Technical Information Liquiline System CA80NO

Colorimetric analyzer for nitrite

Integrated controller with up to 2 measuring channels and digital Memosens technology

Application

The Liquiline System CA80NO is a wet-chemical analyzer for the almost continuous determination of the concentration of nitrite in liquid media.

- The analyzer is designed for use in the following applications:
- Monitoring of drinking water treatment and distribution
- Monitoring of the wastewater treatment plant outlet
- Quality control of raw water for the food industry
- Monitoring of drinking water
- Control of industrial wastewater treatment

The "Cabinet, outdoor version" product variant may be set up, mounted and operated outdoors.

Your benefits

- Easy upgrade to measuring station by connecting up to 4 Memosens sensors
- Cooled version for longer reagent life time
- Two-channel device available
- Digital fieldbuses (e.g. PROFINET, PROFIBUS DP, Modbus TCP, Modbus RS485 and Ethernet IP) and web server
- Simple, tool-free maintenance

Function and system design

Colorimetric measuring principle

After sample preparation, some of the permeate is pumped into the mixing/reaction chamber. The specific color reagent is metered exactly in a defined mixture ratio. The chemical reaction causes the characteristic change in the color of the sample. The multispectral photometer determines the level of absorption by the sample at defined wavelengths. The analyzed wavelengths, and their relationships to one another, are parameter-specific.

Based on proportionality the amount of light absorption is a direct indicator of the concentration of the parameter under analysis in the sample. In order to compensate for any interference influences, a reference measurement is performed before the actual measurement. This reference signal is subtracted from the measuring signal. The temperature in the photometer is kept constant to ensure a reproducible reaction that takes place within a short period of time.

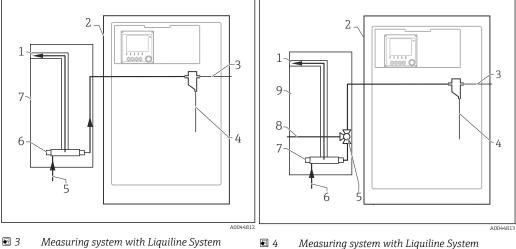

Photometric determination of nitrite	Naphthylamine method according to DIN EN 26777			
	couples with N-(1-naphthyl)-eth	nide under acidic conditions to form a diazo compound which then nylenediamine to form a red dye. The absorption is measured at a unt of light absorption is proportional to the concentration of nitrite		
Cross-sensitivity	ivityThe ions listed were checked with the specified concentrations. A summary effect has not been studied. No cross-sensitivities were observed up to the concentration levels indicated.

Customer-specific solution

Prior to analysis, the sample must be prepared at the customer site so that it is particle-free and homogeneous (representative sample). The sample can either be supplied to an external collecting vessel or pumped directly into the sample collecting vessel of the analyzer. The customer-specific sample preparation system must have its own individual control unit.

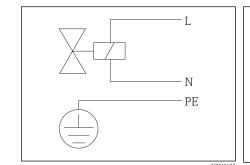

The version of the Liquiline System CA80 as a self-priming device does not have a collecting vessel with level detection. For this reason, a continuous supply of sample must be guaranteed on the process side.

Reagent cooling module	The analyzer can be fitted with a smart, energy-efficient cooling module for the reagents.
(optional)	Thanks to the very low rate of reagent consumption and the extended life time, reagents can last for up to 12 weeks depending on the concentration.
	Cooling is by means of a Peltier cooler and does not require maintenance. The cooling unit is controlled automatically via the electronics.
	Due to the reagent life time, the use of a cooling module is recommended at ambient temperatures above 20 °C (68 °F).

2 x communication via Memosens protocol (1 x optional), hose heating system

Slot and port assignment

- 12 Slot and port assignment
- 5 Siot and port assignment
- Inputs are assigned to measuring channels in the ascending order of the slots and ports. In the example above:
 - "CH1: 1:1 pH glass" means:
 - Channel 1 (CH1) is slot 1 (basic module) : Port 1 (input 1), pH glass sensor
- Outputs and relays are named according to their function, e.g. "current output", and are displayed in ascending order with the slot and port numbers
- Display shows SP1: analyzer measuring channel 1 with sampling point SP1 (measured value display is parameter-specific; is not illustrated in the example)

Communication and data processing

Communication protocols:

- Fieldbus systems
 - PROFIBUS DP (Profile 3.02)
 - Modbus TCP or RS485
 - PROFINET
 - EtherNet/IP
- Configuration via Ethernet

Extension module 485DP/485MB and current outputs

For PROFIBUS DP and Modbus RS485 communication protocols: A maximum of 2 current outputs can be used in parallel.

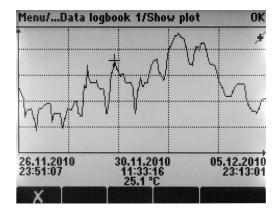

Ethernet functionality via Base2 module and current outputs A maximum of 6 current outputs can be used in parallel.

