Technical Information
Waterpilot FMX11
Hydrostatic level measurement

Compact transmitter for level measurement

Application
The Waterpilot FMX11 is a pressure sensor for hydrostatic level measurement in fresh water applications. Typical applications include:
- Level measurement in groundwater wells; suitable for narrow 1" pipes
- Surface water monitoring in rivers and lakes
- Level monitoring in the extraction of drinking water, e.g., in water towers

Your benefits
- Easy and quick to install and commission
- Flexible uses in fresh water applications thanks to the very compact design and materials that are suitable for drinking water

## Symbols

### Safety symbols

- **DANGER**
  This symbol alerts you to a dangerous situation. Failure to avoid this situation will result in serious or fatal injury.

- **WARNING**
  This symbol alerts you to a dangerous situation. Failure to avoid this situation can result in serious or fatal injury.

- **CAUTION**
  This symbol alerts you to a dangerous situation. Failure to avoid this situation can result in minor or medium injury.

- **NOTICE**
  This symbol contains information on procedures and other facts which do not result in personal injury.

### Electrical symbols

- **Ground connection:**
  A grounded terminal which, as far as the operator is concerned, is grounded via a grounding system.

### Symbols for certain types of information

- **Permitted:**
  Procedures, processes or actions that are permitted.

- **Forbidden:**
  Procedures, processes or actions that are forbidden.

- **Additional information:**

- **Series of steps:**
  1. 2. 3.

- **Result of an individual step:**

### Symbols in graphics

- **Item numbers:** 1, 2, 3 ...

Function and system design

Measuring principle

The process pressure causes the metal process isolating diaphragm of the sensor to deflect. A filling oil transfers the pressure to a Wheatstone bridge (semiconductor technology). The pressure-dependent change in the bridge output voltage is measured and evaluated.

Measuring system

Application examples

The complete measuring system comprises a Waterpilot FMX11 and a transmitter power supply unit with a supply voltage of 8 to 28 V DC as standard.

1 Waterpilot FMX11
2 Overvoltage protection (OVP), e.g., HAW from Endress+Hauser
3 Power supply, display and evaluation unit with one input for 4 to 20 mA
4 Power supply
Input

**Measured variable**  
Hydrostatic pressure of a liquid

**Measuring range**  
Customer-specific measuring ranges or calibration that has been preset in the factory.

**Input signal**  
Change in capacitance
Output

Output signal
4 to 20 mA analog, 2-wire for hydrostatic pressure measured value.

Signal range
2 to 22 mA

Maximum load
The maximum load resistance depends on the supply voltage (U) and must be determined individually for each current loop, see formula and diagram. The total resistance resulting from the resistances of the connected devices, the connecting cable and, where applicable, the resistance of the extension cable may not exceed the load resistance value. Load diagram for an approximate calculation of the load resistance. Additional resistances, such as the resistance of the extension cable (per wire ≤0.09 Ω/m), have to be subtracted from the value calculated as shown in the equation.

\[
R_{L\text{max}} \leq \frac{U - 8 \text{ V}}{22 \text{ mA}} - 2 \times 0.09 \frac{\Omega}{\text{m}} \times L - R_{\text{add}}
\]

- \(R_{L\text{max}}\): Max. load resistance [Ω]
- \(R_{\text{add}}\): Additional resistances such as resistance of evaluating device and/or display unit, cable resistance [Ω]
- \(U\): Supply voltage [V]
- \(L\): Basic length, extension cable [m]
### Power supply

**Supply voltage**
8 to 28 V<sub>DC</sub>

**Power consumption**
≤ 0.62 W at 28 V<sub>DC</sub>

**Current consumption**
Max. current consumption: ≤ 22 mA
Min. current consumption: ≥ 2 mA

**Electrical connection**
- The supply voltage must match the supply voltage specified on the nameplate.
- The cable must end in a dry room or a suitable terminal box. The terminal box (IP66/IP67) with GORE-TEX® filter from Endress+Hauser is suitable for outdoor installation. The terminal box can be ordered separately as an accessory (order number: 52006152).
- Connect the device in accordance with the following diagrams. Reverse polarity protection is integrated in the Waterpilot FMX11. Changing the polarities will not result in damage to the device. The device is not operational.
- A suitable circuit breaker should be provided for the device in accordance with IEC/EN 61010.

