Electrical connection data ........................................... 6
**Associated documentation**

This document is an integral part of the following Operating Instructions:

**RIA15:**
Operating Instructions:
- BA01073K/09 or
- BA01170K/09 (HART option)

The Operating Instructions pertaining to the device apply.

**Supplementary Documentation**

Explosion-protection brochure:
CP00021Z/11

**EAC certificate of conformity according to TR CU 012/2011**

The device meets the fundamental health and safety requirements for the design and construction of devices and protective systems intended for use in potentially explosive atmospheres in accordance with TR CU 012/2011.

Certification body: НАНИО "ЦСВЭ"

Certificate number: TC RU C-DE.AA87.B.00944

Affixing the certificate number certifies conformity with the following standards:

ГОСТ Р 31610.0-2014 (IEC 60079-0: 2011)
ГОСТ Р 31610.11-2014 (IEC 60079-11: 2011)

**Manufacturer address**

Endress+Hauser Wetzer GmbH + Co KG
Obere Wank 1
D-87484 Nesselwang
Germany
Phone: +49 (0)8361 308 0
Safety instructions

Explosion hazardous area zone 0, 1, 2
EPL Ga, Gb, Gc

Explosion hazardous area zone 1, 2
EPL Gb, Gc

Non-hazardous area

Associated intrinsically safe apparatus with max. electrical connection values (see tables)

Connection without background illumination

Connection with background illumination

1 Loop power supply

2 Current supply 4...20 mA

Local potential equalization

e.g. process transmitter
Safety instructions: Installation

- Comply with the installation and safety instructions in the Operating Instructions.
- Install the device according to the manufacturer's instructions and any other valid standards and regulations (ГОСТ IEC 60079-14-2011).
- The indicator housing must be connected to the potential matching line.

Safety instructions: Special conditions

- Supply of indicators should be carried out through the intrinsically safe barriers with a certificate of conformity.
- The indicator must be installed so, that even in the event of rare incidents, an ignition source due to impact or friction between the enclosure and iron/steel is excluded.
- The type of protection for the process transmitter changes as follows when the devices are connected to certified intrinsically safe circuits of Category Ex ib: Ex ib IIC. When connecting an intrinsically safe Ex ib circuit, do not operate the process transmitter at Zone 0 / EPL Ga.
- The permitted category of the intrinsically safe circuit for the process transmitter depends on the type of protection of the respective associated apparatus used.
