardless of the sensor power supply.
- ▶ The isolation lug must remain in the battery compartment of the Bluetooth® module for as long as the sensors are in storage.

Operating life

- If the batteries are discharged, a Bluetooth® connection is no longer possible
- At ambient temperatures from +10 to +40 °C (+50 to +104 °F), the service life of the Bluetooth® module without replacing the battery is at least five years with a maximum of 60 downloads of complete datasets.
  Requirement: The sensor is 99% in the OK status (demand mode requires increased power consumption)
  The battery life is based on a scenario where the sensor is connected and powered.

Replacing the battery

- ▶ Before replacing the battery, the Bluetooth® module must be disconnected from electronic insert FEL68.
  - ↳ Only then will the battery status display be detected correctly.

Approvals

The Bluetooth® module is approved for use with the following types of protection for devices: Ex i, Ex d, Ex e or Ex t. The temperature class of the device is limited to T4 to T1 if the Bluetooth® module is used with the Ex i/IS type of protection in conjunction with electronic insert FEL68 (2-wire NAMUR) and the required battery in the Bluetooth® module.

Additional technical data

- Free-field range: 50 m (165 ft) max.
- Operation radius with intervisibility around the device: 10 m (33 ft)

For documentation on radio approvals, see the Endress+Hauser website: www.endress.com → Downloads.

Heartbeat Technology

Heartbeat Technology modules

Heartbeat Technology comprises 3 modules. These three modules combined check, evaluate and monitor device functionality and process conditions.

- Heartbeat Diagnostics
- Heartbeat Verification
- Heartbeat Monitoring

Performance characteristics

Reference operating conditions

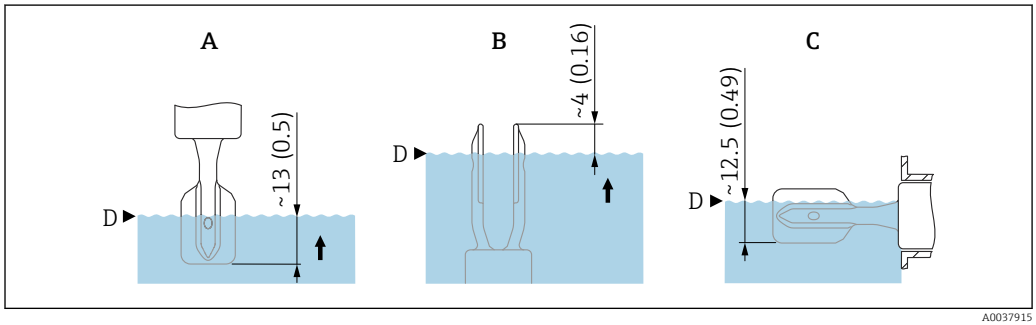
- As per IEC 62828-2
- Ambient temperature: +23 °C (+73 °F)
- Process temperature: +23 °C (+73 °F)
- Humidity φ = constant, in the range: 5 to 80% rF ± 5%
- Medium density (water): 1 g/cm³ (62.4 lb/ft³)
- Medium viscosity: 1 mPa·s
- Atmospheric pressure p_A = constant, in the range: 860 to 1060 mbar (12.47 to 15.37 psi)
- Process pressure: Atmospheric pressure/unpressurized
- Sensor installation: Vertically and from above
- Density selection switch: > 0.7 g/cm³ (43.7 lb/ft³)
- Switch direction of sensor: Uncovered to covered
- Supply voltage: DC 24 V ±3 V

Take switch point into consideration

The following are typical switch points, depending on the orientation of the level switch.

Water +23 °C (+73 °F)

Minimum distance between the tuning fork and the tank wall or pipe wall: 10 mm (0.39 in)



17 *Typical switch points. Unit of measurement mm (in)*

A Installation from above
B Installation from below
C Installation from the side
D Switch point

Maximum measurement error

At reference operating conditions: max. ± 1 mm (0.04 in) at switch point

Hysteresis

Typically 2.5 mm (0.1 in)

Non-repeatability

0.5 mm (0.02 in)

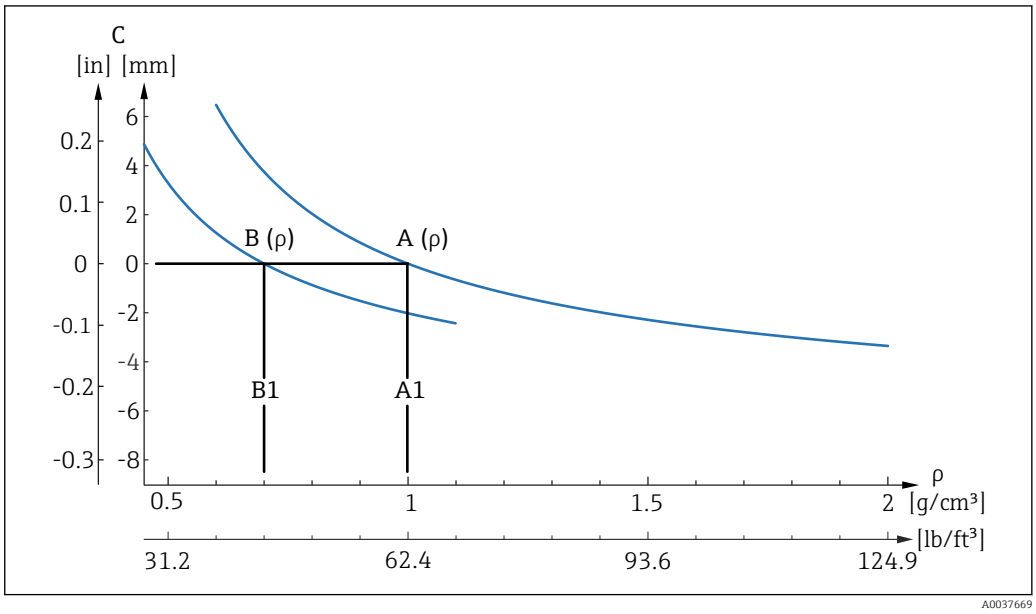
Influence of the process temperature

The switch point moves from +1.4 to −2.6 mm (+0.06 to −0.1 in) in the temperature range of −50 to +150 °C (−58 to +302 °F)

Influence of the process pressure

The switch point moves from 0 to 2.6 mm (0 to 0.1 in) in the pressure range of −1 to +64 bar (−14.5 to +928 psi)

Influence of the density of the process medium (at room temperature and normal pressure)



18 *Switch point deviation over density, 316L*

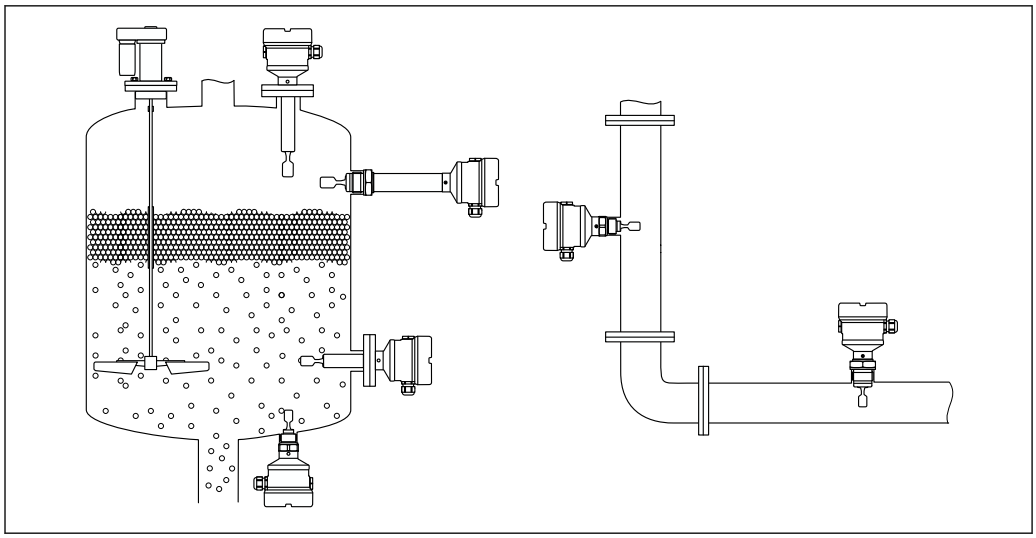
A *Density switch setting (ρ) > 0.7 g/cm³ (43.7 lb/ft³)*
A1 *Reference operating condition ρ = 1 g/cm³ (62.4 lb/ft³)*
B *Density switch setting (ρ) > 0.5 g/cm³ (31.2 lb/ft³)*
B1 *Reference operating condition ρ = 0.7 g/cm³ (43.7 lb/ft³)*
C *Switch point deviation*

Density setting
- $TC_{typ.}$, [mm/10 k]
  - ρ > 0.7 g/cm³ (43.7 lb/ft³): −0.2
  - ρ > 0.5 g/cm³ (31.2 lb/ft³): −0.2
- $Pressure_{typ.}$, [mm/10 bar]
  - ρ > 0.7 g/cm³ (43.7 lb/ft³): −0.3
  - ρ > 0.5 g/cm³ (31.2 lb/ft³): −0.4

Installation

Mounting location, orientation

Mounting instructions
- Any orientation for compact version or version with a pipe length of up to 500 mm (19.7 in)approx.
- Vertical orientation from above for device with long pipe
- Minimum distance between the tuning fork and the tank wall or pipe wall: 10 mm (0.39 in)



A0037879

19 *Installation examples for a vessel, tank or pipe*

Installation instructions

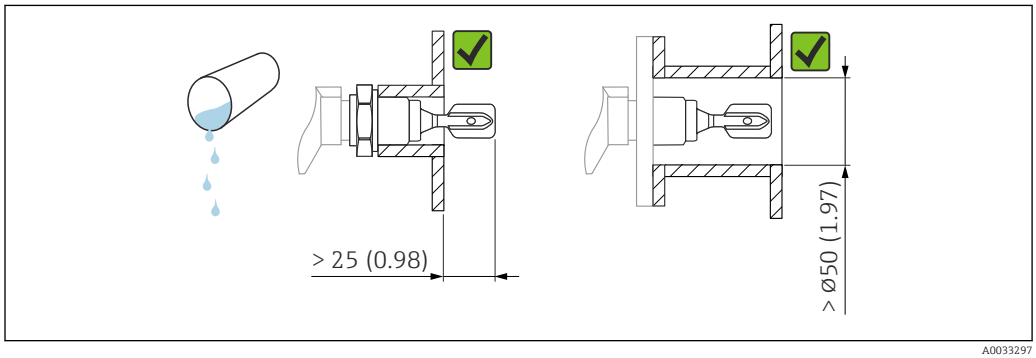
Take viscosity into consideration

Viscosity values
- Low viscosity : < 2 000 mPa·s
- High viscosity: > 2 000 to 10 000 mPa·s

Low viscosity

Low viscosity, e.g. water: < 2 000 mPa·s

It is permitted to position the tuning fork within the installation socket.



A0033297

20 *Installation example for low-viscosity liquids. Unit of measurement mm (in)*

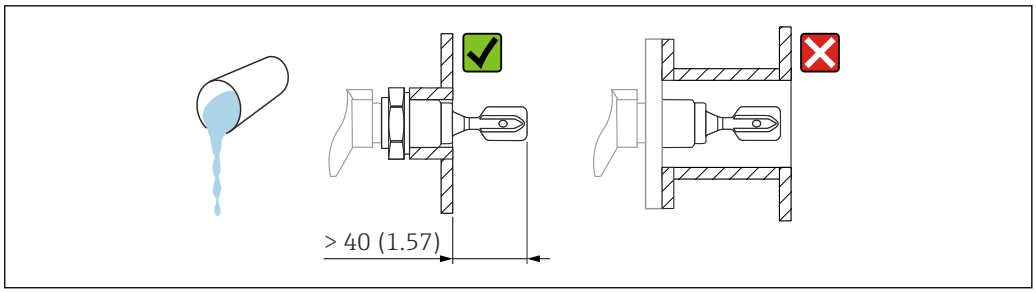
High viscosity

NOTICE

Highly viscous liquids may cause switching delays.
- ▶ Make sure that the liquid can run off the tuning fork easily.
- ▶ Deburr the socket surface.

High viscosity, e.g. viscous oils: ≤ 10 000 mPa·s

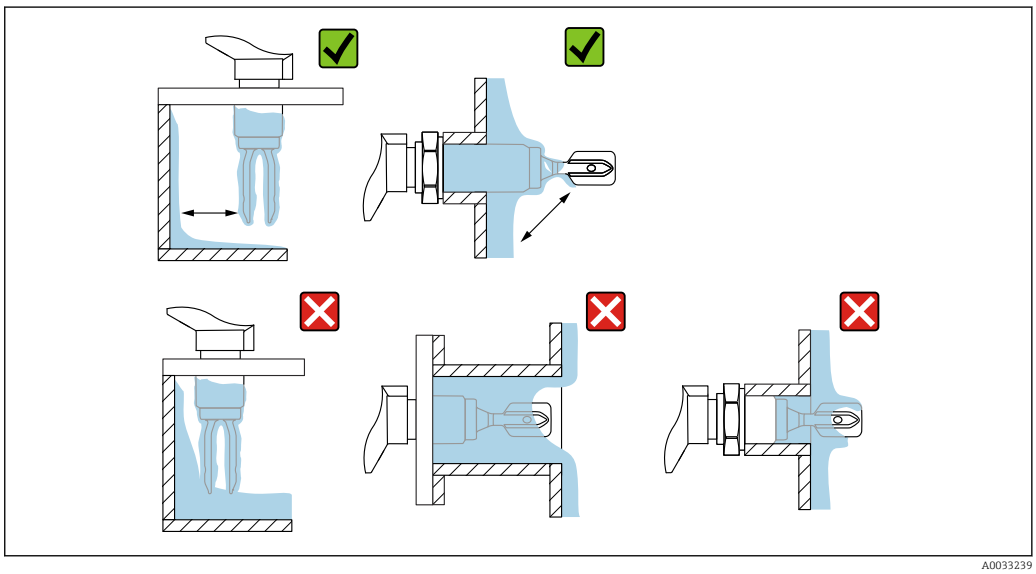
The tuning fork must be located outside the installation socket!



