Prosonic S FMU90

Slot-Index Lists for Profibus DP
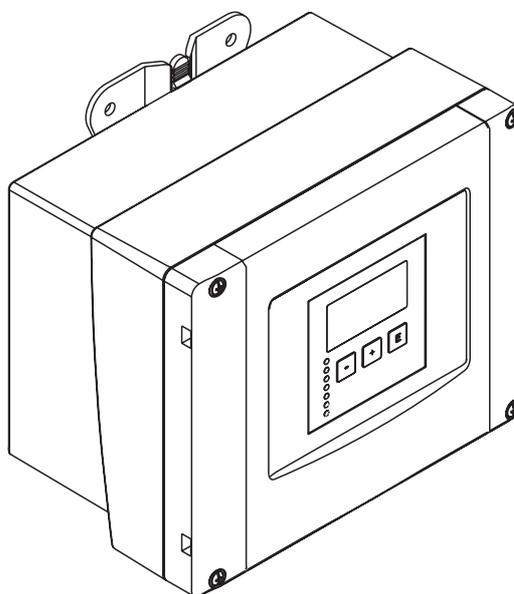

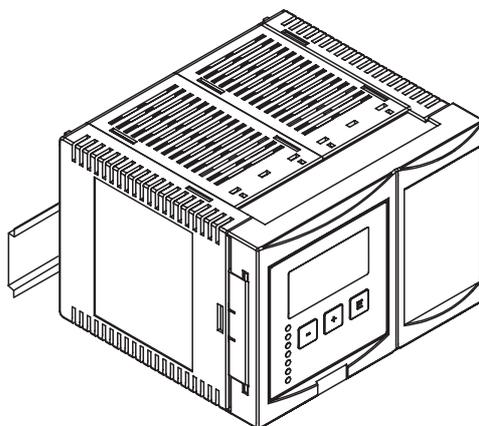

PROFI ®
PROCESS FIELD BUS
BUS

Endress+Hauser

People for Process Automation

Table of Contents

1   Introduction

This document comprises the Slot-Index tables for all user parameters of the Prosonic S.
The parameters are arranged according to the function blocks of the Prosonic S. All function blocks containing user parameters are taken into account. Some of these blocks are not available in every version of the instrument.

For each block, there is a list of instances. A slot number and a start index is given for each instance. The structure of each block is only given once. This structure is valid for all instances of the respective block.

2 Slot-Index Lists

2.1 Resource Block (RB)

2.1.1 Instances

Instance	Slot	Index
1	0	16

2.1.2 Structure

Parameter Text	Variable Name	Position Indicator	Slot (relative)	Index (absolute)	Size [bytes]	Type	Changeable in Mode	Range	Default	Unit	Access	Storage Class
Target Mode	RBTargetMode	–	0	21	1	Unsigned8	Auto, OOS	8 ... 8	0	–	RW	static
