Technical Information
Liquiligne Mobile CML18
Multiparameter mobile device

Application
Liquiligne Mobile CML18 is a multiparameter mobile device for connecting digital sensors with Memosens technology and optional operation by smartphone or other mobile devices via Bluetooth.

The device is designed for reliable operation in the field or laboratory and is particularly suitable for the following industries:
- Life sciences
- Chemical industry
- Water and wastewater
- Food and beverages
- Power stations
- Other industrial applications of liquid analysis

Your benefits

Easy operation:
Use your own tablets and smartphones for operation and commissioning.

Enjoy all the benefits of Memosens technology:
Memosens sensors offer you the most secure method of data transmission, maximum measured value availability and easy, straightforward handling.

Trust your measured values:
As the same technology is used, complete consistency between process and sample measurements is guaranteed.

Simplify your daily tasks:
Real plug & play with pre-calibrated Memosens sensors allows you to switch quickly between parameters.

Use the data logger function:
Save over 10,000 measured values with a time and date stamp.

Simply take it with you to any measuring point:
The versatile device can be used wherever it is needed - from the laboratory to the process. Small and handy, it fits into any shirt pocket.
Function and system design

Product description

1 CML18
2 Protection cap
3 Display screen with automatic screen rotation
4 ‘Select’ button
5 ‘Next’ button
6 Memosens connection
7 Area for wireless charging
8 Status LED
9 M12 connection
Measuring system

The measuring system consists at least of a Liquiline Mobile CML18 transmitter and a Memosens sensor.

Connection options:
- M12 connection
  - Connection of a Memosens sensor via the M12 Memosens cable (optionally available)
  - Connection of the Liquiline Mobile CML18 to a PC for data transmission or to charge the device via the M12-USB cable (optionally available)
- Bluetooth interface to connect the Liquiline Mobile CML18 to a compatible end device (not supplied) for data analysis, data transmission and device configuration via the SmartBlue app
- Memosens connection directly on the device for a Memosens sensor

![Diagram showing the connection options](image)

1 M12 connection
2 Bluetooth interface
3 Memosens connection

The simultaneous connection of 2 sensors is not supported. Measurement is interrupted during data transmission, software updates or device configuration.

Communication and operation

Operation and settings via:
- Internal operating menu with keys
- SmartBlue App via Bluetooth® LE wireless technology → 9

Dependability

Reliability

Memosens makes your measuring point safer and more reliable:
- Non-contact, digital signal transmission enables optimum galvanic isolation
- No contact corrosion
- Completely watertight
• Sensor can be calibrated in a lab, thus increasing the availability of the measuring point in the process
• Intrinsically safe electronics mean operation in hazardous areas is not a problem.
• Predictive maintenance thanks to recording of sensor data, e.g.:
  • Total hours of operation
  • Hours of operation with very high or very low measured values
  • Hours of operation at high temperatures
  • Number of steam sterilizations
  • Sensor condition

**Input**

<table>
<thead>
<tr>
<th>Input power</th>
<th>Wireless charging</th>
<th>5 W</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>M12 connection</td>
<td>5 V; 0.6 A</td>
</tr>
</tbody>
</table>

**Measured variables**

- pH
- ORP
- pH/ORP
- Oxygen
- Conductivity
- Temperature

**Measuring range**

→ Documentation of the connected sensor

**Type of input**

Memosens connection for sensors with Memosens technology
M12 connection for digital measuring cable CYK10, CYK20 for sensors with Memosens technology
Memosens sensors CLS50D and CLS54D
A complete list of supported sensors can be found on the product page of the device: www.endress.com/CML18

**Output**

**Output signal**

Memosens M12 (maximum 80 mA)

**Power supply**

**Supply voltage**

Inductive charging: use Qi-certified devices (min. 5 W output power)

**Battery rated capacity**

1 000 mAh (min. 950 mAh)

**Battery life**

Max. 48 h

**Overvoltage protection**

IEC 61 000-4-4 with 0.6 kV
IEC 61 000-4-5 with 2.0 kV

**Sensor connection**

Sensors with Memosens technology

**Cable specification**

Digital measuring cable CYK10-Axx2+x
Digital measuring cable CYK20-AAxxC1
## Environment

### Ambient temperature range

Charging: 0 to +45 °C (32 to 113 °F)  
Operation: –10 to +60 °C (14 to 140 °F)

> The maximum ambient temperature depends on the process temperature and the installation position.

### Storage temperature

–20 to +45 °C (–4 to 113 °F)

> Elevated storage temperatures reduce the battery capacity.