21 *Installation example for a highly viscous liquid. Unit of measurement mm (in)*

Avoid buildup

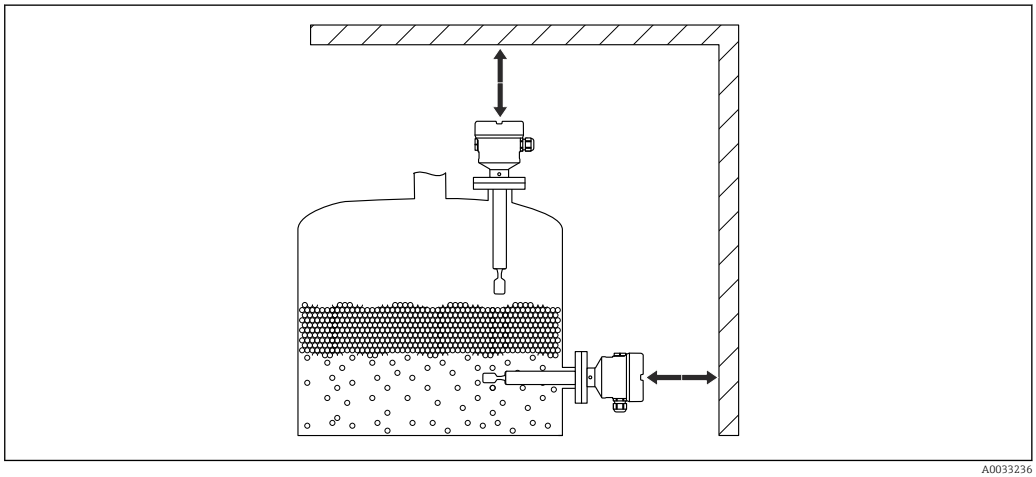
- Use short installation sockets to ensure that the tuning fork projects freely into the vessel
- Leave sufficient distance between the buildup expected on the tank wall and the tuning fork



22 *Installation examples for a highly viscous process medium*

Take clearance into consideration

Allow sufficient space outside the tank for mounting, connection and settings involving the electronic insert.



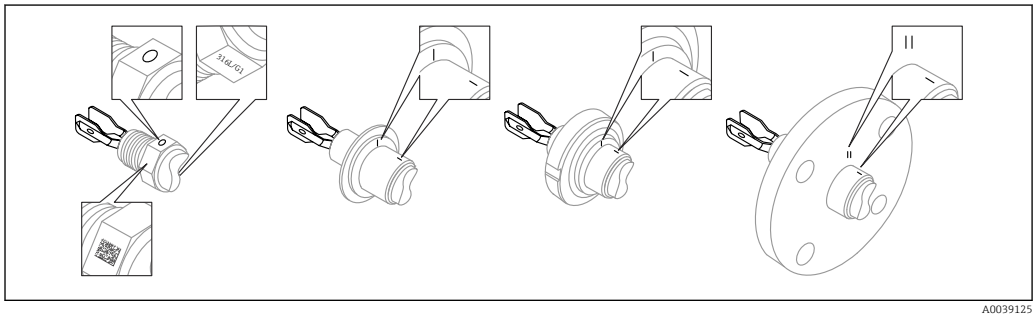
23 *Take clearance into consideration*

Align the vibrating fork using the marking

The vibrating fork can be aligned using the marking in such a way that the medium drains off easily and buildup is avoided.

- Markings for threaded connections: Circle (material specification/thread designation opposite)
- Markings for flange or clamp connections: Line or double line

In addition, the threaded connections have a matrix code that is **not** used for alignment.

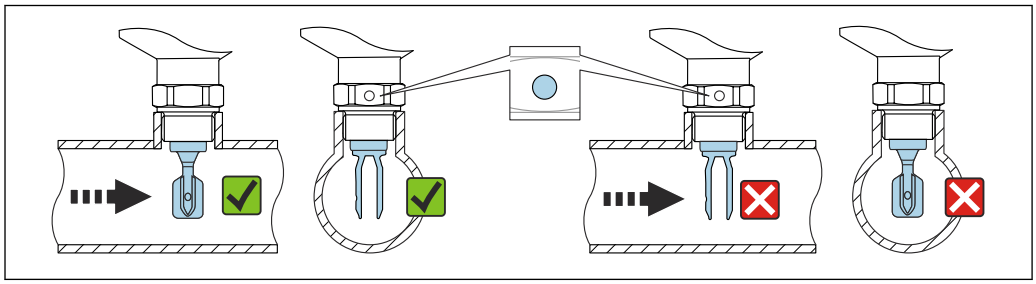


A0039125

24 *Position of the vibrating fork when installed horizontally in the vessel using the marking*

Installing the device in piping

- Flow velocity up to 5 m/s with a viscosity of 1 mPa·s and density of 1 g/cm³ (62.4 lb/ft³) (SGU). Check for correct functioning in the event of other process medium conditions.
- The flow will not be significantly impeded if the tuning fork is correctly aligned and the marking is pointing in the direction of flow.
- The marking is visible when installed.



A0034851

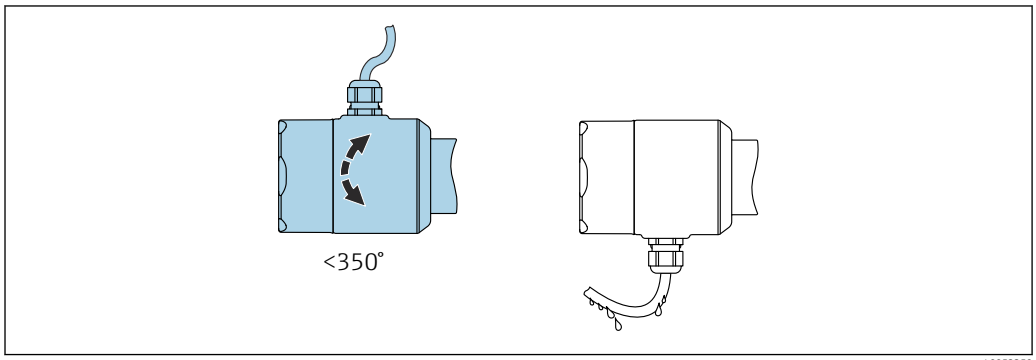
25 *Installation in pipes (take fork position and marking into consideration)*

Aligning the cable entry

All housings can be aligned. Forming a drip loop on the cable prevents moisture from entering the housing.

Housing without set screw

The device housing can be rotated up to 350°.

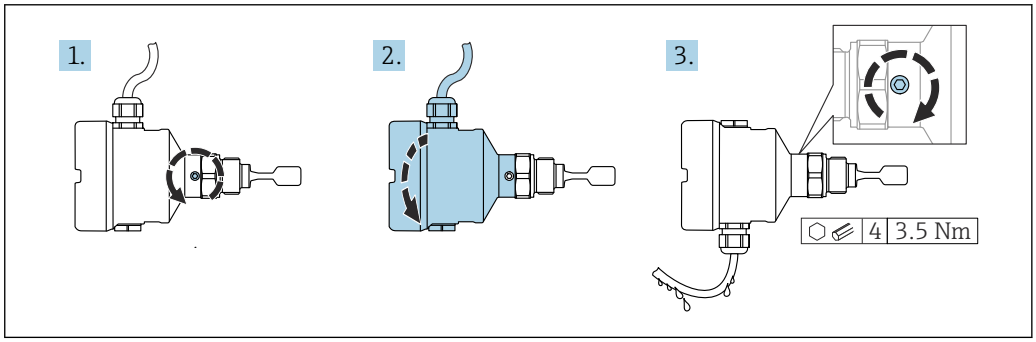


A0052359

26 *Housing without set screw; form a drip loop on the cable.*

Housing with set screw

In the case of housings with locking screw:
- The housing can be turned and the cable aligned by loosening the locking screw. A cable loop for draining prevents moisture in the housing.
- The locking screw is not tightened when the device is delivered.

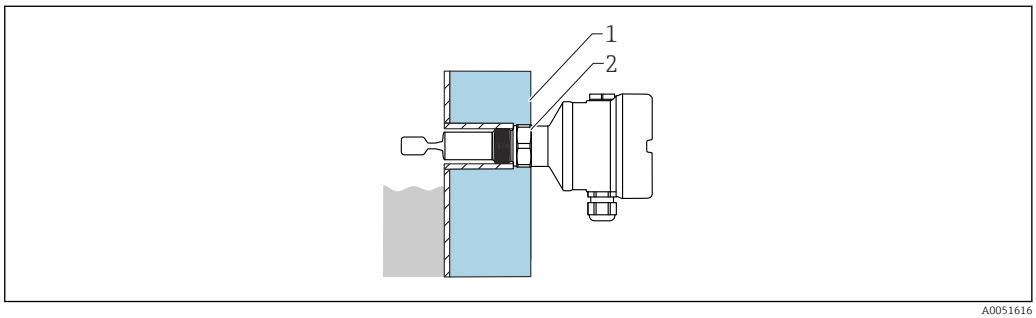


27 *Housing with external set screw; form a drip loop on the cable*

Special installation instructions

Vessel with heat insulation

If process temperatures are high, the device should be included in the vessel insulation system to prevent the electronics from heating as a result of thermal radiation or convection. The insulation in this case should not be higher than the neck of the device.

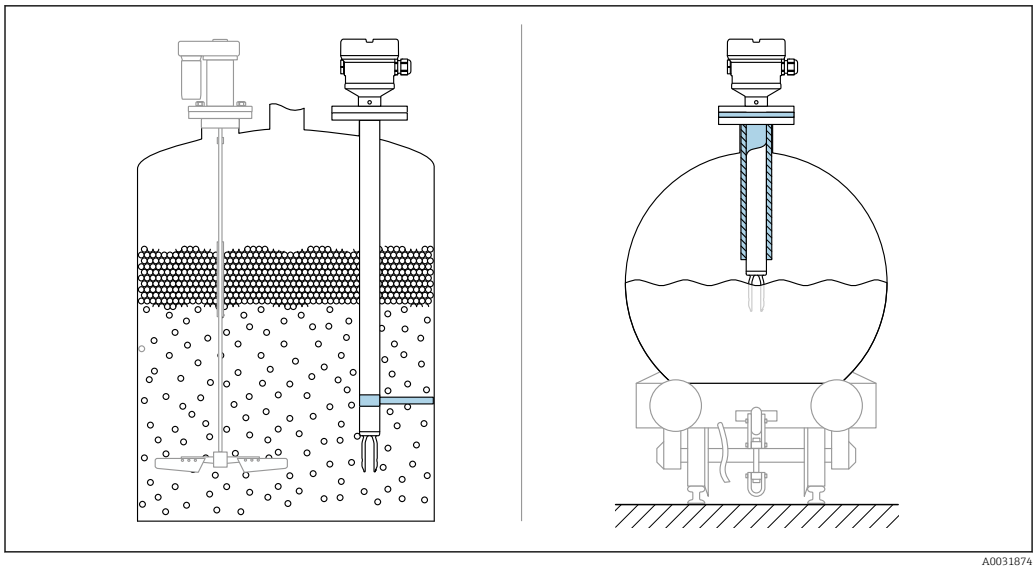


28 *Example of a vessel with heat insulation*

1 *Vessel insulation*
2 *Insulation (up to the housing neck max.)*

Support the device

Support the device in the event of severe dynamic load. Maximum lateral loading capacity of the pipe extensions and sensors: 75 Nm (55 lbf ft).

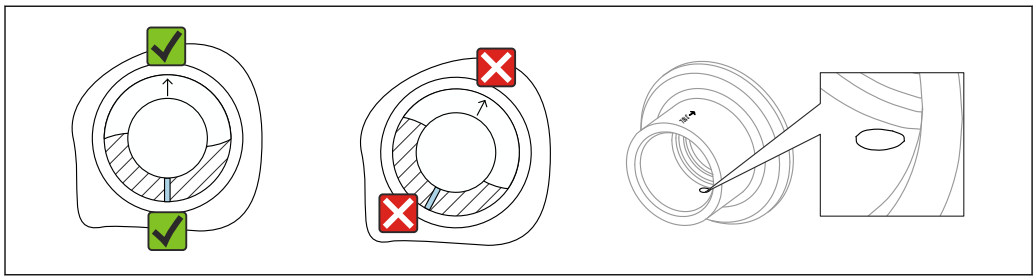


A0031874

29 Examples of support in the event of dynamic load

Weld-in adapter with leakage hole

Position the weld-in adapter so that the leakage hole points downwards. This allows any leakage to be detected at an early stage, as the escaping medium becomes visible.



A0039230

30 Weld-in adapter with leakage hole

Environment

Ambient temperature range

WARNING

Permitted connection voltage exceeded!