Bus termination on the device

- Via slide switch at bus module 485DP/485MB
- Displayed via LED "T" on bus module 485DP/485MB

Dependability

Reliability thanks to Memosens technology	 Memosens weights Memosens makes your measuring point safer and more reliable: Non-contact, digital signal transmission enables optimum galvanic isolation Completely watertight Sensor can be calibrated in a lab, thus increasing the availability of the measuring point in the process Intrinsically safe electronics mean operation in hazardous areas is not a problem. Predictive maintenance thanks to recording of sensor data, e.g.: Total hours of operation Hours of operation with very high or very low measured values Hours of operation at high temperatures Number of steam sterilizations Sensor condition
Ease of maintenance	 Modular design The modular analyzer can be easily adapted to suit your needs: Retrofit extension modules for new or extended range of functions, e.g. current outputs, relays and digital communication Upgrade from one channel to two channel analyzer Upgrade to cooled analyzer Upgrade to measuring station with digital sensors with Memosens technology Optional: M12 sensor connector for connecting any kind of Memosens sensor
	 Data storage Independent, integrated ring memories (FIFO) or stack memories for recording: An analog value (e.g. flow, pH value, conductivity) Events (e.g. power failure) Analyzer data logbook Scan time: automatically adjusted to the measuring interval Max. 2 data logbooks 20000 entries per logbook Graphic display (load curves) or numerical list Factory setting: enabled for all channels, ring memory (FIFO) Data logbooks for digital sensors: Adjustable scan time: 1 to 3600 s (1 h) Max. 8 data logbooks Graphic display (load curves) or numerical list 150,000 entries per logbook Graphic display (load curves) or numerical list Calibration logbook: max. 75 entries Hardware logbook: Hardware configuration and modifications Max. 125 entries Version logbook: Software updates among other things Max. 50 entries Event logbook Analyzer event logbook Analyzer event logbook Analyzer event logbook Max. 19 500 entries, ring memory or fill-up buffer for recording Operations logbook: max. 250 entries

Mathematical functions (virtual process values)

In addition to "real" process values, which are provided by connected physical sensors or analog inputs, mathematical functions can be used to calculate a maximum of 6 "virtual" process values.

The "virtual" process values can be:

- Output via a current output or a fieldbus
- Used as a controlled variable
- Assigned as a measured variable to a limit switch
- Used as a measured variable to trigger cleaning
- Displayed in user-defined measuring menus

The following mathematical functions are possible:

- Calculation of pH from two conductivity values according to VGB Standard 405, e.g. in boiler feedwater
- Difference between two measured values from different sources, e.g. to monitor membranes
- Differential conductivity, e.g. to monitor the efficiency of ion exchangers
- Degassed conductivity, e.g. for process controls in power plants
- Redundancy to monitor two or three redundant sensors
- rH calculation based on the measured values of a pH and an ORP sensor
- Formula editor as a powerful mathematics tool and for Boolean operations with up to 3 measured values

FieldCare

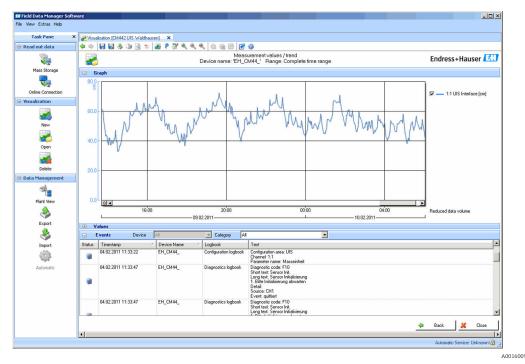

Configuration and asset management software based on FDT/DTM technology

- Complete device configuration when connected via FXA291 and service interface
- Access to a number of configuration parameters and identification, measuring and diagnostic data when connected via HART modem
- Logbooks can be downloaded in CSV format or binary format for "Field Data Manager" software
 Field Data Manager"

Field Data Manager

Visualization software and database for measuring, calibration and configuration data

- SQL database which is protected against manipulation
- Functions to import, save and print out logbooks
- Load curves to display measured values

If Field Data Manager: load curve display

SD card

The exchangeable storage medium enables:

- Quick and easy software updates and upgrades
- Quick and easy updates and upgrades to measuring parameter lists
- Data storage of internal device memory (e.g. logbooks)
- Transfer of complete configurations to a device with an identical setup (backup function)
- Transfer of configurations without the TAG and bus address to devices with an identical setup (copy function)

Endress+Hauser offers industry-approved SD cards as accessories. These memory cards provide maximum data security and integrity.

Other SD cards can also be used. However, Endress+Hauser does not accept any responsibility for the data security of such cards.

Self-monitoring functions	 Electronics Current inputs are deactivated in the event of overcurrent and reactivated once the overcurrent stops. Board voltages are monitored and the board temperature is also measured. 			
	Counter Counters monitor consumables such as reagents or dispensers.			
	 Photometer Automatic temperature monitoring Active monitoring of communication between the photometer module and the analyzer electronics 			
	 Sample preparation (optional) Active monitoring of communication between sample preparation with Memosens communication and the analyzer Counter for consumables, such as hoses of the peristaltic pump 			
	Sample collecting vessel (optional) Active monitoring of liquid level in the sample collecting vessel to ensure the supply of liquid to the analyzer			
	Leak sensor in the housing			
Data security	All settings, logbooks etc. are stored in a non-volatile memory to ensure that the data are retained even in the event of a disruption to the power supply.			

