Technical Information

**Micropilot FMR67B PROFIBUS PA**

Free space radar

Level measurement in bulk solids

**Application**
- Continuous, non-contact level measurement of powdered to granular bulk solids
- Process connections: Flanges with purge air and alignment unit
- Maximum measuring range: 125 m (410 ft)
- Temperature: –40 to +450 °C (–40 to +842 °F)
- Pressure: –1 to +160 bar (–14.5 to +2321 psi)
- Accuracy: ±3 mm (±0.12 in)

**Your benefits**
- PTFE lens antenna or ceramic sealed high-temperature horn antenna
- Reliable measurement thanks to strong signal focusing, even with multiple internal fixtures
- Easy, guided commissioning with intuitive user interface
- Bluetooth® wireless technology for commissioning, operation and maintenance

Ground connection
A grounded terminal which, as far as the operator is concerned, is grounded via a grounding system.

Protective earth (PE)
Ground terminals that must be connected to ground prior to establishing any other connections. The ground terminals are located on the inside and outside of the device.

- Inner ground terminal; protective earth is connected to the mains supply.
- Outer ground terminal; device is connected to the plant grounding system.

Function and system design

Measuring principle

The Micropilot is a "downward-looking" measuring system, operating based on the frequency modulated continuous wave method (FMCW). The antenna emits an electromagnetic wave at a continuously varying frequency. This wave is reflected by the product and received again by the antenna.

![Diagram of FMCW principle](image1.png)

**1 FMCW principle: transmission and reflection of the continuous wave**

- **R** Reference point of measurement
- **D** Distance between reference point and product surface

The frequency of this wave is modulated in the form of a sawtooth signal between two limit frequencies \( f_1 \) and \( f_2 \):

![Diagram of FMCW principles](image2.png)

**2 FMCW principle: result of frequency modulation**

1. Transmitted signal
2. Received signal

This results in the following difference frequency at any time between the transmitted signal and the received signal:

\[
\Delta f = k \Delta t
\]

where \( \Delta t \) is the run time and \( k \) is the specified increase in frequency modulation.

\( \Delta t \) is given by the distance \( D \) between the reference point \( R \) and the product surface:
\[ D = \left( \frac{c \Delta t}{2} \right) \]

where \( c \) is the speed of propagation of the wave.

In summary, \( D \) can be calculated from the measured difference frequency \( \Delta f \). \( D \) is then used to determine the content of the tank or silo.

### Input

**Measured variable**

The measured variable is the distance between the reference point and the product surface. The level is calculated based on “\( E \)”, the empty distance entered.

**Measuring range**

The start of the measuring range is the point where the beam hits the floor. Levels below this point cannot be measured, particularly in the case of conical outlets. An alignment unit can be used to increase the maximum measuring range in such applications.

**Maximum measuring range**

The maximum measuring range depends on the antenna size and design.

<table>
<thead>
<tr>
<th>Antenna</th>
<th>Maximum measuring range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horn, 316L, 65 mm (2.6 in)</td>
<td>125 m (410 ft)</td>
</tr>

<td>50 m (164 ft)</td>
</tr>
<tr>
<td>Flush mount, PTFE, 80 mm (3 in)</td>
<td>125 m (410 ft)</td>
</tr>
</tbody>
</table>

**Usable measuring range**

The usable measuring range depends on the antenna size, the medium's reflective properties, the installation position and any possible interference reflections.

In principle, measurement is possible up to the tip of the antenna.

Depending on the position of the product (angle of repose) and to avoid any material damage from abrasive media and deposit buildup on the antenna, the end of the measuring range should be selected 10 mm (0.4 in) before the tip of the antenna.
For further information on the reference point, see → Mechanical construction.

For the dielectric constants (DC values) of many media commonly used in industry, please refer to:

- Dielectric constant (DC value) Compendium CP01076F
- The Endress+Hauser "DC Values app" (available for Android and iOS)

**Operating frequency**

Approx. 80 GHz

Up to 8 devices can be installed in a tank without the devices mutually influencing one another.

**Transmission power**

- Peak power: <1.5 mW
- Average output power: <70 µW

## Output

### PROFIBUS PA

According to EN 50170 Volume 2, IEC 61158-2

**Signal coding:**
Manchester Bus Powered (MBP) type 1

**Data transmission rate:**
31.25 kBit/s, voltage mode

**Galvanic isolation:**
Yes

**Signal on alarm**

Diagnostics in accordance with PROFIBUS PA Profile 3.02

**Local display**

Status signal (in accordance with NAMUR Recommendation NE 107):
Plain text display

**Operating tool via service interface (CDI)**

Status signal (in accordance with NAMUR Recommendation NE 107):
Plain text display
Operating tool via PROFIBUS PA communication
Status signal (in accordance with NAMUR Recommendation NE 107):
Plain text display

**Linearization**
The linearization function of the device allows the conversion of the measured value into any unit of length, weight, flow or volume.

**Pre-programmed linearization curves**
Linearization tables for calculating the volume in the following vessels are preprogrammed into the device:
- Pyramid bottom
- Conical bottom
- Angled bottom
- Horizontal cylinder
- Sphere

Other linearization tables of up to 32 value pairs can be entered manually.

**Protocol-specific data**

**PROFIBUS PA**

**Manufacturer ID:**
17 (0x11)

**Ident number:**
0x1568 or 0x9700

**Profile version:**
3.02

**GSD file and version**
Information and files available at:
- www.endress.com
  On the product page for the device: Documents/Software → Device drivers
- www.profibus.com

**Output values**

**Analog Input:**
- Level linearized
- Distance
- Volume
- Terminal voltage
- Electronic temperature
- Sensor temperature
- Absolute echo amplitude
- Relative echo amplitude
- Area of incoupling
- Build-up index, optional (Guidance → Heartbeat Technology → Build-up detection → Build-up index)
- Foam index, optional (Diagnostics → Heartbeat Technology → Foam detection → Foam index)

**Digital Input:**
Is only available if the 'Heartbeat Verification + Monitoring' application package was selected.
- 168 Build-up detected, optional (Guidance → Heartbeat Technology → Build-up detection → 168 Build-up detected)
- 952 Foam detected, optional (Guidance → Heartbeat Technology → Foam detection → 952 Foam detected)