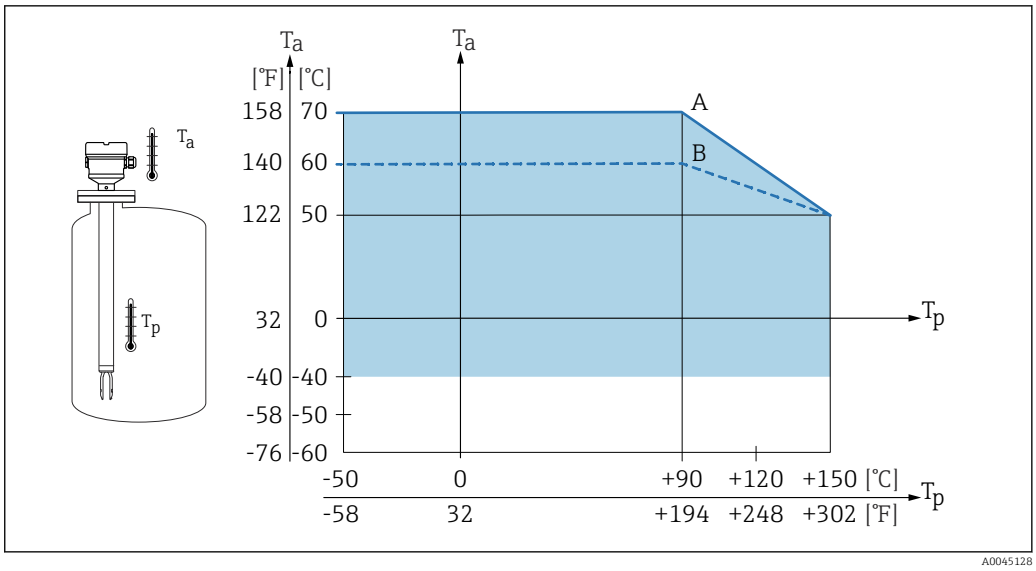
- ▶ For electrical safety reasons, the maximum connection voltage for all electronic inserts at ambient temperatures below −40 °C (−40 °F) is limited to a maximum of 35 V DC.

−40 to +70 °C (−40 to +158 °F)

Optionally available to order:
- −50 °C (−58 °F) with restricted operating life and performance
- −60 °C (−76 °F) with restricted operating life and performance

Below −50 °C (−58 °F): Devices can be permanently damaged

The minimum permitted ambient temperature of the plastic housing is limited to −20 °C (−4 °F); 'indoor use' applies to North America.



31 *Permitted ambient temperature T_a at the housing as a function of the process temperature T_p in the vessel:*

A Device without LED module
B Device with LED module

For devices with a temperature spacer, the following ambient temperatures apply across the entire process temperature range:
A: 70 °C (158 °F)
B: 60 °C (140 °F)

Maximum current carrying capacity with FEL64

- Without LED module:
  - For FEL64 with hygienic housing
    T_p < 90 °C: Max. load current 4 A; Tp > 90 °C; max. load current 2 A
  - For FEL64 and all other housings
    T_p < 90 °C: Max. load current 6 A; Tp > 90 °C; max. load current 4 A
- With LED module:
  - For FEL64 with hygienic housing
    T_p < 90 °C: Max. load current 4 A; Tp > 90 °C; max. load current 2 A
  - For FEL64 and all other housings
    T_p < 90 °C: Max. load current 6 A; Tp > 90 °C; max. load current 2 A

- Low temperatures are not possible for SIL
- Bluetooth® module:
  - −50 °C (−58 °F) for non-Ex, Ex ia and Ex d
  - −60 °C (−76 °F) for non-Ex
- LED module:
  - −50 °C (−58 °F) for non-Ex, Ex ia and Ex d
  - −60 °C (−76 °F) for non-Ex

Outdoor operation in strong sunlight:
- Mount the device in a shaded location
- Avoid direct sunlight, particularly in warmer climatic regions
- Use a protective cover, which can be ordered as an accessory

Hazardous area

In the hazardous area, the permitted ambient temperature can be limited depending on the zones and gas groups. Pay attention to the information in the Ex documentation (XA).

Storage temperature	−40 to +80 °C (−40 to +176 °F) Optional: −50 °C (−58 °F), −60 °C (−76 °F)
Humidity	Operation up to 100 %. Do not open in a condensing atmosphere.

Operating altitude

As per IEC 61010-1 Ed.3:
- Up to 2 000 m (6 600 ft) above sea level
- Can be extended to 3 000 m (9 800 ft) above sea level if overvoltage protection is used

Climate class

As per IEC 60068-2-38 test Z/AD

Degree of protection

Testing according to IEC 60529 and NEMA 250

IP68 test condition: 1.83 m H_2O for 24 h

Housing
See cable entries

Cable entries
- M20 coupling, plastic, IP66/68 NEMA Type 4X/6P
- M20 coupling, nickel-plated brass, IP66/68 NEMA Type 4X/6P
- M20 coupling, 316L, IP66/68 NEMA Type 4X/6P
- M20 coupling, 316L, hygienic, IP66/68/69 NEMA Type 4X/6P
- M20 thread, IP66/68 NEMA Type 4X/6P
- G ½ thread, NPT ½, NPT ¾ IP66/68 NEMA Type 4X/6P

Degree of protection for M12 plug
- When housing is closed and connection cable is plugged in: IP66/67 NEMA Type 4X
- When housing is open or connection cable is not plugged in: IP20, NEMA Type 1

NOTICE

M12 plug: Loss of IP protection class due to incorrect installation!
- ▶ The degree of protection only applies if the connecting cable used is plugged in and screwed tight.
- ▶ The degree of protection only applies if the connecting cable used is specified according to IP67 NEMA Type 4X.

If the "M12 plug" option is selected as the electrical connection, **IP66/67 NEMA Type 4X** applies for all housing types.

Vibration resistance

As per IEC 60068-2-64-2008
a(RMS) = 50 m/s^2, f = 5 to 2 000 Hz , t = 3 axes x 2 h

Shock resistance

As per IEC 60068-2-27-2008: 300 m/s^2 [= 30 g_n] + 18 ms

g_n: standard acceleration of gravity

Mechanical load

Support the device in the event of severe dynamic load. Maximum lateral loading capacity of the pipe extensions and sensors: 75 Nm (55 lbf ft).

For more details, see the "Supporting the device" section.

Pollution degree

Pollution degree 2

Electromagnetic compatibility (EMC)
- Electromagnetic compatibility as per the EN 61326 series and NAMUR Recommendation EMC (NE 21)
  Interference immunity according to Table 2 (Industrial), interference radiation according to Group 1 Class B
- Fulfills the requirements of functional safety (SIL) in accordance with EN 61326-3-1-x

For more details, refer to the EU Declaration of Conformity.

Process

Process temperature range

−50 to +150 °C (−58 to +302 °F)

Pay attention to the pressure and temperature dependency.

Thermal shock

≤ 120 K/s

Process pressure range

−1 to +64 bar (−14.5 to 928 psi) for a maximum of 150 °C (302 °F)

The maximum pressure for the device depends on the lowest-rated element with regard to pressure.

Components are: process connection, optional mounting parts, or accessories.

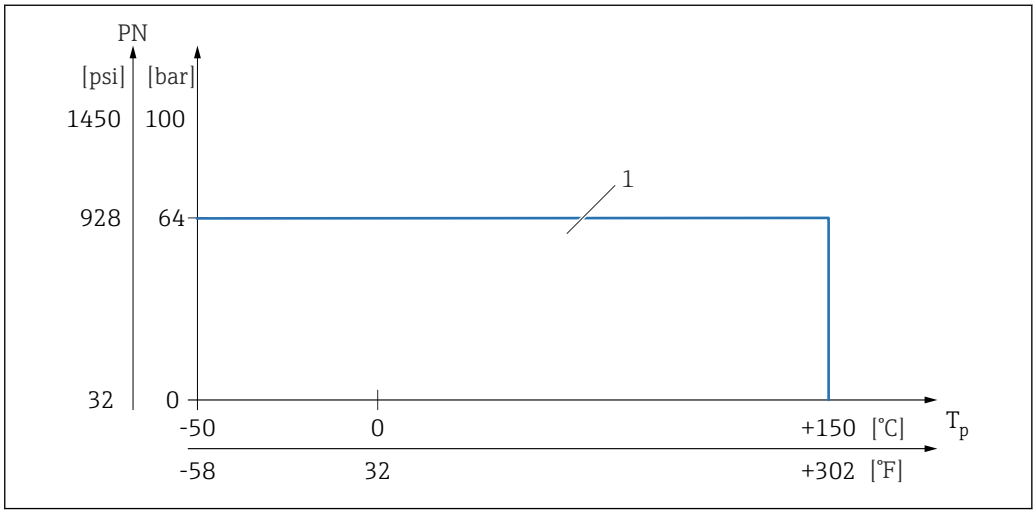
⚠ WARNING

Incorrect design or use of the device may lead to bursting parts!

This may result in severe, possibly irreversible injury to persons and environmental hazards.

- Only operate the device within the specified limits for the components!
- MWP (maximum working pressure): The maximum working pressure is specified on the nameplate. This value refers to a reference temperature of +20 °C (+68 °F) and may be applied to the device for an unlimited time. Observe the temperature dependency of the maximum working pressure. For higher temperatures, refer to the following standards for the permitted pressure values for flanges:EN 1092-1 (materials 1.4435 and 1.4404 are identical with regard to their stability/temperature property and are grouped together in under 13E0 in EN 1092-1 Tab. 18; the chemical composition of the two materials can be identical), ASME B 16.5a, JIS B 2220 (the latest version of the standard applies in each case).
- The Pressure Equipment Directive (2014/68/EU) uses the abbreviation "PS". The abbreviation "PS" corresponds to the maximum working pressure of the device.
- MWP data that deviate from this are provided in the relevant sections of the Technical Information.

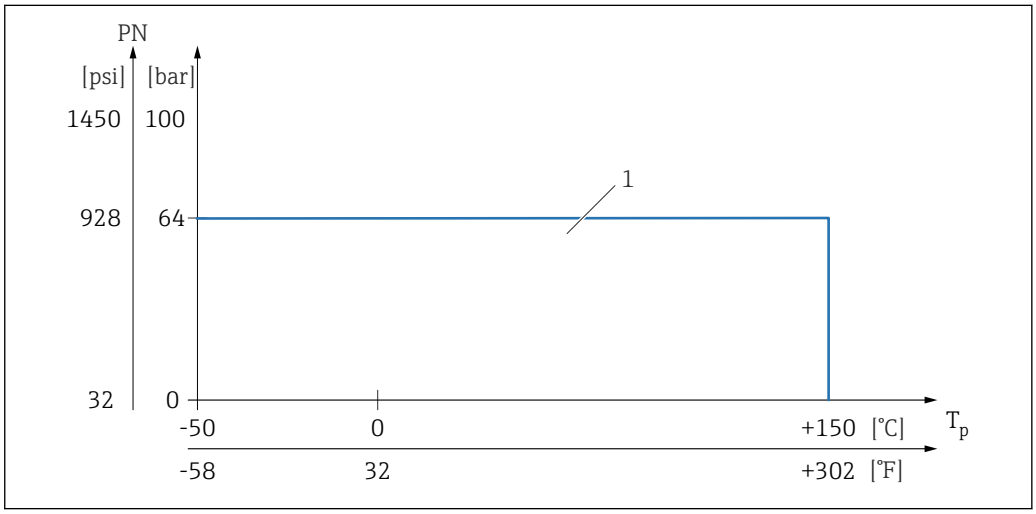
Process pressure range of the sensors



A0051481

1 PN: 64 bar (928 psi) for a maximum of 150 °C (302 °F), refer to "Process connections" section for exceptions

Process pressure range of the sensors



A0051481

1 PN: 64 bar (928 psi) for a maximum of 150 °C (302 °F), refer to "Process connections" section for exceptions

Overpressure limit

- PN = 64 bar (928 psi): overpressure limit = 1.5 · PN maximum 100 bar (1 450 psi) depending on the selected process connection
- Membrane burst pressure at 200 bar (2 900 psi)

The device function is limited during the pressure test.

Mechanical integrity is guaranteed up to 1.5 times the process nominal pressure PN.

Medium density

Liquids with density > 0.7 g/cm³ (43.7 lb/ft³)
Switch position > 0.7 g/cm³ (43.7 lb/ft³), as-delivered state

Liquids with density 0.5 g/cm³ (31.2 lb/ft³)
Switch position > 0.5 g/cm³ (31.2 lb/ft³), can be configured via DIP switch

Liquids with density > 0.4 g/cm³ (25.0 lb/ft³)

- Optionally available to order
- SIL for defined media and process parameters on request
- Fixed value that cannot be changed
  The function of the DIP switch is interrupted

Viscosity

≤ 10 000 mPa·s

Pressure tightness

Up to vacuum

In vacuum evaporation plants, select the 0.4 g/cm³ (25.0 lb/ft³)/ density setting.

Solids contents

Ø ≤ 5 mm (0.2 in)

Mechanical construction

Design, dimensions

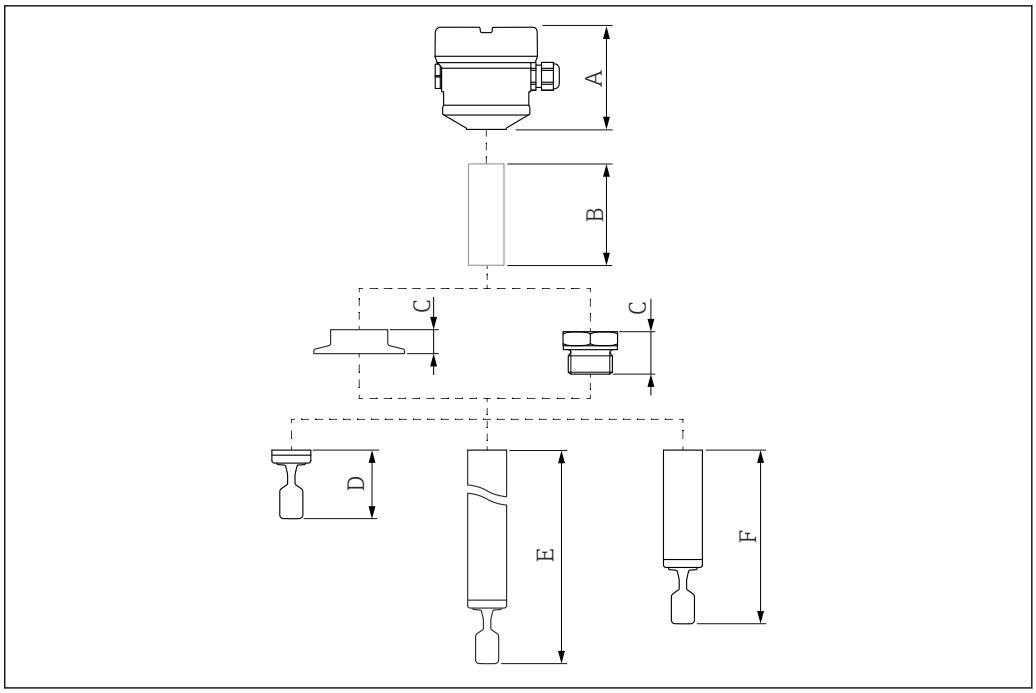
Device height

The device height consists of the following components:

- Housing including cover
- Temperature spacer and/or pressure-tight feedthrough (second line of defense), optional
- Compact version, pipe extension or short pipe version
- Process connection

The individual heights of the components can be found in the following sections:

- Determine the height of the device and add the individual heights
- Take the installation clearance into consideration (space that is needed to install the device)



32 *Components to determine the device height*

A Housing including cover
B Temperature spacer, pressure-tight feedthrough (optional)
C Process connection
D Probe design: compact version with tuning fork
E Probe design: pipe extension with tuning fork
F Probe design: short pipe version with tuning fork

Dimensions

The following dimensions are rounded values. As a result, there may be deviations from the specifications in the Product Configurator at www.endress.com.