IT security

We only provide a warranty if the device is installed and used as described in the Operating Instructions. The device is equipped with security mechanisms to protect it against any inadvertent changes to the device settings.

IT security measures in line with operators' security standards and designed to provide additional protection for the device and device data transfer must be implemented by the operators themselves.

- Min. 5 mA at 24 V AC
- Min. 1 mA at 230 V AC

Protocol-specific data

PROFIBUS DP

Manufacturer ID	11 _h	
Device type	155E _h	
Profile version	3.02	
Device database files (GSD files)	www.endress.com/profibus Device Integration Manager DIM	
Output variables	16 AI blocks, 8 DI blocks	
Input variables	4 AO blocks, 8 DO blocks	
Supported features	 1 MSCY0 connection (cyclical communication, master class 1 to slave) 1 MSAC1 connection (acyclical communication, master class 1 to slave) 2 MSAC2 connections (acyclical communication, master class 2 to slave) Device lock: The device can be locked using the hardware or software. Addressing using DIL switches or software GSD, PDM DD, DTM 	

Modbus RS485

Protocol	RTU/ASCII	
Function codes	03, 04, 06, 08, 16, 23	
Broadcast support for function codes	06, 16, 23	
Output data	16 measured values (value, unit, status), 8 digital values (value, status)	
Input data	4 setpoints (value, unit, status), 8 digital values (value, status), diagnostic information	
Supported features	Address can be configured using switch or software	

Modbus TCP

TCP port	502
TCP connections	3
Protocol	TCP
Function codes	03, 04, 06, 08, 16, 23
Broadcast support for function codes	06, 16, 23
Output data	16 measured values (value, unit, status), 8 digital values (value, status)
Input data	4 setpoints (value, unit, status), 8 digital values (value, status), diagnostic information
Supported features	Address can be configured using DHCP or software

Web server

The web server enables full access to the device configuration, measured values, diagnostic messages, logbooks and service data via standard WiFi/WLAN/LAN/GSM or 3G routers with a user-defined IP address.

TCP port	80
Supported features	 Remote-controlled device configuration(1 session) Save/restore device configuration (via SD card) Logbook export (file formats: CSV, FDM) Access to web server via DTM or Internet Explorer Login Web server can be switched off

EtherNet/IP

Log	EtherNet/IP

Device description files (GSD)	Information and files under: • www.endress.com On the product page for the device: Documents/Software → Device drivers • www.profibus.com On the website under Products/Product Finder	
Polarity	Auto-polarity for automatic correction of crossed TxD and RxD pairs	
Supported connections	 1 x AR (IO Controller AR) 1 x AR (IO-Supervisor Device AR connection allowed) 1 x Input CR (Communication Relation) 1 x Output CR (Communication Relation) 1 x Alarm CR (Communication Relation) 	
Configuration options for measuring device	 Web browser Manufacturer-specific software (FieldCare, DeviceCare) Device master file (GSD), can be read out via the integrated web server of the measuring device 	
Configuration of the device name	DCP protocol	
Supported functions	 Identification & maintenance Simple device identification via: Process control system Nameplate Measured value status The process variables are communicated with a measured value status Blinking feature (FLASH_ONCE) via the local display for simple device identification and assignment Device operation via operating tools (e.g. FieldCare, DeviceCare) 	
System integration	For information on system integration, see the Operating Instructions • Cyclic data transmission • Overview and description of the modules • Status coding • Startup configuration • Factory setting	

Power supply

Supply voltage

- 100 to 120 V AC / 200 to 240 V AC
- or 24 V DC (not available for "Outdoor" version)
- 50 or 60 Hz

Fieldbus connection	Supply voltage: not applicable		
Power consumption	All versions except "Outdoor" version		
	130 VA + 660 VA per hose heater, max. 1450 VA (version with c	ooling system)	
	24-V version: max. 105 W		
	"Outdoor" version		
	680 VA + 660 VA per hose heater, max. 2000 VA (version with c	ooling system) ¹⁾	
Fuse	5 x 20 mm 10 A/250 V fine-wire fuse for hose trace heating system		
Cable entries	 4 x bores for M16, G3/8, NPT3/8", Memosens connection ²⁾ 4 x bores for M20, G1/2, NPT1/2" 		
Cable specification	Cable gland	Permitted cable diameter	
	M16x1.5 mm	4 to 8 mm (0.16 to 0.32")	
	M12x1.5 mm (for order version M12 socket for Memosens sensors)	2 to 5 mm (0.08 to 0.20")	
	M20x1.5 mm	6 to 12 mm (0.24 to 0.48")	
	NPT ³ /8"	4 to 8 mm (0.16 to 0.32")	
	G ³ / ₈	4 to 8 mm (0.16 to 0.32")	
	NPT ¹ /2"	6 to 12 mm (0.24 to 0.48")	
	G ¹ /2	7 to 12 mm (0.28 to 0.48")	
Heating for dilution water	Cable glands mounted at the factory are tightened with 2 Nm The dilution water and the hose for dilution water must be h installation!		
Connecting optional modules	 s With extension modules you can purchase additional functions for your device. NOTICE Unacceptable hardware combinations (due to conflicts in power supply) Incorrect measurements or total failure of the measuring point as a result of heat build-up or overloading Find out if the planned upgrade of your device results in a permitted hardware combination (configurator on www.endress.com/CA80NO). A maximum of eight current inputs and current outputs is permitted. A maximum of two "DIO" modules is permitted. Please contact your Endress+Hauser sales center should you have any questions. Cable bushings and possible cable diameters 		

¹⁾ The power value indicated on the nameplate refers to the power consumption when commissioning at 5 °C (41 °F) after an operating time of one minute.

