**About this document**

This document has been translated into several languages. Legally determined is solely the English source text.

**Associated documentation**

This document is an integral part of the following Operating Instructions:

- BA01005F/00 (FMP50)
- BA01006F/00 (FMP51, FMP52, FMP54)
- BA01007F/00 (FMP53)
- BA01008F/00 (FMP55)
- BA01009F/00 (FMP56, FMP57)

**Manufacturer's certificates****FM C/US certificate**

Certificate number:

- FM18.US0211X
- FM18.CA0100X

**Manufacturer address**

Endress+Hauser SE+Co. KG  
Hauptstraße 1  
79689 Maulburg, Germany

Address of the manufacturing plant: See nameplate.

**Extended order code**

The extended order code is indicated on the nameplate, which is affixed to the device in such a way that it is clearly visible. Additional information about the nameplate is provided in the associated Operating Instructions.

**Structure of the extended order code**

FMP5x	-	*****	+	A*B*C*D*E*F*G*..
(Device type)		(Basic specifications)		(Optional specifications)

\* = Placeholder

At this position, an option (number or letter) selected from the specification is displayed instead of the placeholders.

**Basic specifications**

The features that are absolutely essential for the device (mandatory features) are specified in the basic specifications. The number of

positions depends on the number of features available.  
The selected option of a feature can consist of several positions.

#### *Optional specifications*

The optional specifications describe additional features for the device (optional features). The number of positions depends on the number of features available. The features have a 2-digit structure to aid identification (e.g. JA). The first digit (ID) stands for the feature group and consists of a number or a letter (e.g. J = Test, Certificate). The second digit constitutes the value that stands for the feature within the group (e.g. A = 3.1 material (wetted parts), inspection certificate).

More detailed information about the device is provided in the following tables. These tables describe the individual positions and IDs in the extended order code which are relevant to hazardous locations.

#### **Extended order code: Levelflex**

The following specifications reproduce an extract from the product structure and are used to assign:

- This documentation to the device (using the extended order code on the nameplate).
- The device options cited in the document.

#### *Device type*

FMP50, FMP51, FMP52, FMP53, FMP54, FMP55, FMP56, FMP57

#### *Basic specifications*

<b>Position 1, 2 (Approval)</b>			
<b>Selected option</b>		<b>Description</b>	
FMP5x	FC	FM C/US	XP-IS Cl. I, Div. 1, Groups A,B,C,D; AIS Cl. I, Div. 1, Groups A,B,C,D
	FD	FM C/US	XP-IS Cl. I, Div. 1, Groups A,B,C,D; DIP-IS Cl. II, III, Div. 1, Groups E,F,G; NI Class I, Div. 2, Groups A,B,C,D; AIS Cl. I, II, III, Div. 1, Groups A-G; Class I, Zone 0/1, AEx/Ex ia/db [ia Ga] IIC Ga/Gb

Selected option	Description	
FMP57	A4	Viton, -30...150 °C
	B3	EPDM, -40...120 °C
	C5	Kalrez, -5...185 °C

 Shown in the temperature tables exemplary as follows:

#### Optional specifications

ID Jx (Test, Certificate)		
Selected option	Description	
FMP51 <sup>1)</sup> FMP54	JN	Ambient temperature transmitter -50 °C

1) Only in connection with Position 9, 10 = E1

ID Mx (Probe Design)		
Selected option	Description	
FMP5x	MB	Sensor remote, 3 m/9 ft cable, detachable + mounting bracket
FMP53	MA	Sensor compact, detachable
FMP50-54 FMP56 FMP57	MC MD	Sensor remote, 6 m/18 ft cable, detachable + mounting bracket Sensor remote, 9 m/27 ft cable, detachable + mounting bracket

ID Nx, Ox (Accessory Mounted)		
Selected option	Description	
FMP51 FMP52 FMP55	NC	Gas-tight feed through

**Combined type of protection  
(Approval code, 8A)**

Devices with approval code "8A" are suitable for installation with explosion protection type of Intrinsic Safety or Explosionproof.

