***** = Any combination of number and/or letter
+, # = Signs are used as indicator for optional abbreviation of extended order code.

Statement Promass sensors have been subject to fatigue analysis based on FEA methodology. The analysis identifies the peak stresses based on the highest lateral vibrations that occur during measurement. All sensors are found to be below the fatigue endurance limits according to the norm ASME BPVC Sec VIII Div. 2.

This manufacturer's declaration applies to all products placed on the market up to three years after the date of issue.
