Technical Information **Liquiline System CA80CR**

Colorimetric analyzer for chromate (Cr(VI))

Integrated controller with up to 2 measuring channels and digital Memosens technology

Application

The Liquiline System CA80CR is a wet-chemical analyzer for the almost continuous determination of chromate concentrations (Cr (VI)) in liquid media.

The analyzer is designed for use in the following applications:

- Optimization of the treatment efficiency of industrial wastewater treatment plants
- Monitoring of drinking water
- Monitoring of membrane filtration systems
- Monitoring of limit values for the discharge of industrial wastewater

The "Cabinet, outdoor version" product variant may be set up, mounted and operated outdoors.

Your benefits

- Easy upgrade to measuring station by connecting up to 4 Memosens sensors
- Two-channel device available
- Digital fieldbuses (e.g. PROFINET, PROFIBUS DP, Modbus TCP, Modbus RS485 and Ethernet IP) and web server
- Simple, tool-free maintenance

Function and system design

Colorimetric measuring principle

After sample preparation, some of the permeate is pumped into the mixing/reaction chamber. The specific color reagent is metered exactly in a defined mixture ratio. The chemical reaction causes the characteristic change in the color of the sample. The multispectral photometer determines the level of absorption by the sample at defined wavelengths. The analyzed wavelengths, and their relationships to one another, are parameter-specific.

Based on proportionality the amount of light absorption is a direct indicator of the concentration of the parameter under analysis in the sample. In order to compensate for any interference influences, a reference measurement is performed before the actual measurement. This reference signal is subtracted from the measuring signal. The temperature in the photometer is kept constant to ensure a reproducible reaction that takes place within a short period of time.

■ 1 Colorimetric measuring principle

- 1 Multispectral LED unit (for measurement/reference)
- 2 Cuvette mixing and reaction vessel
- 3 Detector (for measurement/reference)

Chromium and chromate

Chromium occurs in different oxidation states, of which only the trivalent (Cr^{3+}) and the hexavalent (chromate, CrO_4^{2-} and dichromate, $Cr_2O_7^{2-}$) are of significance in process applications. While Cr(VI) is recognized as a carcinogen, Cr(III) is only slightly toxic and is an essential trace element in protein synthesis. National standards stipulate limit values for chromate concentration. The German drinking water ordinance, for example, stipulates a limit value for total chromium of 50 μ g/l. Separate standards apply to industrial wastewater. The current limit value for tanneries is 2 μ g/l, and for electroplating plants the limit value is 0.1 μ g/l.

Photometric determination of chromate

Diphenylcarbazide method

Chromate (Cr(VI)) reacts with diphenylcarbazide in a mineral acid solution to form a red-violet chelate complex. Chromate (Cr(VI)) is reduced in the process while diphenylcarbazide is oxidized to form diphenylcarbazone. This method records Cr(VI) ions only. Non-dissolved chromium or Cr(III) is not recorded.

Cross-sensitivity

The ions listed were checked with the specified concentrations. A summary effect has not been studied. No cross-sensitivities were observed up to the specified concentrations. ¹⁾

| 15 000 mg/l (ppm) | Cl- |
|-------------------|----------------------|

Measuring system

A complete measuring system comprises:

- Analyzer Liquiline System CA80CR with the configuration ordered
- Reagents, cleaner and standard solution (to be ordered separately)
- Sample conditioning Liquiline System CAT8x0 (optional)

Microfiltration (Liquiline System CAT810)

- Function: pressure pipe sampling and filtration
- Sieve filter, 50 µm
- Control via CA80

Optional: time control via integrated timer

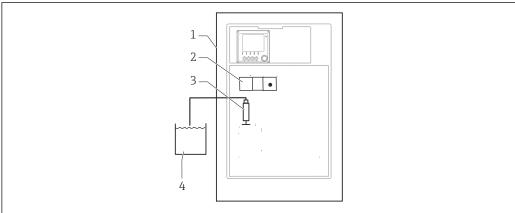

- Backflushing, with compressed air or water
- Panel version or integration into analyzer stand
- Application: wastewater treatment plant outlet

Membrane filtration (Liquiline System CAT820), ceramic filter version

- Function: sampling and filtration
- \blacksquare Ceramic membrane filter cartridge; pore size 0.1 μm or 0.4 μm or plate filter with holder, pore size 0.04 μm
- Communication via Memosens protocol, control via CA80
- Backflushing with compressed air (version with Memosens technology)
- Easy installation with Flexdip CYH112
- Application: aeration, wastewater treatment plant outlet, surface water

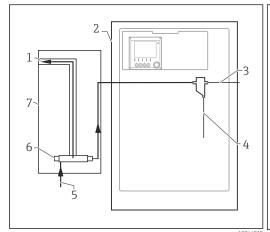

Membrane filtration (Liquiline System CAT860)

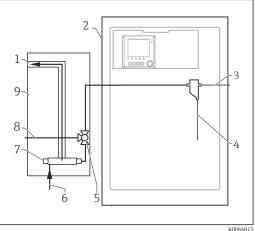

- Function: sampling and filtration
- ullet Ceramic membrane filter candle; pore size 0.1 μm or 0.4 μm
- Communication via Memosens protocol, control via CA80
- Automatic backflush function with cleaning solution and compressed air
- Easy installation via Flexdip CYH112
- Application: wastewater treatment plant inlet