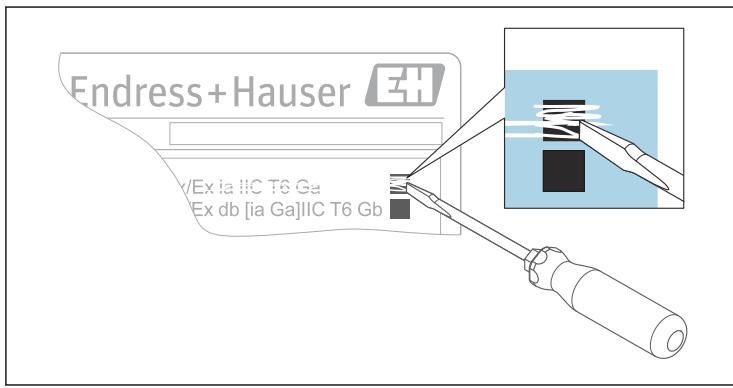

- Before initial commissioning, specify the type of protection.
- It is not permitted to change the type of protection after initial commissioning as this can jeopardize the explosion protection.

For aluminum enclosures:

Void out the explosion protection that is not used on the nameplate.

For stainless steel enclosures:

Using a striking tool, mark the explosion protection used, or void out the explosion protection that is not used.

A0033253

1

It is critical to observe and follow the correct instructions for installation depending on the type of protection used. Refer to the following table for reference to the correct installation instructions.

Type of protection	Agency approval	Control Drawing no. / Document no.
Intrinsic Safety	CSA	XA00571F
	FM	XA00573F
Explosionproof	CSA	XA00570F
	FM	XA00572F

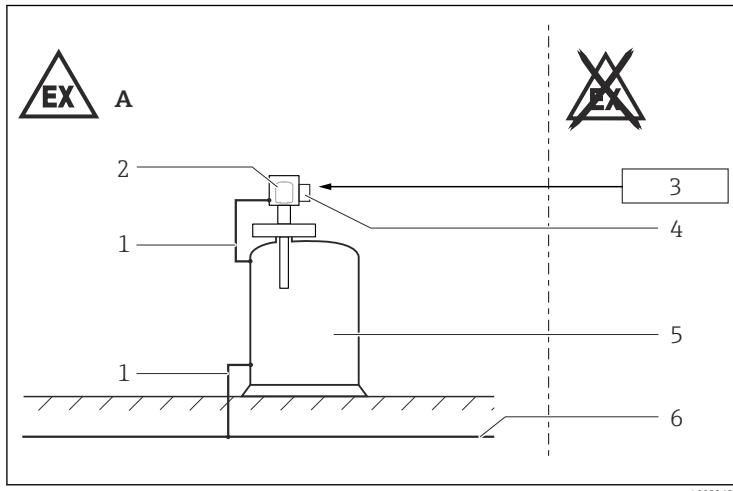

Class I, Division 2 installation:

References in this manual to Class I, Division 2 installation are not applicable for devices with the combined type of protection. For installation in Class I, Division 2, these devices must be installed per the applicable Division 1 intrinsic safety or explosionproof requirements.

<b>Safety instructions:</b>	<ul style="list-style-type: none"><li>▪ Staff must meet the following conditions for mounting, electrical installation, commissioning and maintenance of the device:<ul style="list-style-type: none"><li>▪ Be suitably qualified for their role and the tasks they perform</li><li>▪ Be trained in explosion protection</li><li>▪ Be familiar with national regulations</li></ul></li><li>▪ Install the device according to the manufacturer's instructions and national regulations.</li><li>▪ Do not operate the device outside the specified electrical, thermal and mechanical parameters.</li><li>▪ Only use the device in media to which the wetted materials have sufficient durability.</li><li>▪ Avoid electrostatic charging:<ul style="list-style-type: none"><li>▪ Of plastic surfaces (e.g. enclosure, sensor element, special varnishing, attached additional plates, ...)</li><li>▪ Of isolated capacities (e.g. isolated metallic plates)</li></ul></li><li>▪ Alterations to the device can affect the explosion protection and must be carried out by staff authorized to perform such work by Endress+Hauser.</li><li>▪ Refer to the temperature tables for the relationship between the permitted ambient temperature for the sensor and/or transmitter, depending on the range of application and the temperature class.</li><li>▪ When replacing the probe electronics or opening the connection between the remote cable and the probe, a jumper plug must be used or a short-circuit must be established between the probe contact and the potential equalization conductor to avoid electrostatically charging the probe.</li></ul>
<b>Safety instructions:</b> <b>Special conditions</b>	<p>Permitted ambient temperature range at the electronics enclosure: -40 °C ≤ T<sub>a</sub> ≤ +80 °C</p> <p><i>Optional specification, ID Jx = JN</i></p> <p>Permitted ambient temperature range at the electronics enclosure: -50 °C ≤ T<sub>a</sub> ≤ +80 °C</p> <ul style="list-style-type: none"><li>▪ Observe the information in the temperature tables.</li><li>▪ Use supply wires suitable for 20 K above the ambient temperature.</li><li>▪ In the case of process connections made of polymeric material or with polymeric coatings, avoid electrostatic charging of the plastic surfaces.</li><li>▪ To avoid electrostatic charging: Do not rub surfaces with a dry cloth.</li><li>▪ In the event of additional or alternative special varnishing on the enclosure or other metal parts or for adhesive plates:<ul style="list-style-type: none"><li>▪ Observe the danger of electrostatic charging and discharge.</li><li>▪ Do not install in the vicinity of processes (≤ 0.5 m) generating strong electrostatic charges.</li></ul></li></ul>

