Technical Information

RID16

8-channel field indicator with FOUNDATION Fieldbus™ or PROFIBUS® PA protocol

Field indicator for easy integration into existing fieldbus systems

Application
- Field indicator with 8 input channels and FOUNDATION Fieldbus™ or PROFIBUS® PA protocol for displaying process values and calculated values
- On-site display of process parameters in fieldbus systems

Your benefits
- Bright, backlit LC display with bar graph, diagnostic symbols and plain text field
- Listener mode for up to 8 input channels or digital status
- Eight channels displayed via function block interconnection in the case of FOUNDATION Fieldbus™
- Safe operation in hazardous areas thanks to international approvals
- FM IS, NI
- CSA IS, NI
- ATEX Ex ia
- Intrinsically safe mounting in Zone 1 and Zone 2
- Optional aluminum housing for Ex applications
Function and system design

Measuring principle
Backlit display for up to 8 process or calculated values of the fieldbus users connected to the fieldbus system by listener mode or via function block interconnection in the case of FOUNDATION Fieldbus™.

Measuring system
Endress+Hauser has a wide range of innovative products for use with FOUNDATION Fieldbus™ and PROFINET® PA protocol. Together with the sensors and transmitters, the indicators form a complete measuring point for a wide range of applications in industrial environments.

Device architecture

1 System integration via FOUNDATION Fieldbus™
PC Visualization and monitoring e.g. P View, FieldCare and diagnostic software
HSE High Speed Ethernet (100 Mbit/s)
H1 FOUNDATION Fieldbus-H1
1...3 Up to 32 devices per segment

2 System integration via PROFINET® PA
PC Visualization and monitoring e.g. P View, FieldCare and diagnostic software
1...3 Up to 32 devices per segment

The 8-channel indicator displays the measured values, calculated values and status information of the fieldbus users of a fieldbus network. The device listens to the configured fieldbus addresses and...
displays their values in listener mode. In addition, the FOUNDATION Fieldbus™ indicator can also display values available on the bus via function block interconnection.

Separate settings can be made for each channel. The analog values of the bus user to be displayed are shown as a five-digit number, digital values in plain text (ON/OFF, OPEN/CLOSE, number values). The process value status is indicated by icons or as plain text in the measured value display. Plain text display enables the display of alphanumeric character combinations, such as the TAG. For trend analysis, in addition to indicating measured values, the display also has a bar graph with indicators for overranging and underranging, which can be scaled independently of the display value.

The device is powered by the fieldbus and can be used in hazardous areas up to a temperature class of T6.

**Communication**

**Failure information**

Status message as per the fieldbus specification.

**Switch-on delay**

8 s

**FOUNDATION Fieldbus™**

- FOUNDATION Fieldbus™ H1, IEC 61158-2
- FDE (Fault Disconnection Electronic) = 0 mA
- Data transmission rate, supported baudrate: 31.25 kBit/s
- Signal encoding = Manchester II
- LAS (Link Active Scheduler), LM (Link Master) function is supported: Therefore, the indicator can assume the function of a Link Active Scheduler (LAS) if the current Link Master (LM) is no longer available. The device is supplied as a BASIC device. To use the device as an LAS, this must be defined in the distributed control system and activated by downloading the configuration to the device.
- According to IEC 60079-27, FISCO/FNICO

**PROFIBUS® PA**

- PROFIBUS® PA in accordance with EN 50170 Volume 2, IEC 61158-2 (MBP)
- FDE (Fault Disconnection Electronic) = 0 mA
- Data transmission rate, supported baudrate: 31.25 kBit/s
- Signal encoding = Manchester II
- Connection values in accordance with IEC 60079-11 FISCO, Entity

Brief block description

Resource Block:
The Resource Block contains all the data that clearly identify and characterize the device. It is an electronic version of a nameplate on the device. In addition to parameters required to operate the device on the fieldbus, the Resource Block makes information available such as the order code, device ID, software revision, order ID etc.

Display Transducer:
The parameters of the "Display" Transducer Block enable the configuration of the display.

Advanced Diagnostic:
All the parameters for self-monitoring and diagnostics are grouped in this Transducer Block.

PID:
This function block contains input channel processing, proportional integral-differential control (PID) and analog output channel processing. The following can be realized: Basic controls, feedforward control, cascade control and cascade control with limiting.

Input Selector (ISEL):
The Input Selector Block enables the selection of up to four inputs and generates an output based on the configured action.

Integrator (INT):
The Integrator Block integrates one or two variables over time. The Block compares the integrated or totalized value to limit values and generates a discrete output signal if the limit value is reached. It can be selected from six integration types.
Arithmetic (ARITH):
The Arithmetic function block permits standard computing operations and compensations. It supports the addition, subtraction, multiplication and division of values. In addition, mean values are calculated and flow values are compensated for (linear, quadratic compensation) in this block.

