SupplyCare Enterprise Inventory data management and visualization

- Getting Started -

1 Change history

Software version 3.0.xx

- Changes/comments: linearization tool removed. 32-bit installer removed. Software License Management introduced.
- Document: BA00054S/00/A2/18.16

Software version 3.1.xx

- Changes/comments: Tank Freeze extended and Tank Holdup implemented. User Preferences extended: level can now be displayed in millimeters. Reconciliation Report implemented.
- Document: BA00054S/00/A2/19.16

Software version 3.2.xx

- Changes/comments: Change Software ID function implemented. New Gateway HG1plus added to list. Data storage also in PostgreSQL database.
- Document: BA00054S/00/A2/20.17

Software version 3.3.xx

- Changes/comments: update for registered trademarks. General Troubleshooting section added.
- Document: BA00054S/00/A2/21.19

Software version 3.4.xx

- Changes/comments: supplementary note on uninstalling the software.
- Document: BA00054S/00/A2/22.20

Software version 3.5.xx

- Changes/comments: system requirements updated.
- Document: KA01579S/00/01.22 as successor to BA00054S

2 About this document

2.1 Registered trademarks

The following trademarks are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries:

- Microsoft[®]
- Windows[®]
- Windows Server[®]

The following trademarks are either registered trademarks or trademarks of Google LLC:

- GoogleTM
- Google ChromeTM
- Google MapsTM

The following trademarks are either registered trademarks or trademarks of Cisco Systems, Inc. and/or its affiliates in the United States and certain other countries: IOS[®]

The following trademarks are trademarks of Apple[®] Inc., registered in the United States and other countries.

- Safari[®]
- iPhone[®]
- iPad[®]

2.1.1 Legal notice concerning trademarks

All company and/or product names and/or all company logos may be trade names, trademarks and/or registered trademarks of Endress+Hauser, its affiliates or of their respective owners with which they are associated.

3 Product description

3.1 Scope of delivery

- KA01579S (DE/EN) these Installation Instructions
- DVD-ROM contains all the necessary software components and additional documentation:
 - SupplyCare Enterprise software
 - KA01579S (SupplyCare Enterprise Getting Started)
 - BA00055S/00/EN (SupplyCare Enterprise Operating Instructions)
 - OPC Libraries
 - OPC Bridge
 - README text file with information about release notations (release notes, readme.txt)
 - Text file with information about the licensing agreements (license_en.txt)

3.2 Licensing agreement

The software components needed for the installation are either freely available or subject to the licensing conditions of their manufacturer.

By installing the software on your computer, you declare that you accept the conditions of the licensing agreement in question.

4 Installation

4.1 System requirements

4.1.1 Internet browser

- These are the browsers that we recommend for this application. The use of any other browser version or technology may lead to limited functionality and visualization.
- Microsoft[®] Edge 93 (or higher)
- Mozilla Firefox 92 (or higher)
- Google Chrome[™] 93 (or higher)

Mobile devices

- Apple[®] iPhone[®] with Safari[®] on iOS 15 (or higher)
- Apple[®] iPad[®] with Safari[®] on iOS 15 (or higher)

Browser configuration

- Active Scripting enabled
- JavaScript enabled
- Allow cookies

4.1.2 Operating systems

- Microsoft[®] Windows[®] 10 (Enterprise)
- Microsoft[®] Windows[®] 11 (Enterprise)
- Microsoft[®] Windows Server[®] 2016 (Standard)
- Microsoft[®] Windows Server[®] 2019 (Standard)
- Microsoft[®] Windows Server[®] 2022 (Standard)

SupplyCare Enterprise runs by default in an Apache Tomcat environment on an application server as a service under Microsoft Windows. Operators and administrators operate the application via web browser from their desks.

Automatic rebooting after a Windows update may fail to start the Windows service SupplyCareEnterprise. As a consequence, SupplyCare Enterprise does not start.

Remedy: Start Windows Services app, select the Windows service SupplyCareEnterprise, start service.