Customer-specific solution

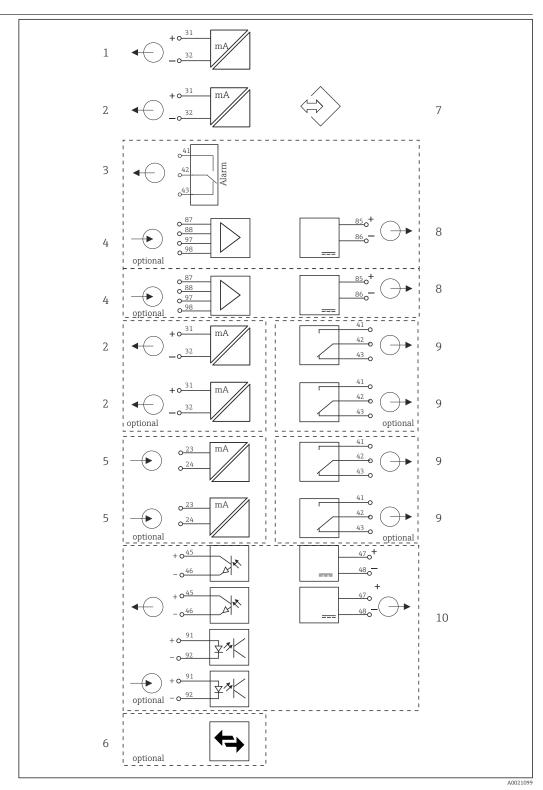

Prior to analysis, the sample must be prepared at the customer site so that it is particle-free and homogeneous (representative sample). The sample can either be supplied to an external collecting vessel or pumped directly into the sample collecting vessel of the analyzer. The customer-specific sample preparation system must have its own individual control unit.

The version of the Liquiline System CA80 as a self-priming device does not have a collecting vessel with level detection. For this reason, a continuous supply of sample must be guaranteed on the process side.

Device architecture

- 86
- 97, Communication connection
- 98

 $2\ x$ communication via Memosens protocol (1 x optional), hose heating system

Slot and port assignment

Analyzer measured value (parameter-specific)

■ 12 Slot and port assignment

- 13 Slot and port assignment
- Inputs are assigned to measuring channels in the ascending order of the slots and ports. In the example above:
 - "CH1: 1:1 pH glass" means:
 - Channel 1 (CH1) is slot 1 (basic module): Port 1 (input 1), pH glass sensor
- Outputs and relays are named according to their function, e.g. "current output", and are displayed in ascending order with the slot and port numbers
- Display shows SP1: analyzer measuring channel 1 with sampling point SP1 (measured value display is parameter-specific; is not illustrated in the example)

Communication and data processing

Communication protocols:

- Fieldbus systems
 - PROFIBUS DP (Profile 3.02)
 - Modbus TCP or RS485
 - PROFINET
 - EtherNet/IP
- Configuration via Ethernet

Extension module 485DP/485MB and current outputs

For PROFIBUS DP and Modbus RS485 communication protocols: A maximum of 2 current outputs can be used in parallel.

Ethernet functionality via Base2 module and current outputs

A maximum of 6 current outputs can be used in parallel.

Bus termination on the device

- Via slide switch at bus module 485DP/485MB
- Displayed via LED "T" on bus module 485DP/485MB

Dependability

Reliability thanks to Memosens technology

Memosens MEMO(SENS

Memosens makes your measuring point safer and more reliable:

- Non-contact, digital signal transmission enables optimum galvanic isolation
- Completely watertight
- Sensor can be calibrated in a lab, thus increasing the availability of the measuring point in the process
- Intrinsically safe electronics mean operation in hazardous areas is not a problem.
- Predictive maintenance thanks to recording of sensor data, e.g.:
 - Total hours of operation
 - Hours of operation with very high or very low measured values
 - Hours of operation at high temperatures
 - Number of steam sterilizations
 - Sensor condition

Ease of maintenance

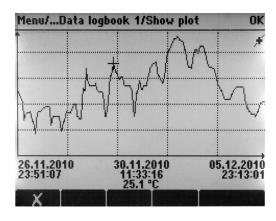

Modular design

The modular analyzer can be easily adapted to suit your needs:

- Retrofit extension modules for new or extended range of functions, e.g. current outputs, relays and digital communication
- Upgrade from one channel to two channel analyzer
- Upgrade to measuring station with digital sensors with Memosens technology
- Optional: M12 sensor connector for connecting any kind of Memosens sensor

Data storage

- Independent, integrated ring memories (FIFO) or stack memories for recording:
 - An analog value (e.g. flow, pH value, conductivity)
 - Events (e.g. power failure)
- Analyzer data logbook
 - Scan time: automatically adjusted to the measuring interval
 - Max. 2 data logbooks
 - 20000 entries per logbook
 - Graphic display (load curves) or numerical list
 - Factory setting: enabled for all channels, ring memory (FIFO)
- Data logbooks for digital sensors:
 - Adjustable scan time: 1 to 3600 s (1 h)
 - Max. 8 data logbooks
 - 150,000 entries per logbook
 - Graphic display (load curves) or numerical list
- Calibration logbook: max. 75 entries
- Hardware logbook:
 - Hardware configuration and modifications
 - Max. 125 entries
- Version logbook:
 - Software updates among other things
 - Max. 50 entries
- Event logbook
- Analyzer event logbook
 - Analyzer-specific events
 - Max. 19 500 entries, ring memory or fill-up buffer for recording
- Operations logbook: max. 250 entries
- Diagnostic logbook: max. 250 entries

■ 15 Data logbook: graphic representation on the display

A0024359

Mathematical functions (virtual process values)

In addition to "real" process values, which are provided by connected physical sensors or analog inputs, mathematical functions can be used to calculate a maximum of 6 "virtual" process values.