Power supply

Terminal assignment

![Terminal assignment of the field indicator](image)

1 Fieldbus connection

Supply voltage

The power is supplied via the fieldbus.

\[ U = 9 \text{ to } 32 \text{ V}_{\text{DC}}, \text{ polarity-independent (max. voltage } U_b = 35 \text{ V).} \]

Mains voltage filter

50/60 Hz

Current consumption

\( \leq 11 \text{ mA} \)

Cable entry

The following cable entries are available:

- NPT1/2 thread
- M16 thread

Installation

Orientation

No restrictions, the orientation depends on the readability of the display.

Mounting location

Wall or pipe mounting (see "Accessories" → 9)
Environment

Ambient temperature range  
\[-40 \text{ to } +80 \, ^\circ\text{C} (-40 \text{ to } +176 \, ^\circ\text{F})\]

\[\text{The display may react slowly at temperatures } < -20 \, ^\circ\text{C} (-4 \, ^\circ\text{F}).\]

\[\text{At temperatures } < -30 \, ^\circ\text{C} (-22 \, ^\circ\text{F}) \text{ the readability of the display can no longer be guaranteed.}\]

Storage temperature  
\[-40 \text{ to } +80 \, ^\circ\text{C} (-40 \text{ to } +176 \, ^\circ\text{F})\]

Altitude  
Up to 2,000 m (6,561.7 ft) above sea level

Climate class  
As per IEC 60654-1, Class C

Humidity  
- Condensation permitted as per IEC 60068-2-33
- Max. rel. humidity: 95% as per IEC 60068-2-30

Degree of protection  
IP67. NEMA 4X.

Shock and vibration resistance  
10 to 2,000 Hz at 5g as per IEC 60068-2-6

Electromagnetic compatibility (EMC)  
CE conformity

Electromagnetic compatibility in accordance with all the relevant requirements of the IEC/EN 61326 series and NAMUR Recommendation EMC (NE21). For details refer to the EU Declaration of Conformity.

Interference immunity as per IEC/EN 61326 series, industrial requirements.

Interference emission as per IEC/EN 61326 series, Class B equipment.

Measuring category  
Measuring category II as per IEC 61010-1. The measuring category is provided for measuring on power circuits that are directly connected electrically with the low-voltage network.

Overvoltage category  
Overvoltage category II

Pollution degree  
Pollution degree 2

Mechanical construction

Design, dimensions

\[\text{Dimensions of the field indicator in mm (in)}\]

Plastic housing for general applications or, optional aluminum housing
Weight
- Plastic housing
  Approx. 500 g (1.1 lb)
- Aluminum housing
  Approx. 1.7 kg (3.75 lb)

Materials

<table>
<thead>
<tr>
<th>Housing</th>
<th>Nameplate</th>

Terminals
Screw terminals for cables up to 2.5 mm² (14 AWG) max. plus ferrule

Operability

Local operation

Display elements

5.  LC display of the field indicator (backlit)
1.  Bar graph display in increments of 10% with indicators for underranging (item 1a) and overranging (item 1b)
2.  Measured value display, digit height 26 mm (1.2 in), status indication “Bad measured value status”
3.  14-segment display for units and messages
4.  ‘Communication’ symbol
5.  ‘Configuration locked’ symbol
6.  ‘Unit %’
7.  ‘Uncertain measured value status’ symbol

Display range
-9999 to +99999

DIP switch
PROFIBUS® PA: Configuration of the bus address of the values displayed (max. 2 if configuring via DIP switches) and the hardware write protection
FOUNDATION Fieldbus™: Configuration of the hardware write protection

Remote operation

FOUNDATION Fieldbus™
FOUNDATION Fieldbus™ functions and device-specific parameters are configured via fieldbus communication. Special configuration systems from different manufacturers are available for this purpose.

#### Other standards and guidelines

- IEC 60529: Degrees of protection provided by enclosures (IP code)
- IEC 61010-1: Safety requirements for electrical equipment for measurement, control and laboratory use
- IEC 61326-Serie: Electromagnetic compatibility (EMC requirements)
- NAMUR: International user association of automation technology in process industries (www.namur.de)
Ordering information

Detailed ordering information is available from your nearest sales organization www.addresses.endress.com or in the Product Configurator at www.endress.com:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select Configuration.

Product Configurator - the tool for individual product configuration
- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Accessories

Various accessories are available for the device, and can be ordered with the device or at a later stage from Endress+Hauser. Detailed information on the order code in question is available from your local Endress+Hauser Sales Center or on the product page of the Endress+Hauser website: www.endress.com