Recommendation: Change the maintenance settings of the computer. Control updates of the operation system manually instead of executing them automatically.

4.1.3 Hardware

- If a version of SupplyCare is already installed and activated, the license must first be returned before changes are made to the computer hardware (Help > License Information > Return License). Activate the software again once the changes to the computer hardware are completed (Help > License Information > Activate Software).
- Processor type: 4 cores, 3 GHz or better
- Main memory (RAM): 8 GB (free memory)
- Hard-disk (HDD) capacity: 50 GB for full-version installation, depending on database size
- Monitor resolution, display: 1280 x 800
- The minimum requirements do not take into account the requirements for the server operating system or other applications (e.g. anti-virus software) installed on the server. The actual requirements and product functions can depend on the system configuration and operating system. The requirements for the hardware will depend greatly on the desired number of users, failsafe performance etc.

4.1.4 Database

PostgreSQL (included in delivery)

4.2 Software installation

4.2.1 Requirements for installation

- Administrator rights on the computer
- All other applications are closed
- The computer meets the system requirements, at the very minimum

4.2.2 Preliminaries

- 1. Insert the SupplyCare Enterprise CD-ROM into the CD/DVD drive.
 - The SupplyCare Enterprise Installation Manager starts automatically. Note: If autostart is not active, double-click the setup.exe file to start the Installation Manager. Then follow the installation instructions.

SupplyCare En Inventory Data Collection	terprise SCE30B Vitualization and Management
Deutsch English	Change menu language to English
Package: V3.0.1	Endress+Hauser

Select the language for the installation.

4.2.3 Installing SupplyCare Enterprise software

The installation can be easily aborted at several points in the installation process. Exceptions are marked accordingly. To cancel the installation, click **Cancel**.

Click **Software** to get an overview of the available software. Note: Under **Documentation**, you can find all the documents that are available on the CD (Getting Started, Operating Instructions, Release Notes and Licensing Agreement).

2.

Click **SupplyCare Enterprise (64 bit)** to initiate the software installation process.

Setup prepares the SupplyCare Setup Wizard, which guides you through the program setup process. The SupplyCare Setup Wizard opens.

Click Next to continue.

└ The SupplyCare Setup Wizard now checks whether the system requirements are satisfied. For example, it verifies whether the system environment variable is set correctly.

Your environment set	ings	Environment settings Now it will be verified, if the settings of your computer are sufficient to install the application.
Operating System:	•	Windows 7
Java Home:	0	bundled
Admin right:	0	true 🕢 Install as service
		< <u>B</u> ack <u>N</u> ext > Cancel

4. Click **Next** to continue.

In the **License Agreement** dialog box, read through the licensing agreement thoroughly before continuing with the installation.

- If you agree to all the terms of the agreement, tick the check box: I accept all terms in the special software terms and conditions. Click Next to continue.
- 7. If you do not agree to the terms of the agreement, click **Cancel** to cancel the installation.

8.	Choose Install Location Choose the folder in which to install SupplyCare Enterprise 3.2.1-SNAPSHOT.
	Setup will install SupplyCare Enterprise 3.2.1-SNAPSHOT in the following folder. To install in a different folder, click Browse and select another folder. Click Next to continue.
	Destination Folder
	C:\Program Files (x86)\Endress+Hauser\ Browse
	Space required: 1.0G8 Space available: 390.5GB
	< Back Next > Cancel

The SupplyCare Setup Wizard suggests a default **Destination Folder** where the SupplyCare Enterprise software will be installed. If you want to choose another destination folder, click **Browse**. Note: The installation path including the drive name can have a maximum of 50 characters. Click **Next** to continue.

9.		Specify your communication port You only have to modify the default setting if another application uses these ports.
	HTTP Port	8080
	HTTPS Port	8443
		< Back Next > Cancel

Specify the web server port. Click Next to continue.

Select the Start Menu can also enter a name	folder in which you v to create a new fold	would like to create t der.	he program's sho	rtcuts

SupplyCare Enterprise is now installed in the folder indicated under **Destination Folder**. Please wait while SupplyCare Enterprise Software is installed. Once the software is fully installed, the **Next** button becomes active.