The "virtual" process values can be:

- Output via a current output or a fieldbus
- Used as a controlled variable
- Assigned as a measured variable to a limit switch
- Used as a measured variable to trigger cleaning
- Displayed in user-defined measuring menus

The following mathematical functions are possible:

- Calculation of pH from two conductivity values according to VGB Standard 405, e.g. in boiler feedwater
- Difference between two measured values from different sources, e.g. to monitor membranes
- Differential conductivity, e.g. to monitor the efficiency of ion exchangers
- Degassed conductivity, e.g. for process controls in power plants
- Redundancy to monitor two or three redundant sensors
- rH calculation based on the measured values of a pH and an ORP sensor
- Formula editor as a powerful mathematics tool and for Boolean operations with up to 3 measured values

FieldCare

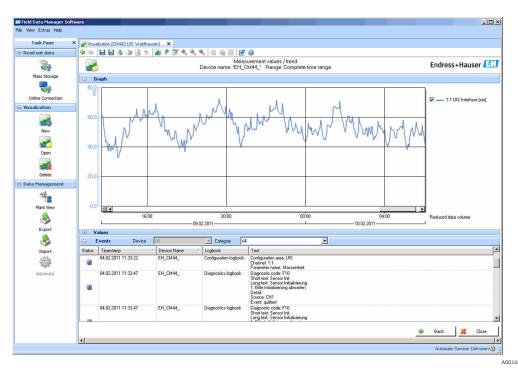

Configuration and asset management software based on FDT/DTM technology

- Complete device configuration when connected via FXA291 and service interface
- Access to a number of configuration parameters and identification, measuring and diagnostic data when connected via HART modem
- Logbooks can be downloaded in CSV format or binary format for "Field Data Manager" software

Field Data Manager

Visualization software and database for measuring, calibration and configuration data

- SQL database which is protected against manipulation
- Functions to import, save and print out logbooks
- Load curves to display measured values

■ 16 Field Data Manager: load curve display

SD card

The exchangeable storage medium enables:

- Quick and easy software updates and upgrades
- Quick and easy updates and upgrades to measuring parameter lists
- Data storage of internal device memory (e.g. logbooks)
- Transfer of complete configurations to a device with an identical setup (backup function)
- Transfer of configurations without the TAG and bus address to devices with an identical setup (copy function)

Endress+Hauser offers industry-approved SD cards as accessories. These memory cards provide maximum data security and integrity.

Other SD cards can also be used. However, Endress+Hauser does not accept any responsibility for the data security of such cards.

Self-monitoring functions

Electronics

- Current inputs are deactivated in the event of overcurrent and reactivated once the overcurrent stops.
- Board voltages are monitored and the board temperature is also measured.

Counter

Counters monitor consumables such as reagents or dispensers.

Photometer

- Automatic temperature monitoring
- Active monitoring of communication between the photometer module and the analyzer electronics

Sample preparation (optional)

- Active monitoring of communication between sample preparation with Memosens communication and the analyzer
- Counter for consumables, such as hoses of the peristaltic pump

Sample collecting vessel (optional)

Active monitoring of liquid level in the sample collecting vessel to ensure the supply of liquid to the analyzer

Leak sensor in the housing

Data security

All settings, logbooks etc. are stored in a non-volatile memory to ensure that the data are retained even in the event of a disruption to the power supply.

IT security

We only provide a warranty if the device is installed and used as described in the Operating Instructions. The device is equipped with security mechanisms to protect it against any inadvertent changes to the device settings.

IT security measures in line with operators' security standards and designed to provide additional protection for the device and device data transfer must be implemented by the operators themselves.

Input

Measured variables

Chromate (Cr(VI)), CrO₄ [mg/l, µg/l, ppm, ppb]

Measuring range

CA80CR-**AF: CA80CR-**AG: 0.03 to 2.5 mg/l Cr(VI) 0.2 to 5.0 mg/l Cr(VI)

Order version with dilution function (optional)

| Measuring range to be configured [mg/l (ppm)] | Dilution factor 1) | Effective measuring range [mg/l (ppm)] |
|---|--------------------|--|
| 0.2 to 5.0 | 1 | 0.2 to 5.0 ²⁾ |
| 0.2 to 5.0 | 5 | 1 to 25 |
| 0.2 to 5.0 | 10 | 2 to 50 |
| 0.2 to 5.0 | 50 | 10 to 250 |

- 1) User configurable
- 2) Dilution function disabled

Types of input

- 1 or 2 measuring channels (analyzer main parameter)
- 1 to 4 digital sensor inputs for sensors with Memosens protocol (optional)
- Analog current inputs (optional)
- Binary inputs (optional)

Input signal

Depending on version

 $2\ x\ 0/4$ to $20\ mA$ (optional), passive, potentially isolated

Current input, passive

Span

> 0 to 20 mA

Signal characteristic

Linear

Internal resistance

Non-linear

Test voltage 500 V

Cable specification (for optional sensors with Memosens technology)

Cable type

Memosens data cable CYK10 or sensor fixed cable, each with cable end sleeves or M12 round-pin connector (optional)

Cable length

Max. 100 m (330 ft)

Output

Output signal

Depending on version:

- 2 x 0/4 to 20 mA, active, potentially isolated (standard version)
 4 x 0/4 to 20 mA, active, potentially isolated (version with 2 additional analog outputs)
 6 x 0/4 to 20 mA, active, potentially isolated (version with 4 additional analog outputs)
- Binary outputs

| IP address | Via DCP protocol using the configuration tool (e.g. Siemens PRONETA) | |

Signal on alarm

Adjustable, as per NAMUR Recommendation NE 43

- In measuring range 0 to 20 mA: Failure current from 0 to 23 mA
- In measuring range 4 to 20 mA: Failure current from 2.4 to 23 mA
- Factory setting for failure current for both measuring ranges:

21.5 mA

Load

Max. 500 Ω

Transmission behavior

Linear

Current outputs, active

| Span | 0 to 23 mA |
|--------------------------|------------------------------------|
| Signal characteristic | Linear |
| | |
| Electrical specification | Output voltage Max. 24 V |

Cable specification

Cable type

Recommended: shielded cable

Cable specification

Max. 2.5 mm² (14 AWG)

Relay outputs

Electrical specification

- 1 single-pin changeover contact (alarm relay)
- 2 or 4 single-pin changeover contacts (optional with extension modules)

Maximum load

■ Alarm relay: 0.5 A ■ All other relays: 2.0 A

Relay switching capacity

Base module (Alarm relay)

| Switching voltage | Load (max.) | Switching cycles (min.) |
|----------------------------------|-------------|-------------------------|
| 230 V AC, $\cos \Phi$ = 0.8 to 1 | 0.1 A | 700,000 |
| | 0.5 A | 450,000 |
| 115 V AC, $\cos \Phi$ = 0.8 to 1 | 0.1 A | 1,000,000 |
| | 0.5 A | 650,000 |
| 24 V DC, L/R = 0 to 1 ms | 0.1 A | 500,000 |
| | 0.5 A | 350,000 |

Extension module

| Switching voltage | Load (max.) | Switching cycles (min.) |
|---|-------------|-------------------------|
| 230 V AC, cosΦ = 0.8 to 1 | 0.1 A | 700,000 |
| | 0.5 A | 450,000 |
| | 2 A | 120,000 |
| 115 V AC, $\cos \Phi = 0.8 \text{ to } 1$ | 0.1 A | 1,000,000 |
| | 0.5 A | 650,000 |
| | 2 A | 170,000 |
| 24 V DC, L/R = 0 to 1 ms | 0.1 A | 500,000 |
| | 0.5 A | 350,000 |
| | 2 A | 150,000 |

Minimum load (typical) • Min. 100 mA at 5 V DC • Min. 1 mA at 24 V DC

- Min. 5 mA at 24 V AC
- Min. 1 mA at 230 V AC

Power supply

Supply voltage

- 100 to 120 V AC / 200 to 240 V AC or 24 V DC (not available for "Outdoor" version)
- 50 or 60 Hz

| Fieldbus connection | Supply voltage: not applicable |
|---------------------|---|
| Power consumption | All versions except "Outdoor" version |
| | 130 VA + 660 VA per hose heater, max. 1450 VA |
| | 24-V version: max. 105 W |
| | "Outdoor" version |
| | $680VA + 660VA$ per hose heater, max. $2000VA$ (version with cooling system) $^{2)}$ |
| Fuse | 5 x 20 mm 10 A/250 V fine-wire fuse for hose trace heating system |
| Cable entries | 4 x bores for M16, G3/8, NPT3/8", Memosens connection ³⁾ 4 x bores for M20, G1/2, NPT1/2" |

Cable specification

| Cable gland | Permitted cable diameter |
|--|----------------------------|
| M16x1.5 mm | 4 to 8 mm (0.16 to 0.32") |
| M12x1.5 mm (for order version M12 socket for Memosens sensors) | 2 to 5 mm (0.08 to 0.20") |
| M20x1.5 mm | 6 to 12 mm (0.24 to 0.48") |
| NPT ³ / ₈ " | 4 to 8 mm (0.16 to 0.32") |
| $G^3/_8$ | 4 to 8 mm (0.16 to 0.32") |
| NPT ¹ /2" | 6 to 12 mm (0.24 to 0.48") |
| G1/2 | 7 to 12 mm (0.28 to 0.48") |

Cable glands mounted at the factory are tightened with 2 Nm.

Heating for dilution water

The dilution water and the hose for dilution water must be heated onsite at the place of installation!

Connecting optional modules

With extension modules you can purchase additional functions for your device.

NOTICE

Unacceptable hardware combinations (due to conflicts in power supply)

Incorrect measurements or total failure of the measuring point as a result of heat build-up or overloading

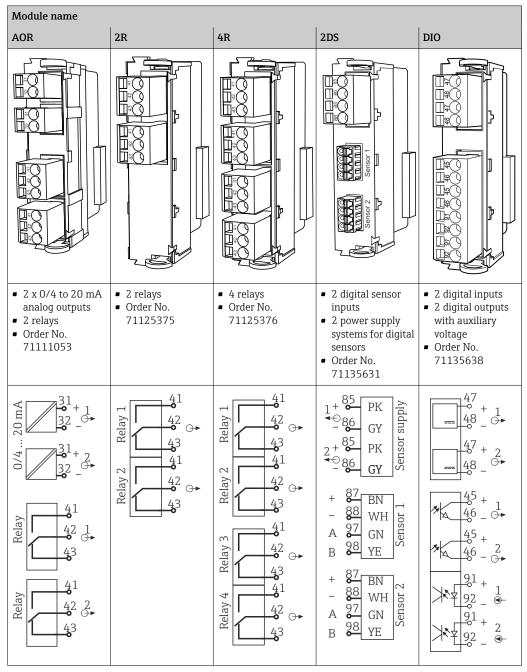

- ► Find out if the planned upgrade of your device results in a permitted hardware combination (configurator on www.endress.com/CA80CR).
- A maximum of eight current inputs and current outputs is permitted.
- ► A maximum of two "DIO" modules is permitted.
- ▶ Please contact your Endress+Hauser sales center should you have any questions.

