

# Technical Information

## Proline Promass U 500

Coriolis flowmeter for single use

### Application

- Measuring principle operates independently of physical fluid properties such as viscosity or density
- Highest measurement performance for liquids in single-use processes for the Life Sciences Industry

### Device properties

- Standard cable between sensor and transmitter
- Fully traceable cGMP compliance
- One sensor fits four line sizes: 1/8 to 1"
- Remote version with up to 4 I/Os
- Backlit display with touch control and WLAN access
- Standard cable between sensor and transmitter

### Your benefits

- Modern fieldbus communication protocols (2-wire)
- One sensor fits all DN – single variant with 4 disposable line sizes provides highest turndown ratio
- One-hand mounting of disposable – easy commissioning due to intuitive clamping mechanism
- Mounting angle - self drainability or air bubble escape
- Full access to process and diagnostic information – numerous, freely combinable I/Os and Ethernet
- Reduced complexity and variety – freely configurable I/O functionality
- Integrated verification – Heartbeat Technology

Function and system design

Measuring principle

The measuring principle is based on the controlled generation of Coriolis forces. These forces are always present in a system when both translational and rotational movements are superimposed.

$$F_c = 2 \cdot \Delta m (v \cdot \omega)$$

$F_c$  = Coriolis force

$\Delta m$  = moving mass

$\omega$  = rotational velocity

$v$  = radial velocity in rotating or oscillating system

The amplitude of the Coriolis force depends on the moving mass  $\Delta m$ , its velocity  $v$  in the system and thus on the mass flow. Instead of a constant rotational velocity  $\omega$ , the sensor uses oscillation.

In the sensor, two parallel measuring tubes containing flowing fluid oscillate in antiphase, acting like a tuning fork. The Coriolis forces produced at the measuring tubes cause a phase shift in the tube oscillations (see illustration):

- At zero flow (when the fluid is at a standstill) the two tubes oscillate in phase (1).
- Mass flow causes deceleration of the oscillation at the inlet of the tubes (2) and acceleration at the outlet (3).

A0028850

The phase difference (A-B) increases with increasing mass flow. Electrodynamics sensors register the tube oscillations at the inlet and outlet. System balance is ensured by the antiphase oscillation of the two measuring tubes. The measuring principle operates independently of temperature, pressure, viscosity, conductivity and flow profile.

**Density measurement**

The measuring tube is continuously excited at its resonance frequency. A change in the mass and thus the density of the oscillating system (comprising measuring tube and fluid) results in a corresponding, automatic adjustment in the oscillation frequency. The resonance frequency is thus a function of the medium density. The microprocessor utilizes this relationship to obtain a density signal.

**Volume measurement**

Together with the measured mass flow, this is used to calculate the volume flow.

**Temperature measurement**

The temperature of the measuring tube is determined in order to calculate the compensation factor due to temperature effects. This signal corresponds to the process temperature and is also available as an output signal.

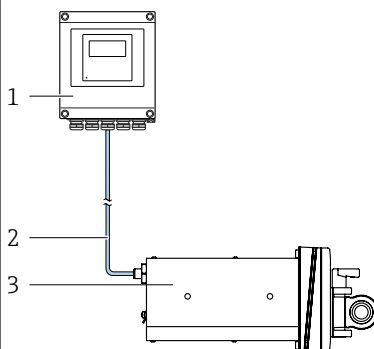

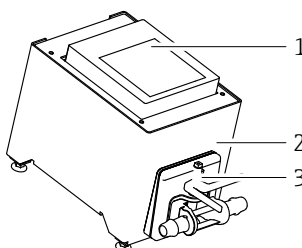

**Measuring system**

The measuring system consists of a transmitter, a sensor and a disposable measuring tube.

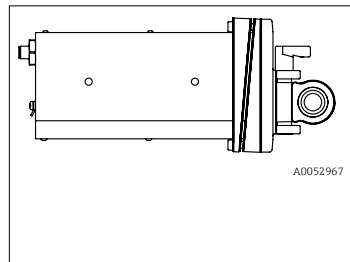

- The device is available for front panel mounting:  
The transmitter and sensor are mounted physically separate from each other and are attached to each other via connecting cables.
- The device is available in a table-top version:  
The transmitter and sensor form a mechanical unit.

**Proline 500 – digital transmitter**

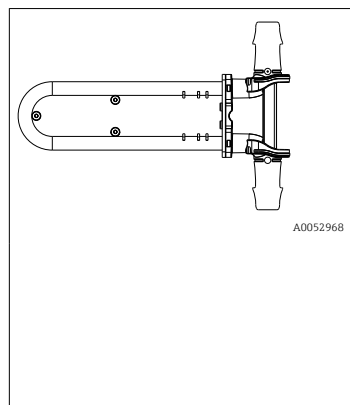

For use in applications not required to meet special requirements due to ambient or operating conditions.

**Reliability**

**IT security**

Our warranty is valid only if the product is installed and used as described in the Operating Instructions. The product is equipped with security mechanisms to protect it against any inadvertent changes to the settings.

IT security measures, which provide additional protection for the product and associated data transfer, must be implemented by the operators themselves in line with their security standards.

**Device-specific IT security**

The device offers a range of specific functions to support protective measures on the operator's side. These functions can be configured by the user and guarantee greater in-operation safety if used correctly. The following list provides an overview of the most important functions:

| Function/interface   | Factory setting    | Recommendation  |
|--|--------------------|---|
| Write protection via hardware write protection switch → 9                  | Not enabled        | On an individual basis following risk assessment          |
| Access code (also applies to web server login or FieldCare connection) → 9 | Not enabled (0000) | Assign a customized access code during commissioning      |
| WLAN (order option in display module)                                      | Enabled            | On an individual basis following risk assessment          |
| WLAN security mode   | Enabled (WPA2-PSK) | Do not change   |
| WLAN passphrase (Password) → 9   | Serial number      | Assign an individual WLAN passphrase during commissioning |
| WLAN mode  | Access point       | On an individual basis following risk assessment          |
| Web server → 9   | Enabled            | On an individual basis following risk assessment          |
| CDI-RJ45 service interface → 9   | -                  | On an individual basis following risk assessment          |

#### *Protecting access via hardware write protection*

Write access to the parameters of the device via the local display, web browser or operating tool (e.g. FieldCare, DeviceCare) can be disabled via a write protection switch (DIP switch on the main electronics module). When hardware write protection is enabled, only read access to the parameters is possible.

Hardware write protection is disabled when the device is delivered.

#### *Protecting access via a password*

Different passwords are available to protect write access to the device parameters or access to the device via the WLAN interface.

- **User-specific access code**  
Protect write access to the device parameters via the local display, web browser or operating tool (e.g. FieldCare, DeviceCare). Access authorization is clearly regulated through the use of a user-specific access code.
- **WLAN passphrase**  
The network key protects a connection between an operating unit (e.g. notebook or tablet) and the device via the WLAN interface which can be ordered as an option.
- **Infrastructure mode**  
When the device is operated in infrastructure mode, the WLAN passphrase corresponds to the WLAN passphrase configured on the operator side.