**Input values**

**Analog Output:**
Analog value from PLC to be indicated on the display
Supported functions

- Identification & maintenance
  Straightforward device identification on the part of the control system and nameplate
- Automatic Ident Number adoption
  GSD compatibility mode for generic profile 0x9700 “Transmitter with 1 Analog Input”
- Physical layer diagnostics
  Installation check of the PROFIBUS segment and device using terminal voltage and message monitoring
- PROFIBUS upload/download
  Reading and writing parameters is up to ten times faster with PROFIBUS upload/download
- Condensed status
  Straightforward and self-explanatory diagnostic information by categorizing diagnostic messages that occur

1. Positive terminal
2. Negative terminal
3. Internal ground terminal

Terms
- Supply voltage and internal ground terminal: 0.5 to 2.5 mm² (20 to 14 AWG)
- External ground terminal: 0.5 to 4 mm² (20 to 12 AWG)

Available connectors
In the case of devices with a plug, it is not necessary to open the housing for connection purposes.
Use the enclosed seals to prevent the penetration of moisture into the device.
Devices with M12 plug

![Plug Connection Diagram](image.png)

6 View of the plug-in connection on the device

1 Signal +
2 Not assigned
3 Signal −
4 Ground

Various M12 sockets are available as accessories for devices with M12 plugs.

</tbody>
</table>

- Use only suitable and certified Profibus PA components (e.g. DP/PA segment coupler) for the power supply
- FISCO/FNICO-compliant according to IEC 60079-27
- The supply is not polarity-dependent

Device display and Bluetooth

The display background lighting and Bluetooth function (order option) is guaranteed across the entire supply voltage range. The Bluetooth function can be restricted at high ambient temperatures.

Potential equalization

The protective ground on the device must not be connected. If necessary, the potential matching line can be connected to the outer ground terminal of the transmitter before the device is connected.
**WARNING**

**Explosion Hazard!**

- Please refer to the separate documentation on applications in hazardous areas for the safety instructions.

_for optimum electromagnetic compatibility:

- Keep the potential matching line as short as possible
- Observe a cross-section of at least 2.5 mm² (14 AWG)

---

</tr>
<tr>
<td>External ground terminal</td>
</tr>
<tr>
<td>0.5 to 4 mm² (20 to 12 AWG)</td>
</tr>
</tbody>
</table>

**Cable outer diameter**

The cable outer diameter depends on the cable gland used

- Coupling, plastic:  
  Ø5 to 10 mm (0.2 to 0.38 in)
- Coupling, nickel-plated brass:  
  Ø7 to 10.5 mm (0.28 to 0.41 in)
- Coupling, stainless steel:  
  Ø7 to 12 mm (0.28 to 0.47 in)

Use a twisted, shielded twin-core cable, preferably cable type A.

For further information on the cable specification:

- Operating Instructions BA00034S PROFIBUS DP/PA: Guidelines for planning and commissioning
- PROFIBUS Assembling Guideline 8.022
- IEC 61158-2 (MBP).

---

**Overvoltage protection**

The overvoltage protection can optionally be ordered as a "Mounted accessory" via the product structure

**Devices without optional overvoltage protection**

The equipment fulfills the requirements of the product standard IEC / DIN EN 61326-1 (Table 2 Industrial Environment).
Depending on the type of port (DC power supply, input/output port) different testing levels according to IEC / DIN EN 61326-1 against transient overvoltages (Surge) are applied (IEC / DIN EN 61000-4-5 Surge):

Test level on DC power ports and input/output ports is 1,000 V line to earth.

Devices with optional overvoltage protection

- Spark-over voltage: min. 400 V<sub>DC</sub>
- Tested according to IEC / DIN EN 60079-14 sub chapter 12.3 (IEC / DIN EN 60060-1 chapter 7)
- Nominal discharge current: 10 kA

**NOTICE**

Device could be destroyed

- Always ground device with integrated overvoltage protection.

**Overvoltage category**

Overvoltage category II

---

**Performance characteristics**

### Reference operating conditions

- Temperature = +24 °C (+75 °F) ± 5 °C (±9 °F)
- Pressure = 960 mbar abs. (14 psia) ± 100 mbar (±1.45 psi)
- Humidity = 60 % ± 15 %
- Reflector: metal plate with diameter ≥ 1 m (40 in)
- No major interference reflections inside the signal beam

### Maximum measured error

**Reference accuracy**

The devices are optimized for bulk solid applications on delivery. Additional reference condition for the accuracy specifications for solids devices is **Bin type = Workbench test**.

**Accuracy**

The accuracy is the sum of the non-linearity, non-repeatability and hysteresis.

- Measuring distance up to 1.5 m (4.92 ft): max. ±20 mm (±0.79 in)
- Measuring distance > 1.5 m (4.92 ft): ±3 mm (±0.12 in)

**Non-repeatability**

Non-repeatability is already included in the accuracy.

≤ 1 mm (0.04 in)

If conditions deviate from the reference operating conditions, the offset/zero point that results from the installation conditions can be up to ±4 mm (±0.16 in). This additional offset/zero point can be eliminated by entering a correction (Level correction parameter) during commissioning.
Differing values in near-range applications

<table>
<thead>
<tr>

<tr>
<td>-3 (-0.12)</td>
<td>-20 (-0.79)</td>
</tr>
</tbody>
</table>

7 Maximum measured error in near-range applications

Δ Maximum measured error
R Reference point of the distance measurement
D Distance from reference point of antenna

Measured value resolution
Dead band according to DIN EN IEC 61298-2/DIN EN IEC 60770-1:
Digital: 1 mm

Response time
According to DIN EN IEC 61298-2 / DIN EN IEC 60770-1, the step response time is the time following an abrupt change in the input signal up until the changed output signal has adopted 90% of the steady-state value for the first time.

The response time can be configured.