*Device type FMP52, FMP55, FMP56, FMP57*

A probe coated with non-conductive material can be used if avoiding electrostatic charging (e.g. through friction, cleaning, maintenance, strong medium flow).

**Safety  
instructions:  
Installation**

A0022630

■ 2

- A Class I, Div. 1 or 2, Groups A, B, C, D; Class II, Div. 1, Groups E, F, G;  
Zone 1
- 1 Potential equalization line  
2 Electronics compartment Ex ia; Electronic insert  
3 Power supply  
4 Connection compartment XP / Ex db  
5 Tank; Class I, Div. 1, Groups A, B, C, D; Class II, Div. 1, Groups E, F, G;  
Zone 0, Zone 1  
6 Potential equalization

- After aligning (rotating) the enclosure, retighten the fixing screw (see Operating Instructions).
- Install the device to exclude any mechanical damage or friction during the application. Pay particular attention to flow conditions and tank fittings.
- Before operation:
  - Screw in the cover all the way.
  - Tighten the securing clamp on the cover.
- Continuous service temperature of the connecting cable:  
-40 °C to ≥ +85 °C; in accordance with the range of service temperature taking into account additional influences of the process conditions ( $T_{a,min}$ ), ( $T_{a,max} +20$  K).

*Optional specification, ID Jx = JN*

Continuous service temperature of the connecting cable:

-50 °C to ≥ +85 °C; in accordance with the range of service temperature taking into account additional influences of the process conditions (T<sub>a,min</sub>), (T<sub>a,max</sub> +20 K).

**Explosionproof / Flameproof**

Class I, Div. 1, Groups A, B, C, D; Class II, Div. 1, Groups E, F, G; Class III Class I, Zone 0/1, AEx/Ex ia/db [ia Ga] IIC Ga/Gb

- Install per National Electrical Code (NFPA70) or Canadian Electrical Code, Part I (C22.1), as applicable.
- For the maximum supply voltage: See "Connection data" section.
- Control room equipment may not use or generate over 250 V<sub>rms</sub>.
- Seal unused entries with approved plugs that correspond to the type of protection. The plastic transport sealing plug does not meet this requirement and must therefore be replaced during installation.
- Probe is intrinsically safe, AEx ia/Ex ia, and suitable for installation in Class I, II, III, Division 1 or Class I, Zone 0/1.
- When prepared for use with an approved remote display FHX50, remote display is intrinsically safe suitable for Class I, Division 1/Zone 0 locations and connection between transmitter enclosure and remote display is intrinsically safe field wiring.
- **WARNINGS:** Substitution of components may impair intrinsic safety.

Factory sealed

Explosionproof conduit seal not required for terminal compartment when installed in Division 1 locations.

Terminal compartment

Do not open when explosive atmosphere is present.

For Class II and III

- Keep covers tight unless power has been switched off.
- Use a dust-tight seal at the conduit entry in a Class II and III location.

**Class I, Div. 2,  
Groups A-D**

The following instructions apply only for *Device type FMP5x, Basic specification, Position 1, 2 = FD*

*Device type FMP5x, Basic specification, Position 1, 2 = FC, 8A* are not marked for use in Class I, Division 2; however, these devices are suitable for this application when installed using the explosionproof instructions for Class I, Division 1.

