2.1  Used symbols

2.1.1  Safety symbols

⚠️ DANGER
This symbol alerts you to a dangerous situation. Failure to avoid this situation will result in serious or fatal injury.
WARNING
This symbol alerts you to a dangerous situation. Failure to avoid this situation can result in serious or fatal injury.

CAUTION
This symbol alerts you to a dangerous situation. Failure to avoid this situation can result in minor or medium injury.

NOTICE
This symbol contains information on procedures and other facts which do not result in personal injury.

2.1.2 Electrical symbols

Protective earth (PE)
Ground terminals that must be connected to ground prior to establishing any other connections.
The ground terminals are located on the interior and exterior of the device:
- Interior ground terminal: protective earth is connected to the mains supply.
- Exterior ground terminal: device is connected to the plant grounding system.

2.1.3 Tool symbols

Flat blade screwdriver

Open-ended wrench

2.1.4 Symbols for certain types of information and graphics

Permitted
Procedures, processes or actions that are permitted

Forbidden
Procedures, processes or actions that are forbidden

Tip
Indicates additional information

Item numbers
3 Basic safety instructions

3.1 Requirements for the personnel

The personnel must fulfill the following requirements to carry out the necessary tasks:

‣ Are trained, qualified to perform specific functions and tasks.
‣ Are authorized by the plant owner or operator to perform specific tasks.
‣ Are familiar with federal or national regulations.
‣ Have read and understood the instructions in the manual and supplementary documentation.
‣ They follow instructions and comply with conditions.

3.2 Workplace safety

For work on and with the device:

‣ Wear the required protective equipment according to federal or national regulations.

3.3 Operational safety

When performing configuration, testing, and maintenance work on the device, alternative supervisory measures must be taken to guarantee the operational safety and process safety.

3.3.1 Ex-area

When using the measuring system in Ex-areas, the appropriate national standards and regulations must be observed. Separate Ex-documentation, which constitutes an integral part of this documentation, is supplied with the device. The installation procedures, connection data and safety instructions it contains must be observed.

See Operating Instructions → 2

- Make sure that the technical staff has adequate training.
- The special measuring and safety-related requirements for the measuring points must be observed.
3.4 **Product safety**
This measuring device is designed following good engineering practice to meet state-of-the-art safety requirements, has been tested, and left the factory in a condition in which it is safe to operate.

It meets general safety standards and legal requirements. It is compliant with the EC directives listed in the device-specific EC Declaration of Conformity. Endress+Hauser confirms this by affixing the CE mark to the device.

4 **Incoming acceptance and product identification**

4.1 **Incoming acceptance**
Check whether the packaging or content is damaged. Check that the goods delivered are complete and compare the scope of delivery with the information in your order.

4.2 **Product Identification**
Check nameplate data.

See Operating Instructions →  2

4.3 **Storage temperature**
–40 to +80 °C (–40 to +176 °F)

5 **Mounting**

5.1 **Mounting requirements**
- Do not handle the probe by the rods!
- Do not bend the rods!
- Do not extend the rods!

See Operating Instructions →  2

5.2 **Mounting the measuring device**

Mounting location
The probe can be mounted on top of the tank.
1. **Probe mounting**

   A. Metal tank
   B. Plastic tank
2 Incorrect mounting

See Operating Instructions → 2

5.3 Rods shortening

5.3.1 Shortening

Do not damage insulation at any other points!
3  Shortening the rods

5.3.2  Probe shortening set

4  Probe shortening

1  Eye screw
2  Sealing ring
3  Insulating cap
4  Tighten to the stop
5.3.3  Rod spacer

- **5**  Rod spacer
- 1  Metal rod
- 2  Insulated rod

5.3.4  Probe mounting

**G 1½**

- Maximum pressure $p_e$ is 10 bar (145 psi)
- Maximum torque 80 to 100 Nm (59.0 to 73.7 lbf ft)
6  Probe mounting G 1½

NPT 1½

- Maximum pressure $p_e$ is 10 bar (145 psi)
- Maximum torque 40 to 80 Nm (29.5 to 59.0 lbf ft)

7  Probe mounting NPT 1½

1  PTFE sealing tape
5.4 Mounting the optional display

Mounting the display

1. Insert the display cable through the slot in the holder.
2. Place the display on the holder.
3. Connect the display to the electronic insert.
4. Place and lock the holder on the electronic insert.
5. Rotate the display by an angle of 30° to the desired position.
   A double clicking sound indicates 30° rotation.
Unmounting the display

1. ▶ Rotate the display by an angle of 15°.
   ▶ A one clicking sound indicates 15° rotation.

2. ▶ Pull up the display.

3. ▶ Pull up the display holder.

4. ▶ Disconnect the display.
6 Electrical connection

6.1 Connecting the measuring device

![Diagram of electrical connection with FEI20 display and 4-20 mA connection]

8 Connection of the electronic insert FEI20

1 Transmitter power supply unit

7.2 Empty calibration

A Vertical tank
B Cylindrical tank in the horizontal position and active linearization

Setting empty calibration without display

1 →

2 Hz 10 s

3 →

0.25 Hz
Setting empty calibration with display

1. Press the start button for >2 seconds.
2. Wait for 10 seconds.
3. Set the display to 0.0.

7.3 Full calibration

A  Vertical tank
B  Cylindrical tank in the horizontal position and active linearization
Setting full calibration without display

1 → 0.25 Hz
> 2 s

2 → 2 Hz
10 s

3 → 0.25 Hz

Setting full calibration with display

1 → > 2 s

2 → 10 s

3 → 100.0

7.4 Shifting empty and full calibration
