1 Overview of CSFxx

1 Liquistation CSFxx, with stainless steel housing (graphic on left, rear view) and with plastic housing (graphic on right, front view)

1 Ventilation grid
2 Metal mesh
3 Filter mat
4 Retaining bracket

2 Intended use

- The parts of the kits are only to be used as retrofit parts or replacement parts for automatic samplers CSFxx. Any other use is not permitted!
- Only use original parts from Endress+Hauser.
- In the W@M Device Viewer, check if the spare part is suitable for the existing device.
3  Authorized installation personnel

- Installation, commissioning, operation and maintenance of the measuring system may be carried out only by specially trained technical personnel.
- The technical personnel must be authorized by the plant operator to carry out the specified activities.
- The electrical connection may be performed only by an electrical technician.
- The technical personnel must have read and understood these Installation Instructions and must follow the instructions they contain.
- Faults at the measuring point may only be rectified by authorized and specially trained personnel.

Repairs not described in the Operating Instructions provided must only be carried out directly at the manufacturer's site or by the service organization.

4  Safety instructions

⚠️ CAUTION
Reduced cooling capacity of the cooling module due to reduced air flow rate (contaminated filter mat).
- Replace the filter mat after six months in service at the very least.
- Adapt the replacement interval to the ambient conditions (shorten if necessary).

⚠️ WARNING
Danger from connected mains voltage!
- Stop active sampling programs.
- Disconnect the sampler from the mains voltage.
- Make sure the sampler is properly disconnected from the mains voltage when performing replacement work.
5 Scope of delivery

5.1 Accessory kit in the CSFxx device delivered

The accessory kit contains the following parts → 2, 5:

1 x Filter mat G2 167x167x5mm

2 Accessory kit in the device delivered
5.2  71217058 kit CSF48 filter set for plastic housing
The kit contains the following parts →  3,  6:

10 x  Filter mat G2 167x167x5mm

5.3  71225573 kit CSF48 filter set for stainless steel housing
The kit contains the following parts →  4,  6:

10 x  Filter mat G2 167x167x5mm
5.4 71225577 kit CSF48 filter retrofitting stainless steel

The kit contains the following parts → 5, 7:

2 x Filter mat G2 167x167x5mm
1 x Retaining bracket

5.5 71623229 kit CSFxx metal grid

The kit contains the following parts → 5, 7:

2 x Metal mesh V4A 160x160mm
6 Additional documentation
Detailed information on the device can be found in the Operating Instructions for the sampler in question and in the other documentation available via:
- www.endress.com/device-viewer
- Smartphone/tablet: Endress+Hauser Operations app

7 Tool list

8 Replacement of spare parts
- Pay attention to the installation instructions provided in the Operating Instructions for the sampler used.

8.1 Replacement in sampler with plastic housing
1. Stop the active sampling program.
2. Disconnect the sampler from the mains voltage and secure it so that it cannot be switched back on.
3. Using a small screwdriver, lever out the left ventilation grid (front view) and push it outwards.

4. Take off the ventilation grid and remove the used filter mat if one is present.

5. Take the new filter mat out of the kit supplied and place it in the ventilation grid.
6. Check the metal mesh for damage and replace if necessary.

7. Click the ventilation grid with the filter mat from the outside back into the frame.

Viewed from the outside, the angled slats of the ventilation grid must slope downwards.

8. Reconnect the sampler to the mains voltage and start the sampling program.

9. Perform a function test with the sampler.
8.2 Replacement/installation in sampler with stainless steel housing

Removing the rear panel of the dosing compartment

1. Stop the active sampling program.
2. Disconnect the sampler from the mains voltage and secure it so that it cannot be switched back on.
3. Open the door of the dosing compartment.
4. Loosen the screw above the dosing compartment with an Allen key to unfasten the rear panel of the dosing compartment.

5. Lift up the rear panel.
6. Remove the rear panel towards the back and put it in a safe place.

Replacing the filter mat

1. Remove the retaining bracket on the ventilation grid on the inside and put it in a safe place.

2. Remove the used filter mat.

3. Check the metal mesh for damage and replace if necessary.

4. Take the new filter mat out of the kit supplied and place it in the ventilation grid.
5. Push the retaining bracket onto the pins (x 4) on the inside of the ventilation grid. The pins of the retaining bracket must lock into place!

Retrofitting the filter mat

1. Take a filter mat out of the kit supplied and place it in the ventilation grid.
2. Push the retaining bracket onto the pins (x 4) on the inside of the ventilation grid. The pins of the retaining bracket must lock into place!

Inserting the rear panel of the dosing compartment

1. Slide the rear panel into the bracket from below and then guide the metal tabs into the slots provided for this purpose.

2. Tighten the screw above the dosing compartment with an Allen key to secure the rear panel of the dosing compartment.
3. Close the door of the dosing compartment.
4. Reconnect the sampler to the mains voltage and start the sampling program.
5. Perform a function test with the sampler.
9 Disposal

» Please observe local regulations!