**Standard Wiring installation (only for NPT conduit entries)**

- Install per National Electrical Code (NFPA70) or Canadian Electrical Code, Part I (C22.1), as applicable.
- Use wiring methods appropriate for the location.
- Associated apparatus not required.

- For the maximum supply voltage: See "Connection data" section.
- Probe is intrinsically safe, AEx ia/Ex ia, and suitable for installation in Class I, II, III, Division 1 or Class I, Zone 0/1.
- When prepared for use with an approved remote display FHX50, remote display is intrinsically safe suitable for Class I, Division 1/Zone 0 locations and connection between transmitter enclosure and remote display is intrinsically safe field wiring.
- **WARNINGS:** Explosion hazard - Do not disconnect equipment unless power has been switched off or the area is known to be non-hazardous.
- **WARNINGS:** Substitution of components may impair suitability for Class I, Div. 2.

Factory sealed

Explosionproof conduit seal not required for terminal compartment.

## Process seals

The following device types are Dual Seal devices per UL 122701 (2017) and do not require the use of an external Add-on Secondary Seal.

Device type	Basic specification, Position 1, 2	MWP <sup>1)</sup>	Method of annunciation <sup>2)</sup>
FMP50 FMP53 FMP56 FMP57	FC, FD, 8A	6 bar	Process fluid leakage through vent located in electronics compartment.
FMP51 FMP52 FMP55	FD, 8A	40 bar	Electronic firmware is incorporated to detect and signal any significant increases or decreases of measurement signal reflection caused by combustible or flammable process fluid between the primary and secondary seal.
FMP54	FD, 8A	370 bar	

1) Maximum Working Pressure for the Dual Seal rating.  
This value may be a value less than the MWP for the device.

2) No maintenance of annuator necessary.

 Verify the chemical compatibility of the process seal specified on the nameplate in first position with the process fluid (see field "Mat." on the nameplate).

## Temperature tables

### General notes

 Observe the permitted temperature range at the probe.

 *Basic specification, Position 3 = E, G*  
Deratings are based on a power consumption of 1 W (PFS);  
→  33.

## Description notes

 Unless otherwise indicated, the positions always refer to the basic specification.

1st column: Position 3 = A, B, ..

- (1): 1 channel used
- (2): 2 channels used

2nd column: Temperature classes T6 (85 °C) to T1 (450 °C)

Column P1 to P6: Position (temperature value) on the axes of the derating

- $T_a$ : Ambient temperature in °C
- $T_p$ : Process temperature in °C

 Column P6 is only relevant for version B of the derating.

### Example table

Position 5 = B

(1)		P1		P2		P3		P4		P5		P6	
		$T_p$	$T_a$										
E, G	T6	-40	60	60	60	85	45	85	-40	-40	-40	-40	-
	T5	-40	73	73	73	100	60	100	-40	-40	-40	-40	-
	T4	-40	73	73	73	135	54	135	-40	-40	-40	-40	-

### Class II, III, Division 1

1st column: Position 3 = A, B, ..