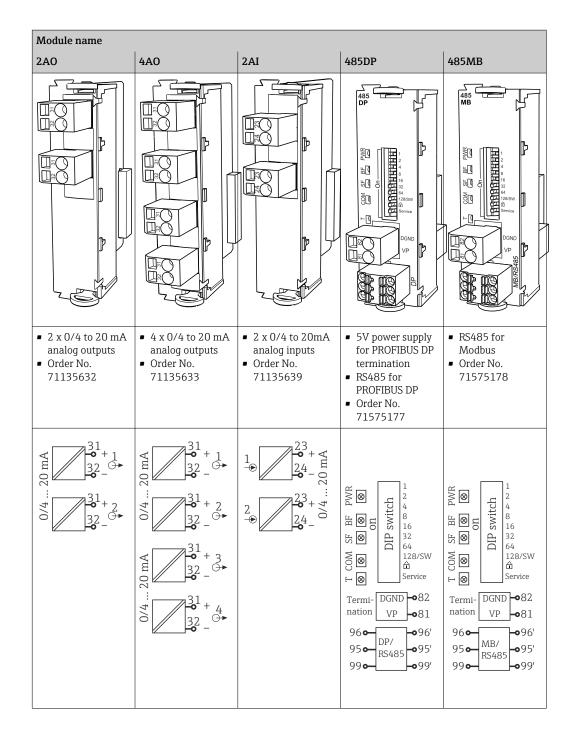

²⁾ The power value indicated on the nameplate refers to the power consumption when commissioning at 5 °C (41 °F) after an operating time of one minute

³⁾ In the case of the "Outdoor" version, 2 bores are occupied; for this reason only 2 Memosens sensors are possible

Overview of all the optional modules

PROFIBUS DP (module 485DP)

Contacts 95, 96 and 99 are jumpered in the plug. This ensures that PROFIBUS communication is not interrupted if the connector is disconnected.

Sensor connection (optional)

Sensors with Memosens protocol

| Sensor types | Sensor cable | Sensors |
|---|--|---|
| Digital sensors without additional internal power supply | With plug-in connection and inductive signal transmission | pH sensors ORP sensors Combined sensors Oxygen sensors (amperometric and optical) Conductivity sensors with conductive measurement of conductivity Chlorine sensors (disinfection) |
| | Fixed cable | Conductivity sensors with inductive measurement of conductivity |
| Digital sensors with additional internal power supply | Fixed cable | Turbidity sensors Sensors for interface measurement Sensors for measuring the spectral absorption coefficient (SAC) Nitrate sensors Optical oxygen sensors Ion-sensitive sensors |

Performance characteristics

| Maximum measured error 4) | 2 % of end of measuring range |
|---|---|
| | With dilution and dilution factor 5: |
| | additionally 3.0 % of end of measuring range |
| Maximum measurement error for sensor inputs | → Documentation of the connected sensor |
| Maximum measurement | Typical measured errors: |
| error for current inputs and outputs | $<$ 20 μ A (with current values $<$ 4 mA) |
| outputs | $<$ 50 μA (with current values 4 to 20 mA) |
| | at 25 °C (77° F) in each case |
| | Additional measured error depending on the temperature: $< 1.5 \; \mu \text{A/K}$ |
| Repeatability ⁴⁾ | ■ to 0.5 mg/l (ppm) Cr(VI): \pm 10 μ g/l (ppb) Cr(VI) ■ \geq 0.5 mg/l (ppm) Cr(VI): \pm 2 % of the display value |
| | With dilution and dilution factor 5: Additionally 1.5 % of end of measuring range |
| Repeatability of sensor inputs | → Documentation of the connected sensor |
| Measuring interval | Continuous (approx. 5 min), adjustable 10 min to 24 h |
| Sample requirement | Without dilution module 22 ml (0.74 fl oz)/measurement |
| | With dilution module Sample: 11 to 15 ml (0.37 to 0.51 fl oz)/measurement (depends on dilution factor) Dilution water: 17 to 21 ml (0.57 to 0.71)/measurement (depends on dilution factor) Use demineralized water for expected sample concentrations of < 50 mg/l (ppm). |

⁴⁾ According to ISO 15839 with standard solutions. Measurement errors include all the uncertainties of the analyzer. They do not include the uncertainties from the standard solutions used as a reference.

| Reagent requirement | Approx. 65 μl per reagent and measurement Given a measuring interval of 10 min, one set of reagents lasts for approx. 3.5 months |
|----------------------|---|
| Standard requirement | Given a calibration interval of 48 h approx. 420 ml (14.2 fl.oz) per month |
| Calibration interval | 1 h to 90 days, depending on the application and ambient conditions |
| Maintenance interval | Every 3 to 6 months, depending on the application |
| Maintenance effort | Weekly: visual inspectionQuarterly: 1 hour |

Mounting

Mounting location

Note the following when erecting the device:

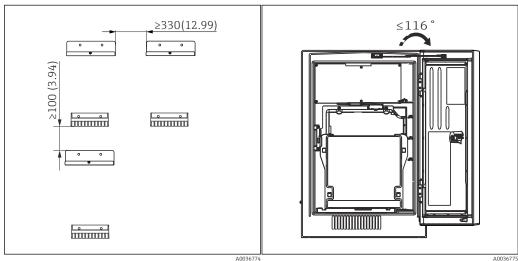

- ► If mounting on a wall, make sure that the wall has sufficient load-bearing capacity and is fully perpendicular.
- If mounting on a base, set up the device on a level surface. Installing on a base is only permitted indoors.
- ► Protect the device against additional heating (e.g. from heaters).
- ▶ Protect the device against mechanical vibrations.
- ▶ Protect the device against corrosive gases, e.g. hydrogen sulfide (H₂S) .
- Make sure to pay attention to the maximum height difference and the maximum distance from the sampling point.
- ► Ensure that the unit can drain freely, without any siphoning effects.
- Make sure air can circulate freely at the front of the housing.
- Open analyzers (i.e. analyzers that are supplied without a door) may only be set up in closed areas or in a protective cabinet or similar facility.
- "Outdoor" version only: Post mounting is recommended for outdoor installation.

Installation instructions

The device can be installed in the following ways:

- Mounted on a wall
- Mounted on a base
- Post mounting / on a post (accessory)

Spacing required for installing analyzer

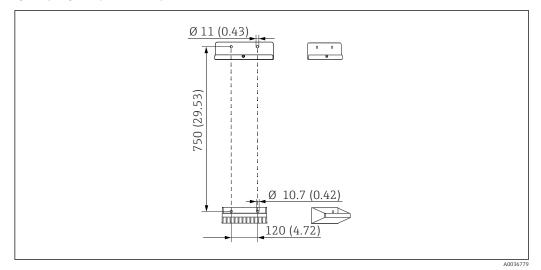

■ 17 Minimum spacing required for mounting. Engineering unit mm (in).

■ 18 Maximum opening angle

24

Spacing required for installing wall-mount version

 \blacksquare 19 Holder unit dimensions. Engineering unit mm (in)

Environment

| Ambient temperature range | All housing versions with the exception of the outdoor version | | |
|---|---|--|--|
| | +5 to +40 °C (41 to 104 °F) | | |
| | Outdoor version | | |
| | -20 to +40 °C (-4 to 104 °F) | | |
| Storage temperature | −20 to 60 °C (−4 to 140 °F) | | |
| Relative humidity | 10 to 95 %, non-condensing | | |
| Degree of protection | IP55 (cabinet, analyzer stand), TYPE 3R (cabinet, analyzer stand) | | |
| Electromagnetic compatibility ⁵⁾ | c Interference emission and interference immunity as per EN 61326-1, class A for industrial areas | | |
| Electrical safety | According to EN/IEC 61010-1:2010, Class I equipment Low voltage: overvoltage category II For installations up to 2000 m (6500 ft) above MSL | | |
| Pollution degree | Pollution level 2 | | |

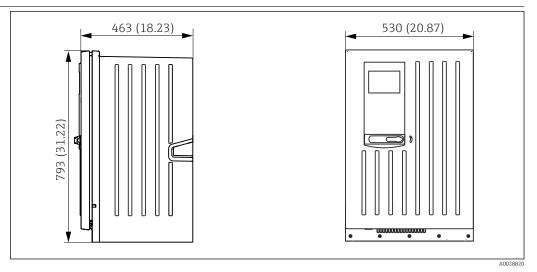

Process

| Sample temperature | 4 to 40 °C (39 to 104 °F) |
|---------------------------|---|
| Consistency of the sample | Low solids content (turbidity < 50 NTU), aqueous, homogenized |
| Sample supply | Unpressurized |

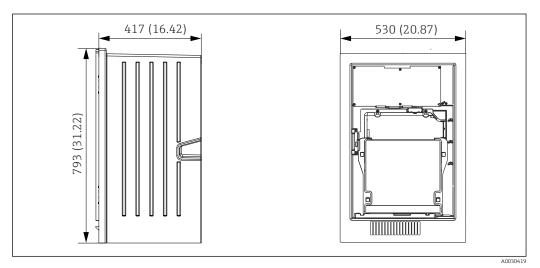

⁵⁾ Sufficient mains quality is required to operate the product as intended.

Hose entries

4 x bores for M32 for sample inflow and outflow

Hose specification (self-priming)

- Clearance: max. 1.0 m (3.3 ft)
- Height: max. 0.5 m (1.6 ft)
- Hose ID: 1.6 mm ($^{1}/_{16}$ in)

Operability

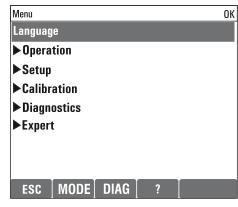

Operation concept

The simple and structured operating concept sets new standards:

- Intuitive operation with the navigator and soft keys
- Fast configuration of application-specific measurement options
- Easy configuration and diagnosis thanks to plain-text display
- All languages that can be ordered are available in every device

■ 24 Plain-text menu

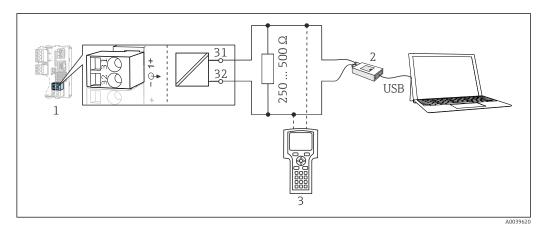

Display

Graphic display:

- Resolution: 240 x 160 pixel
 Back light with switch-off function
- Red display background for alarms alerts users to errors
- Transflective display technology for maximum contrast even in bright environments

Remote operation

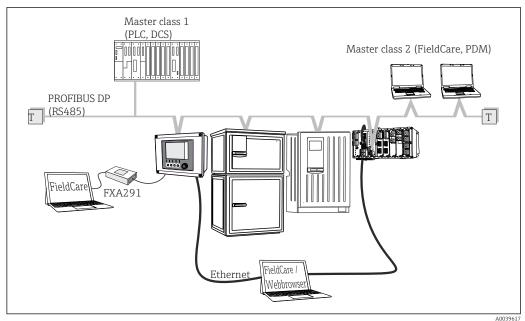

Via HART (e.g. via HART modem and FieldCare)

25 € HART using modem

- Device module Base2-E: current output 1 with HART
- HART modem for connection to PC, e.g. Commubox FXA191 (RS232) or FXA195 $^{\rm 1)}$ (USB)
- HART handheld terminal
- $^{\rm 1)}$ Switch position "on" (substitutes the resistor)

