# 1 About this document

## 1.1 Document function

The document is part of the Operating Instructions and serves as a reference for parameters, providing a detailed explanation of each individual parameter of the operating menus.

It is used to perform tasks that require detailed knowledge of the function of the device:

- Optimal adaptation of the measurement to difficult conditions
- Detailed configuration of the communication interface
- Error diagnostics in difficult cases

## 1.2 Target group

The document is aimed at specialists who work with the device over the entire life cycle and perform specific configurations.

## 1.3 Using this document

### 1.3.1 Symbols

#### Types of information

-  Preferred procedures, processes or actions
-  Permitted procedures, processes or actions
-  Forbidden procedures, processes or actions
-  Additional information
-  Reference to documentation
-  Reference to page
-  Reference to graphic

### 1.3.2 Information on the document structure

The parameters of all the operating menus and the commissioning wizard are described in this document.

- **Guidance** menu with the **Commissioning** wizard (→  7), which guides the user automatically through all the device parameters that are required for commissioning
- **Application** menu (→  45)
- **Diagnostics** menu (→  24)
- **System** menu (→  71)

### 1.3.3 Operation concept

Operation method	Operation via: <ul style="list-style-type: none"> <li>SmartBlue app <sup>1)</sup></li> <li>Commubox FXA291</li> </ul>
Reliable operation	<ul style="list-style-type: none"> <li>Operation in local language</li> <li>Standardized operating concept on the device and in the SmartBlue app</li> <li>Write protection</li> <li>When electronics modules are replaced: configurations are transferred using the T-DAT Backup device memory. The device memory contains process data, device data and the event logbook. No reconfiguration is necessary.</li> </ul>
Diagnostic behavior	Efficient diagnostic behavior increases measurement availability: <ul style="list-style-type: none"> <li>Open troubleshooting measures via local display and SmartBlue app.</li> <li>Diverse simulation options</li> <li>Logbook of events that have occurred.</li> </ul>

1) Optional via order code "Display; operation", options H, J or K

#### IO-Link

The device-specific parameters are configured via IO-Link. There are specific configuration or operating programs from different manufacturers available to the user for this purpose. The device description file (IODD) is provided for the device

#### IO-Link operating concept

Operator-oriented menu structure for user-specific tasks. Efficient diagnostic behavior increases measurement availability:

- Diagnostic messages
- Remedial measures
- Simulation options

#### IODD download

Two options for downloading the IODD:

- [www.endress.com/download](http://www.endress.com/download)
- <https://ioddfinder.io-link.com/>

#### [www.endress.com/download](http://www.endress.com/download)

- Select "Device drivers".
- Under "Type", select the "IO Device Description (IODD)" item.
- Select "Product root".
- Click "Search ".
  - A list of search results is displayed.

Select and download the appropriate version.

#### <https://ioddfinder.io-link.com/>

- Enter and select "Endress" as the manufacturer.
- Select product name.
  - A list of search results is displayed.

Select and download the appropriate version.

For detailed IO-Link information, see "IO-Link" Special Documentation on the device  
→ 6

### 1.3.4 Structure of a parameter description

The individual parts of a parameter description are described in the following section:

<b>Complete parameter name</b>	Write-protected parameter =
<b>Navigation</b>	Navigation path to the parameter via the operating tool The names of the menus, submenus and parameters are abbreviated to the form in which they appear on the display and in the operating tool.
<b>Prerequisite</b>	The parameter is only available under these specific conditions
<b>Description</b>	Description of the parameter function
<b>Selection</b>	List of the individual options for the parameter <ul style="list-style-type: none"> <li>■ Option 1</li> <li>■ Option 2</li> </ul>
<b>User entry</b>	Input range for the parameter
<b>User interface</b>	Display value/data for the parameter
<b>Additional information</b>	Additional explanations (e.g. in examples): <ul style="list-style-type: none"> <li>■ On individual options</li> <li>■ On display values/data</li> <li>■ On the input range</li> <li>■ On the parameter function</li> </ul>

## 1.4 Related documentation

Technical information	Overview of the device with the most important technical data.
Operating instructions	All the information that is required in the various phases of the life cycle of the device: from product identification, incoming acceptance and storage, to mounting, connection, operation and commissioning through to troubleshooting, maintenance and disposal as well as the technical data and dimensions.
Sensor Brief Operating Instructions	Incoming acceptance, transport, storage and mounting of the device.
Transmitter Brief Operating Instructions	Electrical connection and commissioning of the device.
Description of Parameters	Detailed explanation of the menus and parameters.
Safety Instructions	Documents for the use of the device in hazardous areas.
Special Documentation	Documents with more detailed information on specific topics.
Installation Instructions	Installation of spare parts and accessories.