²⁾ In the case of the "Outdoor" version, 2 bores are occupied; for this reason only 2 Memosens sensors are possible

PROFIBUS DP (module 485DP) Contacts 95, 96 and 99 are jumpered in the plug. This ensures that PROFIBUS communication is not interrupted if the connector is disconnected.

Sensor connection (optional)

Sensors with Memosens protocol

Sensor types	Sensor cable	Sensors
Digital sensors without additional internal power supply	With plug-in connection and inductive signal transmission	 pH sensors ORP sensors Combined sensors Oxygen sensors (amperometric and optical) Conductivity sensors with conductive measurement of conductivity Chlorine sensors (disinfection)
	Fixed cable	Conductivity sensors with inductive measurement of conductivity
Digital sensors with additional internal power supply	Fixed cable	 Turbidity sensors Sensors for interface measurement Sensors for measuring the spectral absorption coefficient (SAC) Nitrate sensors Optical oxygen sensors Ion-sensitive sensors

Performance characteristics

Maximum measured error ³⁾	CA80NO-AAG2:	10 to 500 µg/l (ppb) NO ₂ -N	2 % of end of measuring range		
	CA80NO-AAG3:	0.1 to 1.0 mg/l (ppm) NO_2 -N	2 % of end of measuring range		
	CA80NO-AAG4:	0.2 to 3.0 mg/l (ppm) NO_2 -N	2 % of end of measuring range		
	With dilution and dilution factor 5: additionally 2.0 % of end of measuring range				
Maximum measurement error for sensor inputs	\rightarrow Documentation of the connected sensor				
Maximum measurement Typical measured errors:					
error for current inputs and	< 20 μ A (with current values < 4 mA)				
outputs	< 50 µA (with current values 4 to 20 mA)				
	at 25 °C (77° F) in each case				
	Additional measured error depending on the temperature: $< 1.5 \ \mu\text{A/K}$				
Repeatability ³⁾	 to 150 µg/l: ± 3 ≥ 150 µg/l to 60 ≥ 600 µg/l: ± 20)0 μg/l: ± 10 μg/l (ppb)			
	With dilution and dilution factor 5: Additionally 1.0 % of end of measuring range				
Repeatability of sensor inputs	\rightarrow Documentation of the connected sensor				
Measuring interval	Continuous (approx. 7 min), adjustable 10 min to 24 h				
Sample requirement	Without dilution module 22 ml (0.74 fl oz)/measurement				

³⁾ According to ISO 15839 with standard solutions. Measurement errors include all the uncertainties of the analyzer. They do not include the uncertainties from the standard solutions used as a reference.

	 With dilution module Sample: 11 to 15 ml (0.37 to 0.51 fl oz)/measurement (depends on dilution factor) Dilution water: 17 to 21 ml (0.57 to 0.71)/measurement (depends on dilution factor) Use demineralized water for expected sample concentrations of < 50 mg/l (ppm). 	
Reagent requirement	 Approx. 100 µl per reagent and measurement 	
	• Given a measuring interval of 10 min, one set of reagents lasts for approx. 2 months	
Standard requirement	Given a calibration interval of 48 h approx. 420 ml (14.2 fl.oz) per month	
Calibration interval	1 h to 90 days, depending on the application and ambient conditions	
Maintenance interval	Every 3 to 6 months, depending on the application	
Maintenance effort	 Weekly: visual inspection Quarterly: 1 hour 	

Mounting

Mounting location	Note the following when erecting the device:				
	 If mounting on a wall, make sure that the wall has sufficient load-bearing capacity and is fully perpendicular. 				
	 If mounting on a base, set up the device on a level surface. Installing on a base is only permitted indoors. Protect the device against additional heating (e.g. from heaters). Protect the device against mechanical vibrations. Protect the device against corrosive gases, e.g. hydrogen sulfide (H₂S) . Make sure to pay attention to the maximum height difference and the maximum distance from the sampling point. 				
	 Ensure that the unit can drain freely, without any siphoning effects. Make sure air can circulate freely at the front of the housing. 				
					 Open analyzers (i.e. analyzers that are supplied without a door) may only be set up in closed areas or in a protective cabinet or similar facility.
	 "Outdoor" version only: Post mounting is recommended for outdoor installation. 				
Installation instructions	The device can be installed in the following ways:				
	 Mounted on a wall 				
	 Mounted on a base 				
	Post mounting / on a post (accessory)				

Post mounting / on a post (accessory)

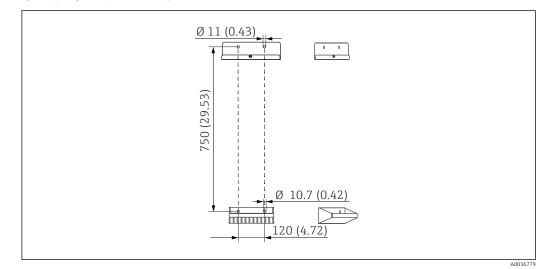

Minimum spacing required for mounting.
 Engineering unit mm (in).

18 Maximum opening angle

Spacing required for installing wall-mount version

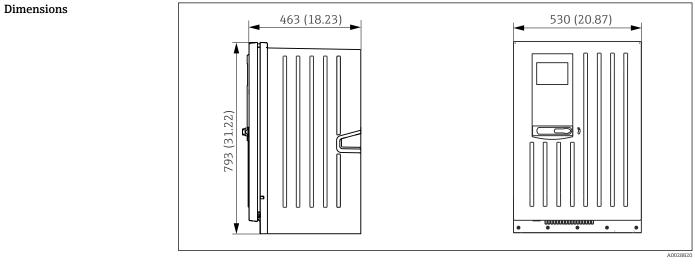

🖻 19 Holder unit dimensions. Engineering unit mm (in)

Environment

Ambient temperature range	All housing versions with the exception of the outdoor version +5 to +40 °C (41 to 104 °F)
	Outdoor version
	-20 to +40 °C (-4 to 104 °F)
Storage temperature	-20 to 60 °C (-4 to 140 °F)
Relative humidity	10 to 95 %, non-condensing
Degree of protection	IP55 (cabinet, analyzer stand), TYPE 3R (cabinet, analyzer stand)

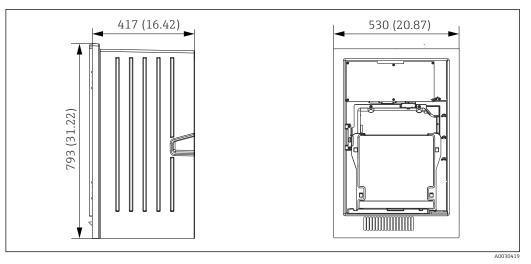

Electromagnetic	Interference emission and interference immunity as per EN 61326-1, class A for industrial areas	
compatibility ⁴⁾		
Electrical safety	According to EN/IEC 61010-1:2010, Class I equipment Low voltage: overvoltage category II	
	For installations up to 2000 m (6500 ft) above MSL	
Pollution degree	Pollution level 2	
	Process	
Sample temperature	4 to 40 °C (39 to 104 °F)	
Consistency of the sample	Low solids content (turbidity < 50 NTU), aqueous, homogenized	
Sample supply	Unpressurized	

Mechanical construction

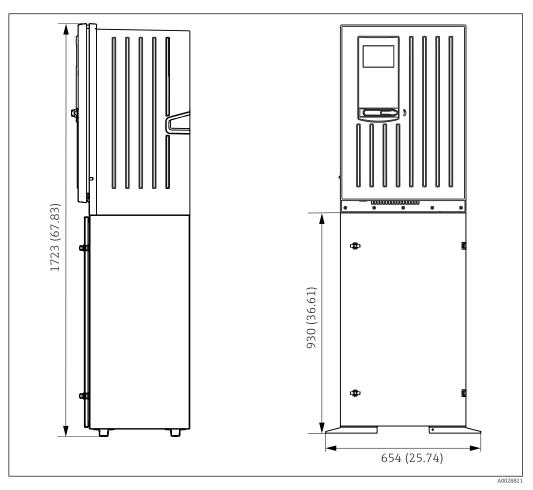

■ 20 Liquiline System CA80 closed version, dimensions in mm (in)

⁴⁾ Sufficient mains quality is required to operate the product as intended.

🖻 21 Liquiline System CA80 open version, dimensions in mm (in)

■ 22 Liquiline System CA80 with base, dimensions in mm (in)

Weight	Order	Weight with cooling modu	le Weight without cooling module
	Cabinet version	42 kg (92.6 lbs)	39.5 kg (87.1 lbs)
	Open installation	34 kg (74.96 lbs)	31.5 kg (69.45 lbs)
	Analyzer stand	75 kg (165.3 lbs)	72.5 kg (159.8 lbs)
Materials	Parts not in conta	Parts not in contact with medium	
	Cabinet version, ex	terior cover ASA	A + PC

Open installation, exterior cover	
Cabinet version, interior lining	рр
Open installation, interior lining	11
Window	Safety glass, coated
Reagent container	PP
Insulation	EPP (extruded PP)
Base, analyzer stand	Powder-coated sheet steel

