

Brief Operating Instructions **TAF10**

Field housing

Installation

CAUTION

Risk of injury due to incorrect shielding!

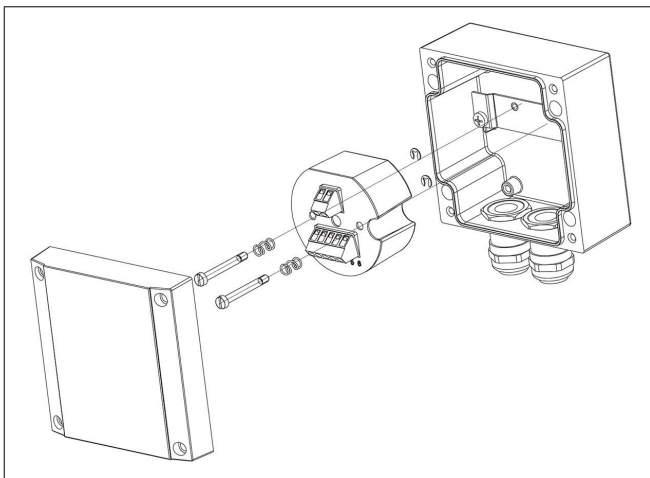

- For effective shielding, the cable shield must be connected to the field housing over a wide area. This is achieved by placing the cable shield on the special EMC PG 13.5 cable glands.

Field housing for all E + H temperature head transmitters

Aluminum die-cast housing IP66: 100x100x60 mm (WxHxD)

Weight: approx. 0.58 kg (1.28 lb)

- Attach the temperature head transmitter to the mounting bracket inside the field housing (see drawing).

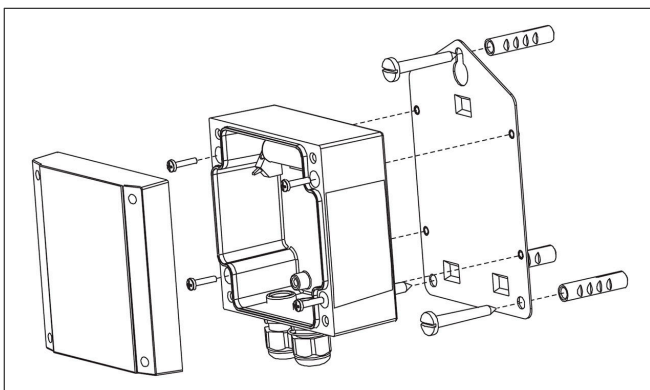

1 Installation

Additional fittings:

- Mounting bracket for wall mounting
- Mounting bracket for pipe mounting

Wall mounting