The related documentation is available online:

Device Viewer	On the <a href="http://www.endress.com/deviceviewer">www.endress.com/deviceviewer</a> website, enter the serial number of the device: nameplate
Endress+Hauser Operations App	<ul style="list-style-type: none"> <li>▶ Scan the Data Matrix code: nameplate</li> <li>▶ Enter the serial number of the device: nameplate</li> </ul>

## 2 "Guidance" menu

Main functions for use – from fast and safe commissioning to guided support during operation.

Navigation  Guidance

### 2.1 "Commissioning" menu

Complete this wizard to commission the device. NOTE: If you exit the wizard beforehand, the changes you made will be saved. For this reason, the device may be in an undefined state! In this case, reset the device to the default settings.

Navigation  Guidance → Commissioning

#### 2.1.1 "Device identification" wizard

Navigation  Guidance → Commissioning → Device ident.

**Device name**

<b>Navigation</b>	 Guidance → Commissioning → Device ident. → Device name
<b>Description</b>	Displays the name of the transmitter. The transmitter name is also provided on the nameplate of the transmitter.
<b>User interface</b>	Character string comprising numbers, letters and special characters

**Serial number**

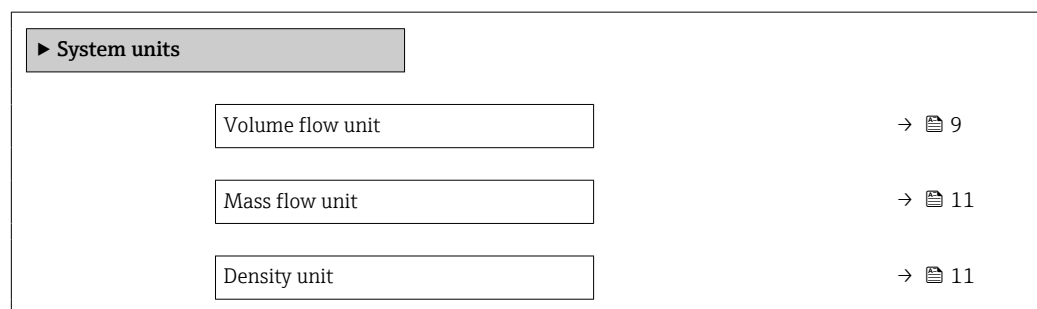

<b>Navigation</b>	 Guidance → Commissioning → Device ident. → Serial number
<b>Description</b>	<p>Displays the serial number of the measuring device. The serial number is also provided on the nameplate of the sensor and of the transmitter.</p> <p>The serial number can also be used to retrieve further device-related information and documentation via the Operations app or the Device Viewer on the Endress+Hauser website.</p>
<b>User interface</b>	Character string comprising numbers, letters and special characters

**Firmware version**

<b>Navigation</b>	 Guidance → Commissioning → Device ident. → Firmware version
<b>Description</b>	Displays the device firmware version installed.
<b>User interface</b>	Character string comprising numbers, letters and special characters

**2.1.2 "System units" wizard**

*Navigation*   Guidance → Commissioning → System units

Temperature unit	→  12
Conductivity unit	→  12

---

**Volume flow unit**

**Navigation**

 Guidance → Commissioning → System units → Volume flow unit

**Description**

Select the volume flow unit.

▪ SG4°C		
▪ SG15°C		
▪ SG20°C		

**Additional information** *Options*  
 For an explanation of the abbreviated units: → 90

The IO-Link interface only offers the **kg/m<sup>3</sup>** option.

