#### 12. Description of Equipment:

**General** - The Tank Gauge Radar Micropilot NMR8x is used for the contactless, continuous measurement of liquids in hazardous areas with gas atmosphere. Two different types of transmitters are available, the NMR81 and NMR84, each with a different transmitter, antenna and working frequencies for different applications. Short microwave impulses are radiated from the antenna, reflected by the medium surface and picked up again by the antenna. The delay time between radiation and receiving is measured and converted into a signal to calculate the level.

The Tank Gauge Radar Micropilot NMR8x is comprised of certified Tank Gauge Platform Enclosures (FM16CA0075U) and certified Tank Gauge Platform Electronic Modules (FM16CA0007U). The following enclosures and electronic modules may be used:

Enclosure TRC[01-10-11] ALU C-Band Enclosure TRC[01-20-11] ALU E-Band Enclosure TRC[02-10-12] SS C-Band

Enclosure TRC[02-20-12] SS E- Band

Module TRC[00] FP Front Plane Board

Module TRC[01] PS\_HV Power Supply, High Voltage

Module TRC[02] PS LV AC Power Supply, Low Voltage, AC

**Construction** - The Tank Gauge Radar Micropilot NMR8x comprises a single compartment explosionproof/flameproof enclosure with a thread-on window cover —housing the display module, electronics assembly, radar module— along with a feedthrough and a process connector with antenna. NMR81 and NMR84 have a unique radar box, feedthrough, connection cable and antenna while they share the same enclosure, display and electronics assembly. The enclosure for NMR81 and NMR84 can be Aluminum or Stainless Steel, with 7 integral M20 sized field wiring entries. Integral threaded inserts allow for optional field wiring entry options including M25, ½ NPT or ¾ NPT.

Ratings - The Tank Gauge Radar Micropilot NMR8x operates at 85-264 Vac (28.8 Volt-Amperes), 52-75 Vac (21.6 Volt-Amperes) and 19-64 Vdc (13.4 Watts). The transmitters are rated for use in an ambient temperature range of -40°C to +60°C. The transmitter probes are rated for use in a process temperature range of -40°C to +200°C. For further information regarding the Temperature Class and Ambient Temperature Ranges, refer to the temperature and configuration tables.