The electrical connection is established with the corresponding wires of the extension cable and with the optional use of the terminal box and a power supply (e.g. RN221N active barrier).

---

![Electrical Connection Diagram](image)

1. 8 to 28 V<sub>DC</sub>
2. 4 to 20 mA
3. Resistance (R<sub>L</sub>)
4. Waterpilot FMX11

**Wire colors**
- RD = red
- BK = black
- GNYE = green/yellow

**Connection values**
Connection classification as per IEC 61010-1:
- Overvoltage category 1
- Pollution level 1

---

**Terminals in the terminal box**
Three terminals as standard in terminal box (terminal box can be ordered separately as an option, order number: 52006152).

**Cable specification**
Connecting cable
Endress+Hauser recommends using shielded, twisted-pair two-wire cables.
- Commercially available instrument cable
- Terminals, terminal box: 0.08 to 2.5 mm<sup>2</sup> (28 to 14 AWG)
Extension cable
- Total outer diameter: 6 mm (0.24 in) ±0.2 mm (0.01 in)
- PA pressure compensation tube:
  - Outer diameter 2.5 mm (0.1 in)
  - Internal diameter 1.5 mm (0.06 in)
  - Pressure compensation element outer diameter 6 mm (0.24 in)

The extension cables are shielded.

Cross-section
2 x 0.22 mm² + pressure compensation tube

Cable resistance
Per wire: ≤0.09 Ω/m

Residual ripple
No impact on the 4 to 20 mA signal to ±5 % residual ripple within the permitted voltage range.

Overvoltage protection
To protect the Waterpilot from large interference voltage peaks, Endress+Hauser recommends installing overvoltage protection upstream and downstream of the display and/or evaluation unit.
- Integrated overvoltage protection to EN 61000-4-5 (2 kV asymmetrical)
- Install overvoltage protection ≥ 1.0 kV, external if necessary

1 Waterpilot FMX11
2 Overvoltage protection (OVP), e.g., HAW from Endress+Hauser
3 Power supply, display and evaluation unit with one input for 4 to 20 mA
4 Power supply
Performance characteristics

Reference operating conditions

- As per IEC 60770
- Ambient temperature $T_U$ = constant, in the range: +21 to +27 °C (+70 to 81 °F)
- Humidity $\varphi$ = constant, in the range of 20 to 80 % rH
- Ambient pressure $p_U$ = constant, in the range: 860 to 1060 mbar (12.47 to 15.37 psi)
- Position of measuring cell constant, vertical in the range of ±1°
- Supply voltage constant: 21 V DC to 27 V DC

Reference accuracy

The reference accuracy comprises the non-linearity after limit point configuration, hysteresis and non-reproducibility in accordance IEC 60770.

- Sensor measuring range ≥ 400 mbar: ≤ ±0.35 %
- Sensor measuring range < 400 mbar: ≤ ±0.50 %

Long-term stability

≤ ±0.1 % of URL/year at reference operating conditions

Influence of medium temperature

- Thermal change in the zero output and the output span:
  -10 to +70 °C (+14 to 158 °F): < (0.4 + 0.4 x TD)% of set span
- Temperature coefficient ($T_K$) of the zero output and the output span
  0 to +70 °C (32 to 158 °F): 0.15 %/10 K of URL