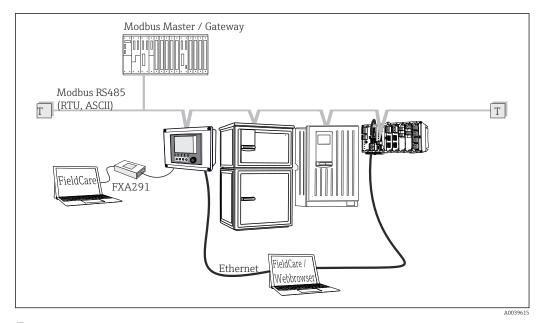

Via PROFIBUS DP

Terminating resistor

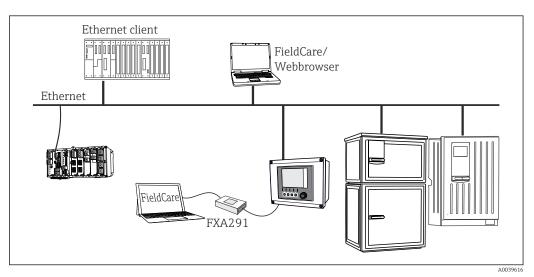

Via Modbus RS485

■ 27 Modbus RS485

T Terminating resistor

Via Ethernet: web server/Modbus TCP/PROFINET/Ethernet/IP

■ 28 Modbus TCP or EtherNet/IP or PROFINET

Language packages

The language selected in the product structure is the operating language preset at the factory. All other languages can be selected using the menu.

- English (US)
- German
- Chinese (Simplified, PR China)
- Czech
- Dutch
- French
- Italian
- Japanese
- Polish
- Portuguese
- lacktrianup Russian
- Spanish
- Turkish

30

- Hungarian
- Croatian
- Vietnamese

The availability of other languages can be checked via the product structure at www.endress.com/ca80cr.

Certificates and approvals

Current certificates and approvals for the product are available at www.endress.com on the relevant product page:

- 1. Select the product using the filters and search field.
- 2. Open the product page.
- 3. Select **Downloads**

Order information

Product page

www.endress.com/ca80cr

Product Configurator

- 1. **Configure**: Click this button on the product page.
- 2. Select **Extended selection**.
 - └ The Configurator opens in a separate window.
- 3. Configure the device according to your requirements by selecting the desired option for each feature.
 - └ In this way, you receive a valid and complete order code for the device.
- 4. **Accept**: Add the configured product to the shopping cart.
- For many products, you also have the option of downloading CAD or 2D drawings of the selected product version.
- 5. **CAD**: Open this tab.
 - The drawing window is displayed. You have a choice between different views. You can download these in selectable formats.

Accessories

The following are the most important accessories available at the time this documentation was issued.

Listed accessories are technically compatible with the product in the instructions.

- 1. Application-specific restrictions of the product combination are possible.

 Ensure conformity of the measuring point to the application. This is the responsibility of the operator of the measuring point.
- 2. Pay attention to the information in the instructions for all products, particularly the technical data.
- 3. For accessories not listed here, please contact your Service or Sales Center.

Device-specific accessories

Sample preparation

Liquiline System CAT810

- Pressure pipe sampling and microfiltration
- Product Configurator: www.endress.com/cat810)
- Technische Information Liquiline System CAT810, TI01138C

Liquiline System CAT820

- Sampling and membrane filtration
- Product Configurator: www.endress.com/cat820)
- Technical Information Liquiline System CAT820, TI01131C

Liquiline System CAT860

- Sampling and membrane filtration
- Product Configurator: www.endress.com/cat860)
- Technical Information Liquiline System CAT860, TI01137C
- The Liquiline System CAT860 can only be operated with a Liquiline System CA80 single-channel device.

Installation accessories

Kit, post with bracket CA80, outd.

- Post 60 x 60 x 1800 mm, stainless steel 1.4571
- Post mount clamp CA80xx
- Kit installation instructions
- Order No. 71458285

Consumables

- 1. https://portal.endress.com/webapp/SparePartFinder
- 2. Specify the serial number or product code.

The following consumables are available:

- Reagents and standard solutions CY80CR
- Cleaner CY800 (for hoses in the device)
- Cleaner CY820 (for hoses of sample preparation system and of sample collecting vessel)
- CAC880, inlet and outlet hoses for CA80

Maintenance kit CAV800

https://portal.endress.com/webapp/SparePartFinder

Standard

- Dispensers, 4 x 2.5 ml and 4 x 10 ml, including mounted adapter
- Hoses
- Silicone grease, medium-viscosity, tube 2 g
- Plug
- Sealing caps
- Filter mats

Optional

- Inlet and outlet hoses
- Liquid Manager without motor
- Collecting vessel, beaker (2 pcs.)

Upgrade kits CAZ800

Kit for upgrade to two-channel device

- Valve for switching sample flow
- Two sample collecting vessels with level monitoring, pre-fitted on mounting bracket
- Hoses, connection adapters
- Activation code

Kit for upgrading the dilution function

- Hose with identification marking
- Modified cable gland
- Activation code

Sensors

pH glass electrodes

Memosens CPS11E

- pH sensor for standard applications in process and environmental engineering
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps11e

Technical Information TI01493C

Memosens CPS41E

- pH sensor for process technology
- With ceramic junction and KCl liquid electrolyte
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps41e

Technical Information TI01495C

Memosens CPS71E

- pH sensor for chemical process applications
- With ion trap for poison-resistant reference
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps71e

Technical Information TI01496C

Memosens CPS91E

- pH sensor for heavily polluted media
- With open aperture
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps91e

Technical Information TI01497C

Memosens CPS31E

- pH sensor for standard applications in drinking water and swimming pool water
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps31e

Technical Information TI01574C

Ceramax CPS341D

- pH electrode with pH-sensitive enamel
- Meets highest demands of measuring accuracy, pressure, temperature, sterility and durability
- Product Configurator on the product page: www.endress.com/cps341d

Technical Information TI00468C

Memosens CPF81E

- pH sensor for mining operations, industrial water and wastewater treatment
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cpf81e

Technical Information TI01594C

ORP electrodes

Memosens CPS12E

- ORP sensor for standard applications in process and environmental engineering
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps12e

Technical Information TI01494C

Memosens CPS42E

- ORP sensor for process technology
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps42e

Technical Information TI01575C

Memosens CPS72E

- ORP sensor for chemical process applications
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps72e

Technical Information TI01576C

Memosens CPS92E

- ORP sensor for use in heavily polluted media
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps92e

Technical Information TI01577C

Memosens CPF82E

- ORP sensor for mining operations, industrial water and wastewater treatment
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cpf82e

Technical Information TI01595C

Conductivity sensors with inductive measurement of conductivity

Indumax CLS50D

- High-durability inductive conductivity sensor
- For standard and hazardous area applications
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cls50d

Technical Information TI00182C

Conductivity sensors with conductive measurement of conductivity

Memosens CLS21E

- Digital conductivity sensor for media with medium or high conductivity
- Conductive measurement
- With Memosens 2.0
- Product Configurator on the product page: www.endress.com/cls21e

Technical Information TI01528C

Oxygen sensors

Memosens COS51E

- Amperometric oxygen sensor for water, wastewater and utilities
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cos51e

Technical Information TI01620C

Memosens COS81E

- Hygienic optical oxygen sensor with maximum measurement stability over multiple sterilization
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cos81e

Technical Information TI01558C

Memosens COS22E

- Hygienic amperometric oxygen sensor with maximum measurement stability over multiple sterilization cycles
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cos22e

Technical Information TI01619C

Chlorine dioxide and chlorine sensors

Memosens CCS50E

- Membrane-covered amperometric sensor for chlorine dioxide
- With Memosens technology
- Product Configurator on the product page: www.endress.com/ccs50e

Technical Information TI01353C

Memosens CCS51E

- Sensor for measuring free available chlorine
- Product Configurator on the product page: www.endress.com/ccs51e

Technical Information TI01423C

Ion-selective sensors

ISEmax CAS40D

- Ion selective sensors
- Product Configurator on the product page: www.endress.com/cas40d

Technical Information TI00491C

Turbidity sensors

Turbimax CUS51D

- For nephelometric measurements of turbidity and solids in wastewater
- 4-beam scattered light method
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cus51d

Technical Information TI00461C

Turbimax CUS52D

- Hygienic Memosens sensor for turbidity measurement in drinking water, process water and in utilities
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cus52d

Technical Information TI01136C

SAC and nitrate sensors

Viomax CAS51D

- SAC and nitrate measurement in drinking water and wastewater
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cas51d

Technical Information TI00459C

Interface measurement

Turbimax CUS71D

- Immersion sensor for interface measurement
- Ultrasonic interface sensor
- Product Configurator on the product page: www.endress.com/cus71d

Technical Information TI00490C

Cable junction with Velcro strip

- 4 pieces, for sensor cable
- Order No. 71092051

Communication-specific accessories

Additional functionality

▶ Always quote the serial number of your device when ordering activation codes.

| Order code | Communication; software |
|------------|---|
| 51516983 | Commubox FXA291 (hardware) |
| 71127100 | SD card with Liquiline Firmware, 1 GB, Industrial Flash Drive |
| XPC0018 | Activation code for EtherNet/IP + web server |
| XPC0020 | Activation code for Modbus TCP + web server |
| XPC0021 | Activation code for web server for BASE2 |
| XPC0022 | Activation code for PROFINET + web server for BASE2 |
| XPC0024 | Activation code for Profibus DP for module 485 |
| XPC0025 | Activation code for Modbus RS485 for module 485 |
| 71249548 | Kit CA80: activation code for 1st digital sensor input |
| 71249555 | Kit CA80: activation code for 2nd digital sensor input |

| | Retrofit kits |
|----------|---|
| 71136999 | Kit CSF48/CA80: retrofit service interface (CDI flange connector, counter nut) |
| 71111053 | Kit module AOR: 2 x relay, 2 x analog output 0/4 to 20 mA |
| 71125375 | Kit module 2R: 2 x relay |
| 71125376 | Kit module 4R: 4 x relay |
| 71135632 | Kit module 2AO: 2 x analog output 0/4 to 20 mA |
| 71135633 | Kit module 4AO: 4 x analog output 0/4 to 20 mA |
| 71135631 | Kit module 2DS: 2 x digital sensor, Memosens |
| 71135634 | Kit module 485: PROFIBUS DP or Modbus RS485. This requires an additional activation code which can be ordered separately. |
| 71135638 | Kit module DIO: 2 x digital input; 2 x digital output; auxiliary power supply for digital output |
| 71135639 | Kit module 2AI: 2 x analog input 0/4 to 20 mA |
| 71140888 | Upgrade kit module 485 + Profibus DP |
| 71140889 | Upgrade kit module 485 + Modbus RS485 |
| 71141366 | Kit, extension backplane module |

Software

Memobase Plus CYZ71D

- PC software to support laboratory calibration
- Visualization and documentation of sensor management
- Sensor calibrations stored in database