The following step response times apply (in accordance with DIN EN IEC 61298-2/DIN EN IEC 60770-1) when damping is switched off:
- Pulse frequency ≥ 5/s (cycle time ≤ 200 ms)
- Step response time < 1 s

Influence of ambient temperature
The output changes due to the effect of the ambient temperature with respect to the reference temperature.

The measurements are performed according to DIN EN IEC 61298-3 / DIN EN IEC 60770-1
Average $T_C = 3 \text{ mm/10 K}$
Mounting

Mounting location

A   Recommended distance from wall to nozzle outer edge ~ 1/6 of the vessel diameter. The device should never be mounted closer than 20 cm (7.87 in) to the vessel wall.
1   Use of a weather protection cover; protection from direct sunlight or rain
2   Installation in the center, interference can cause signal loss
3   Do not install above the filling curtain

In applications with strong dust emissions, the integrated purge air connection can prevent the antenna from becoming clogged.
Avoid internal fittings (point level switches, temperature sensors, struts, vacuum rings, heating coils, baffles etc.) inside the signal beam. Pay attention to the beam angle $\alpha$.

**Avoiding interference echoes**
Metal deflector plates, installed at an angle to scatter the radar signals, help prevent interference echoes.

**Vertical alignment of antenna axis**
Align the antenna so that it is perpendicular to the product surface.

> The maximum reach of the antenna can be reduced, or additional interference signals can occur, if the antenna is not installed perpendicular to the product.

**Radial alignment of the antenna**
Based on the directional characteristic, radial alignment of the antenna is not necessary.

### Installation instructions
#### Horn antenna 65 mm (2.56 in)

**Information about the mounting nozzle**
The maximum nozzle length $H_{\text{max}}$ depends on the nozzle diameter $D$.

**Maximum nozzle length $H_{\text{max}}$ as a function of the nozzle diameter $D$**

<table>
<thead>
<tr>

In the case of longer nozzles, reduced measuring performance must be expected.

Please note the following:
- The end of the nozzle must be smooth and free from burrs.
- The edge of the nozzle should be rounded.
- Mapping must be performed.
- Please contact the manufacturer’s support department for applications with nozzles that are higher than indicated in the table.

#### Horn antenna 65 mm (2.56 in) with alignment unit
UNI flanges with an integrated alignment unit are available for the horn antenna 65 mm (2.56 in). An angle of inclination of up to $15^\circ$ in all directions can be set for the antenna axis using the alignment unit. The alignment unit is used to optimally align the measuring signal to the bulk solids.

</tr>
</tbody>
</table>

In the case of longer nozzles, reduced measuring performance must be expected.

Please note the following:
- The end of the nozzle must be smooth and free from burrs.
- The edge of the nozzle should be rounded.
- Mapping must be performed.
- Please contact the manufacturer's support department for applications with nozzles that are higher than indicated in the table.

Antenna flush mount 80 mm (3 in) with alignment unit

UNI flanges with an integrated alignment unit are available for the antenna flush mount 80 mm (3 in). An inclination of the antenna axis of up to 15° in all directions can be set with the help of the alignment unit. The alignment unit is used to optimally align the measuring signal to the bulk solids.

Information about the mounting nozzle

The maximum nozzle length H<sub>max</sub> depends on the nozzle diameter ØD.
The maximum length of the nozzle $H_{\text{max}}$ depends on the nozzle diameter $D$:

<table>
<thead>
<tr>
<th>$\phi D$</th>
<th>$H_{\text{max}}$</th>
</tr>
</thead>
<tbody>
<tr>
<td>min. 80 to 100 mm (3 to 4 in)</td>
<td>1450 mm (57 in)</td>

<td>1800 mm (71 in)</td>
</tr>
<tr>
<td>$\geq$ 150 mm (6 in)</td>
<td>2700 mm (106 in)</td>
</tr>
</tbody>
</table>

In the case of longer nozzles, reduced measuring performance must be expected.

Please note the following:

- The end of the nozzle must be smooth and free from burrs.
- The edge of the nozzle should be rounded.
- Mapping must be performed.
- Please contact the manufacturer's support department for applications with nozzles that are higher than indicated in the table.

**Purge air connection**

In applications with strong dust emissions, the integrated purge air connection can prevent the antenna from becoming clogged. Pulse operation is recommended.

**Purge air pressure range**

- **Pulse operation**: Max. 6 bar (87 psi)
- **Continuous operation**: 200 to 500 mbar (3 to 7.25 psi)

**Purge air connection**

- Tool:
  - Open-ended wrench 13 mm (G 1/4"
  - Open-ended wrench 14 mm (NPT)
  - Open-ended wrench 17 mm (NPT "adapter")
- Min. torque: 6 Nm (4.4 lbf ft)
- Max. torque: 7 Nm

- Always use dry purge air
- In general, purging should only be performed to the extent necessary as excess purging can cause mechanical damage (abrasion)

**Beam angle**

The beam angle is defined as the angle $\alpha$ where the energy density of the radar waves reaches half the value of the maximum energy density (3 dB width). Microwaves are also emitted outside the signal beam and can be reflected off interfering installations.
Relationship between beam angle $\alpha$, distance $D$ and beamwidth diameter $W$

The beamwidth diameter $W$ depends on the beam angle $\alpha$ and the distance $D$.

Horn antenna 65 mm (2.56 in), $\alpha = 4^\circ$

**Special mounting instructions**

- Dielectric constant of medium: \( \varepsilon_r \geq 10 \)
- The distance from the tip of the antenna to the tank should be approx. 100 mm (4 in).
- Avoid installation positions where condensate or buildup can form between the antenna and the vessel.
- In the case of outdoor installations, ensure that the area between the antenna and the tank is protected from the weather.
- Do not install any fittings or attachments between the antenna and the tank that could reflect the signal.

The thickness of the tank ceiling or the dielectric window depends on the \( \varepsilon_r \) of the material.

The material thickness can be a full multiple of the optimum thickness (table); it is important to note, however, that the microwave transparency decreases significantly with increasing material thickness.

