

TYPE APPROVAL CERTIFICATE

Certificate No: **TAA00002HC** Revision No: **7**

_				4		410	
	h	10	10	to	CO	rtif\	/"
		13	13	LU	CC		

That the Sensors for Liquid Analysis

with type designation(s)

xPS11D, xPS11E, xPS12D, xPS12E, xLS21D, xLS21E, xLS50D, xLS82D, xPF81D, xPF81E, xUS50D, xUS52D, xUS52D, xCS50D, xCS51D, xFS51, xCS55D, xOS81D, xYK10

Issued to

Endress+Hauser Conducta GmbH+Co. KG Gerlingen, Germany

is found to comply with

DNV rules for classification - Ships, offshore units, and high speed and light craft

Application:

Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV.

Location classes:

Temperature A
Humidity B
Vibration A
EMC B
Enclosure D

Issued at Hamburg on 2024-01-03

for **DNV**

This Certificate is valid until 2024-11-03.

DNV local station: Augsburg

Approval Engineer: Dariusz Lesniewski

Joannis Papanuskas Head of Section

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to 300,000 USD.

Form code: TA 251 Revision: 2021-03 www.dnv.com Page 1 of 9

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Revision No: 7

Approval conditions

The Type Approval covers hardware listed under Product description. When the hardware is used in applications to be classed by DNV, documentation for the actual application is to be submitted for approval by the manufacturer of the application system in each case. Reference is made to DNV rules for classification of ships Pt.4 Ch.9 Control and monitoring systems.

Ex-certification is not covered by this certificate. Application in hazardous area to be approved in each case according to DNV Rules and Ex-Certification / Special Condition for Safe Use listed in valid Ex-certificate issued by a notified/recognized Certification Body.

Place of manufacture

Endress+Hauser Conducta GmbH+Co. KG ... for all products except xPF81D and xPF81E Landsberger Strasse 28 04736 Waldheim, Germany

Endress+Hauser Conducta Inc. ... for xPF81D, xPF81E, xPS11D and xPS11E 4123 East La Palma Avenue, Suite 200 Anaheim, CA 92807 USA

Application/Limitation

"The sensor for fluorescence measurement, the pH electrodes as well as the sensors for the turbidity measurements are generally in compliance with the with the requirements of Resolution MEPC.259(68) – "2015 Guidelines for exhaust gas cleaning systems", Chapter 10.2 "Washwater monitoring" as well as Resolution MEPC.340(77) – "2021 Guidelines for exhaust gas cleaning systems", Chapter 10.2 "Discharge water monitoring".

"The turbidity sensor CUS52D meets the following requirements:

- Permissible deviation of the Turbidity monitoring equipment MEPC.340(77), 10.2.2
- Principle of detection for Turbidity MEPC.259(68), 10.2.5 and MEPC.340(77), 10.2.6)"

Type approval assessment report issued at Magdeburg on 2019-06-05

Tests carried out

Applicable tests according to class guideline DNV-CG-0339, August 2021.

Marking of product

The products to be marked with:

- manufacturer name
- model name
- serial number
- power supply ratings

Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate

Periodical assessment is to be performed after 2 years and after 3.5 years. A renewal assessment will be performed at renewal of the certificate.

END OF CERTIFICATE