To view CAD data:

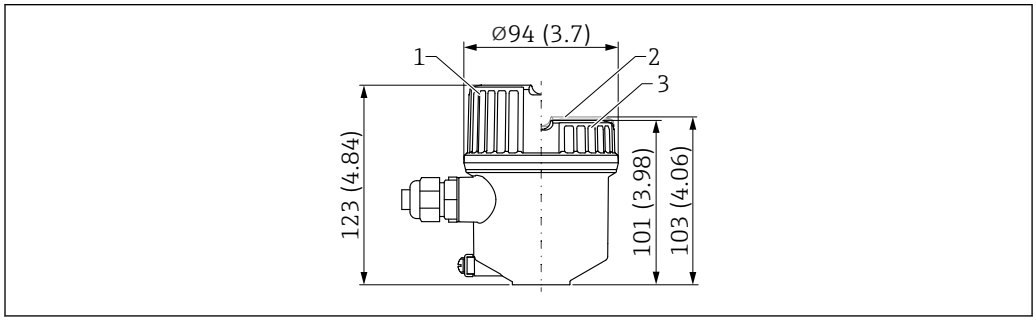
1. Enter www.endress.com in your web browser
2. Search for the device
3. Select the **Configuration** button
4. Configure the device
5. Select the **CAD drawings** button

Housing and cover

All housings can be aligned. The housing alignment can be fixed on housings with a locking screw.

Devices with a Bluetooth or LED module require a tall cover (transparent plastic cover or cover with sight glass).

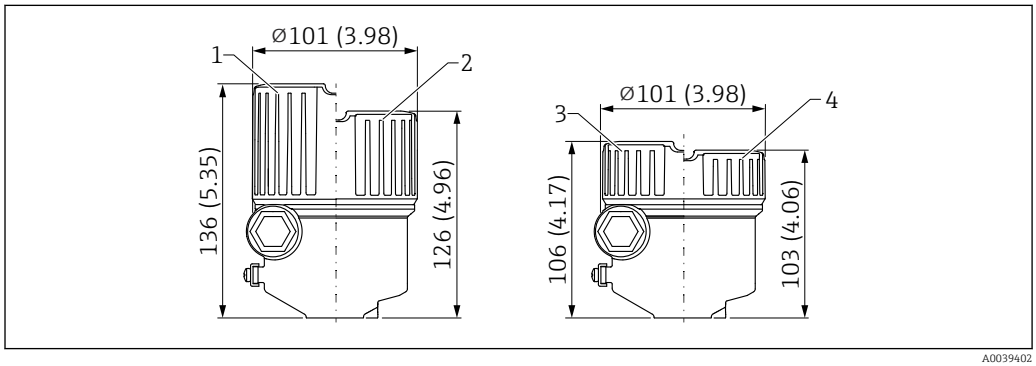
Single compartment housing, plastic



33 Dimensions of single compartment housing, plastic. Unit of measurement mm (in)

1 Height with plastic cover (transparent)
2 Height with cover with plastic sight glass (optional)
3 Height with cover without sight glass

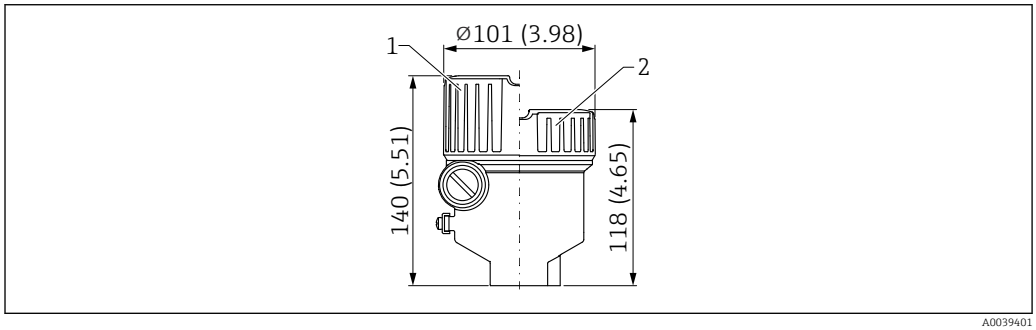
Single-compartment housing, aluminum, coated



34 Dimensions of single-compartment housing, aluminum, coated. Unit of measurement mm (in)

1 Height with cover including sight glass made of glass for Ex ec approval
2 Height with cover including sight glass made of plastic
3 Height with cover including sight glass made of plastic (optional)
4 Height with cover without sight glass

Single compartment housing, aluminum, coated (Ex d/XP, dust ignition-proof)

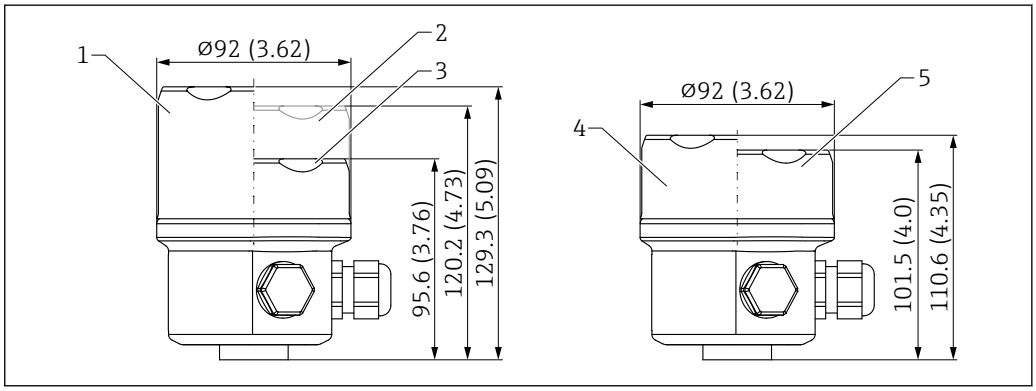


35 Dimensions of single compartment housing, aluminum, coated; with Ex d/XP, dust ignition-proof. Unit of measurement mm (in)

1 Height with cover with sight glass made of glass
2 Height with cover without sight glass

Single-compartment housing, 316L, hygienic

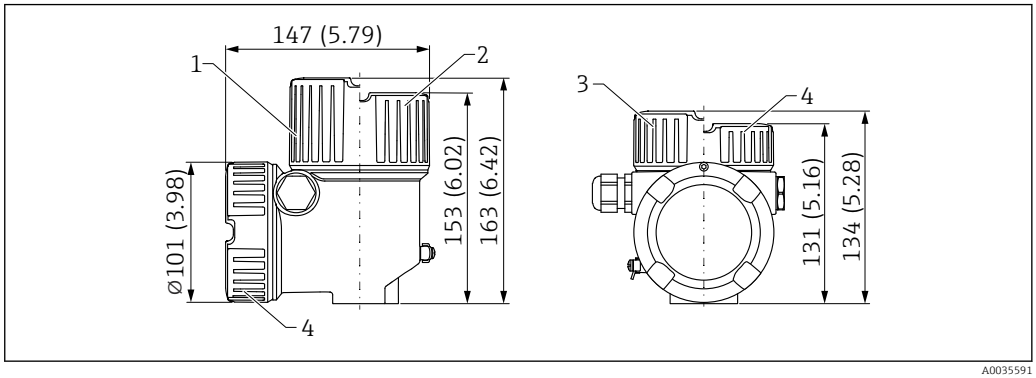
For use in hazardous areas with a certain type of protection, the ground terminal on the outside of the housing is required.



36 *Dimensions of single-compartment housing, 316L, hygienic. Unit of measurement mm (in)*

1 *Height with cover including sight glass made of glass*
2 *Height with cover including sight glass made of plastic*
3 *Height with cover without sight glass*
4 *Height with cover including sight glass made of glass (optional)*
5 *Height with cover including sight glass made of plastic (optional)*

Dual compartment housing, L-shaped, aluminum, coated



37 *Dimensions of dual compartment housing, L-shaped, aluminum, coated; also with Ex d/XP, dust ignition-proof. Unit of measurement mm (in)*

1 *Height with cover with sight glass made of glass*
2 *Height with cover with plastic sight glass*
3 *Height with cover with plastic sight glass (optional)*
4 *Height with cover without sight glass*

Ground terminal

- Ground terminal inside the housing, max. conductor cross-section 2.5 mm^2 (14 AWG)
- Ground terminal outside on the housing, max. conductor cross-section 4 mm^2 (12 AWG)

Cable glands

Cable outer diameter:
- Plastic: Ø5 to 10 mm (0.2 to 0.38 in)
- Nickel-plated brass: Ø7 to 10.5 mm (0.28 to 0.41 in)
- Stainless steel: Ø7 to 12 mm (0.28 to 0.47 in)
- Hygienic stainless steel: Ø7 to 10 mm (0.28 to 0.39 in)

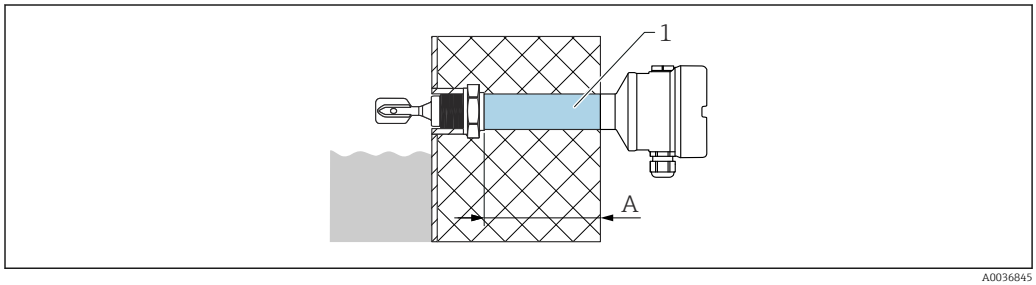
The scope of delivery comprises:
- 1 cable gland installed
- 1 cable gland sealed with dummy plug

A second cable gland (not installed) is also included in the scope of delivery of the relay electronics.

Exceptions: For Ex d/XP, only threaded insertions are permitted.

Temperature spacer, pressure-tight feedthrough (optional)

Provides sealed insulation for the vessel and a normal ambient temperature for the housing.



A0036845

1 Temperature spacer and/or pressure-tight feedthrough with maximum insulation length
A Approx. 140 mm (5.51 in)

Dimension A depends on the process connection selected and can therefore vary. For exact dimensions, information is available from the Endress+Hauser sales office.

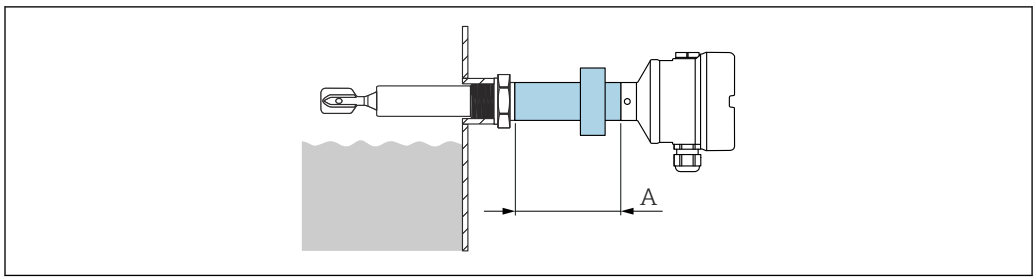
Product Configurator, feature "Sensor design":
- Temperature spacer
- Pressure-tight feedthrough (second line of defense)
  If the sensor is damaged, this protects the housing from vessel pressures up to 100 bar (1 450 psi).

Both versions cannot be ordered in combination with Ex d approval.

The "Pressure-tight feedthrough" version can only be selected in conjunction with the "Temperature spacer" option.

Ex d glass feedthrough for pipe extensions

If a pipe extension is required in combination with an Ex d approval, the following design is used:



A0046136

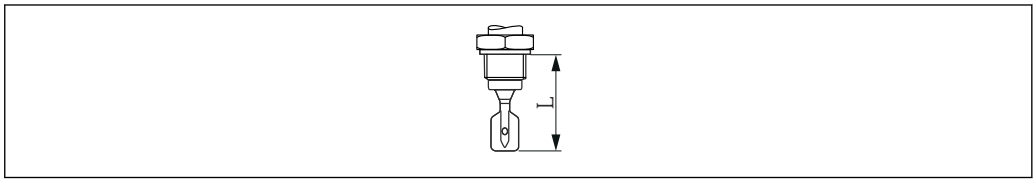
38 Ex d glass feedthrough for pipe extensions

A Approx. 76 mm (2.99 in)

Dimension A depends on the process connection selected and can therefore vary. For exact dimensions, information is available from the Endress+Hauser sales office.