**Optimum material thickness**

**Storage temperature**
- Without LCD display: –40 to +90 °C (–40 to +194 °F)
- With LCD display: –40 to +85 °C (–40 to +185 °F)

**Climate class**
- DIN EN 60068-2-38 (test Z/AD)

**Installation height as per IEC61010-1 Ed.3**
- Generally up to 5000 m (16404 ft) above sea level

**Degree of protection**
- Test as per IEC 60529 and NEMA 250-2014

**Housing**
- IP66/68, NEMA TYPE 4X/6P
- IP68 test condition: 1.83 m under water for 24 hours

**Cable entries**
- Gland M20, plastic, IP66/68 NEMA TYPE 4X/6P
- Gland M20, nickel-plated brass, IP66/68 NEMA TYPE 4X/6P
- Gland M20, 316L, IP66/68 NEMA TYPE 4X/6P
- Gland M20, hygiene, IP66/68/69 NEMA Type 4X/6P
- Thread M20, IP66/68 NEMA TYPE 4X/6P
• Thread G1/2, IP66/68 NEMA TYPE 4X/6P
  If the G1/2 thread is selected, the device is delivered with an M20 thread as standard and a G1/2 adapter is included with the delivery, along with the corresponding documentation
• Thread NPT1/2, IP66/68 NEMA TYPE 4X/6P
• M12 plug
  • When housing is closed and connecting cable is plugged in: IP66/67 NEMA TYPE 4X
    • When housing is open or connecting cable is not plugged in: IP20, NEMA TYPE 1

**NOTICE**

**M12 plug: Loss of IP protection class due to incorrect installation!**
  ▶️ The degree of protection only applies if the connecting cable used is plugged in and screwed tight.
  ▶️ The degree of protection only applies if the connecting cable used is specified according to IP66/67 NEMA 4X.
  ▶️ The protection classes are only maintained if the dummy cap is used or the cable is connected.

### Vibration resistance

| DIN EN 60068-2-64 / IEC 60068-2-64 for 5 to 2,000 Hz: 1.5 (m/s²)²/Hz |

### Electromagnetic compatibility (EMC)

- Electromagnetic compatibility as per EN 61326 series and NAMUR recommendation EMC (NE21)
- Maximum measured error during EMC testing: < 0.5 % of the current digital measured value
  
  For more details refer to the EU Declaration of Conformity.

---

### Process

#### Process pressure range

**WARNING**

The maximum pressure for the device depends on the lowest-rated component with regard to pressure (components are: process connection, optional mounted parts or accessories).

  ▶️ Only operate the device within the specified limits for the components!
  ▶️ MWP (Maximum Working Pressure): The MWP is specified on the nameplate. This value refers to a reference temperature of +20 °C (+68 °F) and may be applied to the device for an unlimited time. Note temperature dependence of MWP. For flanges, refer to the following standards for the permitted pressure values at higher temperatures: EN 1092-1 (with regard to their stability/temperature property, the materials 1.4435 and 1.4404 are grouped together under EN 1092-1; the chemical composition of the two materials can be identical), ASME B16.5, JIS B2220 (the latest version of the standard applies in each case). MWP data that deviate from this are provided in the relevant sections of the Technical Information.

  ▶️ The Pressure Equipment Directive (2014/68/EU) uses the abbreviation **PS**. This corresponds to the maximum working pressure (MWP) of the device.

The following tables show the dependencies between the seal material, process temperature ($T_p$) and process pressure range for each process connection that can be selected for the antenna used.

**Drip-off antenna 50 mm (2 in)**

UNI flange UNI 4”/DN100/100A for antennas with alignment unit

![Diagram of UNI flange]

42 Dimensions of UNI flange UNI 4”/DN100/100A for antennas with alignment unit. Unit of measurement mm (in)
**UNI flange UNI 4"/DN100/100A**

Suitable for ASME B16.5, 4" 150lbs / EN1092-1; DN100 PN16 / JIS B2220; 10K 100A

- **Material:** Aluminum
- **Process pressure:** ≤1 bar (14.5 psi)
- **Weight:** 1.4 kg (3.09 lb)

The number of bolts is reduced in some cases. To match different standards the bores are enlarged. Therefore the bolts should be aligned centrally to the counter flange before tightening.

**UNI flange 6"/DN150/150A for antennas with alignment unit**

![Diagram of UNI flange 6"/DN150/150A](image)

Dimensions of UNI flange 6"/DN150/150A for antennas with alignment unit. Unit of measurement mm (in)

**UNI flange 6"/DN150/150A**

Suitable for ASME B16.5, 6" 150lbs / EN1092-1; DN150 PN16 / JIS B2220; 10K 150A

- **Material:** Aluminum
- **Process pressure:** ≤1 bar (14.5 psi)
- **Weight:** 2.2 kg (4.85 lb)

The number of bolts is reduced in some cases. To match different standards the bores are enlarged. Therefore the bolts should be aligned centrally to the counter flange before tightening.
**UNI flange 8”/DN200/200A for antennas with alignment unit**

Dimensions of UNI flange 8”/DN200/200A for antennas with alignment unit. Unit of measurement mm (in)

**UNI flange 8”/DN200/200A**

Suitable for ASME B16.5, 8” 150lbs / EN1092-1; DN200 PN16 / JIS B2220; 10K 200A

- **Material:**
  - Aluminum
- **Process pressure:**
  - ≤1 bar (14.5 psi)
- **Weight:**
  - 3.2 kg (7.05 lb)

The number of bolts is reduced in some cases. To match different standards the bores are enlarged. Therefore the bolts should be aligned centrally to the counter flange before tightening.
UNI flange 10"/DN250/250A for antennas with alignment unit

Dimensions of UNI flange 10"/DN250/250A for antennas with alignment unit. Unit of measurement mm (in)

**UNI flange 10"/DN250/250A**

Suitable for ASME B16.5, 10" 150lbs / EN1092-1; DN250 PN16 / JIS B2220; 10K 250A

- **Material:**
  - Aluminum
- **Process pressure:**
  - ≤1 bar (14.5 psi)
- **Weight:**
  - 4.7 kg (10.36 lb)

The number of bolts is reduced in some cases. To match different standards the bores are enlarged. Therefore the bolts should be aligned centrally to the counter flange before tightening.
Drip-off antenna, PTFE, 50 mm (2 in), with UNI flange and purge air connection

![Diagram of Drip-off antenna](image)

  - Nameplate: stainless steel housing, labeled directly
  - TAG plate: plastic foil, stainless steel or provided by the customer
  - M20 cable glands: select material (stainless steel, nickel-plated brass, polyamide) |
| Stainless steel housing, 316L hygiene
  - Housing: stainless steel 316L (1.4404)
  - Dummy cover: stainless steel 316L (1.4404)
  - 316L (1.4404) stainless steel cover with PC Lexan 943A window
  - 316L (1.4404) stainless steel cover with borosilicate window; can be optionally ordered as an enclosed accessory
    For Dust-Ex applications, the window is always made from borosilicate.
  - Cover seal materials: EPDM |
- Nameplate: stainless steel housing, labeled directly
- TAG plate: plastic foil, stainless steel or provided by the customer
- M20 cable glands: select material (stainless steel, nickel-plated brass, polyamide)

**Materials in contact with the medium**

**DN65 horn antenna**

![Diagram of DN65 horn antenna](image)

59  Material; DN65 horn antenna. Unit of measurement mm (in)
1  Horn: 316L / 1.4404
   Antenna: Al₂O₃ (ceramic)
   Antenna seal: graphite
2  Process connection: 316L / 1.4404
3  Housing adapter: 316L / 1.4404

**DN65 horn antenna, with UNI flange and alignment unit**

![Diagram of DN65 horn antenna with UNI flange and alignment unit](image)

60  Material; DN65 horn antenna, with UNI flange and alignment unit. Unit of measurement mm (in)
1  Horn: 316L / 1.4404
   Antenna: Al₂O₃ (ceramic)
   Antenna seal: graphite
2  Process connection: aluminum
3  Housing adapter: 316L / 1.4404
4  Sensor adapter with alignment unit: 316L / 1.4404
5  Screws: A4-70, A2-70
6  Clamping washer: 3.1645 / aluminum
Drip-off antenna, purge air connection

1. Antenna: PTFE, seal material FKM Viton GLT
2. Process connection: PP
3. Housing sensor adapter: 316L / 1.4404
4. Synthetic/organic fiber elastomer seal (asbestos-free), FA material
5. Threaded adapter, plug screw fitting: 316L / 1.4404
   - For NPT plug screw fitting: seal material PTFE tape
   - For G plug screw fitting or NPT adapter: seal material: FKM O-ring
6. Purge air adapter: PA-GF (polyamide fiber-glass reinforced)
7. Synthetic/organic fiber elastomer seal (asbestos-free), FA material

Antenna flush mount, 80 mm (3 in), with flange and purge air connection

1. Antenna: PTFE, seal material FKM Viton GLT
2. Process connection: 316L / 1.4404
3. Housing adapter: 316L / 1.4404
4. Threaded adapter, plug screw fitting: 316L / 1.4404
   - For NPT plug screw fitting: seal material PTFE tape
   - For G plug screw fitting or NPT adapter: seal material: FKM O-ring
5. Integrated purge air adapter: 316L / 1.4404
Antenna flush mount, 80 mm (3 in), with UNI flange and purge air connection

1. Antenna: PTFE, seal material FKM Viton GLT
2. Process connection: 316L / 1.4404
3. Housing adapter: 316L / 1.4404
4. Threaded adapter, plug screw fitting: 316L / 1.4404
   For NPT plug screw fitting: seal material PTFE tape
   For G plug screw fitting or NPT adapter: seal material: FKM O-ring
5. Integrated purge air adapter: 316L / 1.4404

Antenna flush mount, 80 mm (3 in), with UNI flange, alignment unit and purge air connection

1. Antenna: PTFE, seal material FKM Viton GLT
2. Process connection: aluminum
3. Housing adapter: 316L / 1.4404
4. Threaded adapter, plug screw fitting, purge air adapter: 316L / 1.4404
   For NPT plug screw fitting: seal material PTFE tape
   For G plug screw fitting or NPT adapter: seal material: FKM O-ring
5. Sensor adapter with alignment unit: 316L / 1.4404
6. Screws: A4-70, A2-70
7. Clamping washer: 3.1645 / aluminum
Display and user interface

**Operation concept**

Operator-oriented menu structure for user-specific tasks
- User navigation
- Diagnosis
- Application
- System

**Quick and safe commissioning**
- Interactive wizard with graphical interface for guided commissioning in FieldCare, DeviceCare or DTM and PDM-based tools from third-party users or SmartBlue
- Menu guidance with brief descriptions of the individual parameter functions
- Standardized operation at the device and in the operating tools

**Integrated HistOROM data memory**
- Adoption of data configuration when electronics modules are replaced
- Up to 100 event messages recorded in the device
- A reference signal curve is saved during commissioning for later use as a reference during operation

**Efficient diagnostics increase measurement reliability**
- Remedial measures are integrated in plain text
- Diverse simulation options

**Bluetooth module (optionally integrated in local display)**
- Easy and fast setup via SmartBlue app or PC with DeviceCare from version 1.07.00 or FieldXpert SMT70
- No additional tools or adapters needed
- Encrypted single point-to-point data transmission (tested by Fraunhofer Institute) and password-protected communication via Bluetooth® wireless technology

**Languages**

The operating language of the local display (optional) can be selected via the Product Configurator. The local display is delivered with English from the factory if a different language was not selected. The operating language can be changed subsequently via the **Language** parameter.

**Local operation**

Local operation with 3 keys (ESC, ▼, ▲) on the display.

The operating elements are also accessible in the various hazardous areas.

**Local display**

Device display (optional)

**Functions**
- Display measured values, also fault and notice messages
- Background lighting, which switches from green to red in the event of an error
- The device display can be removed for easier operation

The device displays are available with the additional option of Bluetooth® wireless technology.
65 Segment display without keys

66 Graphic display

1 Optical operating keys

Permitted ambient temperature for the display: −20 to +70 °C (−4 to +158 °F)
The readability of the display may be impaired at temperatures outside the temperature range.
Local operation with 3 keys (left, right, enter) on the display.

The operating elements are also accessible in the various hazardous areas.

Installation position of device display exchangeable
The installation position of the display can be changed in the case of the dual compartment housing, L-form.
Remote operation

Via PROFIBUS PA protocol

1 Segment coupler
2 Computer with PROFibus and operating tool (e.g. DeviceCare/FieldCare)
3 PLC (programmable logic controller)
4 Transmitter
5 Additional functions (valves etc.)

Via service interface (CDI)

1 Computer with FieldCare/DeviceCare operating tool
2 Commubox FXA291
3 Service interface (CDI) of the measuring device (= Endress+Hauser Common Data Interface)

Operation via Bluetooth® wireless technology (optional)

Prerequisite
- Measuring device with Bluetooth display
- Smartphone or tablet with SmartBlue app or PC with DeviceCare, version 1.07.00 and higher, or FieldXpert SMT70

The connection has a range of up to 25 m (82 ft). The range can vary depending on environmental conditions such as attachments, walls or ceilings.

System integration

According to EN 50170 Volume 2, IEC 61158-2 (MBP) type 1 PROFIBUS PA Profile Version 3.02
**Supported operating tools**

Smartphone or tablet with Endress+Hauser SmartBlue (app), DeviceCare, version 1.07.00 and higher, FieldCare, DTM, and PDM.

**Certificates and approvals**

Current certificates and approvals for the product are available at [www.endress.com](http://www.endress.com) on the relevant product page:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select Downloads.

**CE mark**

The measuring system meets the legal requirements of the applicable EU directives. These are listed in the corresponding EU Declaration of Conformity together with the standards applied.

The manufacturer confirms successful testing of the device by affixing to it the CE mark.

**RoHS**

The measuring system meets the substance restrictions of the Directive on the Restriction of the Use of Certain Hazardous Substances 2011/65/EU (RoHS 2) and the Delegated Directive (EU) 2015/863 (RoHS 3).

**RCM marking**

The supplied product or measuring system meets the ACMA (Australian Communications and Media Authority) requirements for network integrity, interoperability, performance characteristics as well as health and safety regulations. Here, especially the regulatory arrangements for electromagnetic compatibility are met. The products bear the RCM marking on the nameplate.

**Ex approvals**

Additional safety instructions must be followed for use in hazardous areas. Please refer to the separate "Safety Instructions" (XA) document included in the delivery. Reference to the applicable XA can be found on the nameplate.

**Explosion-protected smartphones and tablets**

If used in hazardous areas, mobile end devices with an Ex approval must be used.

**Pressure equipment with permitted pressure ≤ 200 bar (2900 psi)**

Pressure instruments with a process connection that does not have a pressurized housing do not fall within the scope of the Pressure Equipment Directive, irrespective of the maximum allowable pressure.

**Reasons:**

According to Article 2, point 5 of EU Directive 2014/68/EU, pressure accessories are defined as "devices with an operational function and having pressure-bearing housings".

If a pressure instrument does not have a pressure-bearing housing (no identifiable pressure chamber of its own), there is no pressure accessory present within the meaning of the Directive.

**Radio approval**

Displays with Bluetooth LE have radio licenses according to CE and FCC. The relevant certification information and labels are provided on display.

**EN 302729 radio standard**

The devices comply with the LPR (Level Probing Radar) radio standard EN 302729.

The devices are approved for unrestricted use inside and outside closed containers in countries of the EU and the EFTA. As a prerequisite, the countries must have already implemented this standard.

The standard is already implemented in the following countries:
Belgium, Bulgaria, Germany, Denmark, Estonia, France, Greece, UK, Ireland, Iceland, Italy, Liechtenstein, Lithuania, Latvia, Malta, The Netherlands, Norway, Austria, Poland, Portugal, Romania, Sweden, Switzerland, Slovakia, Spain, Czech Republic and Cyprus.

Implementation is still underway in all of the countries not listed.

Please note the following for the operation of the devices outside of closed vessels:
- Installation must be carried out by properly trained, expert staff.
- The device antenna must be installed in a fixed location pointing vertically downwards.
- The installation site must be located at a distance of 4 km (2.49 mi) from the astronomy stations listed or otherwise approval must be provided by the relevant authority. If a device is installed within a radius of 4 to 40 km (2.49 to 24.86 mi) around one of the listed stations, it must not be installed at a height of more than 15 m (49 ft) above the ground.

> As a general rule, the requirements outlined in EN 302729 must be observed.

### EN 302372 radio standard

The devices comply with the TLPR (Tanks Level Probing Radar) radio standard EN 302372 and are permitted for use in closed vessels. Points a to f in Annex E of EN 302372 must be observed for the installation.

### FCC

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

[Any] changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

In addition, the devices are compliant with Section 15.256. For these LPR (Level Probe Radar) applications, the devices must be professionally installed in a downwarkd operating position. In addition, the devices are not allowed to be mounted in a zone of 4 km (2.49 mi) around RAS stations and within a radius of 40 km (24.86 mi) around RAS stations. The maximum operation height of devices is 15 m (49 ft) above ground.

### Industry Canada

#### Canada CNR-Gen Section 7.1.3

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not interfere, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

[Any] changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

- The installation of the LPR/TLPR device shall be done by trained installers, in strict compliance with the manufacturer’s instructions.
- The use of this device is on a “no-interference, no-protection” basis. That is, the user shall accept operations of high-powered radar in the same frequency band which may interfere with or damage this device. However, devices found to interfere with primary licensing operations will be required to be removed at the user’s expense.
- This device shall be installed and operated in a completely enclosed container to prevent RF emissions, which can otherwise interfere with aeronautical navigation.
- The installer/user of this device shall ensure that it is at least 10 km from the Dominion Astrophysical Radio Observatory (DRAO) near Penticton, British Columbia. The coordinates of the DRAO are latitude 49°19’15” N and longitude 119°37’12” W. For devices not meeting this 10 km separation (e.g., those in the Okanagan Valley, British Columbia,) the installer/user must coordinate with, and obtain the written concurrence of, the Director of the DRAO before the equipment can be installed or operated. The Director of the DRAO may be contacted at 250-497-2300 (tel.) or 250-497-2355 (fax). (Alternatively, the Manager, Regulatory Standards Industry Canada, may be contacted.)

### External standards and guidelines

  Electromagnetic compatibility (EMC) of industrial process and laboratory control equipment
- NAMUR NE 53
  Software of field devices and signal-processing devices with digital electronics
- NAMUR NE 107
  Status categorization in accordance with NE 107
- NAMUR NE 131
  Requirements for field devices for standard applications

### Ordering information

Detailed ordering information is available from your nearest sales organization at [www.addresses.endress.com](http://www.addresses.endress.com) or in the Product Configurator at [www.endress.com](http://www.endress.com):

1. Select the product using the filters and search field.
2. Open the product page.
3. Select Configuration.

Product Configurator - the tool for individual product configuration
- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Calibration

Factory calibration certificate

The calibration points are spread evenly over the measuring range (0 to 100 %). The Empty calibration E and Full calibration F must be specified to define the measuring range. If this information is missing, antenna-dependent default values are used instead.

Measuring range restrictions

The following restrictions must be considered when selecting E and F:
- Minimum distance between reference point R and 100% mark
  - A ≥ 400 mm (16 in)
- Minimum span
  - F ≥ 45 mm (1.77 in)
- Maximum value for Empty calibration
  - E ≥ 450 mm (17.72 in) (maximum 50 m (164 ft))
- Calibration takes place under reference conditions.
- The selected values for Empty calibration and Full calibration are only used to create the factory calibration certificate. Afterwards, the values are reset to the default values specific for the antenna. If values other than the default values are required, they must be ordered as a customized empty/full calibration.

Service

Services that can be selected via the product structure in the Product Configurator include.
- Cleaned of oil+grease (wetted)
- PWIS-free (paint-wetting impairment substances)
- ANSI Safety Red coating, coated housing cover
- Set damping
- Bluetooth communication is disabled on delivery
- Customized empty/full calibration
- Product documentation on paper

A printed (hard copy) version of test reports, declarations and inspection certificates can optionally be ordered via the Service feature, Product documentation on paper option. The documents can be selected via the Test, certificate, declaration feature and are then provided with the device upon delivery.
**Test, certificate, declaration**

All test reports, declarations and inspection certificates are provided electronically in the **Device Viewer**.
Enter the serial number from the nameplate ([www.endress.com/deviceviewer](http://www.endress.com/deviceviewer))

**Identification**

**Measuring point (tag)**

The device can be ordered with a tag name.

**Location of tag name**

In the additional specification, select:
- Stainless steel tag plate
- Paper adhesive label
- Tag provided by the customer
- RFID TAG
- RFID TAG + stainless steel tag plate
- RFID TAG + paper adhesive label
- RFID TAG + TAG provided by the customer
- IEC 61406 stainless steel TAG
- IEC 61406 stainless steel TAG + NFC TAG
- IEC 61406 stainless steel TAG, stainless steel TAG
- IEC 61406 stainless steel TAG + NFC, stainless steel TAG
- IEC 61406 stainless steel TAG, plate provided
- IEC 61406 stainless steel TAG + NFC, plate provided

**Definition of tag name**

In the additional specification, specify:
3 lines of maximum 18 characters each
The specified tag name appears on the selected plate and/or on the RFID TAG.

**Presentation in the SmartBlue app**

The first 18 characters of the tag name
The tag name can always be changed specifically for the measuring point via Bluetooth.

**Display in electronic nameplate (ENP)**

The first 18 characters of the tag name

**Display in PROFIBUS PA**

The first 18 characters of the tag name are part of the electronic nameplate (ENP) and are also used as TAG_DESC in accordance with the PA Profile 3.02.

For further information, please refer to SD01502F, SD02796P
Available in the Download Area of the Endress+Hauser website ([www.endress.com/downloads](http://www.endress.com/downloads)).

---

**Application packages**

**Heartbeat Technology**

The Heartbeat Verification + Monitoring application package offers diagnostic functionality through continuous self-monitoring, the transmission of additional measured variables to an external Condition Monitoring system and the in-situ verification of devices in the application.

The application package can be ordered together with the device or can be activated subsequently with an activation code. Detailed information on the order code is available via the Endress+Hauser website ([www.endress.com](http://www.endress.com)) or from your local Endress+Hauser Sales Center.

**Heartbeat Verification**

Heartbeat Verification is carried out on request and supplements self-monitoring, which is performed continuously, by carrying out further tests. During verification, the system checks whether the device components comply with the factory specifications. Both the sensor and the electronics modules are included in the tests.

Heartbeat Verification confirms the device function on request within the specified measuring tolerance with a total test coverage TTC (Total Test Coverage) in percent.

Heartbeat Verification meets the requirements for metrological traceability in accordance with ISO 9001 (ISO9001:2015 Section 7.1.5.2).
The result of the verification is either Passed or Failed. The verification data are saved in the device and optionally archived on a PC with the FieldCare asset management software or in the Netilion Library. Based on this data, a verification report is generated automatically to ensure that traceable documentation of the verification results is available.

**Heartbeat Monitoring**

Foam detection wizard and **Build-up detection** wizard are available, process windows can be configured. Furthermore, additional monitoring parameters can be displayed and used for predictive maintenance or application optimization.

"Foam detection" wizard

This wizard configures the automatic foam detection. Foam detection can be linked to a output variable or status information e.g. to control a sprinkler used to dissolve the foam. It is also possible to monitor the foam increase in a so called foam index. The foam index can also be linked to a output variable and can be shown on the display.

Preparation:
The Foam monitoring initialization should only be done without or less foam.

Areas of application

- Measurement in liquids
- Reliable detection of foam on the medium

"Build-up detection" wizard

This wizard configures the build-up detection.

Basic idea:
The build-up detection can, for example, be linked to a compressed-air system to clean the antenna. With the build-up monitoring the maintenance cycles can be optimized.

Preparation:
The build-up monitoring initialization should only be done without or less build-up.

Areas of application

- Measurement in liquids and solids
- Reliable detection of buildup on the antenna

Detailed description

Special Documentation SD03093F

**Accessories**

| Weather protection cover 316L | The weather protection cover can be ordered together with the device via the "Accessory enclosed" product structure. It is used to protect against direct sunlight, precipitation and ice. Weather protection cover 316L is suitable for the dual compartment housing made of aluminum or 316L. The delivery includes the holder for direct mounting on the housing. |
Material
- Weather protection cover: 316L
- Clamping screw: A4
- Holder: 316L

Order number for accessories:
71438303

Plastic weather protection cover
The weather protection cover can be ordered together with the device via the “Accessory enclosed” product structure.

It is used to protect against direct sunlight, precipitation and ice.

The plastic weather protection cover is suitable for the single compartment housing made of aluminum. The delivery includes the holder for direct mounting on the housing.

Adjustable flange seal
The adjustable flange seal is used to align the sensor to the surface of the product. It can be ordered directly with the device via the product structure ‘Accessory enclosed’ or individually via the specific order number.

Seal, adjustable, DN80
The seal, adjustable, DN80 is compatible with flanges EN DN80 PN10/PN40
Technical data

- Material: EPDM
- Recommended screw size: M14
- Recommended screw length: 100 mm (3.9 in)
- Process pressure: –0.1 to 0.1 bar (–1.45 to 1.45 psi)
- Process temperature: –40 to +80 °C (–40 to +176 °F)

Ordering information

- The flange seal can be ordered together with the device via the 'Accessory enclosed' product structure.
- Order number: 71074263

Seal, adjustable, DN100

The seal, adjustable, DN100 is compatible with flanges EN DN100 PN10/PN16

Technical data

- Material: EPDM
- Recommended screw size: M14
- Recommended screw length: 100 mm (3.9 in)
- Process pressure: –0.1 to 0.1 bar (–1.45 to 1.45 psi)
- Process temperature: –40 to +80 °C (–40 to +176 °F)

Ordering information

- The flange seal can be ordered together with the device via the 'Accessory enclosed' product structure.
- Order number: 71074264

Seal, adjustable, DN150

The seal, adjustable, DN150 is compatible with flanges EN DN150 PN10/PN19
Technical data
- Material: EPDM
- Recommended screw size: M18
- Recommended screw length: 110 mm (4.3 in)
- Process pressure: –0.1 to 0.1 bar (–1.45 to 1.45 psi)
- Process temperature: –40 to +80 °C (–40 to +176 °F)

Ordering information
- The flange seal can be ordered together with the device via the "Accessory enclosed" product structure.
- Order number: 71074265

Seal, adjustable, ASME 3”/ JIS 80A
The seal, adjustable, ASME 3”/ JIS 80A is compatible with flanges ASME 3” 150 lbs and JIS 80A 10K

Technical data
- Material: EPDM
- Recommended screw size: M14
- Recommended screw length: 100 mm (3.9 in)
- Process pressure: –0.1 to 0.1 bar (–1.45 to 1.45 psi)
- Process temperature: –40 to +80 °C (–40 to +176 °F)

Ordering information
- The flange seal can be ordered together with the device via the "Accessory enclosed" product structure.
- Order number: 71249070

Seal, adjustable, ASME 4”
The seal, adjustable, ASME 4” is compatible with flanges ASME 4” 150 lbs

Technical data
- Material: EPDM
- Recommended screw size: M14
- Recommended screw length: 100 mm (3.9 in)
- Process pressure: –0.1 to 0.1 bar (–1.45 to 1.45 psi)
- Process temperature: –40 to +80 °C (–40 to +176 °F)
**Ordering information**

- The flange seal can be ordered together with the device via the "Accessory enclosed" product structure.
- Order number: 71249072

**Seal, adjustable, ASME 6"/ JIS 150A**

The seal, adjustable, ASME 6"/ JIS 150A is compatible with flanges ASME 6" 150 lbs and JIS 150A 10K

**Technical data**

- Material: EPDM
- Recommended screw size: M18
- Recommended screw length: 100 mm (3.9 in)
- Process pressure: –0.1 to 0.1 bar (–1.45 to 1.45 psi)
- Process temperature: –40 to +80 °C (–40 to +176 °F)

**Ordering information**

- The flange seal can be ordered together with the device via the "Accessory enclosed" product structure.
- Order number: 71249073

**Remote display FHX50B**

The remote display is ordered via the Product Configurator.

If the remote display is to be used, the device version Prepared for display FHX50B must be ordered.
Material of single compartment housing, remote display
- Aluminum
- Plastic

Degree of protection:
- IP68 / NEMA 6P
- IP66 / NEMA 4x

Connecting cable:
- Connecting cable (option) up to 30 m (98 ft)
- Customer-supplied standard cable up to 60 m (197 ft)
  Recommendation: EtherLine®-P CAT.5e from LAPP.

Specification of customer-supplied connecting cable
Push-in CAGE CLAMP®, connection technology, push actuation
- Conductor cross-section:
  - Solid conductor 0.2 to 0.75 mm² (24 to 18 AWG)
  - Fine-stranded conductor 0.2 to 0.75 mm² (24 to 18 AWG)
  - Fine-stranded conductor; with insulated ferrule 0.25 to 0.34 mm²
  - Fine-stranded conductor; without insulated ferrule 0.25 to 0.34 mm²
- Stripping length 7 to 9 mm (0.28 to 0.35 in)
- Outer diameter: 6 to 10 mm (0.24 to 0.4 in)
- Maximum cable length: 60 m (197 ft)

Ambient temperature:
- –40 to +80 °C (–40 to +176 °F)
- Option: –50 to +80 °C (–58 to +176 °F)

Gas-tight feedthrough
Chemically inert glass feedthrough, which prevents gases from entering the electronics housing.
Can optionally be ordered as "Accessory mounted" via the product structure.

Documentation

For an overview of the scope of the associated Technical Documentation, refer to the following:
- Device Viewer (www.endress.com/deviceviewer): Enter the serial number from the nameplate
- Endress+Hauser Operations app: Enter serial number from nameplate or scan matrix code on nameplate.
The following documentation may be available depending on the version ordered:

<table>
<thead>
<tr>