- (1): 1 channel used
- (2): 2 channels used

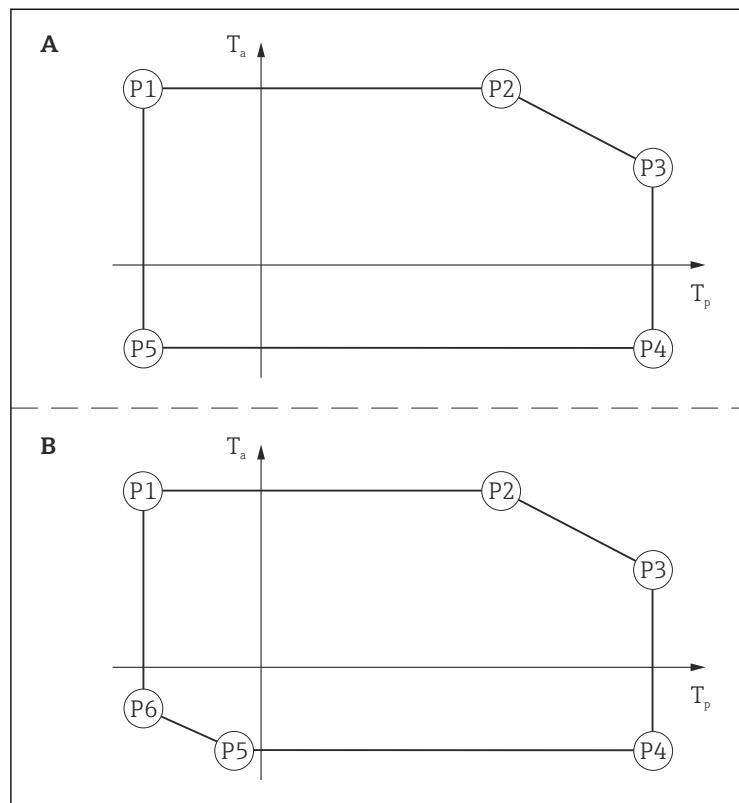

2nd column: Temperature values

  $T_a$ : Ambient temperature in °C

### Example table

Position 5 = B, C

(1)	
E, G	$T = T_a + 5 \text{ K}$

*Example diagrams of possible deratings*

A0022717

## Compact; 1 channel

Explosion protection: XP / AEx/Ex ia/db [ia Ga] or Division 2

Probe: Class I, Zone 0 / Class I, Division 1

Electronics enclosure: Class I, Zone 1 / Class I, Division 1 or  
Division 2

(2)	
E, G	$T = T_a + 20 \text{ K}$

**Connection data****Connection compartment (AEx/Ex db)***Basic specification, Position 3 = E, G*

Terminal 1 (+), 2 (-)	Terminal 3 (+), 4 (-)
Power supply	Switch output (PFS)
$U_N = 32 \text{ V}_{\text{DC}}$ $U_m = 250 \text{ V}$	$U_N = 35 \text{ V}_{\text{DC}}$ $U_m = 250 \text{ V}$

The power consumption of I/O modules with passive PFS output can be limited for certain applications.

- Recommended: Power consumption = 1 W. This is obtained for a supply voltage at the terminals of 27 V<sub>DC</sub>.
- For higher supply voltages ( $U_{\text{max}}$ ): Insert a serial resistance ( $R_V$ ) in order to limit the power consumption, see table below.

**Table for the PFS serial resistance ( $R_V$ ):**

Power consumption	1.0 W
Total power consumption	1.88 W
Internal resistance $R_i$	760 Ω

<b>U<sub>max</sub> [V]</b>	<b>R<sub>V</sub> min</b>
35	205 Ω
34	177 Ω
33	150 Ω
32	122 Ω
31	95 Ω
30	67 Ω
29	39 Ω
28	12 Ω
27	0 Ω

For values associated with a higher or lower internal power consumption please contact Endress+Hauser.

### Electronics compartment, intrinsically safe (AEx/Ex ia)

#### Service interface (CDI)

Taking the following values into consideration, the device can be connected to the certified Endress+Hauser FXA291 service tool or a similar interface:

<b>Service interface</b>												
U <sub>i</sub> = 7.3 V effective inner inductance L <sub>i</sub> = negligible effective inner capacitance C <sub>i</sub> = negligible												
U <sub>o</sub> = 7.3 V I <sub>o</sub> = 100 mA P <sub>o</sub> = 160 mW												
I <sub>o</sub> (mH) =	5.00	2.00	1.00	0.50	0.20	0.10	0.05	0.02	0.01	0.005	0.002	0.001
C <sub>o</sub> (μF) =	0.73	1.20	1.60	2.00	2.60	3.20	4.00	5.50	7.30	10.00	12.70	12.70

#### Remote display interface

- Devices with *Basic specification, Position 4 = L, M, N* can be connected to the approved Endress+Hauser remote display FHX50.
- Refer to Safety Instructions XA01096F for additional installation instructions.