Probe design

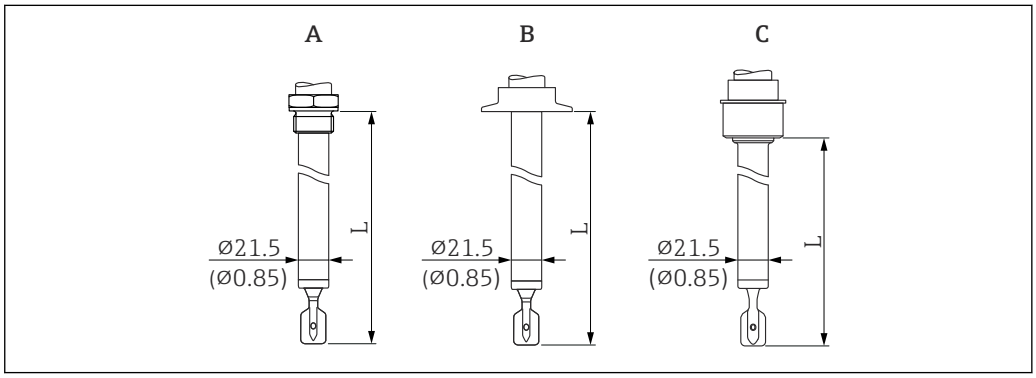
Compact version
Sensor length L: depends on process connection
For more details, see the "Process connections" section.



39 Probe design: Compact version, sensor length L

Short pipe version
Sensor length L: Depends on process connection
- Thread G 1 approx. 118 mm (4.65 in)
- Ingold, flush-mounted tank connection, DIN 11851/DIN 11864-1/SMS 1145 pipe connection, DRD, Varivent, clamp/Tri-Clamp approx. 115 mm (4.53 in)
- Flush-mounted 1" (G 1 welding boss from Endress+Hauser) approx. 104 mm (4.09 in)

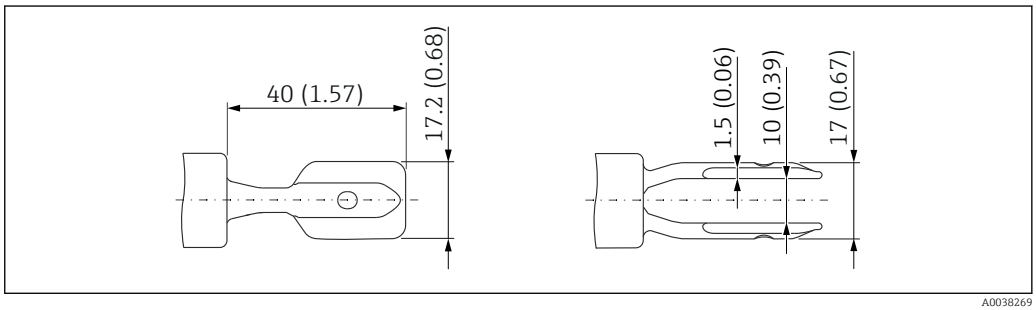
Pipe extension
- Sensor lengths L: 148 to 3 000 mm (5.83 to 118.11 in)
- Length tolerances L: < 1 m (3.3 ft) = −5 mm (−0.2 in), 1 to 3 m (3.3 to 9.8 ft) = −10 mm (−0.39 in)



40 Probe designs: Pipe extension, short pipe version (sensor length L). Unit of measurement mm (in)

A Thread G 1
B For example, clamp/Tri-Clamp, Varivent
C Flush-mounted tank connection for installation in weld-in adapter

Tuning fork



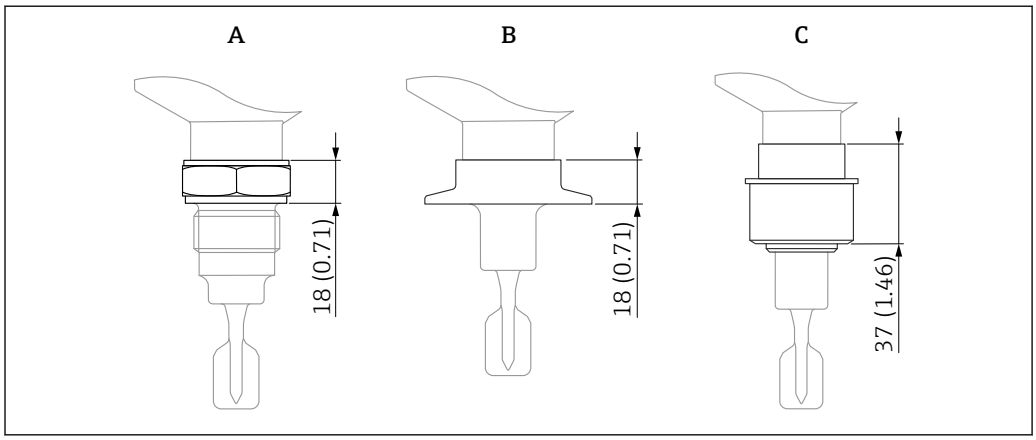
41 Tuning fork. Unit of measurement mm (in)

Process connections

Process connection, sealing surface

- Thread ISO228, G
- Ingold
- Flush-mounted tank connection
- DIN11851 pipe union
- DIN11864-1 pipe union
- DRD
- SMS1145 pipe union
- Varivent (Varinline)
- Clamp/Tri-Clamp

Height of process connection



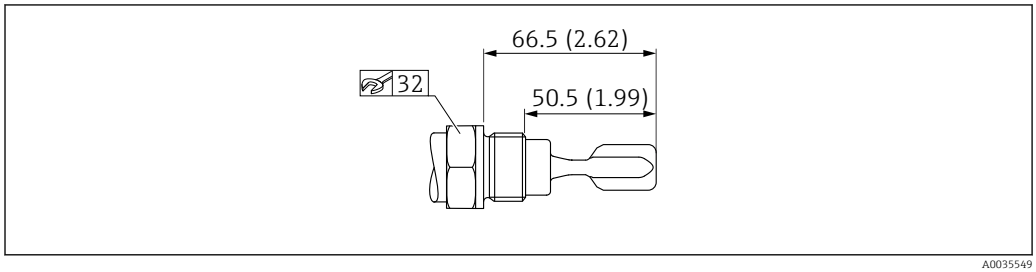
42 Maximum height specification for the process connections. Unit of measurement mm (in)

A Process connection with threaded connection
B For example: Clamp/Tri-Clamp, Varivent
C Flush-mounted tank connection for installation in welding neck

Thread ISO228 G ¾ for installation in weld-in adapter

G ¾ with defined thread start for flush mounting in weld-in adapter
- Only for sensor design: compact version
- Pressure rating, temperature: ≤ 40 bar (580 psi), ≤ +100 °C (+212 °F)
- Pressure rating, temperature: ≤ 25 bar (363 psi), ≤ +150 °C (+302 °F)
- Weight: 0.2 kg (0.44 lb)
- Accessories: weld-in adapter, optionally available as "Accessory enclosed"

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.

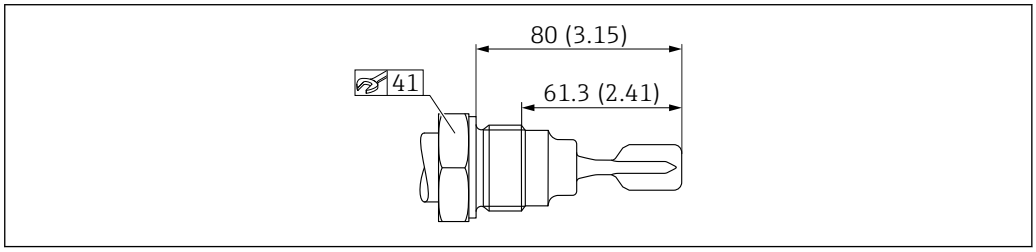


43 Thread ISO228 G ¾. Unit of measurement mm (in)

Thread ISO228 G 1 for installation in weld-in adapter

G 1 with defined thread start, comprising sealing surface for flush mounting in weld-in adapter
- Pressure rating, temperature: ≤ 40 bar (580 psi), ≤ +100 °C (+212 °F)
- Pressure rating, temperature: ≤ 25 bar (363 psi), ≤ +150 °C (+302 °F)
- Weight: 0.33 kg (0.73 lb)
- Accessories: weld-in adapter, optionally available as "Accessory enclosed"

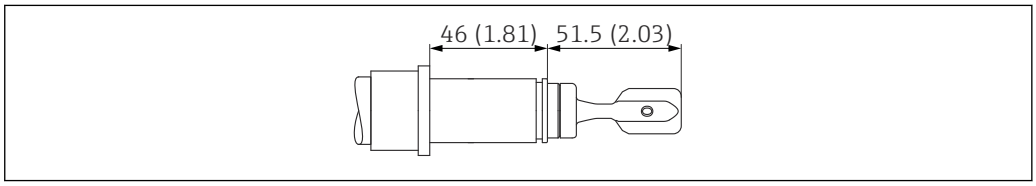
A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.



44 *Thread ISO228 G 1. Unit of measurement mm (in)*

Ingold fitting

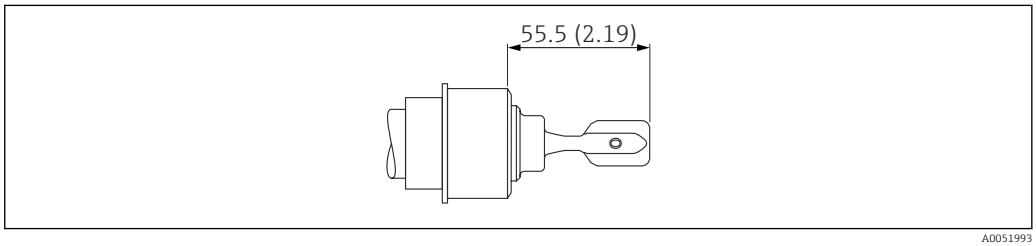
Ingold fitting 25 x 46 mm (2.52 in)
- Pressure rating: ≤ 16 bar (232 psi)
- Temperature: ≤ 150 °C (302 °F)
- Weight: 0.2 kg (0.44 lb)
- Scope of delivery: cap-nut G 1¼, seal



45 *Ingold fitting 25 x 46 mm (2.52 in). Unit of measurement mm (in)*

Flush-mounted tank connection for installation in weld-in adapter

- Pressure rating, temperature: ≤ 40 bar (580 psi), ≤ +100 °C (+212 °F)
- Pressure rating, temperature: ≤ 25 bar (363 psi), ≤ 140 °C (284 °F)
- Weight: 0.44 kg (0.97 lb)
- Accessories: weld-in adapter, optionally available as "Accessory enclosed"
- Scope of delivery: cap-nut, seal



46 *Flush-mounted tank connection. Unit of measurement mm (in)*

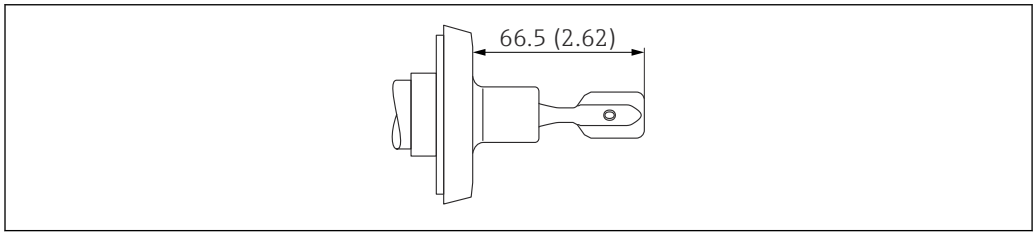
DIN 11851 pipe connection

DN32 PN25
- Slotted nut
- Pressure rating: ≤ 40 bar (580 psi)/≤ 25 bar (363 psi)
- Temperature: ≤ 100 °C (212 °F)/ 140 °C (284 °F)
- Weight: 0.3 kg (0.66 lb)

DN40 PN25
- Slotted nut
- Pressure rating: ≤ 40 bar (580 psi)/≤ 25 bar (363 psi)
- Temperature: ≤ 100 °C (212 °F)/≤ 140 °C (284 °F)
- Weight: 0.35 kg (0.77 lb)

DN50 PN25
- Slotted nut
- Pressure rating: ≤ 25 bar (363 psi)
- Temperature: ≤ 140 °C (284 °F)
- Weight: 0.47 kg (1.04 lb)

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.

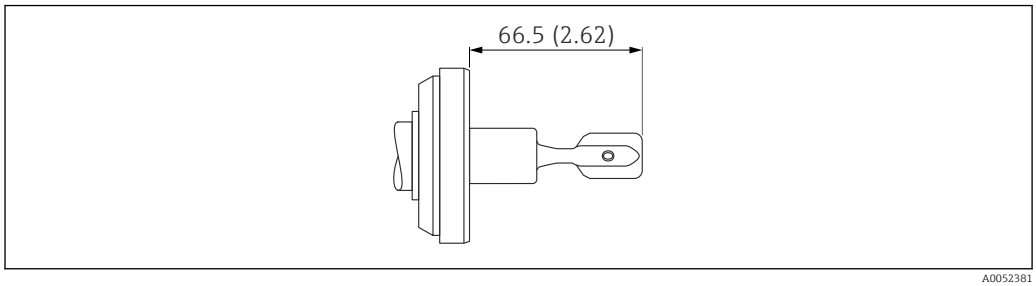


47 *DIN 11851 pipe connection. Unit of measurement mm (in)*

DIN 11864-1 pipe connection

DIN 11864-1 A DN50 pipe DIN 11850
- Slotted nut
- Pressure rating: ≤ 25 bar (363 psi)
- Temperature: ≤ 140 °C (284 °F)
- Weight: 0.47 kg (1.04 lb)

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.