Warm-up period

≤ 10 s

Response time

- T90 time: ≤ 15 ms
- T99 time: ≤ 45 ms

Installation

Installation instructions

- Cable length
  - See → 11
  - Limited cable length when performing installation with freely suspended device with suspension clamp: max. 300 m (984 ft).
- Sideways movement of the level probe can result in measuring errors. Install the probe at a point free from flow and turbulence or use a guiding tube. The internal diameter of the guiding tube should be at least 1 mm (0.04 in) greater than the outer diameter of the FMX11.
- To avoid mechanical damage to the measuring cell, the device is equipped with a protection cap.
- The cable must end in a dry room or a suitable terminal box. The terminal box from Endress+Hauser provides humidity and climatic protection and is suitable for installation outdoors.
- Cable length tolerance: ±≤ 50 mm (1.97 in)
- Endress+Hauser recommends using twisted, shielded cable.
- The length of the extension cable depends on the intended level zero point. The height of the protective cap must be taken into consideration when designing the layout of the measuring point. The level zero point (E) corresponds to the position of the process isolating diaphragm. Level zero point = E, tip of probe = L (see the following diagram).

![Diagram](image_url)

1 Extension cable
2 Suspension clamp
3 Clamping jaws

Cable length

A Length of extension cable

Pay attention to the "Load"
Cable lengths available for order
- 6 m (20 ft) cable, can be shortened, PE
- 10 m (33 ft) cable, can be shortened, PE
- 20 m (66 ft) cable, can be shortened, PE
- 30 m (98 ft) cable, can be shortened, PE
- Limited cable length when performing installation with freely suspended device with suspension clamp: max. 300 m (984 ft).

Technical data for cable
- Minimum bending radius: 
  \[ \geq 70 \text{ mm (2.76 in)} \] (static)
- Tensile strength: 500 N (112.4 lbf)
- Cable extraction force (= tensile force required to extract the cable from the probe): 
  \[ \geq 400 \text{ N (89.92 lbf)} \]
- UV-resistant (UV = ultraviolet)
- TPE: Use in water and drinking water
## Environment

</tr>
</tbody>
</table>

The FMX11 may be operated in this temperature range. The specification values, such as accuracy, may be exceeded.

**WARNING**

The maximum pressure for the measuring device depends on the lowest-rated element with regard to pressure.

- The measuring device must be operated only within the specified limits!
- The Pressure Equipment Directive (2014/68/EU) uses the abbreviation 'PS'. The abbreviation 'PS' corresponds to the MWP (maximum working pressure) of the measuring device.
- OPL (Over Pressure Limit = sensor overload limit): The test pressure corresponds to the over pressure limit of the sensor and may only be applied for a limited time period so that no permanent damage develops.

| **Pressure Equipment Directive** | Pressure Equipment Directive 2014/68/EU (PED)  

*Pressure equipment with allowable pressure ≤ 200 bar (2,900 psi)*

Pressure equipment (with a maximum allowable pressure PS ≤ 200 bar (2,900 psi)) can be classified as pressure accessories in accordance with Pressure Equipment Directive 2014/68/EU. If the maximum allowable pressure is ≤ 200 bar (2,900 psi) and the pressurized volume of the pressure equipment is ≤ 0.1 l, the pressure equipment is subject to the Pressure Equipment Directive (cf. Pressure Equipment Directive 2014/68/EU, Article 4, point 3). The Pressure Equipment Directive only requires that the pressure equipment shall be designed and manufactured in accordance with the 'sound engineering practice of a Member State'.

**Reasons:**
- Pressure Equipment Directive (PED) 2014/68/EU Article 4, point 3

**Note:**
A partial examination shall be performed for pressure instruments that are part of safety equipment for the protection of a pipe or vessel from exceeding allowable limits (safety accessory in accordance with Pressure Equipment Directive 2014/68/EU, Article 2, point 4).

Ordering information

Detailed ordering information is available from the following sources:

- In the Product Configurator on the Endress+Hauser website: www.endress.com -> Click "Corporate" -> Select your country -> Click "Products" -> Select the product using the filters and search field -> Open product page -> The "Configure" button to the right of the product image opens the Product Configurator.
- Your Endress+Hauser sales center: www.addresses.endress.com

Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop