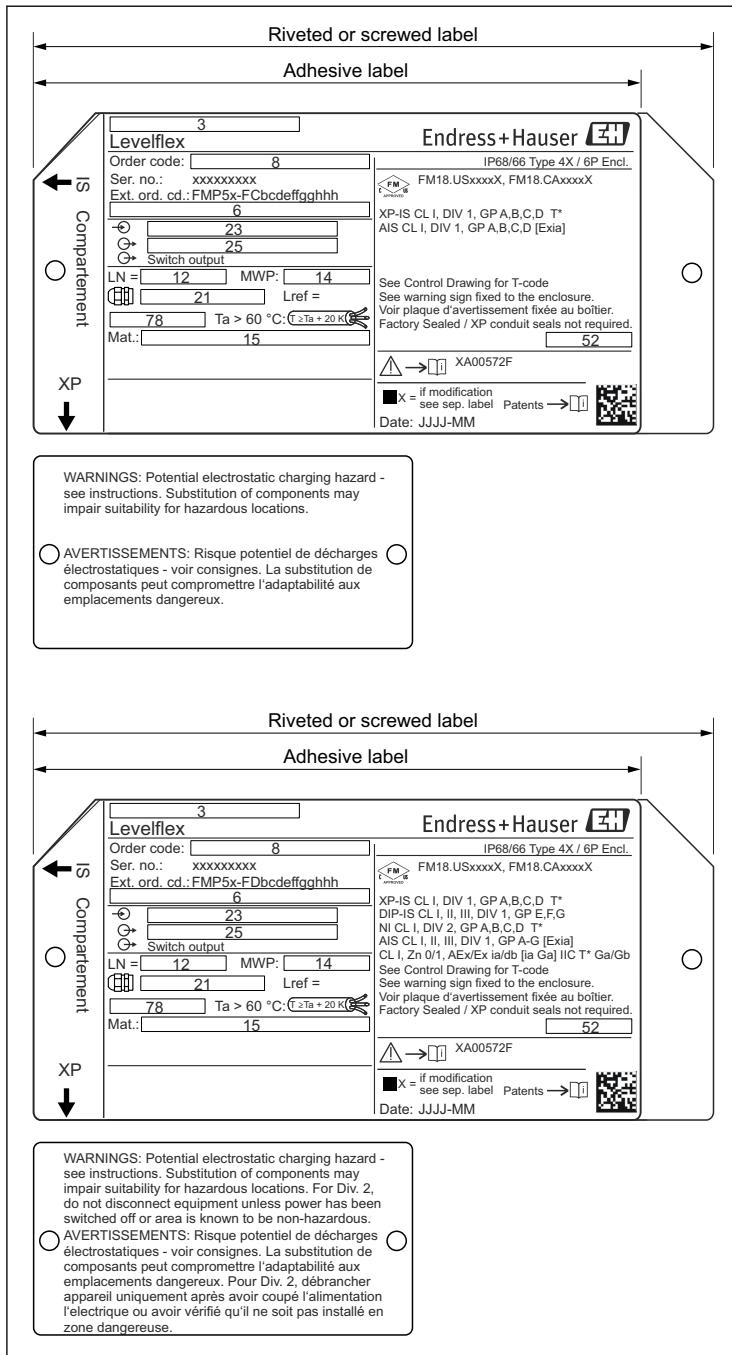

# Lelevelflex FMP50-FMP57

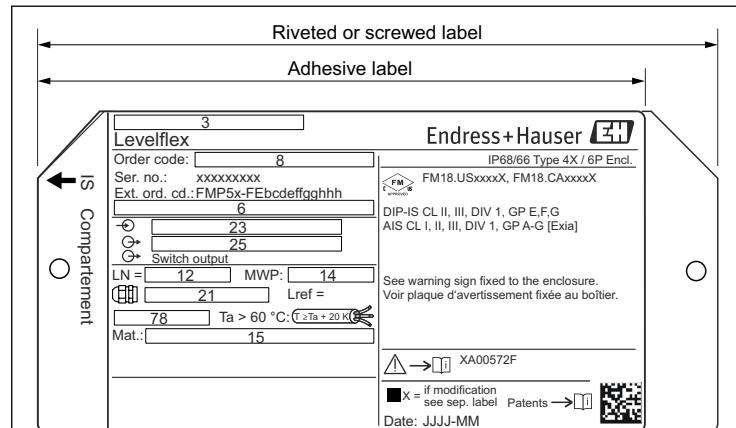

PROFIBUS PA, FOUNDATION Fieldbus

**WARNINGS:** Potential electrostatic charging hazard -  
see instructions. Keep covers tight when explosive  
dust atmosphere is present.

**AVERTISSEMENTS:** Risque potentiel de décharges  
électrostatiques - voir consignes. Garder les  
couvertures bien fermées en présence d'une atmosphère  
poussiéreuse explosive.

**WARNINGS:** Potential electrostatic charging hazard -  
see instructions. Substitution of components may  
impair suitability for hazardous locations.

**AVERTISSEMENTS:** Risque potentiel de décharges  
électrostatiques - voir consignes. La substitution de  
composants peut compromettre l'adaptabilité aux  
emplacements dangereux.