11. Click **Next** to continue.

Click **Finish** to close the Setup Wizard.

4.2.4 Initial configuration

To complete the installation, some information is required.

Suj	pplyCare E	nterprise vest	n 3.0.1 - Grace petiod (expires in 59 days)	Endress+Hauser 🖪
Suppl In order to a tasks like of The compar provided by	yCare Enterprise complete the setup of SupplyCare B reating other sales. Please provide ny shall be the real name of your o EndrosserHausar. Olick on "Save" 5	Initial Configuration exceptse some information are required, under information have (name etc.) and impany since it will be used later on in the stare this information.	l Hada specify the administrative user for Supplycare Enforcement is email address which will be mentaned periodically since some application. Remember the Lopin name and passwerd for later o	this user is required to perform basic administrative alarm + marks are sent to this address if mecisiany, sa. Enter the license information that was
	First name *	julan .		
	Name *	Dee		
	E-mail *	john.doe@endress.com		
	Login name *	johndoe		
	Password *			
	Confirm persword *			
	Company *	Endress=Hauser		
	Software ID *			

- 1. Specify an administrator for the SupplyCare Enterprise application. This user is needed to perform basic administrative tasks, such as the creation of additional users.
- 2. Specify a valid e-mail address.
- **3.** Provide a login name and password which the administrator will use to log in later.
- 4. Enter the name of the company in which SupplyCare will be used later. The company name will be used later in the application.

5. Enter the software ID. The serial number and the software ID can be found on a separate label in the DVD cover.

Click the 🖹 button to save your entries.

The database is now initialized and the application is started.

Perform the following steps if the database cannot be initialized:

- 1. Specify an administrator for the SupplyCare Enterprise application. This user is needed to perform basic administrative tasks, such as the creation of additional users.
- 2. Start the Windows Services app.
- 3. Select the Windows service **SupplyCareEnterprise** and stop the service.
- 4. Delete the ...\SupplyCareEnterprise\data\database\supplycare folder from the file system.
- 5. Restart the Windows service **SupplyCareEnterprise** using the Windows Services app.
- 6. Start a web browser and enter the address of the page for the initial configuration in the browser's address line to reload the page: http://localhost:8080/SupplyCareEnterpriseGUI/page/dbinit/InitializeDB
- 7. Fill in the fields and save your entries.

4.2.5 Installing the OPC Bridge

You only need to install the **OPC Bridge** if an OPC connection is to be used. Before installing the **OPC Bridge**, make sure that the right versions of .NET framework are installed and enabled on the computer (.NET 3.5 and .NET 4.0).

The Operating Instructions of the **OPC Bridge** are on the DVD and contain information about the system requirements and installation.

Click **OPC Bridge** to initiate the software installation process.

5 Updating the software

Before you can update the SupplyCare Enterprise software from an older version 3.x to a newer version 3.x, the software license must first be updated.

- 1. Update the license $\rightarrow \cong 27$.
- 2. Perform steps 1 to 4 in the section "Installing SupplyCare Enterprise software" → 🗎 6.
- \mathbf{f}

If a software update is to be performed from an older version of SupplyCareEnterprise, the software must be updated on a step-by-step basis for all the versions that have been released since the old version.

Example: Version 3.0 is installed. You would like to upgrade the software to version 3.2. Version 3.1 was released between versions 3.0 and 3.2. Proceed as follows: First update the software from version 3.0 to 3.1, and then from version 3.1 to 3.2.

The installation can be easily aborted at several points in the installation process. Exceptions are marked accordingly. To cancel the installation, click **Cancel**.

The type of installation must be selected. The **Update** type of installation is correct in order to update an existing SupplyCare Enterprise installation.

If **Installation** is selected as the type of installation, the following message appears: "An existing installation was found. Therefore only an update is possible. For a clean install, please uninstall the old version first."