Temperature unit 							
<b>Navigation</b>	 Guidance → Commissioning → System units → Temperature unit						
<b>Prerequisite</b>	Temperature measurement is only optionally available for Promag H 10 (5HBB): Under order code for "Functionality", option D (enhanced transmitter) and order code for "Sensor option", option CI (fluid temperature measurement)						
<b>Description</b>	Select the temperature unit.						
<b>Selection</b>	<table border="0"> <thead> <tr> <th><i>SI units</i></th> <th><i>US units</i></th> </tr> </thead> <tbody> <tr> <td>■ °C</td> <td>■ °F</td> </tr> <tr> <td>■ K</td> <td>■ °R</td> </tr> </tbody> </table>	<i>SI units</i>	<i>US units</i>	■ °C	■ °F	■ K	■ °R
<i>SI units</i>	<i>US units</i>						
■ °C	■ °F						
■ K	■ °R						
<b>Additional information</b>	 The IO-Link interface only offers the °C option.						

Conductivity unit 												
<b>Navigation</b>	 Guidance → Commissioning → System units → Conductiv. unit											
<b>Prerequisite</b>	Conductivity measurement is switched on in the <b>Conductivity measurement</b> parameter (→  59).  Conductivity measurement is only optionally available: Under order code for "Functionality", option D (enhanced transmitter) and order code for "Sensor option", option CX (conductivity measurement)											
<b>Description</b>	Select the conductivity unit.											
<b>Selection</b>	<table border="0"> <thead> <tr> <th><i>SI units</i></th> </tr> </thead> <tbody> <tr><td>■ nS/cm</td></tr> <tr><td>■ µS/cm</td></tr> <tr><td>■ µS/m</td></tr> <tr><td>■ µS/mm</td></tr> <tr><td>■ mS/m</td></tr> <tr><td>■ mS/cm</td></tr> <tr><td>■ S/cm</td></tr> <tr><td>■ S/m</td></tr> <tr><td>■ kS/m</td></tr> <tr><td>■ MS/m</td></tr> </tbody> </table>	<i>SI units</i>	■ nS/cm	■ µS/cm	■ µS/m	■ µS/mm	■ mS/m	■ mS/cm	■ S/cm	■ S/m	■ kS/m	■ MS/m
<i>SI units</i>

■ µS/m												
■ µS/mm												
■ mS/m												
■ mS/cm												
■ S/cm												
■ S/m												
■ kS/m												
■ MS/m												
<b>Additional information</b>	 The IO-Link interface only offers the unit <b>S/m</b> option.											

### 2.1.3 Totalizer 1 to n

Navigation  Guidance → Commissioning → Totalizer 1 to n

▶ **Totalizer 1 to n**

Assign process variable 1 to n	→  13
Process variable unit 1 to n	→  13
Totalizer 1 to n operation mode	→  14
Totalizer 1 to n failure behavior	→  15

---

#### Assign process variable

**Navigation**  Guidance → Commissioning → Totalizer 1 to n → AssignVariab. 1 to n

**Description** Select a process variable to activate the totalizer.  
If the process variable is changed or the totalizer deactivated, the totalizer is reset to "0".

- Selection**
- Off
  - Volume flow
  - Mass flow

**Additional information**  Totalizer 1 is permanently set to **Volume flow** option and cannot be changed. Totalizers 2 and 3 can be changed.

---

#### Process variable unit

**Navigation**  Guidance → Commissioning → Totalizer 1 to n → VariableUnit 1 to n

**Prerequisite** A process variable has been selected in the **Assign process variable** parameter in the **Totalizer 1 to n** submenu.

**Description** Select the unit for the process variable of the totalizer.

- Selection**
- |   |   |
|---|---|
| <p><i>SI units</i></p> <ul style="list-style-type: none"> <li>■ g<sup>*</sup></li> <li>■ kg<sup>*</sup></li> <li>■ t<sup>*</sup></li> </ul> | <p><i>US units</i></p> <ul style="list-style-type: none"> <li>■ oz<sup>*</sup></li> <li>■ lb<sup>*</sup></li> <li>■ STon<sup>*</sup></li> </ul> |

- bbl (imp;beer)\*
- bbl (imp;oil)\*

\* Visibility depends on order options or device settings

or

*Other units*

None\*

\* Visibility depends on order options or device settings

**Additional information**

*Description*

The unit is selected separately for each totalizer. The unit is independent of the option selected in the **System units** submenu (→  8).

*Options*

The selection is dependent on the process variable selected in the **Assign process variable** parameter (→  13).

- The IO-Link interface only offers the **kg** option, **m<sup>3</sup>** option and **Nm<sup>3</sup>** option.
- Totalizer 1 is permanently set to **Volume flow** option and cannot be changed. Totalizers 2 and 3 can be changed.

