Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water
Do not allow product to reach ground water, water course or sewage system.
Danger to drinking water if even small quantities leak into the ground.
Harmful to aquatic organisms
Rinse off of bigger amounts into drains or the aquatic environment may lead to decreased pH -values. A low pH -value harms aquatic organisms. In the dilution of the use-level the pH -value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.