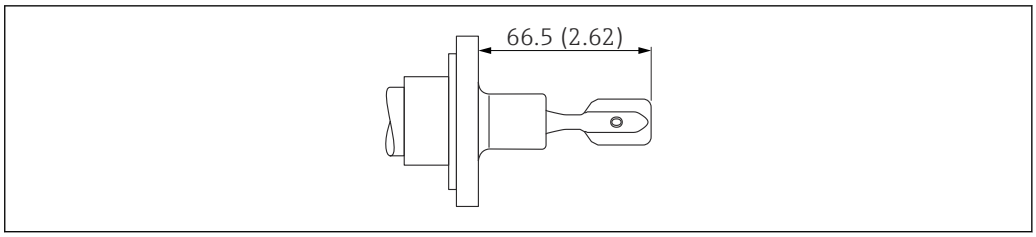


48 *DIN 11864-1 pipe connection. Unit of measurement mm (in)*

DRD

DRD 65 mm (2.56 in)
- Pressure rating, temperature: ≤ 40 bar (580 psi), ≤ +100 °C (+212 °F)
- Pressure rating, temperature: ≤ 25 bar (363 psi), ≤ 140 °C (284 °F)
- Weight: 0.43 kg (0.95 lb)
- Accessories: Weld-in flange with PTFE flat seal, optionally available to order as "Accessories"

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.

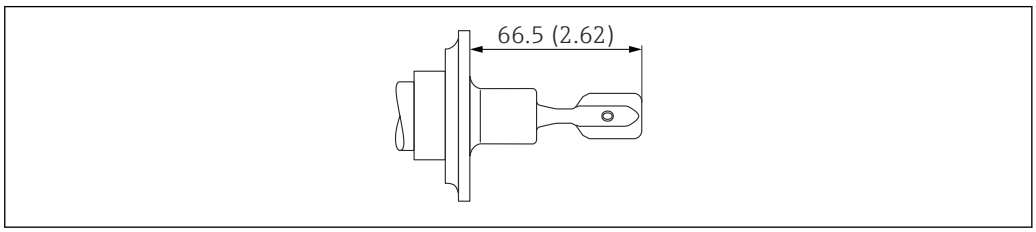


49 *DRD. Unit of measurement mm (in)*

SMS 1145 pipe connection

SMS 2" PN25
- Pressure rating: ≤ 25 bar (363 psi)
- Temperature: ≤ 140 °C (284 °F)
- With cap nut
- Weight: 0.33 kg (0.72 lb)

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.

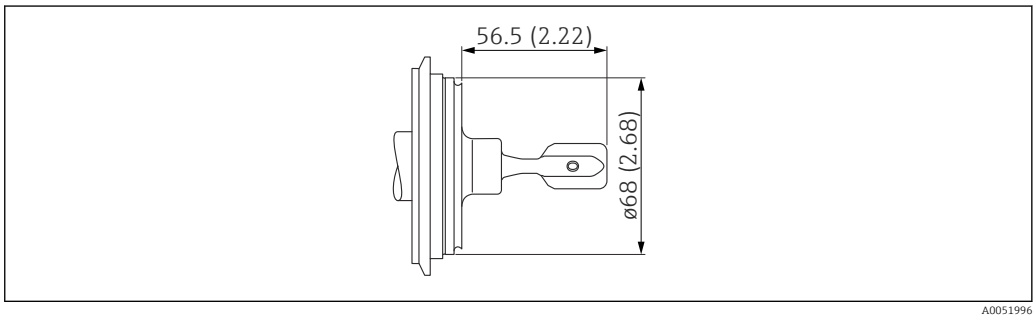


50 *SMS 1145 pipe connection. Unit of measurement mm (in)*

Varivent (Varinline)

Varivent N pipe DN65-162 PN25
- Pressure rating: ≤ 25 bar (363 psi)
- Temperature: ≤ 150 °C (302 °F)
  Suitable for GEA Tuchenhagen
- Weight: 0.72 kg (1.59 lb)

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.



51 *Varivent N pipe DN65-162 PN25. Unit of measurement mm (in)*

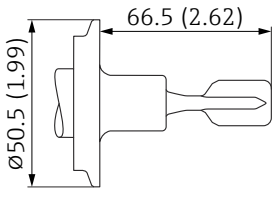
Tri-Clamp

ISO2852 DN25-38 (1 to 1 ½"), DIN32676 DN25-40
- Pressure rating: ≤ 25 bar (363 psi)
- Temperature: ≤ 150 °C (302 °F)
- Weight: 0.3 kg (0.66 lb)

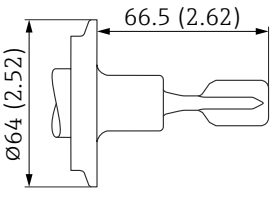
ISO2852 DN40-51 (2"), DIN32676 DN50
- Pressure rating: ≤ 25 bar (363 psi)
- Temperature: ≤ 150 °C (302 °F)
- Weight: 0.3 kg (0.66 lb)

The Tri-Clamp connection is NA Connect-compatible.

A seal is not included in the delivery. The maximum temperature and maximum pressure depend on the clamping ring and sealing element used (according to the process connection design). The lowest value applies in each case.



52 *Tri-Clamp 1 to 1 ½". Unit of measurement mm (in)*



53 *Tri-Clamp 2". Unit of measurement mm (in)*

Weight

Basic weight: 0.65 kg (1.43 lb)
The basic weight comprises:
- Probe design: compact version
- Electronic insert
- Housing: single compartment, plastic with cover
- Thread, G ¾

Differences in weight result from the housing, LED or Bluetooth module (incl. tall cover).

Bluetooth module
0.1 kg (0.22 lb)

LED module
0.1 kg (0.22 lb)

Housing
- Single compartment; aluminum, coated: 0.8 kg (1.76 lb)
- Single compartment; 316L, hygienic: 0.45 kg (0.99 lb)
- Dual compartment, L-shaped; aluminum, coated: 1.22 kg (2.69 lb)

Optionally with LED module or Bluetooth module with tall cover in each case: 0.38 kg (0.84 lb)

Temperature spacer
0.6 kg (1.32 lb)

Pressure-tight feedthrough
0.7 kg (1.54 lb)

Pipe extension
- 1 000 mm: 0.9 kg (1.98 lb)
- 50 in: 1.15 kg (2.54 lb)

Process connection

See "Process connections" section

Protective cover, plastic
0.2 kg (0.44 lb)

Protective cover, 316L
0.93 kg (2.05 lb)

Materials

Materials in contact with process

Process connection and pipe extension

316L (1.4404 or 1.4435)

Tuning fork

316L (1.4435)

Seals

Scope of delivery including seal
- Ingold fitting, seal material: EPDM (in compliance with FDA, USP Class VI)
- Flush-mounted tank connection for installation in welding neck, seal material: silicone

Materials not in contact with process

Plastic housing

- Housing: PBT/PC
- Dummy cover: PBT/PC
- Transparent cover: PA12
- Cover with sight glass: PBT/PC and PC
- Cover seal: EPDM
- Potential equalization: 316L
- Seal under potential equalization: EPDM
- Plug: PBT-GF30-FR
- M20 cable gland: PA
- Seal on plug and cable gland: EPDM
- Threaded adapter as substitute for cable glands: PA66-GF30
- Nameplate: plastic foil
- TAG plate: plastic foil, metal or provided by customer

Aluminum housing, coated

- Housing: aluminum EN AC 43400
- Dummy cover: aluminum EN AC 43400
- Cover with sight glass: aluminum EN AC 43400, PC Lexan 943A synthetic glass
  - Cover with polycarbonate sight glass, optionally available to order
  - In the case of Ex d, the sight glass is made of borosilicate
- Cover seal materials: HNBR
- Cover seal materials: FVMQ (only for low temperature version)
- Plug: aluminum
  Plastic (PBT-GF30-FR) in Ex-free, Ex i or IS combination with cable gland, plastic, M20 thread or G ½ thread
- Nameplate: plastic foil
- TAG plate: plastic foil, stainless steel or provided by the customer
- M20 cable glands: select material (stainless steel, nickel-plated brass, polyamide)

Stainless steel housing, 316L, hygienic

- Housing: stainless steel AISI 316L (1.4404)
- Dummy cover: stainless steel AISI 316L (1.4404)
- Cover with polycarbonate sight glass optionally available. For dust ignition-proof applications, the sight glass is made of borosilicate.
- Cover seal materials: VMQ
- Plug: stainless steel or plastic
  - Plastic (PBT-GF30-FR) in Ex-free, Ex i or IS combination with cable gland, plastic, M20 thread or G ½ thread
  - Stainless steel for cable glands made of stainless steel or nickel or for Ex t, Ex ia IIIC
- Nameplate: stainless steel housing labeled directly
- TAG plate: plastic foil, stainless steel or provided by the customer
- M20 cable glands: select material (stainless steel, nickel-plated brass, polyamide)

Wired-on nameplate

- Stainless steel
- Plastic film
- Provided by customer
- RFID tag: polyurethane potting compound

Electrical connection

Coupling M20, plastic
- Material: PA
- Seal on cable gland: EPDM
- Dummy plug: plastic

Coupling M20, nickel-plated brass
- Material: nickel-plated brass
- Seal on cable gland: EPDM
- Dummy plug: plastic

Coupling M20, 316L
- Material: 316L
- Seal on cable gland: EPDM
- Dummy plug: plastic

M20 coupling, 316 L, hygiene
- Material: 316L
- Seal on cable gland: EPDM

M20 thread
The device is supplied with M20 thread as standard.
Transport plug: LD-PE

Thread G ½
The device is supplied as standard with an M20 thread and an enclosed adapter to G ½ including documentation (aluminum housing, 316L housing, hygienic housing) or with a mounted adapter to G ½ (plastic housing).
- Adapter made of PA66-GF or aluminum or 316L (depends on housing version ordered)
- Transport plug: LD-PE

NPT ½ thread
The device is supplied as standard with an NPT ½ thread (aluminum housing, 316L housing) or with a mounted adapter to NPT ½ (plastic housing, hygienic housing).
- Adapter made of PA66-GF or 316L (depends on housing version ordered)
- Transport plug: LD-PE

Thread NPT ¾
The device is supplied with NPT ¾ thread as standard.
Transport plug: LD-PE

Surface roughness

Surface roughness of the surface in contact with the process:
Ra < 1.5 µm (59 µin), CoC ASME BPE

Optional:
- Ra < 0.3 µm (12 µin) mechanically polished (3-A, EHEDG)
- Ra < 0.38 µm (15 µin) electropolished, (3-A, EHEDG, CoC ASME BPE)
  In this version, the wetted parts are made of 316L (1.4435) in accordance with BN2 (delta-ferrite content < 1 %)

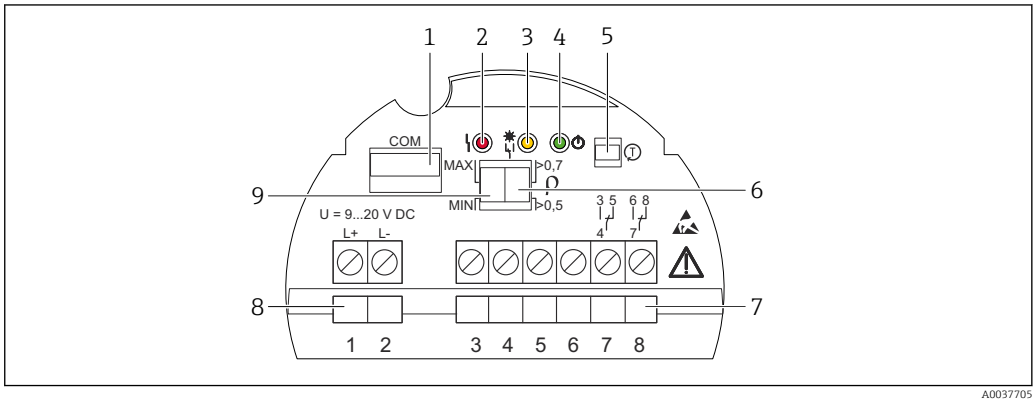
Operability

Operation concept

- Operation with button and DIP switches on the electronic insert
- Display with optional Bluetooth module and SmartBlue app via Bluetooth® wireless technology
- Indication of operational status (switch status or alarm status) with optional LED module (signal lights visible from the outside)
  Observe approvals for plastic housing, aluminum housing and stainless steel housing in hygienic applications (combined with DC-PNP (electronic insert FEL62) and relay electronics (electronic inserts FEL64, FEL64DC)

Local operation

Elements on the electronic insert

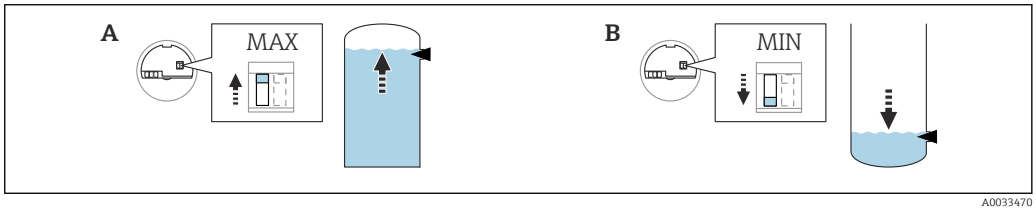


54 *Example of electronic insert FEL64DC*

1 *COM interface for additional modules (LED module, Bluetooth module)*
2 *LED, red, for warning or alarm*
3 *LED, yellow, switch status*
4 *LED, green, operational status (device is on)*
5 *Test button, activates functional test*
6 *DIP switch for setting density 0.7 or 0.5*
7 *Terminals (3 to 8), relay contact*
8 *Terminals (1 to 2), power supply*
9 *DIP switch for configuring MAX/MIN safety mode*

Operation at electronic insert

MAX/MIN safety mode

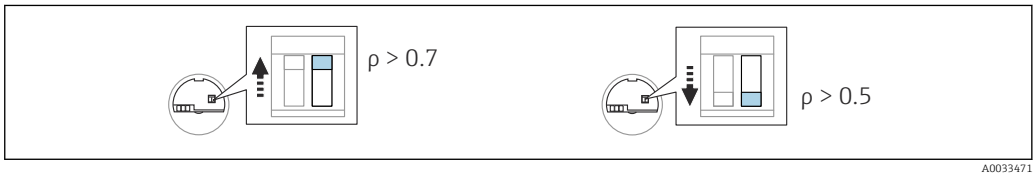


55 *Switch position on the electronic insert for MAX/MIN safety mode*

A *MAX (maximum safety mode), as-delivered state*
B *MIN (minimum safety mode)*

- Minimum/maximum quiescent current safety can be switched at the electronic insert
- MAX = maximum safety: When the vibrating fork is covered, the output switches to demand mode, e.g. use for the overfill protection system
- MIN = minimum safety: When the vibrating fork is uncovered, the output switches to demand mode, e.g. use to prevent pumps from running dry

Density switchover



56 *Switch position on the electronic insert for density*

Liquids with density > 0.7 g/cm³ (43.7 lb/ft³)
Switch position > 0.7 g/cm³ (43.7 lb/ft³), as-delivered state

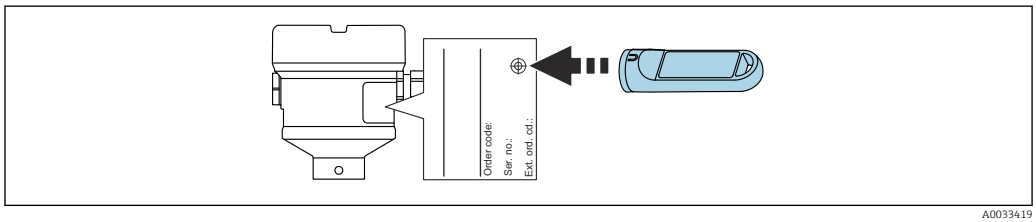
Liquids with density 0.5 g/cm³ (31.2 lb/ft³)
Switch position > 0.5 g/cm³ (31.2 lb/ft³), can be configured via DIP switch

Liquids with density > 0.4 g/cm³ (25.0 lb/ft³)
- Optionally available to order
- SIL for defined media and process parameters on request
- Fixed value that cannot be changed
  The function of the DIP switch is interrupted

Functional test of the electronic switch with a test magnet

The functional test with the test magnet can be performed without opening the device. To perform the test, hold the test magnet against the marking on the nameplate of the housing. The functional test with the test magnet acts in the same way as the functional test using the test button on the electronic insert.