	Parts in contact with medium		
	Dispenser body Piston seal	PP TPE	
	Liquid Manager housing Liquid Manager seal	PP FKM	
	Hoses	C-Flex (TPE), NORPRENE (PP)	
	Optical window	Borosilicate glass	
	Form seal, cuvette	FFKM	
	Drain pipe Outflow hose	PP EPDM	
	Sample collecting vessel (optional) • Beaker • Cover • Level detector pins • Seal, solenoid valve • Seal for sample collecting vessel va	 PMMA PP Stainless steel 1.4404 (V4A) EPDM FKM 	
	Valve on sample collecting vessel (optional) • Housing • Seal	PEEKFKM	
Process connection	Sample inlet: With sample collecting vessel Without sample collecting vessel Dilution water: Outlet:	Plug-in connector for rigid hoses with OD 4 mm Hose barb for flexible hoses with ID 1.6 mm Hose barb for flexible hoses with ID 3.2 mm Hose barb for flexible hoses with ID 13 mm	
Hose entries	4 x bores for M32 for sample inflow and outflow		

Hose specification (self-	 Clearance: max. 1.0 m (3.3 ft)
priming)	 Height: max. 0.5 m (1.6 ft)
	 Hose ID: 1.6 mm (¹/₁₆ in)

Operability

Operation concept	The simple and structured operating concept sets new standards:
operation concept	 Intuitive operation with the navigator and soft keys
	 Fast configuration of application-specific measurement options
	 Easy configuration and diagnosis thanks to plain-text display
	• All languages that can be ordered are available in every device

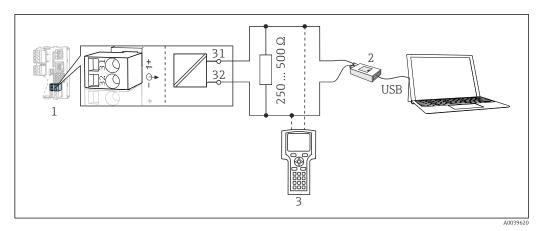

Display

Graphic display:

- Resolution: 240 x 160 pixel
- Back light with switch-off function
 Back disclose he also and for all successions are all successions and for all successions are all successions and for all successions are al
- Red display background for alarms alerts users to errors
- Transflective display technology for maximum contrast even in bright environments

Remote operation

Via HART (e.g. via HART modem and FieldCare)

■ 25 HART using modem

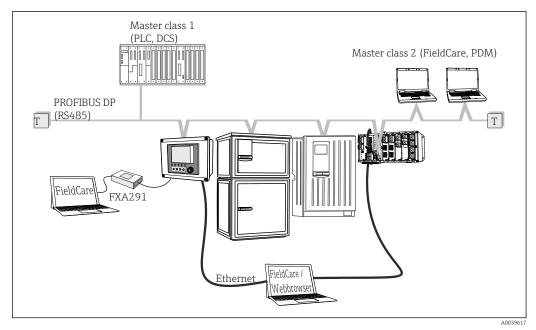

1 Device module Base2-E: current output 1 with HART

2 HART modem for connection to PC, e.g. Commubox FXA191 (RS232) or FXA195¹⁾ (USB)

3 HART handheld terminal

¹⁾ Switch position "on" (substitutes the resistor)

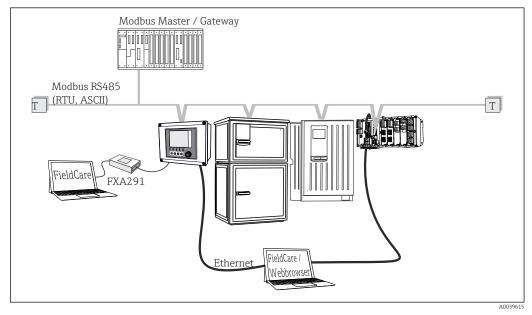

Via PROFIBUS DP

☑ 26 PROFIBUS DP

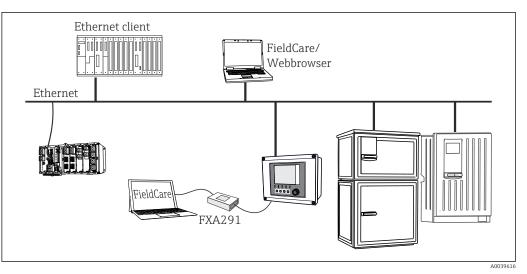

T Terminating resistor

Via Modbus RS485

- 27 Modbus RS485
- T Terminating resistor

Via Ethernet: web server/Modbus TCP/PROFINET/Ethernet/IP

28 Modbus TCP or EtherNet/IP or PROFINET

Language packages

The language selected in the product structure is the operating language preset at the factory. All other languages can be selected using the menu.

- English (US)
- German
- Chinese (Simplified, PR China)
- Czech
- Dutch
- French
- Italian
- Japanese
- Polish
- Portuguese
- Russian
- Spanish
- Turkish
- Hungarian
- Croatian
 Vistage
- Vietnamese

The availability of other languages can be checked via the product structure at www.endress.com/ ca80no.

Certificates and approvals

Current certificates and approvals for the product are available at www.endress.com on the relevant product page:

- 1. Select the product using the filters and search field.
- 2. Open the product page.

3. Select **Downloads**.

Order information

Product page	www.endress.com/ca80no
Product Configurator	1. Configure : Click this button on the product page.

