

Company **Endress+Hauser SE+Co. KG, Hauptstrasse 1, 79689 Maulburg**

declares as manufacturer, that the following product

Product **Liquiphant**
FTL31

has an estimated MTBF value of 300 years.

Mean Time Between Failure (MTBF) is a widely accepted concept to plan general maintenance cycle, reliability, and availability of systems.

MTBF is determined by the following formula: $MTBF = 1 / \lambda_{(tot)}$

where $\lambda_{(tot)}$ is the cumulative total of the failure rate of the components used in a device.

This declaration of compliance is exclusively valid for the above listed product in delivery condition.