In this case, uninstall the old version. The software can then be re-installed.

	istall, Click Next to continue,
Select the type of install:	Update

Select the **Update** type of installation. Click **Next** to continue.

The following message may appear: "The service has to be stopped while updating the software. Please stop the **SupplyCareEnterprise** service and restart the update again".

 Stop the SupplyCareEnterprise service under: Control Panel > Administrative Tools > Services.

You can then continue the update.

In the **License Agreement** window, read through the licensing agreement thoroughly before continuing with the installation.

 If you agree to all the terms of the agreement, tick the check box: I accept all terms in the special software terms and conditions. Click Next to continue.

3. If you do not agree to the terms of the agreement, click **Cancel** to cancel the installation.

During the software update, information about the update process is displayed:

This setup application saves the existing Supp uninstalls SupplyCare, installs the new versior and migrates the database to the current vers	IlyCare directory, 1 ion.
The backup folder will be <installdir>\Supply</installdir>	CareEnterprise_pre_ <new_version>,</new_version>

- If possible, activate the software directly after login. Software that is not activated has a limited range of functions and can only be used for 60 days.
 - The functions of the software are described in detail in the Operating Instructions. The Operating Instructions are on the DVD supplied.

6.2 Activating the software (with Internet connection)

To perform this activity, you need the access data of the user account in the Endress+Hauser software portal. Link to the software portal: https://software-products.endress.com. Licenses of Endress+Hauser products can be managed in the software portal. If the access data for logging onto the software portal are not known, contact the License Administrator in your company or select the **Create Account** option after the **Activate Software** step.

Please import the Endress+Hauser license update file (*.EHU) created and saved in the Endress+Hauser Software Portal.
Import Browse No file selected. Upload
Step 3
To complete the license update, please save the Endress+Hauser license confirmation file (*.EHC) by clicking the following button. Please transfer this file to a computer connected to the internet afterwards. Please log in in the Endress+Hauser Software Portal (https://www.software-products.endress.com) and upload the *.EHC file.
save 📩
Complete license update

4. Follow the instructions on the screen.

6.8 Changing the software ID

The software ID can only be changed on licenses that are inactive, e.g. during a trial period. If the license in question is already activated, it must be returned before the software ID is changed. To return the license, click the **Return License** button (**Help > License Information > Return License**).

The software does not need to be reinstalled to update the license.

Changing the software ID

1. Click the **Help** menu item.

Click License Information.

- 4. Enter the valid and correct software ID.
- 5. Click **Activate** to activate the software with the new software ID and to save the new software ID.
- 6. Click **Save** to save the new software ID without activating the software. Click **Cancel** to cancel the process.

7 Removing the software

Perform the following steps if SupplyCare Enterprise is to be uninstalled:

- 1. Return the license.
- 2. Stop the SupplyCare Enterprise service manually if necessary.
- 3. Run the executable file **uninstall.exe**.
- 4. Follow the instructions for the uninstall routine.

If the **uninstall.exe** file is executed, not all SupplyCare files are deleted automatically. Files such as backups or copies of SupplyCare that were automatically created before a software update are retained. If SupplyCare is really to be uninstalled completely, these files must be manually deleted from the installation folder.

If the backups and copies of SupplyCare are manually deleted from the installation folder, then data from the deleted SupplyCare installation is no longer available, i.e. a subsequent, new installation of SupplyCare can no longer access this data!

8 Diagnostics and troubleshooting

Not possible to initialize the database during the installation.

- Possible cause: installation process has been disrupted or interrupted.
- Remedial action:
 - Start the Windows Services app.
 - Select the SupplyCareEnterprise Windows service and stop the service.
 - Delete the ...\SupplyCareEnterprise\data\database\supplycare folder from the file system.
 - Restart the SupplyCareEnterprise Windows service using the Windows Services app.
 - Start a web browser and enter the address of the page for the initial configuration in the browser's address line to reload the page: http://localhost:8080/SupplyCareEnterpriseGUI/page/dbinit/InitializeDB
 - Fill in the fields and save your entries.