### Humidity

0 to 95 %

### Degree of protection

IP66

### Electrical safety

EN 61010-1

### Radio standards

The device meets the radio standards of the following countries/regions:

- Europe  
- USA  
- China  
- Canada  
- Japan  
- South Korea  
- Brazil  
- Mexico  
- Singapore  
- Argentina  
- Thailand  
- Australia

### Materials not in contact with the medium

#### Information according to REACH Regulation (EC) 1907/2006 Art. 33/1:

The device battery contains the SVHC 1.3 propane sulton; ethylene glycol dimethyl ether (CAS number 1) 110-71-4) with more than 0.1% (w/w). The product does not present a hazard if it is used as designated.

### Impact loads

The product is designed for mechanical impact loads of 1 J (IK06) as per the requirements of EN61010-1.

### Weight

| Liquiline Mobile CML18 | 155 g (5.5 oz) |

### Regulatory information

### Guidance

2 point calibration

1) Available only with pH or ISFET sensor

### Display structure

5 Schematic representation of the display structure

1 Menu path/title of measuring screen
2 Bluetooth status
3 Battery level, charging information
4 NAMUR indicator
5 Measuring screen
6 Date and time (displayed in main menu and if no sensor is connected)
**Status according to NAMUR NE107 categories:**

<table>
<thead>
<tr>
<th>NAMUR indicator</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>OK</td>
<td>The device and sensor are working reliably.</td>
</tr>
<tr>
<td>F</td>
<td>Failure of device or sensor. F status signal as per NAMUR NE107</td>
</tr>
<tr>
<td>M</td>
<td>Device or sensor requires maintenance. M status signal as per NAMUR NE107</td>
</tr>
<tr>
<td>C</td>
<td>Device or sensor undergoing function check. C status signal as per NAMUR NE107</td>
</tr>
<tr>
<td>S</td>
<td>Device or sensor being operated out of specification. S status as per NAMUR NE107</td>
</tr>
</tbody>
</table>

**Structure of the measurement window**

The measurement window has 3 measuring screens, which the user can scroll through:

<table>
<thead>
<tr>
<th>Measuring screen (1 of 3)</th>
<th>Measuring screen (2 of 3)</th>
<th>Measuring screen (3 of 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main value</td>
<td>Main and secondary measured value</td>
<td>All measured values of the sensor input</td>
</tr>
</tbody>
</table>

**LED status indicator**

The status LED is used for the quick visualization of the sensor status.

<table>
<thead>
<tr>

<td>Sensor error</td>
</tr>
</tbody>
</table>

**Operation via SmartBlue app**

The SmartBlue App is available for download from the Google Play Store for Android devices and from the Apple App Store for iOS devices.

Download the SmartBlue App.

- Use the QR codes to download the app.

**System requirements**

- iOS devices: iPhone 4S or higher from iOS9.0; iPad2 or higher from iOS9.0; iPod Touch 5th generation or higher from iOS9.0
- Devices with Android: from Android 4.4 KitKat and Bluetooth® 4.0
- Internet access

- Open the SmartBlue App.
Bluetooth must be enabled on both devices.

Enable Bluetooth

The Livelist displays all of the devices that are within range.

- Tap the device to select it.

To be able to use the device with the SmartBlue App, the Bluetooth connection must be confirmed by entering a user name and password.

1. User name >> **admin**
2. Initial password >> **device serial number**

Change the user name and password after logging in for the first time.

The current measured values are displayed in the Home view. The device information (device tag, serial number, firmware version, order code) is also displayed.
9  Home view of SmartBlue App with current measured values

Ordering information

Product page  www.endress.com/CML18

Product Configurator  On the product page there is a Configure button to the right of the product image.
1. Click this button.
   ⊲ The Configurator opens in a separate window.
2. Select all the options to configure the device in line with your requirements.
   ⊲ In this way, you receive a valid and complete order code for the device.
3. Export the order code as a PDF or Excel file. To do so, click the appropriate button on the right above the selection window.

For many products you also have the option of downloading CAD or 2D drawings of the selected product version. Click the CAD tab for this and select the desired file type using picklists.
Scope of delivery

The scope of delivery comprises:

- 1 Liquiline Mobile CML18
- 1 set of Operating Instructions in German
- 1 set of Operating Instructions in English

 Inductive charger and power unit are available separately.

- If you have any queries:
  Please contact your supplier or local sales center.

Accessories

The latest list of accessories and all compatible Memosens sensors is provided on the product page:

www.endress.com/CML18