#### *User-specific access code*

Write access to the device parameters via the local display, web browser or operating tool (e.g. FieldCare, DeviceCare) can be protected by the modifiable, user-specific access code.

#### *WLAN passphrase: Operation as WLAN access point*

A connection between an operating unit (e.g. notebook or tablet) and the device via the WLAN interface, which can be ordered as an optional extra, is protected by the network key. The WLAN authentication of the network key complies with the IEEE 802.11 standard.

When the device is delivered, the network key is pre-defined depending on the device. It can be changed via the **WLAN settings** submenu in the **WLAN passphrase** parameter.

#### *Infrastructure mode*

A connection between the device and WLAN access point is protected by means of an SSID and passphrase on the system side. Please contact the relevant system administrator for access.

#### *General notes on the use of passwords*

- The access code and network key supplied with the device should be changed during commissioning for safety reasons.
- Follow the general rules for generating a secure password when defining and managing the access code and network key.
- The user is responsible for the management and careful handling of the access code and network key.

#### *Access via web server*

The device can be operated and configured via a web browser with the integrated web server. The connection is established via the service interface (CDI-RJ45) or the WLAN interface.

The web server is enabled when the device is delivered. The web server can be disabled via the **Web server functionality** parameter if necessary (e.g., after commissioning).

The device and status information can be hidden on the login page. This prevents unauthorized access to the information.

Detailed information on the device parameters:  
"Description of device parameters" document .

#### *Access via service interface (CDI-RJ45)*

The device can be connected to a network via the service interface (CDI-RJ45). Device-specific functions guarantee the secure operation of the device in a network.

The use of relevant industrial standards and guidelines that have been defined by national and international safety committees, such as IEC/ISA62443 or the IEEE, is recommended. This includes organizational security measures such as the assignment of access authorization as well as technical measures such as network segmentation.

# Input

**Measured variable**

**Direct measured variables**

- Mass flow
- Density
- Temperature

**Calculated measured variables**

- Volume flow
- Corrected volume flow
- Reference density

**Measuring range**

**Measuring range for liquids**

Full scale value defined at 0.2 bar pressure loss

| DN   |      | Measuring range full scale values $\dot{m}_{\min(F)}$ to $\dot{m}_{\max(F)}$ |            |
|------|------|--|------------|
| [mm] | [in] | [kg/min]   | [lb/min]   |
| 4    | 1/8  | 0 to 2   | 0 to 4.4   |
| 6    | 1/4  | 0 to 4.8   | 0 to 10.6  |
| 15   | 1/2  | 0 to 28.6  | 0 to 63.1  |
| 25   | 1    | 0 to 75  | 0 to 165.3 |

**Recommended measuring range**

 Flow limit →  40

**Operable flow range**

Over 1000 : 1.

Flow rates above the preset full scale value do not override the electronics unit, with the result that the totalizer values are registered correctly.

**Input signal**

**Output and input variants**

→  13

**External measured values**

To increase the measurement accuracy of certain measured variables, the automation system can continuously write various measured values to the measuring device:

- Operating pressure to increase measurement accuracy (Endress+Hauser recommends the use of a pressure measuring device for absolute pressure)
- Medium temperature to increase measurement accuracy

*Current input*

The measured values are written from the automation system to the measuring device via the current input →  11.

*Digital communication*

The measured values can be written by the automation system via:

- Modbus RS485
- PROFINET with Ethernet-APL/SPE

**Current input 0/4 to 20 mA**

|                      |   |
|----------------------|---|
| <b>Current input</b> | 0/4 to 20 mA (active/passive)   |
| <b>Current span</b>  | <ul style="list-style-type: none"> <li>■ 4 to 20 mA (active)</li> <li>■ 0/4 to 20 mA (passive)</li> </ul> |

|                                 |  |
|---------------------------------|--|
| <b>Resolution</b>               | 1 $\mu$ A  |
| <b>Voltage drop</b>             | Typically: 0.6 to 2 V for 3.6 to 22 mA (passive)   |
| <b>Maximum input voltage</b>    | $\leq$ 30 V (passive)  |
| <b>Open-circuit voltage</b>     | $\leq$ 28.8 V (active)   |
| <b>Possible input variables</b> | <ul style="list-style-type: none"> <li>▪ Pressure</li> <li>▪ Temperature</li> <li>▪ Density</li> </ul> |

#### Status input

|                             |  |
|-----------------------------|--|
| <b>Maximum input values</b> | <ul style="list-style-type: none"> <li>▪ DC -3 to 30 V</li> <li>▪ If status input is active (ON): <math>R_i &gt; 3 \text{ k}\Omega</math></li> </ul>                   |
| <b>Response time</b>        | Configurable: 5 to 200 ms  |
| <b>Input signal level</b>   | <ul style="list-style-type: none"> <li>▪ Low signal: DC -3 to +5 V</li> <li>▪ High signal: DC 12 to 30 V</li> </ul>  |
| <b>Assignable functions</b> | <ul style="list-style-type: none"> <li>▪ Off</li> <li>▪ Reset the individual totalizers separately</li> <li>▪ Reset all totalizers</li> <li>▪ Flow override</li> </ul> |

# Output

## Output and input variants

Depending on the option selected for output/input 1, different options are available for the other outputs and inputs. Only one option can be selected for each output/input 1 to 4. The following tables must be read vertically (↓).

### Output/input 1 and options for output/input 2

 Options for output/input 3 and 4 →  14

| Order code for "Output; input 1" (020) →  | Possible options |   |   |   |   |   |   |   |   |    |   |   |    |

| <b>Switching behavior</b>                   | Can be set to: <ul style="list-style-type: none"> <li>▪ NO (normally open), factory setting</li> <li>▪ NC (normally closed)</li> </ul>   |
| <b>Maximum switching capacity (passive)</b> | <ul style="list-style-type: none"> <li>▪ DC 30 V, 0.1 A</li> <li>▪ AC 30 V, 0.5 A</li> </ul>   |
| <b>Assignable functions</b>                 | <ul style="list-style-type: none"> <li>▪ Disable</li> <li>▪ On</li> <li>▪ Diagnostic behavior</li> <li>▪ Limit             <ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> <li>▪ Totalizer 1-3</li> </ul> </li> <li>▪ Flow direction monitoring</li> <li>▪ Status             <ul style="list-style-type: none"> <li>▪ Partially filled pipe detection</li> <li>▪ Low flow cut off</li> </ul> </li> </ul> <p> The range of options increases if the measuring device has one or more application packages.</p> |

### User-configurable input/output

**One** specific input or output is assigned to a user-configurable input/output (configurable I/O) during device commissioning.

The following inputs and outputs are available for assignment:

- Choice of current output: 4 to 20 mA (active), 0/4 to 20 mA (passive)
- Pulse/frequency/switch output
- Choice of current input: 4 to 20 mA (active), 0/4 to 20 mA (passive)
- Status input

The technical values correspond to those of the inputs and outputs described in this section.

### Signal on alarm

Depending on the interface, failure information is displayed as follows:

#### PROFINET with Ethernet-APL/SPE

|                           |  |
|---------------------------|--|
| <b>Device diagnostics</b> | Diagnostics according to PROFINET PA Profile 4 |
|---------------------------|--|

#### Modbus RS485

| The terminal assignment depends on the specific device version ordered →  13. |       |                |        |                |        |                |        |                |        |

#### Transmitter and sensor connection housing: connecting cable

The sensor and transmitter, which are mounted in separate locations, are interconnected by a connecting cable. The cable is connected via the sensor connection housing and the transmitter housing.

Terminal assignment and connection of the connecting cable:

Proline 500 – digital →  24

### Available device plugs

#### Device plugs for fieldbus systems:

Order code for "Input; output 1"

Option **RB** "PROFINET with Ethernet-APL/SPE" →  23

#### Device plug for connecting to the service interface:

Order code for "Accessory mounted"

Option **NB**, RJ45 M12 adapter (service interface) →  23

Order code for "Input; output 1", option RB "PROFINET with Ethernet-APL/SPE"

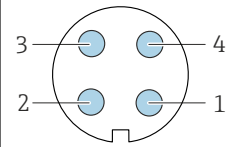

| Order code<br>"Electrical connection" | Cable entry/connection → 25 |   |
|---------------------------------------|-----------------------------|---|
|                                       | 2                           | 3 |
| L, N, P, U                            | M12 plug × 1                | - |

Order code for "Accessory mounted", option NB "Adapter RJ45 M12 (service interface)"

| Order code<br>"Accessory mounted" | Cable entry/coupling → 25 |                  |
|-----------------------------------|---------------------------|------------------|
|                                   | Cable entry<br>2          | Cable entry<br>3 |
| NB                                | Plug M12 × 1              | -                |

Pin assignment, device plug

PROFINET with Ethernet-APL /SPE

|  | Pin                | Assignment                | Coding<br>A | Plug/socket<br>Socket |
|---|--------------------|---------------------------|-------------|-----------------------|
|   | 1                  | APL signal -              |             |                       |
|   | 2                  | APL signal +              |             |                       |
|   | 3                  | Cable shield <sup>1</sup> |             |                       |
|   | 4                  | Not used                  |             |                       |
|   | Metal plug housing | Cable shield              |             |                       |
| <sup>1</sup> If a cable shield is used  |                    |                           |             |                       |

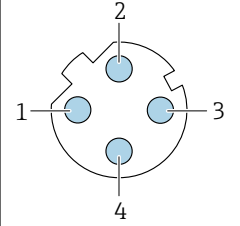

Recommended plug:

- Binder, series 713, part no. 99 1430 814 04
- Phoenix, part no. 1413934 SACC-FS-4QO SH PBPA SCO

Service interface for

Order code for "Accessories mounted", option **NB**: Adapter RJ45 M12 (service interface)

| <br>A0032047 | Pin    | Assignment  |    |  |
|---|--------|-------------|----|--|
|   | 1      | +           | Tx |  |
|   | 2      | +           | Rx |  |
|   | 3      | -           | Tx |  |
|   | 4      | -           | Rx |  |
|   | Coding | Plug/socket |    |  |
| D   | Socket |             |    |  |

Recommended plug:

- Binder, series 825, part no. 99 3729 810 04
- Phoenix, part no. 1543223 SACC-M12MSD-4Q

Supply voltage

| Order code<br>"Power supply" | Terminal voltage |            | Frequency range |
|------------------------------|------------------|------------|-----------------|
| Option I                     | DC 24 V          | ±20%       | -               |
|                              | AC 100 to 240 V  | -15...+10% | 50/60 Hz        |

Power consumption

**Transmitter**  
Max. 10 W (active power)

|                   |   |
|-------------------|---|
| switch-on current | Max. 36 A (<5 ms) as per NAMUR Recommendation NE 21 |
|-------------------|---|

**Current consumption****Transmitter**

- Max. 400 mA (24 V)
- Max. 200 mA (110 V, 50/60 Hz; 230 V, 50/60 Hz)

**Power supply failure**

- Totalizers stop at the last value measured.
- Depending on the device version, the configuration is retained in the device memory or in the pluggable data memory (HistoROM DAT).
- Error messages (incl. total operated hours) are stored.

**Overcurrent protection element**

The device must be operated with a dedicated circuit breaker, as it does not have an ON/OFF switch of its own.

- The circuit breaker must be easy to reach and labeled accordingly.
- Permitted nominal current of the circuit breaker: 2 A up to maximum 10 A.

**Electrical connection****Connection of connecting cable: Proline 500 – digital**

A0053068

☑ 1 Order code for "Device version", option NA "Front panel mounting"

- 1 M12 socket for fitting the connecting cable to the transmitter housing
- 2 Terminal connection for potential equalization (PE)
- 3 Connecting cable with M12 plug and M12 socket
- 4 M12 plug for fitting the connecting cable to the sensor
- 5 Terminal connection for potential equalization (PE)

A0053744

☑ 2 Order code for "Device version", option NE "Table version"

- 1 M12 socket for fitting the connecting cable to the transmitter housing
- 2 Terminal connection for potential equalization (PE)
- 3 Connecting cable with M12 plug and M12 socket
- 4 M12 plug for fitting the connecting cable to the sensor
- 5 Terminal connection for potential equalization (PE)
- 6 Fixed connection between the potential matching (PE)

Pin assignment, device plug

Connection at the transmitter

|               | Pin | Color <sup>1)</sup> | Assignment         |                    | Connection to terminal |

1) Cable colors of connecting cable

Transmitter connection

-  ■ Terminal assignment →  22
-  ■ Device plug pin assignment →  23

## Transmitter connection: Proline 500 – digital

A0028200

- 1 Terminal connection for supply voltage
- 2 Terminal connection for signal transmission, input/output
- 3 Terminal connection for signal transmission, input/output
- 4 Terminal connection for connecting cable between sensor and transmitter
- 5 Terminal connection for signal transmission, input/output; optional: connection for external WLAN antenna
- 6 Terminal connection for potential equalization (PE)

**i** An adapter for the RJ45 to the M12 plug is optionally available:  
Order code for "Accessories", option **NB**: "Adapter RJ45 M12 (service interface)"

The adapter connects the service interface (CDI-RJ45) to an M12 plug mounted in the cable entry. The connection to the service interface can thus be established via an M12 plug without opening the device.