The functional test can be applied for the following electronic inserts: FEL62, FEL64, FEL64DC, FEL68.



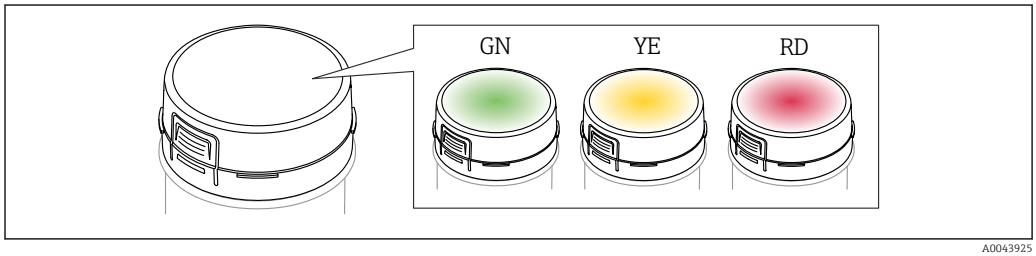
57 *Functional test with test magnet*

Product Configurator: the test magnet is optionally available.

Local display

LED module VU120 (optional)

A brightly lit LED indicates the operational status (switch status or alarm status). The LED module can be connected to the following electronic inserts: FEL62, FEL64, FEL64DC.



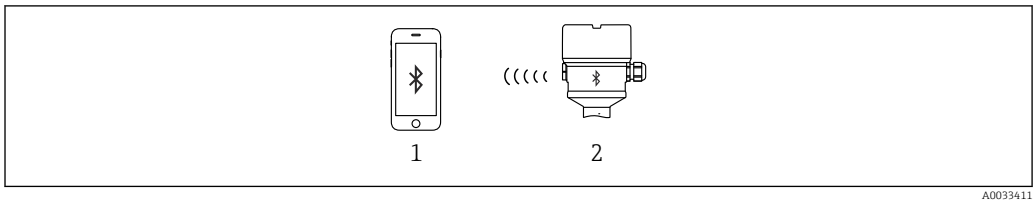
58 *LED module, the LED lights up in green (GN), yellow (YE) or red (RD)*

Additional information → 18 and in the "Accessories" section

Remote operation

Heartbeat diagnostics and verification with Bluetooth® wireless technology

Access via Bluetooth® wireless technology



59 *Remote operation via Bluetooth® wireless technology*

1 *Smartphone or tablet with SmartBlue app*
2 *Device with optional Bluetooth module*

Bluetooth module VU121 (optional)

Functions

- Connection via COM interface: Bluetooth module for device diagnostics via a smartphone app or tablet app
- Display the battery status via app when used with electronic insert FEL68 (NAMUR)
- Guidance via the **SIL/WHG Prooftest** wizard
- Visible in the livelist 10 s seconds after the Bluetooth search commences
- Data can be read from the Bluetooth module 60 s after the supply voltage is switched on
- Display of the current oscillation frequency and the switch status of the device

The yellow LED flashes when the Bluetooth module is connected to another Bluetooth device, e.g. mobile phone.

Heartbeat Technology

Additional information in the "Application packages" section.

Diagnostic information

Heartbeat Technology

The electronics module and the tuning fork are checked using Heartbeat Technology, and a verification of the Liquiphant is performed. The switch output is not changed during this test. The test can be performed at any time and does not influence the switch output in the safety circuit. In the case of proof-testing, the SmartBlue app supports users in every step of the test. The switch output is also switched during this test. During the proof-test, alternative monitoring measures must be taken to ensure process safety.

Proof testing

During the proof test, the SmartBlue app provides support for each individual stage of the test (proof-test wizard). The switch output is also switched during this test. During the proof test, alternative monitoring measures must be taken to ensure process safety.

Evaluation of the vibration frequency

If the vibration frequency exceeds the upper warning frequency, a warning is displayed. A warning is activated when the fork becomes corroded, for example. The switch output remains in the current state. The warning is displayed in the SmartBlue app and output in the Heartbeat Technology protocol. When a warning occurs, it is necessary to check the Liquiphant sensor.

The current oscillation frequency must be in the range between the upper and lower alarm frequency. If the current oscillation frequency is above the upper alarm frequency or below the lower alarm frequency, an alarm is output. The output switches to the safety-oriented state.

Certificates and approvals

Current certificates and approvals for the product are available at www.endress.com on the relevant product page:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Downloads**.

CE mark

The measuring system meets the legal requirements of the applicable EU Directives. These are listed in the corresponding EU Declaration of Conformity together with the standards applied. Endress +Hauser confirms successful testing of the device by affixing to it the CE mark.

RCM marking

The supplied product or measuring system meets the ACMA (Australian Communications and Media Authority) requirements for network integrity, interoperability, performance characteristics as well as health and safety regulations. Here, especially the regulatory arrangements for electromagnetic compatibility are met. The products bear the RCM marking on the nameplate.

A0029561

Ex approval

All data relating to explosion protection is provided in separate Ex documentation and is available from the Downloads Area. The Ex documentation is supplied as standard with all devices approved for use in explosion hazardous areas.

Ex temperature class: T1 to T6

If using the Ex i type of protection and electronic insert FEL68 (NAMUR) and also the Bluetooth module (battery required): T4 to T1.

Explosion-protected smartphones and tablets

If used in hazardous areas, mobile devices with an Ex approval must be used.

Material compliance for contact with food

The device has been developed for food contact applications. Versions can be selected that meet the following requirements:
- EU Food Contact Material (EC) 1935/2004
- US Food Contact Material FDA CFR 21
- CN Food Contact Material GB 4806

Hygienic design compliance

3-A and EHEDG-certified versions of the sensor are suitable for Cleaning-in-Place (CIP) and Sterilization-in-Place (SIP) without removing them from the plant. This means that the sensor does not need to be removed during cleaning. The maximum permitted pressure and temperature values for sensor and adapter must not be exceeded (see notes in this TI).

- Notes on installation and certification in accordance with 3-A and EHEDG:
  SD02503F document "Hygienic approvals"
- Information on 3-A and EHEDG-certified adapters:
  TI00426F document "Weld-in adapters, process adapters and flanges"

cGMP

The device was developed for life sciences applications. You can select versions with a cGMP declaration (Current Good Manufacturing Practice) for process-wetted parts with the following content in English:
- Materials of construction
- Polishing and surface treatment
- Materials and compounds compliance table: USP, FDA
- TSE/BSE-compliant based on EMA/410/01 Rev.3

General material compliance

Endress+Hauser guarantees compliance with all relevant laws and regulations, including the current guidelines for materials and substances.

Examples:
- RoHS
- China RoHS
- REACH
- POP VO (Stockholm Convention)

For further information and general declarations of compliance, see the Endress+Hauser website www.endress.com

Overfill protection system

Before mounting the device, observe the documentation from the WHG approvals (German Federal Water Act).

Approved for overfill protection systems and leakage detection.

Product Configurator: feature "Additional approval"

Functional safety

The device has been developed according to the IEC 61508 standard. The device is suitable for overfill protection systems and dry-run protection up to SIL 2 (SIL 3 with homogeneous redundancy). A detailed description of the safety functions with the device, settings and functional safety data are

provided in the "Functional Safety Manual" on the Endress+Hauser website: www.endress.com → Downloads.

Product Configurator: Feature "Additional approval"

Subsequent confirmation of usability according to IEC 61508 is not possible.

Radio approval

Further information and currently available documentation can be found on the Endress+Hauser website: www.endress.com → Downloads.

CRN approval

Device versions with a CRN approval (Canadian Registration Number) are listed in the corresponding registration documents. CRN-approved devices are marked with a registration number.

Any restrictions regarding the maximum process pressure values are listed on the CRN certificate.

Product Configurator: feature "Additional approval"

TSE (BSE) compliance (ADI free - Animal Derived Ingredients)

Versions can be selected that meet the following requirements:
- The parts of this product in contact with the process are not made from materials derived from animals **or**
- The parts of this product in contact with the process correspond to at least the requirements of the EMA/410/01 Rev. 3 guideline (TSE (BSE) compliant)

Pressure equipment with permitted pressure less than 200 bar, no pressure-bearing volume

Pressure instruments with a process connection that does not have a pressurized housing do not fall within the scope of the Pressure Equipment Directive, irrespective of the maximum working pressure.

If pressure equipment does not have a pressure-bearing housing, there is no pressure accessory present within the meaning of the Directive.

Druckgeräterichtlinie DGRL (PED) 2014/68/EU, Artikel 2, Absatz 5

Process seal as per ANSI/ISA 12.27.01

North American practice for the installation of process seals.

In accordance with ANSI/ISA 12.27.01, Endress+Hauser devices are designed as either single seal or dual seal devices with a warning message. This allows the user to forego the use of - and save the cost of installing - an external secondary process seal in the mating pipe as required in ANSI/NFPA 70 (NEC) and CSA 22.1 (CEC).

These instruments comply with the North American installation practice and provide a very safe and cost-saving installation for pressurized applications with hazardous fluids.

Please refer to the Safety Instructions (XA) of the relevant device for further information.

EAC conformity

The measuring system meets the legal requirements of the applicable EAC guidelines. These are listed in the corresponding EAC Declaration of Conformity along with the standards applied.

The manufacturer confirms successful testing of the device by affixing to it the EAC mark.

ASME B 31.3/31.1

Design and materials in accordance with ASME B31.3/31.1. The welds are through-penetration welded and meet the requirements of the ASME Boiler and Pressure Vessel Code, Section IX and EN ISO 15614-1.

ASME BPE

The measuring system was developed for life sciences applications. Options can be selected that meet the requirements of the ASME BPE (Bioprocessing Equipment) standard.

Ordering information

Detailed ordering information is available from your nearest sales organization www.addresses.endress.com or in the Product Configurator at www.endress.com:

1. Select the product using the filters and search field.
2. Open the product page.

3. Select **Configuration**.

Product Configurator - the tool for individual product configuration
- Up-to-the-minute configuration data
- Depending on the device: direct input of information specific to the measuring point, such as the measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Service

- Cleaned of oil+grease (wetted)
- PWIS-free (paint-wetting impairment substances)
  The plastic protective cover and weld-in adapters are excluded from the PWIS cleaning
- Switching delay setting to be spec.
- Setting for MIN safety mode
- Default density setting > 0.4 g/cm³ (25.0 lb/ft³)
- Default density setting > 0.5 g/cm³ (31.2 lb/ft³)

Test reports, declarations and inspection certificates

All test reports, declarations and inspection certificates are provided electronically in the *Device Viewer*:
Enter the serial number from the nameplate
(https://www.endress.com/de/pages/supporting-tools/device-viewer)

Product documentation on paper
Test reports, declarations and inspection certificates in hard copy can optionally be ordered with feature 570 "Service", Version I7 "Product documentation on paper". The documents are then provided with the device upon delivery.

Test, certificate, declaration

Versions can be selected for which the following certificates are available:
- Inspection certificate 3.1, EN10204 (material certificate, wetted parts)
- AD 2000 (wetted parts), declaration, excluding cast parts
- CoC ASME BPE, declaration
- ASME B31.3 process piping, declaration
- Compliance with requirements derived from cGMP, declaration
- EU Food Contact Material (EC) 1935/2004
- US Food Contact Material FDA CFR 21
- CN Food Contact Material GB 4806
- Surface roughness test ISO4287/Ra, (wetted parts), test report
- Delta-ferrite test, internal procedure (wetted parts), test report

Documentation currently available on the Endress+Hauser website: www.endress.com → Downloads or with the serial number of the device under Online Tools in the Device Viewer.

TAG

Measuring point (tag)

The device can be ordered with a tag name.

Location of tag name
Select in the additional specification:
- Stainless steel tag plate
- Paper adhesive label
- Tag provided by the customer
- RFID tag
- RFID tag + stainless steel tag plate
- RFID tag + paper adhesive label
- RFID tag + tag provided by the customer
- IEC 61406 stainless steel tag
- IEC 61406 stainless steel tag + NFC tag
- IEC 61406 stainless steel tag, stainless steel tag
- IEC 61406 stainless steel tag + NFC, stainless steel tag
- IEC 61406 stainless steel tag, plate supplied
- IEC 61406 stainless steel tag + NFC, plate supplied

Definition of tag name
Specify in the additional specification:
3 lines of maximum 18 characters each
The specified tag name appears on the selected plate and/or on the RFID tag.

Visualization in SmartBlue app
The first 32 characters of the tag name
The tag name can always be changed specifically for the measuring point via Bluetooth.

Application packages

The following versions can be optionally selected in the Product Configurator:

- Heartbeat Verification + Monitoring application package
  Can only be selected in conjunction with optional Bluetooth module
- Accessories installed: Bluetooth

The Bluetooth module for use in conjunction with the electronic insert FEL68 (2-wire NAMUR) must be ordered separately with the necessary battery.

- Application package: Heartbeat Verification + Monitoring for NAMUR output
  Can only be selected in conjunction with Bluetooth module for NAMUR output
- Accessory mounted: Bluetooth for NAMUR output

Heartbeat Technology module

Heartbeat Diagnostics
Continuously monitors and assesses the device condition and process conditions. Generates diagnostic messages when certain events occur and provides troubleshooting measures in accordance with NAMUR NE 107.

Heartbeat Verification
Performs a verification of the current device condition on demand and generates the Heartbeat Technology verification report showing the verification result.

Heartbeat Monitoring
Continuously provides device and/or process data for an external system. Analysis of this data provides a basis for process optimization and predictive maintenance.

Heartbeat Verification

The "Heartbeat Verification" module contains the **Heartbeat Verification** wizard, which verifies the current instrument health and creates the Heartbeat Technology verification report:

- The wizard can be used via the SmartBlue app.
- The wizard guides the user through the entire process for creating the verification report.
- The operating hours counter and minimum/maximum temperature indicator (peakhold) are displayed.
- In the event of an increase in the oscillation frequency of the fork, a corrosion warning will appear.
- The as-delivered state of the oscillation frequency in air is indicated on the verification report. A high oscillation frequency is an indicator of corrosion. A lower oscillation frequency indicates buildup or a sensor covered by the medium. Deviations of the oscillation frequency from the oscillation frequency in the as-delivered state can be caused by the process temperature and process pressure.

Proof testing for SIL/WHG devices

The proof test is only available for devices with SIL or WHG approval.

The "SIL Proof test" module, the "WHG Proof test" module or the "SIL/WHG Proof test" module contains an **SIL/WHG Prooftest** wizard, which must be performed at appropriate intervals in the following applications: SIL (IEC 61508/IEC 61511), WHG (German Water Resources Act (Gesetz zur Ordnung des Wasserhaushalts)):

- The wizard can be used via the SmartBlue app.
- The wizard guides the user through the entire process for creating the verification report.
- The verification report can be saved as a PDF file.

Accessories

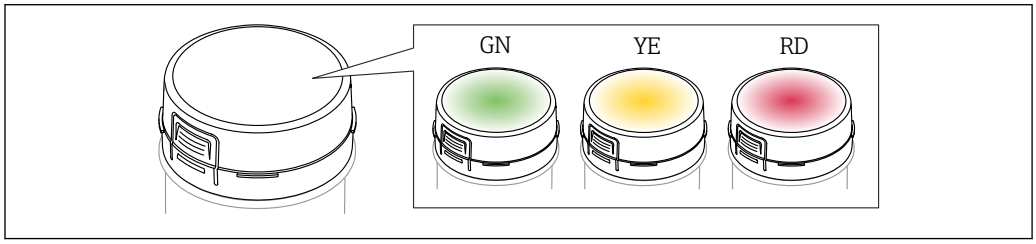
The accessories currently available for the product can be selected at www.endress.com:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Spare parts & Accessories**.

LED module VU120 (optional)

A brightly lit LED indicates the operational status (switch status or alarm status). The LED module can be connected to the following electronic inserts: FEL62, FEL64, FEL64DC.

Order number: 71437382



60 *LED module, the LED lights up in green (GN), yellow (YE) or red (RD)*

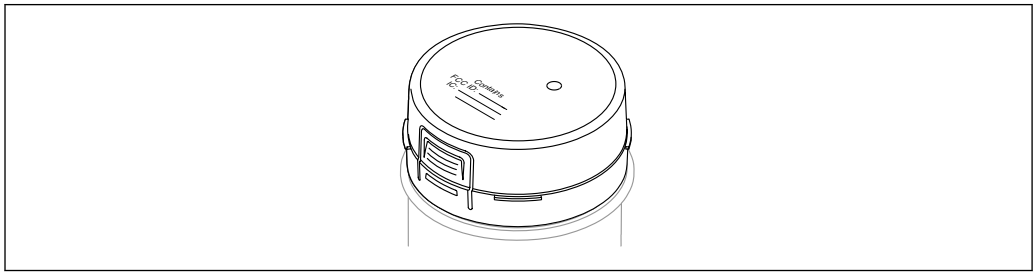
More detailed information and documentation are available:
- Product Configurator on the Endress+Hauser website www.endress.com
- Endress+Hauser sales organization www.addresses.endress.com

A tall cover, transparent or with sight glass, is required for using and retrofitting the LED module. The cover depends on the housing and approval of the device.

Bluetooth module VU121 (optional)

The Bluetooth module can be connected to the following electronic inserts via the COM interface: FEL61, FEL62, FEL64, FEL64DC, FEL67, FEL68 (2-wire NAMUR).

- Bluetooth module without battery for use in conjunction with electronic inserts FEL61, FEL62, FEL64, FEL64DC and FEL67
  Order number: 71437383
- Bluetooth module with battery for use in conjunction with electronic insert FEL68 (2-wire NAMUR)
  Order number: 71437381



61 *Bluetooth module VU121*

More detailed information and documentation are available:
- Product Configurator on the Endress+Hauser website www.endress.com
- Endress+Hauser sales organization www.addresses.endress.com

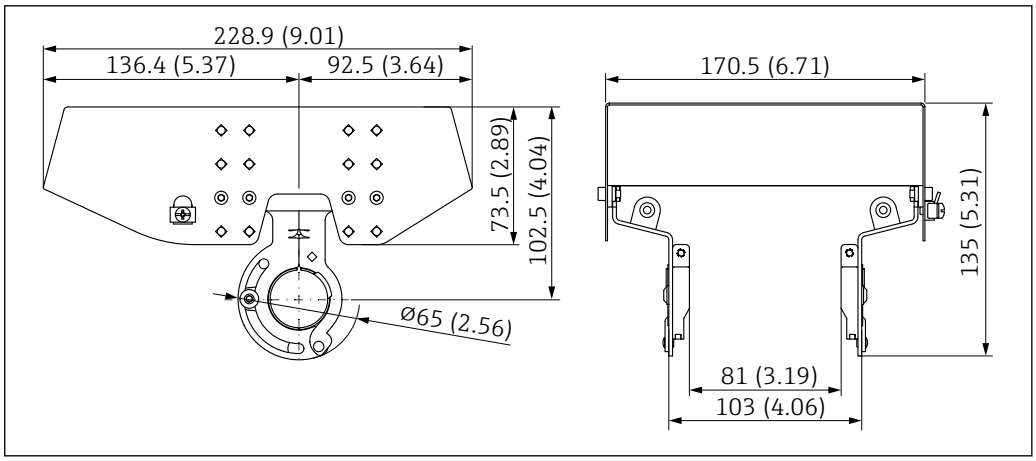
A tall cover, transparent or with sight glass, is required for using and retrofitting the Bluetooth module. The cover depends on the housing and approval of the device.

Protective cover: 316L, XW112

The weather protection cover can be ordered together with the device via the "Accessory enclosed" product structure.

It is used to protect against direct sunlight, precipitation and ice.

The 316L protective cover is suitable for dual-compartment housings made of aluminum. The delivery includes the holder for direct mounting on the housing



62 *Dimensions of protective cover, 316 L, XW112. Unit of measurement mm (in)*

Material
- Protective cover: 316L
- Clamping screw: A4
- Holder: 316L

Accessory order code:
71438303

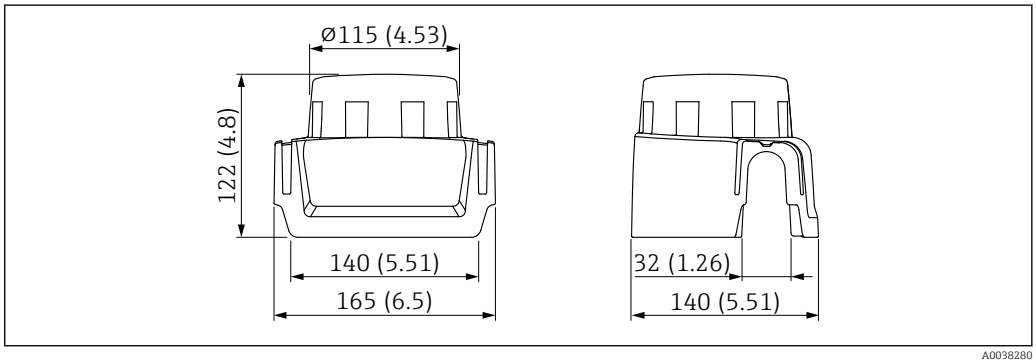
Special Documentation SD02424F

Weather protection cover, plastic, XW111

The weather protection cover can be ordered together with the device via the "Accessory enclosed" product structure.

It is used to protect against direct sunlight, precipitation and ice.

The plastic weather protection cover is suitable for the single compartment housing made of aluminum. The delivery includes the holder for direct mounting on the housing.



63 *Dimensions of weather protection cover, plastic, XW111. Unit of measurement mm (in)*

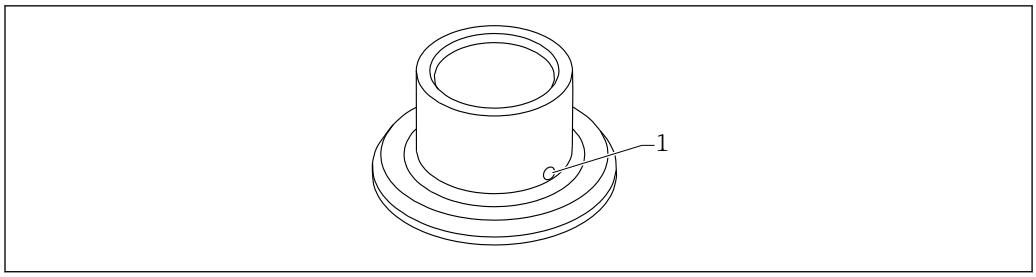
Material
Plastic

Accessory order code:
71438291

Special Documentation SD02423F

Weld-in adapter

Various weld-in adapters are available for installation in vessels or pipes. The adapters are optionally available with inspection certificate 3.1 EN10204.



64 *Weld-in adapter with leakage hole (sample view)*

1 Leakage hole

Weld in the weld-in adapter in such a way that the leakage hole is pointing downwards. This enables any leaks to be detected quickly.

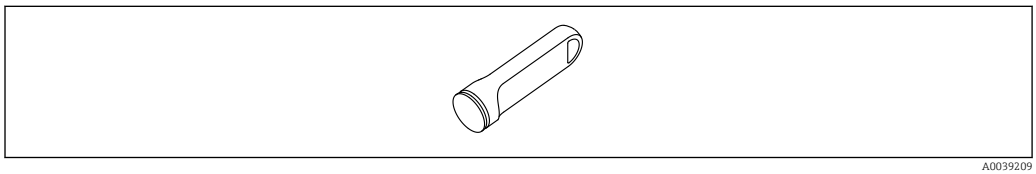
- G 1, Ø53 mounting on the pipe
- G 1, Ø60 flush mount on the vessel
- G ¾, Ø55 flush mount
- G 1 sensor adjustable
- RD52 sensor adjustable

For detailed information, see "Technical Information" TI00426F (Weld-in adapters, process adapters and flanges)

Available in the Download Area of the Endress+Hauser website (www.endress.com/downloads).

Test magnet

Order number: 71437508



65 *Test magnet*

M12 socket

The M12 sockets listed are suitable for use in the temperature range −25 to +70 °C (−13 to +158 °F).

M12 socket IP69
- Terminated at one end
- Angled
- 5 m (16 ft) PVC cable (orange)
- Slotted nut 316L (1.4435)
- Body: PVC
- Order number: 52024216

M12 socket IP67
- Angled
- 5 m (16 ft) PVC cable (gray)
- Slotted nut Cu Sn/Ni
- Body: PUR
- Order number: 52010285

Documentation

For an overview of the scope of the associated Technical Documentation, refer to the following:
- *Device Viewer* (www.endress.com/deviceviewer): Enter the serial number from the nameplate
- *Endress+Hauser Operations app*: Enter serial number from nameplate or scan matrix code on nameplate.

Standard documentation

Document type: Operating Instructions (BA)
Installation and initial commissioning – contains all functions in the operating menu that are required for a typical measuring task. Functions beyond this scope are not included.

Document type: Description of Device Parameters (GP)
The document is part of the Operating Instructions and serves as a reference for parameters, providing a detailed explanation of each individual parameter of the operating menu.

Document type: Brief Operating Instructions (KA)
Quick guide to the first measured value – includes all essential information from incoming acceptance to electrical connection.

Document type: Safety Instructions, certificates
Depending on the approval, Safety Instructions are supplied with the device, e.g. XA. This documentation is an integral part of the Operating Instructions.
The nameplate indicates which Safety Instructions (XA) apply to the device in question.

Supplementary device-dependent documentation

Additional documents are supplied depending on the device version ordered: Always comply strictly with the instructions in the supplementary documentation. The supplementary documentation is an integral part of the device documentation.

Special Documentation

- SD02662F: Heartbeat Verification + Monitoring application package
- SD02389F: Bluetooth module VU121, radio approval
- SD01622P: Weld-in adapter (installation instructions)
- TI00426F: Weld-in adapters, process adapters and flanges (overview)