	2. Select Extended selection .
	The Configurator opens in a separate window.3. Configure the device according to your requirements by selecting the desired option for each
	feature.
	In this way, you receive a valid and complete order code for the device.
	4. Accept : Add the configured product to the shopping cart.
	For many products, you also have the option of downloading CAD or 2D drawings of the selected product version.
	 5. CAD: Open this tab. The drawing window is displayed. You have a choice between different views. You can download these in selectable formats.
Scope of delivery	 The scope of delivery comprises: 1 analyzer in the version ordered with optional hardware 1 x Brief Operating Instructions (hard copy) 1 x Maintenance Manual Optional accessories
	Accessories
	The following are the most important accessories available at the time this documentation was issued.
	Listed accessories are technically compatible with the product in the instructions.
	1. Application-specific restrictions of the product combination are possible.
	Ensure conformity of the measuring point to the application. This is the responsibility of the operator of the measuring point.
	2. Pay attention to the information in the instructions for all products, particularly the technical data.
	3. For accessories not listed here, please contact your Service or Sales Center.
Device-specific accessories	Sample preparation
-	 Liquiline System CAT810 Pressure pipe sampling and microfiltration Product Configurator: www.endress.com/cat810)
	Technische Information Liquiline System CAT810, TI01138C
	Liquiline System CAT820 Sampling and membrane filtration Product Configurator: www.endress.com/cat820)
	Technical Information Liquiline System CAT820, TI01131C
	Liquiline System CAT860 Sampling and membrane filtration Product Configurator: www.endress.com/cat860)
	Technical Information Liquiline System CAT860, TI01137C
	The Liquiline System CAT860 can only be operated with a Liquiline System CA80 single- channel device.
	Installation accessories
	Kit, post with bracket CA80, outd. Post 60 x 60 x 1800 mm, stainless steel 1.4571

- Post mount clamp CA80xxKit installation instructions
- Order No. 71458285

Consumables

1. https://portal.endress.com/webapp/SparePartFinder

2. Specify the serial number or product code.

The following consumables are available:

- Reagents and standard solutions CY80NO
- Cleaner CY800 (for hoses in the device)
- Cleaner CY820 (for hoses of sample preparation system and of sample collecting vessel)
- CAC880, inlet and outlet hoses for CA80

Maintenance kit CAV800

https://portal.endress.com/webapp/SparePartFinder

Standard

- Dispensers, 2 x 2.5 ml and 4 x 10 ml, including mounted adapter
- Hoses
- Silicone grease, medium-viscosity, tube 2 g
- Plug
- Sealing caps
- Filter mats
- O-ring for sample collecting vessel

Optional

- Inlet and outlet hoses
- Liquid Manager without motor
- Collecting vessel, beaker (2 pcs.)

Upgrade kits CAZ800

Kit for upgrade with sample collecting vessel

- Sample collecting vessel with level monitoring, pre-fitted on mounting bracket
- Hoses, connection adapters
- Activation code
- Order No. CAZ800-GGA1

Kit for upgrade to two-channel device

- Valve for switching sample flow
- Two sample collecting vessels with level monitoring, pre-fitted on mounting bracket
- Hoses, connection adapters
- Activation code
- Order No. CAZ800-GGA2

Kit for upgrade with cooling system

- Cooling module integrated in base of housing
- Bottle tray with recess and insulation
- Activation code
- Order No. CAZ800-GGN1

Kit for upgrade for second, downstream analyzer⁵

- Valve for switching sample flow
- Hoses, connection adapters
- Activation code
- Order No. CAZ800-GGM1

Kit for upgrading the dilution function

- Hose with identification marking
- Modified cable gland
- Activation code
- Order No. CAZ800-GGN6

⁵⁾ Not for analyzers operated with CAT860 and not for two-channel versions.

Sensors

pH glass electrodes

Memosens CPS11E

- pH sensor for standard applications in process and environmental engineering
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps11e

Technical Information TI01493C

Memosens CPS41E

- pH sensor for process technology
- With ceramic junction and KCl liquid electrolyte
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps41e

Technical Information TI01495C

Memosens CPS71E

- pH sensor for chemical process applications
- With ion trap for poison-resistant reference
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps71e

Technical Information TI01496C

Memosens CPS91E

- pH sensor for heavily polluted media
- With open aperture
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps91e

Technical Information TI01497C

Memosens CPS31E

- pH sensor for standard applications in drinking water and swimming pool water
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps31e

Technical Information TI01574C

Ceramax CPS341D

- pH electrode with pH-sensitive enamel
- Meets highest demands of measuring accuracy, pressure, temperature, sterility and durability
- Product Configurator on the product page: www.endress.com/cps341d

Technical Information TI00468C

Memosens CPF81E

- pH sensor for mining operations, industrial water and wastewater treatment
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cpf81e

Technical Information TI01594C

ORP electrodes

Memosens CPS12E

- ORP sensor for standard applications in process and environmental engineering
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps12e

Technical Information TI01494C

Memosens CPS42E

- ORP sensor for process technology
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps42e

Technical Information TI01575C i

Memosens CPS72E

- ORP sensor for chemical process applications
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps72e
- Technical Information TI01576C

Memosens CPS92E

- ORP sensor for use in heavily polluted media
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cps92e