**i** Network connection (DHCP client) via service interface (CDI-RJ45) → 51

## Connection examples

## PROFINET with Ethernet-APL/SPE

A0047536

**i** 3 Connection example for PROFINET with Ethernet-APL

- 1 Cable shield
- 2 Measuring device
- 3 Local grounding
- 4 Potential equalization
- 5 Trunk or TCP
- 6 Field switch

Modbus RS485

A0028765

4 Connection example for Modbus RS485, non-hazardous area and Zone 2; Class I, Division 2

- 1 Control system (e.g. PLC)
- 2 Cable shield provided at one end. The cable shield must be grounded at both ends to comply with EMC requirements; observe cable specifications
- 3 Distribution box
- 4 Transmitter

Modbus with TCP-APL

A0047536

5 Connection example for Modbus with TCP-APL

- 1 Cable shield
- 2 Measuring device
- 3 Local grounding
- 4 Potential equalization
- 5 Trunk or TCP
- 6 Field switch

Current output 4-20 mA

A0028758

6 Connection example for 4-20 mA current output (active)

- 1 Automation system with current input (e.g. PLC)
- 2 Analog display unit: observe maximum load
- 3 Transmitter

A0028759

7 Connection example for 4-20 mA current output (passive)

- 1 Automation system with current input (e.g. PLC)
- 2 Active barrier for power supply (e.g. RN221N)
- 3 Analog display unit: observe maximum load
- 4 Transmitter

Pulse/frequency output

A0028761

8 Connection example for pulse/frequency output (passive)

- 1 Automation system with pulse/frequency input (e.g. PLC with 10 kΩ pull-up or pull-down resistor)
- 2 Power supply
- 3 Transmitter: observe input values → 16

Switch output

A0028760

9 Connection example for switch output (passive)

- 1 Automation system with switch input (e.g. PLC with a 10 kΩ pull-up or pull-down resistor)
- 2 Power supply
- 3 Transmitter: observe input values → 16

Double pulse output

A0029280

10 Connection example for double pulse output (active)

- 1 Automation system with double pulse input (e.g. PLC)
- 2 Transmitter: observe input values → 17
- 3 Double pulse output
- 4 Double pulse output (slave), phase-shifted

A0029279

11 Connection example for double pulse output (passive)

- 1 Automation system with double pulse input (e.g. PLC with a 10 kΩ pull-up or pull-down resistor)
- 2 Power supply
- 3 Transmitter: observe input values → 17
- 4 Double pulse output
- 5 Double pulse output (slave), phase-shifted

Relay output

A0028760

12 Connection example for relay output (passive)

- 1 Automation system with relay input (e.g. PLC)
- 2 Power supply
- 3 Transmitter: observe input values → 18

Current input

A0028915

13 Connection example for 4 to 20 mA current input

- 1 Power supply
- 2 Terminal box
- 3 External measuring device (to read in pressure or temperature, for instance)
- 4 Transmitter

Status input

A0028764

14 Connection example for status input

- 1 Automation system with status output (e.g. PLC)
- 2 Power supply
- 3 Transmitter

**Potential equalization**

**Requirements**

For potential equalization:

- Pay attention to in-house grounding concepts
- Take account of operating conditions like the pipe material and grounding
- Medium, Connect the sensor and transmitter to the same electric potential <sup>1)</sup>
- Use a ground cable with a minimum cross-section of 6 mm<sup>2</sup> (10 AWG) and a cable lug for potential equalization connections

**Terminals**

Spring-loaded terminals: Suitable for strands and strands with ferrules.  
 Conductor cross-section 0.2 to 2.5 mm<sup>2</sup> (24 to 12 AWG).

**Cable entries**

- Cable gland: M20 × 1.5 with cable Ø 6 to 12 mm (0.24 to 0.47 in)
- Thread for cable entry:
  - NPT ½"
  - G ½"
  - M20

**Cable specification**

**Permitted temperature range**

- The installation guidelines that apply in the country of installation must be observed.
- The cables must be suitable for the minimum and maximum temperatures to be expected.

**Power supply cable (incl. conductor for the inner ground terminal)**

Standard installation cable is sufficient.

**Protective grounding cable for the outer ground terminal**

Conductor cross-section < 2.1 mm<sup>2</sup> (14 AWG)

The use of a cable lug enables the connection of larger cross-sections.

The grounding impedance must be less than 2 Ω.

**Signal cable**

*PROFINET with Ethernet-APL/SPE*

The reference cable type for APL segments is fieldbus cable type A, MAU type 1 and 3 (specified in IEC 61158-2). This cable meets the requirements for intrinsically safe applications according to IEC TS 60079-47 and can also be used in non-intrinsically safe applications.

|                          |                 |
|--------------------------|-----------------|
| <b>Cable type</b>        | A               |
| <b>Cable capacitance</b> | 45 to 200 nF/km |
| <b>Loop resistance</b>   | 15 to 150 Ω/km  |
| <b>Cable inductance</b>  | 0.4 to 1 mH/km  |

Further details are provided in the Ethernet-APL/SPE Engineering Guideline (<https://www.ethernet-apl.org>).

*Modbus RS485*

The EIA/TIA-485 standard specifies two types of cable (A and B) for the bus line which can be used for every transmission rate. Cable type A is recommended.

|                                 |  |
|---------------------------------|--|
| <b>Cable type</b>               | A  |
| <b>Characteristic impedance</b> | 135 to 165 Ω at a measuring frequency of 3 to 20 MHz |
| <b>Cable capacitance</b>        | < 30 pF/m  |
| <b>Wire cross-section</b>       | > 0.34 mm <sup>2</sup> (22 AWG)                      |

1) Order code for "Device version", option NE "Table version": Sensor and transmitter are wired internally.

|                        |  |
|------------------------|--|
| <b>Cable type</b>      | Twisted pairs  |
| <b>Loop resistance</b> | $\leq 110 \Omega/\text{km}$  |
| <b>Signal damping</b>  | Max. 9 dB over the entire length of the cable cross-section  |
| <b>Shield</b>          | Copper braided shielding or braided shielding with foil shield. When grounding the cable shield, observe the grounding concept of the plant. |

*Modbus TCP-APL*

Twisted, shielded two-wire cable. Cable type A is recommended .

The cable parameters are required for use in a 2-WISE intrinsically safe system.

|                          |                              |
|--------------------------|------------------------------|
| <b>Cable type</b>        | A                            |
| <b>Cable capacitance</b> | 45 to 200 nF/km              |
| <b>Loop resistance</b>   | 15 to 150 $\Omega/\text{km}$ |
| <b>Inductance</b>        | 0.4 to 1 mH/km               |

*Current output 0/4 to 20 mA*

Standard installation cable is sufficient.

*Pulse /frequency /switch output*

Standard installation cable is sufficient.

*Double pulse output*

Standard installation cable is sufficient.

*Relay output*

Standard installation cable is sufficient.

*Current input 0/4 to 20 mA*

Standard installation cable is sufficient.

*Status input*

Standard installation cable is sufficient.

