Brief Operating Instructions
Liquiline Compact CM72

Compact single-parameter transmitter for Memosens sensors

These instructions are Brief Operating Instructions; they are not a substitute for the Operating Instructions pertaining to the device.

Detailed information on the device can be found in the Operating Instructions and in the other documentation available at:
- www.endress.com/device-viewer
- Smart phone/tablet: Endress+Hauser Operations App

1.4 Documentation

The following instructions complement these Brief Operating Instructions and are available on the product pages on the Internet:
Operating Instructions Memosens, BA01245C
- Software description for Memosens inputs
- Calibration of Memosens sensors
- Sensor-specific diagnostics and troubleshooting

2 Basic safety instructions

2.1 Requirements for personnel

- Installation, commissioning, operation and maintenance of the measuring system may be carried out only by specially trained technical personnel.
- The technical personnel must be authorized by the plant operator to carry out the specified activities.
- The electrical connection may be performed only by an electrical technician.
- The technical personnel must have read and understood these Operating Instructions and must follow the instructions contained therein.
- Faults at the measuring point may only be rectified by authorized and specially trained personnel.

Repairs not described in the Operating Instructions provided must be carried out only directly at the manufacturer's site or by the service organization.

2.2 Intended use

The Liquiline CM72 is a transmitter for connecting digital sensors with Memosens technology, permanently preset to sensor parameters and measuring range spreading with 4...20mA communication.

The device is designed for use in the following industries:
- Life science
- Chemical industry
- Water and wastewater
- Food and beverages
- Power stations
- Other industrial applications
2.3 Workplace safety
As the user, you are responsible for complying with the following safety conditions:
- Installation guidelines
- Local standards and regulations

Electromagnetic compatibility
- The product has been tested for electromagnetic compatibility in accordance with the applicable international standards for industrial applications.
- The electromagnetic compatibility indicated applies only to a product that has been connected in accordance with these Operating Instructions.

2.4 Operational safety

Before commissioning the entire measuring point:
1. Verify that all connections are correct.
2. Ensure that electrical cables and hose connections are undamaged.
3. Do not operate damaged products, and protect them against unintentional operation.
4. Label damaged products as defective.

During operation:
- If faults cannot be rectified:
  products must be taken out of service and protected against unintentional operation.

CAUTION
Cleaning not switched off during calibration or maintenance activities
Risk of injury due to medium or cleaning agent!
- If a cleaning system is connected, switch it off before removing a sensor from the medium.
- If you wish to check the cleaning function and have therefore not switched off the cleaning system, wear protective clothing, goggles and gloves or take other appropriate measures.

2.5 Product safety

2.5.1 State-of-the-art technology
The product is designed to meet state-of-the-art safety requirements, has been tested, and left the factory in a condition in which it is safe to operate. The relevant regulations and international standards have been observed.
3 Product description

3.1 Product design

![Diagram of transmitter design]

   1. Cable
   2. Housing
   3. Memosens connection
   4. LED, for optical signaling of operating statuses of measuring point

### 3.1.1 Measuring parameters

The transmitter is designed for digital Memosens sensors with inductive plug-in head:
- pH, ORP, pH/ORP combined sensors
- Conductive conductivity
- Dissolved oxygen

Depending on the order version, the measuring range is configured to suit the sensor type:
- pH sensor: 0 to 14 pH
- ORP: -1500 mV to +1500 mV
- Conductivity: 0 to 20 μS/cm
- Conductivity: 0 to 500 μS/cm
- Conductivity: 0 to 20 mS/cm
- Conductivity: 0 to 500 mS/cm
- Oxygen: 0 to 200 μg/l
- Oxygen: 0 to 20 mg/l
4  Incoming acceptance and product identification

4.1  Incoming acceptance

1. Verify that the packaging is undamaged.
   - Notify the supplier of any damage to the packaging.
     Keep the damaged packaging until the issue has been resolved.

2. Verify that the contents are undamaged.
   - Notify the supplier of any damage to the delivery contents.
     Keep the damaged goods until the issue has been resolved.

3. Check that the delivery is complete and nothing is missing.
   - Compare the shipping documents with your order.

4. Pack the product for storage and transportation in such a way that it is protected
   against impact and moisture.
   - The original packaging offers the best protection.
     Make sure to comply with the permitted ambient conditions.

If you have any questions, please contact your supplier or your local Sales Center.

4.2  Product identification

4.2.1  Nameplate

The nameplate provides you with the following information on your device:
- Manufacturer identification
- Order code
- Extended order code
- Serial number
- Firmware version
- Ambient and process conditions
- Input and output values
- Safety information and warnings
- Approvals as per version ordered

- Compare the data on the nameplate with your order.

4.2.2  Product identification

Product page
www.endress.com/CM72

Manufacturer address
Endress+Hauser Conducta GmbH+Co. KG
Dieselstraße 24
D-70839 Gerlingen
Scope of delivery
The scope of delivery includes:
- CM72
- Brief Operating Instructions

If you have any queries:
Please contact your supplier or local sales center.

5 Electrical connection

WARNING
Device is live!
Incorrect connection may result in injury or death!
- The electrical connection may be performed only by an electrical technician.
- The electrical technician must have read and understood these Operating Instructions and must follow the instructions contained therein.
- Prior to commencing connection work, ensure that no voltage is present on any cable.

| Supply voltage: | 12.6 to 30 VDC (when error current > 20 mA)  
14 to 30 VDC (if the error current is set to 3.6 mA.) |
|----------------|---------------------------------------------------|
| Cable length:  | 3 m (10 ft)  
7 m (23 ft)  
15 m (46 ft) |
| Signal output: | 4 to 20 mA |
| Signal on alarm: | 3.6 or 23 mA depending on order version |

Connect ferrules as specified in the table:

<table>
<thead>
<tr>
<th>Cable</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gray (GY)</td>
<td>Grounding, GND</td>
</tr>
<tr>
<td>BU (blue)</td>
<td>4 to 20 mA +</td>
</tr>
<tr>
<td>White (WH)</td>
<td>4 to 20 mA -</td>
</tr>
</tbody>
</table>
The ground cable must be provided by the customer.

5.1 Environment

<table>
<thead>
<tr>

<tr>
<td>Relative humidity:</td>
<td>5 ... 95 %</td>
</tr>
</tbody>
</table>

6 System integration

6.1 Integrating the measuring device into the system

Interface for measured value transmission:
4 to 20 mA

For configuration with the measured value and the current output turndown, select the option in the order structure when ordering. This cannot be changed at a later stage.

7 Commissioning

7.1 Function check

⚠️ WARNING
Incorrect connection, incorrect supply voltage
Safety risks for staff and device malfunctions!

- Check that all connections have been established correctly in accordance with the wiring diagram.
- Ensure that the supply voltage matches the voltage indicated on the nameplate.

Familiarize yourself with the operation of the device before it is first switched on. In particular, please read the "Basic safety instructions" sections. After power-up, the device performs a self-test and then goes to the measuring mode.
7.1.1 Switching on the device
Once connected to the correct supply voltage, the device starts and is operational. The LED display indicates the status.

7.1.2 LED display
LED messages signal the status of the device and sensor.

<table>
<thead>