Technical Information TI01577C

Memosens CPF82E

- ORP sensor for mining operations, industrial water and wastewater treatment
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cpf82e

Technical Information TI01595C

Conductivity sensors with inductive measurement of conductivity

Indumax CLS50D

- High-durability inductive conductivity sensor
- For standard and hazardous area applications
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cls50d

Technical Information TI00182C Ĩ

Conductivity sensors with conductive measurement of conductivity

Memosens CLS21E

- Digital conductivity sensor for media with medium or high conductivity
- Conductive measurement
- With Memosens 2.0
- Product Configurator on the product page: www.endress.com/cls21e

Technical Information TI01528C

Oxygen sensors

Memosens COS51E

- Amperometric oxygen sensor for water, wastewater and utilities
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cos51e

Technical Information TI01620C

Memosens COS81E

- Hygienic optical oxygen sensor with maximum measurement stability over multiple sterilization cycles
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cos81e

Technical Information TI01558C

Memosens COS22E

- Hygienic amperometric oxygen sensor with maximum measurement stability over multiple sterilization cycles
- Digital with Memosens 2.0 technology
- Product Configurator on the product page: www.endress.com/cos22e

Technical Information TI01619C

Chlorine dioxide and chlorine sensors

Memosens CCS50E

- Membrane-covered amperometric sensor for chlorine dioxide
- With Memosens technology
- Product Configurator on the product page: www.endress.com/ccs50e

Technical Information TI01353C

Memosens CCS51E

- Sensor for measuring free available chlorine
- Product Configurator on the product page: www.endress.com/ccs51e

Technical Information TI01423C

Ion-selective sensors

ISEmax CAS40D

- Ion selective sensors
- Product Configurator on the product page: www.endress.com/cas40d

Technical Information TI00491C

Turbidity sensors

Turbimax CUS51D

- For nephelometric measurements of turbidity and solids in wastewater
- 4-beam scattered light method
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cus51d

Technical Information TI00461C

Turbimax CUS52D

- Hygienic Memosens sensor for turbidity measurement in drinking water, process water and in utilities
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cus52d

Technical Information TI01136C

SAC and nitrate sensors

Viomax CAS51D

- SAC and nitrate measurement in drinking water and wastewater
- With Memosens technology
- Product Configurator on the product page: www.endress.com/cas51d

Interface measurement

Turbimax CUS71D

- Immersion sensor for interface measurement
- Ultrasonic interface sensor
- Product Configurator on the product page: www.endress.com/cus71d

Cable junction with Velcro strip

- 4 pieces, for sensor cable
- Order No. 71092051

Communication-specific accessories

Additional functionality

• Always quote the serial number of your device when ordering activation codes.

Order code	Communication; software
51516983	Commubox FXA291 (hardware)
71127100	SD card with Liquiline Firmware, 1 GB, Industrial Flash Drive
XPC0018	Activation code for EtherNet/IP + web server
XPC0020	Activation code for Modbus TCP + web server
XPC0021	Activation code for web server for BASE2
XPC0022	Activation code for PROFINET + web server for BASE2
XPC0024	Activation code for Profibus DP for module 485
XPC0025	Activation code for Modbus RS485 for module 485
71249548	Kit CA80: activation code for 1st digital sensor input
71249555	Kit CA80: activation code for 2nd digital sensor input

	Retrofit kits
71136999	Kit CSF48/CA80: retrofit service interface (CDI flange connector, counter nut)
71111053	Kit module AOR: 2 x relay, 2 x analog output 0/4 to 20 mA
71125375	Kit module 2R: 2 x relay
71125376	Kit module 4R: 4 x relay
71135632	Kit module 2AO: 2 x analog output 0/4 to 20 mA
71135633	Kit module 4AO: 4 x analog output 0/4 to 20 mA
71135631	Kit module 2DS: 2 x digital sensor, Memosens
71135634	Kit module 485: PROFIBUS DP or Modbus RS485. This requires an additional activation code which can be ordered separately.
71135638	Kit module DIO: 2 x digital input; 2 x digital output; auxiliary power supply for digital output
71135639	Kit module 2AI: 2 x analog input 0/4 to 20 mA
71140888	Upgrade kit module 485 + Profibus DP
71140889	Upgrade kit module 485 + Modbus RS485
71141366	Kit, extension backplane module

Software

Memobase Plus CYZ71D

- PC software to support laboratory calibration
- Visualization and documentation of sensor management
- Sensor calibrations stored in database
- Product Configurator on the product page: www.endress.com/cyz71d

Technical Information TI00502C

Field Data Manager Software MS20/21

- PC software for central data management
- Visualization of series of measurements and logbook events
- SQL database for secure data storage

System components

Measuring cables

Memosens data cable CYK10

- For digital sensors with Memosens technology
- Product Configurator on the product page: www.endress.com/cyk10
- Technical Information TI00118C

Memosens data cable CYK11

- Extension cable for digital sensors with Memosens protocol
- Product Configurator on the product page: www.endress.com/cyk11

SD card

- Industrial Flash Drive, 1 GB
- Order number: 71110815

www.addresses.endress.com