**Choice of connecting cable between the transmitter and sensor**

*A: Connecting cable between sensor and transmitter: Proline 500 – digital*

*Standard cable*

A standard cable with the following specifications can be used as the connecting cable.

|                            |   |
|----------------------------|---|
| <b>Design</b>              | 2x2 cores (twisted pairs); stranded CU wires with common shield |
| <b>Shield</b>              | Tin-plated copper braid, optical cover $\geq 85 \%$             |
| <b>Loop resistance</b>     | Power supply line (+, -): maximum 10 $\Omega$                   |
| <b>Cable length</b>        | Maximum 300 m (900 ft), see the following table.                |
| <b>Device plug, side 1</b> | M12 socket, 5-pin, A-coded.                                     |
| <b>Device plug, side 2</b> | M12 plug, 5-pin, A-coded.                                       |
| <b>Pins 1+2</b>            | Connected cores as twisted pair.                                |
| <b>Pins 3+4</b>            | Connected cores as twisted pair.                                |

| Cross-section                 | Cable length [max.] |
|-------------------------------|---------------------|
| 0.34 mm <sup>2</sup> (AWG 22) | 80 m (240 ft)       |
| 0.50 mm <sup>2</sup> (AWG 20) | 120 m (360 ft)      |
| 0.75 mm <sup>2</sup> (AWG 18) | 180 m (540 ft)      |
| 1.00 mm <sup>2</sup> (AWG 17) | 240 m (720 ft)      |
| 1.50 mm <sup>2</sup> (AWG 15) | 300 m (900 ft)      |

*connecting cable*

|   |  |
|---|--|
| <b>Design</b>                           | 2 × 2 × 0.34 mm <sup>2</sup> PUR cable with common shield  |
| <b>Flame resistance</b>                 | According to DIN EN 60332-1-2 (60 seconds)   |
| <b>Oil resistance</b>                   | According to DIN EN 60811-2-1 (for 168h at 90°C)   |
| <b>Shield</b>                           | Tin-plated copper braid  |
| <b>Continuous operating temperature</b> | When mounted in a fixed position: -40 to +105 °C (-40 to +221 °F); when cable can move freely: -25 to +105 °C (-13 to +221 °F) |
| <b>Available cable lengths</b>          | Fixed: 2 m (6 ft), 5 m (15 ft), 10 m (30 ft)   |
| <b>Device plug, side 1</b>              | M12 socket, 5-pin, A-coded   |
| <b>Device plug, side 2</b>              | M12 plug, 5-pin, A-coded   |

**Overvoltage protection**

|  |   |
|--|---|
| <b>Mains voltage fluctuations</b>        | →  23 |
| <b>Overvoltage category</b>              | Overvoltage category II   |
| <b>Short-term, temporary overvoltage</b> | Between cable and ground up to 1200 V, for max. 5 s                                     |
| <b>Long-term, temporary overvoltage</b>  | Between cable and ground up to 500 V  |

## Performance characteristics

**Reference operating conditions**

- Error limits based on ISO 11631
  - Water
    - +15 to +45 °C (+59 to +113 °F)
    - 2 to 6 bar (29 to 87 psi)
  - Data as indicated in the calibration protocol
  - Accuracy based on accredited calibration rigs according to ISO 17025
-  To obtain measured errors, use the *Applicator* sizing tool →  58

**Maximum measurement error**

o.r. = of reading; 1 g/cm<sup>3</sup> = 1 kg/l; T = medium temperature

 In non-condensing environment.

**Base accuracy**

 Design fundamentals →  35

*Mass flow and volume flow (liquids)*

±0.5 % o.r.

*Temperature*

±2.5 °C (±4.5 °F)

**Zero point stability**

| DN   |               | Zero point stability |          |
|------|---------------|----------------------|----------|
| [mm] | [in]          | [kg/min]             | [lb/min] |
| 4    | $\frac{1}{8}$ | 0.0006               | 0.00132  |
| 6    | $\frac{1}{4}$ | 0.0023               | 0.00507  |
| 15   | $\frac{1}{2}$ | 0.0082               | 0.01808  |
| 25   | 1             | 0.0227               | 0.05004  |

**Flow values**

Flow values as turndown parameters depending on nominal diameter.

*SI units*

**Accuracy of outputs**

The outputs have the following base accuracy specifications.

*Current output*

|          |                     |
|----------|---------------------|
| Accuracy | $\pm 5 \mu\text{A}$ |
|----------|---------------------|

*Pulse/frequency output*

o.r. = of reading

|          |  |
|----------|--|
| Accuracy | Max. $\pm 50$ ppm o.r. (over the entire ambient temperature range) |
|----------|--|

**Repeatability**

o.r. = of reading;  $1 \text{ g/cm}^3 = 1 \text{ kg/l}$ ; T = medium temperature

**Base repeatability**

 Design fundamentals →  35

*Mass flow and volume flow (liquids)*

±0.25 % o.r.

*Density (liquids)*

- Basic accuracy:  
±0.01 g/cm<sup>3</sup>
- Repeatability:  
±0.005 g/cm<sup>3</sup>

*Temperature*

±0.125 °C (±0.225 °F)

**Response time**

The response time depends on the configuration (damping).

**Influence of ambient temperature**

**Current output**

|                                |              |
|--------------------------------|--------------|
| <b>Temperature coefficient</b> | Max. 1 µA/°C |
|--------------------------------|--------------|

**Pulse/frequency output**

|                                |   |
|--------------------------------|---|
| <b>Temperature coefficient</b> | No additional effect. Included in accuracy. |
|--------------------------------|---|

**Influence of medium temperature**

**Mass flow**

o.f.s. = of full scale value

If there is a difference between the temperature during zero adjustment and the process temperature, the additional measurement error of the sensors is typically ±0.0002 %o.f.s./°C (±0.0001 % o. f.s./°F).

The influence is reduced when the zero adjustment is performed at process temperature.

**Density**

Density performance is identical across the entire temperature range.

**Temperature**

±0.005 · T °C (± 0.005 · (T - 32) °F)

**Influence of medium pressure**

A difference between the calibration pressure and process pressure does not affect accuracy.

A pressure of >0.2 bar is required for accurate measurement. Pressures lower than this can lead to incorrect measurement results due to cavitation and the formation of air bubbles.

**Design fundamentals**

o.r. = of reading, o.f.s. = of full scale value

BaseAccu = base accuracy in % o.r., BaseRepeat = base repeatability in % o.r.

MeasValue = measured value; ZeroPoint = zero point stability

*Calculation of the maximum measured error as a function of the flow rate*

| Flow rate  | Maximum measured error in % o.r.   |
|--|--|
| $\geq \frac{\text{ZeroPoint}}{\text{BaseAccu}} \cdot 100$<br><small>A0021332</small> | $\pm \text{BaseAccu}$<br><small>A0021339</small>                                     |
| $< \frac{\text{ZeroPoint}}{\text{BaseAccu}} \cdot 100$<br><small>A0021333</small>    | $\pm \frac{\text{ZeroPoint}}{\text{MeasValue}} \cdot 100$<br><small>A0021334</small> |

Calculation of the maximum repeatability as a function of the flow rate

| Flow rate  | Maximum repeatability in % o.r.  |
|--|--|
| $\geq \frac{1/2 \cdot \text{ZeroPoint}}{\text{BaseRepeat}} \cdot 100$<br><small>A0021335</small> | $\pm \text{BaseRepeat}$<br><small>A0021340</small>   |
| $< \frac{1/2 \cdot \text{ZeroPoint}}{\text{BaseRepeat}} \cdot 100$<br><small>A0021336</small>    | $\pm 1/2 \cdot \frac{\text{ZeroPoint}}{\text{MeasValue}} \cdot 100$<br><small>A0021337</small> |

## Mounting

### Installation point

#### Front panel mounting

A0053021

15 Order code for "Device version", option NA "Front panel mounting"

#### Table version

A0053020

16 Order code for "Device version", option NE "Table version"

1 Secure the device to the table with the supplied cable through the hole on the back.

### Orientation

| Orientation  |                             |
|--|-----------------------------|
| Wedge pointing upwards<br>Gas accumulation in the measuring tube possible.<br>Self-draining.               | <br><small>A0053028</small> |
| Wedge pointing downwards<br>Recommended orientation<br>Solids accumulation in the measuring tube possible. | <br><small>A0053029</small> |

**Inlet and outlet runs**

No special precautions need to be taken for fittings that create turbulence, such as valves, elbows or T-pieces, as long as no cavitation occurs →  40.

**Mounting the transmitter housing**

**Proline 500 – digital transmitter**

Wall mounting

Required tools:

Drill with drill bit  $\varnothing$  6.0 mm

17 Engineering unit mm (in)

L Depends on order code for "Transmitter housing"

Order code for "Transmitter housing"

Option A, aluminum, coated: L = 14 mm (0.55 in)

**Special mounting instructions**

**Drainability**

When installed with the wedge pointing upwards, the measuring tubes can be drained completely and protected against buildup.

**Sterility**

**i** When installing in sterile applications, please refer to the information in the "Certificates and approvals/sterility" section → 54

**Biotech**

**i** When installing in biotech applications, please refer to the information in the "Certificates and approvals/biotech" section → 54

**Environment**

**Ambient temperature range**

|                                  |  |
|----------------------------------|--|
| Measuring device                 | +5 to +40 °C (+41 to +104 °F)  |
| Readability of the local display | -20 to +60 °C (-4 to +140 °F)<br>The readability of the display may be impaired at temperatures outside the temperature range. |

**i** Dependency of ambient temperature on medium temperature → 40

**Storage temperature**

-40 to +70 °C (-40 to +158 °F)

**Shelf life** Disposable measuring tube  
 ■ Maximum 5 years pre-gamma  
 ■ Maximum 2 years post-gamma

**Climate class** DIN EN 60068-2-38 (test Z/AD)

**Relative humidity** The device is suitable for indoor use with a relative humidity of 5 to 40 %.

**Operating height** According to EN 61010-1  
 ■ ≤ 2 000 m (6 562 ft)  
 ■ > 2 000 m (6 562 ft) with additional overvoltage protection (e.g. Endress+Hauser HAW Series)

**Degree of protection**

**Transmitter**

- IP66/67, Type 4X enclosure, suitable for pollution degree 4
- When the housing is open: IP20, Type 1 enclosure, suitable for pollution degree 2
- Display module: IP20, Type 1 enclosure, suitable for pollution degree 2

**Sensor**

- IP54
- With housing open: IP20

**External WLAN antenna**

IP67

**Shock and vibration resistance**

**Vibration sinusoidal, in accordance with IEC 60068-2-6**

Sensor

- 2 to 8.4 Hz, 3.5 mm peak
- 8.4 to 2 000 Hz, 1 g peak

Transmitter

- 2 to 8.4 Hz, 7.5 mm peak
- 8.4 to 2 000 Hz, 2 g peak

**Vibration broad-band random, according to IEC 60068-2-64**

Transmitter

- 10 to 200 Hz, 0.01 g<sup>2</sup>/Hz
- 200 to 2 000 Hz, 0.003 g<sup>2</sup>/Hz
- Total: 2.70 g rms

**Shock half-sine, according to IEC 60068-2-27**

Transmitter

6 ms 50 g

**Rough handling shocks according to IEC 60068-2-31**

**Mechanical load** Transmitter housing, sensor and disposable measuring tube:  
 ■ Protect against mechanical effects, such as shock or impact  
 ■ Do not use as a ladder or climbing aid

**Electromagnetic compatibility (EMC)** As per IEC/EN 61326 and NAMUR Recommendation 21 (NE 21)

 Details are provided in the Declaration of Conformity.

 This unit is not intended for use in residential environments and cannot guarantee adequate protection of the radio reception in such environments.

## Process

|                                 |  |
|---------------------------------|--|
| <b>Medium temperature range</b> | 3 to 60 °C (37.4 to 140 °F)  |
| <b>Medium density</b>           | 800 to 1 500 kg/m <sup>3</sup> (1 764 to 3 307 lb/cf)  |
| <b>Medium pressure</b>          | 6 bar (87 psi)   |
| <b>Flow limit</b>               | <p>Select the nominal diameter by optimizing between the required flow range and permissible pressure loss.</p> <p> For an overview of the full scale values for the measuring range, see the "Measuring range" section →  11</p> <ul style="list-style-type: none"> <li>▪ The minimum recommended full scale value is approx. 1/20 of the maximum full scale value</li> <li>▪ In most applications, 20 to 50 % of the maximum full scale value can be considered ideal</li> <li>▪ A low full scale value must be selected for abrasive media (such as liquids with entrained solids): flow velocity &lt; 1 m/s (&lt; 3 ft/s).</li> </ul> <p> To calculate the flow limit, use the <i>Applicator</i> sizing tool →  58</p> |
| <b>Pressure loss</b>            | <p> To calculate the pressure loss, use the <i>Applicator</i> sizing tool →  58</p>  |
| <b>Static pressure</b>          | <p>It is important that cavitation does not occur, or that gases entrained in the liquids do not outgas. This is prevented by means of a sufficiently high static pressure.</p> <p>For this reason, the following mounting locations are recommended:<br/>Downstream from pumps (no danger of vacuum)</p>  |
| <b>Vibrations</b>               | The operational reliability of the measuring system is not affected by plant vibrations.   |

## Weight

### Transmitter

Proline 500 – digital aluminum: 2.4 kg (5.3 lbs)

### Weight in SI units

- Sensor: 8.65 kg
- Table version: 12.1 kg
- Disposable measuring tube: 0.6 kg

### Weight in US units

- Sensor: 19.07 lbs
- Table version: 26.68 lbs
- Disposable measuring tube: 1.32 lbs

## Materials

### Transmitter housing

*Housing of Proline 500 – digital transmitter*

Order code for "Transmitter housing":

Option A "Aluminum coated": aluminum, AlSi10Mg, coated

*Window material*

Order code for "Transmitter housing":

Option A "Aluminum, coated": glass

### Cable entries/cable glands

| Cable entries and adapters   | Material            |
|--|---------------------|
| Cable gland M20 × 1.5  | Plastic             |
| <ul style="list-style-type: none"> <li>■ Adapter for cable entry with female thread G ½"</li> <li>■ Adapter for cable entry with female thread NPT ½"</li> </ul> | Nickel-plated brass |

### Connecting cables

**i** UV rays can impair the cable outer sheath. Protect the cable from exposure to sun as much as possible.

*Connecting cable for sensor - Proline 500 – digital transmitter*

PE-X cable with copper shield

**Disposable measuring tube**

- Measuring tubes:  
Stainless steel 1.4435, 316 L
- Hose connection nipple:  
Makrolon Rx 1805 polycarbonate

Available process connections

**Accessories**

*External WLAN antenna*

- Antenna: ASA plastic (acrylonitrile styrene acrylate) and nickel-plated brass
- Adapter: Stainless steel and nickel-plated brass
- Cable: Polyethylene
- Plug: Nickel-plated brass
- Angle bracket: Stainless steel

---

**Surface roughness**

All data refer to parts in contact with the medium. The following surface roughness categories can be ordered.

- Steel:  
Ra<sub>max</sub> = 0.76 µm (30 µin) mechanically polished
- Plastic:  
Ra<sub>max</sub> = 0.76 µm (30 µin)

## Display and user interface

---

**Operation concept**

**Operator-oriented menu structure for user-specific tasks**

- Commissioning
- Operation
- Diagnosis
- Expert level

**Quick and safe commissioning**

- Guided menus ("Make-it-run" wizards) for applications
- Menu guidance with brief descriptions of the individual parameter functions
- Access to the device via web server
- WLAN access to the device via mobile handheld terminal, tablet or smart phone

**Reliable operation**

- Operation in local language
- Uniform operating philosophy applied to device and operating tools
- If replacing electronic modules, transfer the device configuration via the integrated memory (HistoROM backup) which contains the process and measuring device data and the event logbook. No need to reconfigure.

**Efficient diagnostics increase measurement reliability**

- Troubleshooting measures can be called up via the device and in the operating tools
- Diverse simulation options, logbook for events that occur and optional line recorder functions

---

**Languages**

Can be operated in the following languages:

- Via local operation  
English, German, French, Spanish, Italian, Dutch, Portuguese, Polish, Russian, Turkish, Chinese, Japanese, Korean, Vietnamese, Czech, Swedish
- Via web browser  
English, German, French, Spanish, Italian, Dutch, Portuguese, Polish, Russian, Turkish, Chinese, Japanese, Vietnamese, Czech, Swedish
- Via "FieldCare", "DeviceCare" operating tool: English, German, French, Spanish, Italian, Chinese, Japanese

## Onsite operation

## Via display module

Features:

- Order code for "Display; operation", option F "4-line, illuminated, graphic display; touch control"
- Order code for "Display; operation", option G "4-line, illuminated, graphic display; touch control + WLAN"

 Information about WLAN interface →  52

A0037255

 22 Operation with touch control

1 Proline 500 – digital

#### Display elements

- 4-line, illuminated, graphic display
- White background lighting; switches to red in event of device errors
- Format for displaying measured variables and status variables can be individually configured

#### Operating elements

External operation via touch control (3 optical keys) without opening the housing: , , 

## Remote operation

## Via Modbus RS485 protocol

This communication interface is available in device versions with a Modbus RS485 output.

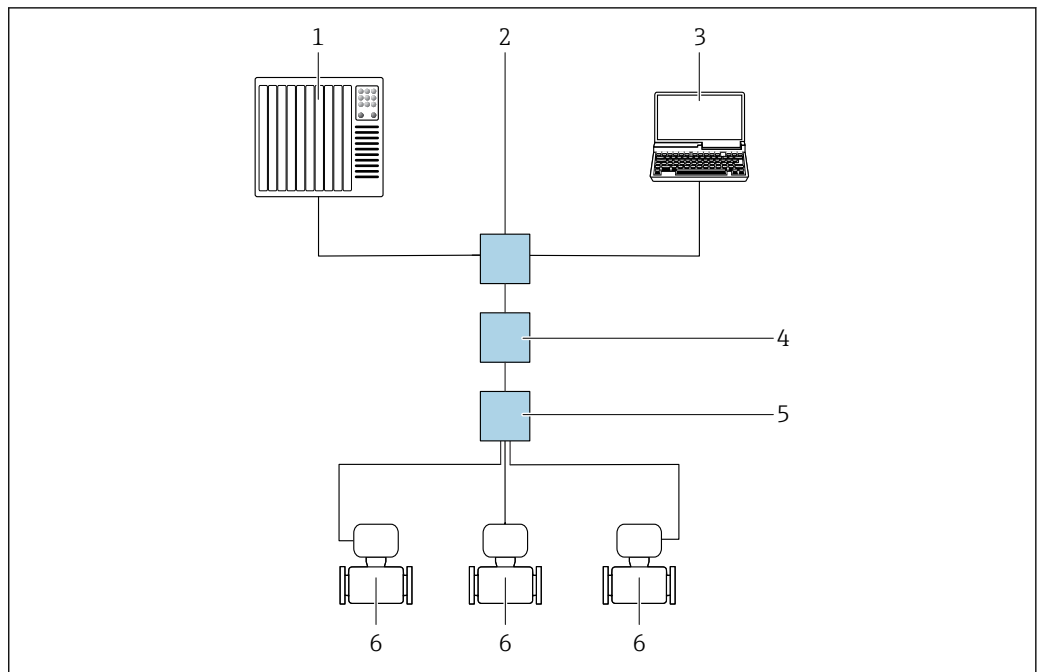

A0029437

 23 Options for remote operation via Modbus RS485 protocol (active)

- 1 Control system (e.g. PLC)
- 2 Computer with web browser (e.g. Microsoft Edge) to access the integrated device web server or with operating tool (e.g. FieldCare, DeviceCare) with COM DTM "CDI Communication TCP/IP" or Modbus DTM
- 3 Transmitter

## Via APL network

A0046117

24 Options for remote operation via APL network

- 1 Automation system, e.g. Simatic S7 (Siemens)
- 2 Ethernet switch, e.g. Scalance X204 (Siemens)
- 3 Computer with Web browser (e.g. Internet Explorer) for access to integrated Web server or computer with operating tool (e.g. FieldCare, DeviceCare with PROFINET COM DTM or SIMATIC PDM with FDI-Package)
- 4 APL power switch (optional)
- 5 APL field switch
- 6 Measuring device

## Service interface

## Via service interface (CDI-RJ45)

A point-to-point connection can be established to configure the device onsite. With the housing open, the connection is established directly via the service interface (CDI-RJ45) of the device.

An adapter for the RJ45 to the M12 plug is optionally available:

Order code for "Accessories", option **NB**: "Adapter RJ45 M12 (service interface)"

The adapter connects the service interface (CDI-RJ45) to an M12 plug mounted in the cable entry. The connection to the service interface can be established via an M12 plug without opening the device.

**Supported operating tools**

Different operating tools can be used for local or remote access to the measuring device. Depending on the operating tool used, access is possible with different operating units and via a variety of interfaces.

| Supported operating tools | Operating unit                                       | Interface   | Additional information  |

 Other operating tools based on FDT technology with a device driver such as DTM/iDTM or DD/EDD can be used for device operation. These operating tools are available from the individual manufacturers. Integration into the following operating tools, among others, is supported:

- Field Device Manager (FDM) from Honeywell → [www.process.honeywell.com](http://www.process.honeywell.com)
- FieldMate from Yokogawa → [www.yokogawa.com](http://www.yokogawa.com)
- PACTWare → [www.pactware.com](http://www.pactware.com)

The related device description files are available: [www.endress.com](http://www.endress.com) → Download Area

### Web server

With the integrated web server, the device can be operated and configured via a web browser using Ethernet-APL/SPE, service interface (CDI-RJ45) or WLAN interface. The structure of the operating menu is the same as for the local display. In addition to the measured values, status information on the device is displayed and can be used to monitor device health. Furthermore the device data can be managed and the network parameters can be configured.

Access to the network is required for the Ethernet-APL/SPE connection.

A device that has a WLAN interface (can be ordered as an option) is required for the WLAN connection: order code for "Display; operation", option G "4-line, illuminated; touch control + WLAN". The device acts as an Access Point and enables communication by computer or a mobile handheld terminal.

#### Supported functions

Data exchange between the operating unit (such as a notebook, for example,) and measuring device:

- Upload the configuration from the measuring device (XML format, configuration backup)
- Save the configuration to the measuring device (XML format, restore configuration)
- Export event list (.csv file)
- Export parameter settings (.csv file or PDF file, document the measuring point configuration)
- Export the Heartbeat verification report (PDF file, only available with the **Heartbeat Verification** application package)
- Flash firmware version for device firmware upgrade, for example
- Download driver for system integration
- Visualize up to 1000 saved measured values (only available with the **Extended HistoROM** application package)

## Certificates and approvals

Current certificates and approvals for the product are available at [www.endress.com](http://www.endress.com) on the relevant product page:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Downloads**.

A comprehensive listing of the serial number-specific disposable measuring tube can be found in the certificate of conformity for single-use requirements in the biopharmaceutical industry.

**PROFINET with Ethernet-APL/SPE certification**

**PROFINET interface**

The measuring device is certified and registered by the PNO (PROFIBUS Nutzerorganisation e. V./ PROFIBUS User Organization). The measuring system meets all the requirements of the following specifications:

- Certified according to:
  - Test specification for PROFINET devices
  - PROFINET PA Profile 4
  - PROFINET netload robustness Class 2 10 Mbit/s
  - APL conformance test
- The device can also be operated with certified devices of other manufacturers (interoperability)
- The device supports PROFINET S2 system redundancy.

**Radio approval**

The measuring device has radio approval.

For detailed information on the radio approval, see the Special Documentation → 59

**Additional certification**

**CRN approval**

Some device versions have CRN approval. A CRN-approved process connection with a CSA approval must be ordered for a CRN-approved device.

**Tests and certificates**

**External standards and guidelines**

- EN 60529  
Degrees of protection provided by enclosure (IP code)

## Ordering information

Detailed ordering information is available from your nearest sales organization [www.addresses.endress.com](http://www.addresses.endress.com) or in the Product Configurator at [www.endress.com](http://www.endress.com):

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Configuration**.

### Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

## Application packages

Many different application packages are available to enhance the functionality of the device. Such packages might be needed to address safety aspects or specific application requirements.

The application packages can be ordered with the device or subsequently from Endress+Hauser. Detailed information on the order code in question is available from your local Endress+Hauser sales center or on the product page of the Endress+Hauser website: [www.endress.com](http://www.endress.com).

Detailed information on the application packages:  
Special Documentation → 59

## Accessories

Various accessories, which can be ordered with the device or subsequently from Endress+Hauser, are available for the device. Detailed information on the order code in question is available from your local Endress+Hauser sales center or on the product page of the Endress+Hauser website: [www.endress.com](http://www.endress.com).

| Netilion    | <p>IIoT ecosystem: Unlock knowledge</p> <p>Endress+Hauser's Netilion IIoT ecosystem enables you to optimize your plant performance, digitize workflows, share knowledge and improve collaboration. Based on decades of experience in process automation, Endress+Hauser offers the process industry an IIoT ecosystem that enables you to gain useful insights from data. This knowledge can be used to optimize processes, leading to higher plant availability, efficiency and reliability, and ultimately to a more profitable plant.</p> <p><a href="http://www.netilion.endress.com">www.netilion.endress.com</a></p>   |
| FieldCare   | <p>FDT-based plant asset management tool from Endress+Hauser. It can configure all smart field units in your system and helps you manage them. By using the status information, it is also a simple but effective way of checking their status and condition.</p>  Operating Instructions BA00027S and BA00059S   |
| DeviceCare  | <p>Tool to connect and configure Endress+Hauser field devices.</p>  Innovation brochure IN01047S  |

## Documentation

-  For an overview of the scope of the associated Technical Documentation, refer to the following:
- *Device Viewer* ([www.endress.com/deviceviewer](http://www.endress.com/deviceviewer)): Enter the serial number from the nameplate
  - *Endress+Hauser Operations app*: Enter serial number from nameplate or scan matrix code on nameplate.

### Standard documentation

-  Supplementary information on the semi-standard options is available in the relevant Special Documentation in the TSP database.

### Brief Operating Instructions

#### Brief Operating Instructions for the sensor

| Measuring device  | Documentation code |
|-------------------|--------------------|
| Proline Promass U | KA0XXXXD           |

#### Brief Operating Instructions for the transmitter

| Measuring device      | Documentation code             |
|-----------------------|--------------------------------|
|                       | PROFINET with Ethernet-APL/SPE |
| Proline 500 – digital | KA01521D                       |

### Operating Instructions

| Measuring device | Documentation code             |
|------------------|--------------------------------|
|                  | PROFINET with Ethernet-APL/SPE |
| Promass U 500    | BA0XXXXD                       |

### Description of device parameters

| Measuring device | Documentation code             |
|------------------|--------------------------------|
|                  | PROFINET with Ethernet-APL/SPE |
| Promass 500      | GP01173D                       |

#### Device-dependent additional documentation

#### Special documentation

| Contents  | Documentation code |
|---|--------------------|
| Information on the Pressure Equipment Directive                 | SD01614D           |
| Radio approvals for WLAN interface for A309/A310 display module | SD01793D           |

### Installation instructions

| Contents  | Note  |
|---|---|
| Installation instructions for spare part sets and accessories | Documentation code: specified for each individual accessory → 57. |