---

**Totalizer operation mode**

**Navigation**

 Guidance → Commissioning → Totalizer 1 to n → Operat. mode 1 to n

**Prerequisite**

A process variable has been selected in the **Assign process variable** parameter in the **Totalizer 1 to n** submenu.

**Description**

Select the totalizer operation mode, e.g. only totalize forward flow or only totalize reverse flow.

**Selection**

- Net
- Forward
- Reverse

<b>Additional information</b>	<i>Selection</i> <ul style="list-style-type: none"> <li>■ <b>Net</b> option The flow values in the forward and reverse flow directions are totalized and netted against each other. Net flow is recorded in the flow direction.</li> <li>■ <b>Forward</b> option Only the flow in the forward flow direction is totalized.</li> <li>■ <b>Reverse</b> option Only the flow in the reverse flow direction is totalized (= reverse flow quantity).</li> </ul>
<hr/>	
<b>Totalizer failure behavior</b> 	
<b>Navigation</b>	 Guidance → Commissioning → Totalizer 1 to n → FailureBehav. 1 to n
<b>Prerequisite</b>	A process variable has been selected in the <b>Assign process variable</b> parameter in the <b>Totalizer 1 to n</b> submenu.
<b>Description</b>	Specify how the totalizer should behave in the event of a device alarm.
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Hold</li> <li>■ Continue</li> <li>■ Last valid value + continue</li> </ul>
<b>Additional information</b>	<i>Selection</i> <ul style="list-style-type: none"> <li>■ <b>Hold</b> option The totalizer is stopped in the event of a device alarm.</li> <li>■ <b>Continue</b> option The totalizer continues to totalize based on the current value measured; the device alarm is ignored.</li> <li>■ <b>Last valid value + continue</b> option The totalizer continues to totalize based on the last valid value measured before the device alarm occurred.</li> </ul>

### 2.1.4 "Measuring conditions" wizard

*Navigation*  Guidance → Commissioning → Meas. conditions

<b>► Measuring conditions</b>	
Flow damping	→  16
Low flow cutoff	→  16
On value low flow cutoff	→  17
Off value low flow cutoff	→  17
Pressure shock suppression	→  18

Empty pipe detection	→  19
Empty pipe adjust value	→  19
Full pipe adjust value	→  19

## Flow damping

### Navigation

 Guidance → Commissioning → Meas. conditions → Flow damping

### Description

Enter value for damping of the flow measured value in order to reduce the variability of the flow measured value when exposed to interference.

Additional information:

The depth of the flow filter is determined by this setting. As the filter depth increases, so does the reaction time of the device.

- Value = 0: No damping. Damping of 0 is not recommended, as the measuring signal is then so noisy that it is almost impossible to perform a measurement.
- Value > 0: Damping increases

Optimal damping depends on the measuring period.

Damping impacts the following measuring device variables:

- Outputs
- Low flow cutoff
- Totalizers

### User entry

0 to 15

## Low flow cutoff

### Navigation

 Guidance → Commissioning → Meas. conditions → Low flow cutoff

### Description

Select a process variable for low flow cutoff to activate low flow cutoff.

### Selection

- Off
- Volume flow
- Mass flow

### Additional information

Description

A0012887

- Q* Flow  
*t* Time  
*H* Hysteresis  
*A* Low flow cut off active  
 1 Low flow cut off is activated  
 2 Low flow cut off is deactivated  
 3 On-value entered  
 4 Off-value entered

### On value low flow cutoff

#### Navigation

Guidance → Commissioning → Meas. conditions → On value

#### Description

Enter on value to switch on low flow cutoff.

Value = 0: No low flow cutoff

Value > 0: Low flow cutoff is activated

#### User entry

Positive floating-point number

### Off value low flow cutoff

#### Navigation

Guidance → Commissioning → Meas. conditions → Off value

#### Description

Enter off value to switch off low flow cutoff. The off value is entered as a positive hysteresis with respect to the on value.

#### User entry

0 to 100.0 %

Pressure shock suppression

Navigation

Guidance → Commissioning → Meas. conditions → Pres. shock sup.

Description

Enter a time span for signal suppression (= pressure shock suppression active), for example to prevent the device from registering flow movements in the pipe when a valve is closed.

Pressure shock suppression is activated when the flow rate drops below the on value for low flow cutoff.

Values reported when pressure shock suppression is active:

Flow: 0

Totalizer: Last valid value

Pressure shock suppression is deactivated when the time span specified has elapsed and the flow rate exceeds the off value for low flow cutoff.

User entry

0 to 100 s

Additional information

*Example*

When a valve is closed, momentarily strong fluid movements may occur in the pipeline, which are registered by the device. These totalized flow values lead to a false totalizer status, particularly during batching processes.

A0012888

- Q Flow
- t Time
- A After run
- B Pressure shock
- C Pressure shock suppression active according to the time entered
- D Pressure shock suppression inactive
- 1 Valve closes
- 2 Flow falls below the on-value of the low flow cut off: pressure shock suppression is activated
- 3 The time entered has elapsed: pressure shock suppression is deactivated
- 4 The current flow value is processed and displayed again.
- 5 On value for low flow cut off
- 6 Off value for low flow cut off

**Empty pipe detection**

- Navigation** Guidance → Commissioning → Meas. conditions → Empty pipe det.
- Description** Switch empty pipe detection on or off. Switch on empty pipe detection to detect a partially filled or empty measuring tube.
- Selection**
  - Off
  - On

**Empty pipe adjust value**

- Navigation** Guidance → Commissioning → Meas. conditions → Empty pipe value
- Description** Displays adjustment value when the measuring tube is empty.  
NOTE  
Users logged on in the Service role have write access!
- User interface** Positive floating-point number

**Full pipe adjust value**

- Navigation** Guidance → Commissioning → Meas. conditions → Full pipe value
- Description** Displays adjustment value when the measuring tube is full.  
NOTE  
Users logged on in the Service role have write access!
- User interface** Positive floating-point number

### 2.1.5 "Display" wizard

*Navigation* Guidance → Commissioning → Display

▶ **Display**

Value 1 display	→  20
Value 2 display	→  20
Value 3 display	→  21

Value 4 display	→  21
Display damping	→  22

---

**Value 1 display**
**Navigation**

 Guidance → Commissioning → Display → Value 1 display

**Description**

Select the measured value to display in the first position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

**Value 2 display**
**Navigation**

 Guidance → Commissioning → Display → Value 2 display

**Description**

Select the measured value to display in the second position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- None
- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

\* Visibility depends on order options or device settings

---

**Value 3 display**

---

**Navigation**

 Guidance → Commissioning → Display → Value 3 display

**Description**

Select the measured value to display in the third position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- None
- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

**Value 4 display**

---

**Navigation**

 Guidance → Commissioning → Display → Value 4 display

**Description**

Select the measured value to display in the fourth position on the local display.  
The unit is set in the "System units" menu.

**Selection**

**Display damping**

**Navigation**

Guidance → Commissioning → Display → Display damping

**Description**

Enter a time constant to set the reaction time of the display to fluctuations in the measured value (PT1 element).

The smaller the time constant, the faster the display reacts to fluctuations in the measured value.

If the time constant is set to 0, damping is deactivated.

**User entry**

0.0 to 999.9 s

**2.1.6 "Date/time" wizard**

### 3 "Diagnostics" menu

Troubleshooting and preventive maintenance – settings for device behavior during process and device events as well as assistance and measures for diagnostic purposes.

*Navigation*  Diagnostics

<b>Diagnostics</b>	
▶ Active diagnostics	→  25
▶ Diagnostic list	→  28
▶ Event logbook	→  32
▶ Simulation	→  33
▶ Heartbeat Technology	→  35
▶ Diagnostic settings	→  36

### 3.1 "Active diagnostics" submenu

Navigation   Diagnostics → Active diagnos.

▶ Active diagnostics	
Actual diagnostics	→  25
Active diagnostic IO-Link	→  25
Timestamp	→  26
Previous diagnostics	→  26
Last diagnostic IO-Link	→  26
Timestamp	→  26
Operating time from restart	→  26
Operating time	→  27

---

#### Actual diagnostics

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → Actual diagnos.
<b>Prerequisite</b>	A diagnostic event has occurred.
<b>Description</b>	Displays the currently active diagnostic message. If there is more than one pending diagnostic event, the message for the diagnostic event with the highest priority is displayed.
<b>User interface</b>	Positive integer

---

#### Active diagnostic IO-Link

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → ActDiag IO-Link
<b>Description</b>	Displays the IO-Link event code for the currently active diagnostic message. If there is more than one pending diagnostic event, the code for the diagnostic message with the highest priority is displayed.
<b>User interface</b>	0 to 65 535

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → Timestamp
<b>Description</b>	Displays the timestamp for the currently active diagnostic message.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Previous diagnostics**

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → Prev.diagnostics
<b>Prerequisite</b>	At least two diagnostic events have already occurred.
<b>Description</b>	Displays the diagnostic message for the last diagnostic event that has ended.
<b>User interface</b>	Positive integer

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → Timestamp
<b>Description</b>	Displays the timestamp of the diagnostic message generated for the last diagnostic event that has ended.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Operating time from restart**

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → Time fr. restart
<b>Description</b>	Indicates how long the device has been in operation since the last time the device was restarted.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Last diagnostic IO-Link**

---

<b>Navigation</b>	 Diagnostics → Active diagnos. → LastDiag IO-Link
<b>Description</b>	Displays the IO-Link event code for the last diagnostic event that has ended.

**User interface**                    0 to 65 535

---

**Operating time**

---

**Navigation**                        Diagnostics → Active diagnos. → Operating time

**Description**                    Indicates how long the device has been in operation.

**User interface**                    Days (d), hours (h), minutes (m), seconds (s)

### 3.2 "Diagnostic list" submenu

Navigation  Diagnostics → Diagnostic list

▶ Diagnostic list		
Diagnostics 1	→	 28
Diagnostic 1 IO-Link	→	 29
Timestamp	→	 29
Diagnostics 2	→	 29
Diagnostic 2 IO-Link	→	 29
Timestamp	→	 29
Diagnostics 3	→	 30
Diagnostic 3 IO-Link	→	 30
Timestamp	→	 30
Diagnostics 4	→	 30
Diagnostic 4 IO-Link	→	 31
Timestamp	→	 30
Diagnostics 5	→	 31
Diagnostic 5 IO-Link	→	 31
Timestamp	→	 31

#### Diagnostics 1

Navigation  Diagnostics → Diagnostic list → Diagnostics 1

Description Displays the currently active diagnostic message with the highest priority.

User interface Positive integer

---

**Diagnostic 1 IO-Link**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diag. 1 IO-Link
<b>Description</b>	Displays the IO-Link event code for the currently active diagnostic message with the highest priority.
<b>User interface</b>	0 to 65 535

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Timestamp
<b>Description</b>	Displays the timestamp for the diagnostic message with the highest priority.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Diagnostics 2**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diagnostics 2
<b>Description</b>	Displays the currently active diagnostic message with the second highest priority.
<b>User interface</b>	Positive integer

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Timestamp
<b>Description</b>	Displays the timestamp for the diagnostic message with the second highest priority.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Diagnostic 2 IO-Link**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diag. 2 IO-Link
<b>Description</b>	Displays the IO-Link event code for the currently active diagnostic message with the second highest priority.
<b>User interface</b>	0 to 65 535

---

**Diagnostics 3**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diagnostics 3
<b>Description</b>	Displays the currently active diagnostic message with the third highest priority.
<b>User interface</b>	Positive integer

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Timestamp
<b>Description</b>	Displays the timestamp for the diagnostic message with the third highest priority.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Diagnostic 3 IO-Link**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diag. 3 IO-Link
<b>Description</b>	Displays the IO-Link event code for the currently active diagnostic message with the third highest priority.
<b>User interface</b>	0 to 65 535

---

**Diagnostics 4**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diagnostics 4
<b>Description</b>	Displays the currently active diagnostic message with the fourth highest priority.
<b>User interface</b>	Positive integer

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Timestamp
<b>Description</b>	Displays the timestamp for the diagnostic message with the fourth highest priority.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Diagnostics 5**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diagnostics 5
<b>Description</b>	Displays the currently active diagnostic message with the fifth-highest priority.
<b>User interface</b>	Positive integer

---

**Timestamp**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Timestamp
<b>Description</b>	Displays the timestamp for the diagnostic message with the fifth highest priority.
<b>User interface</b>	Days (d), hours (h), minutes (m), seconds (s)

---

**Diagnostic 4 IO-Link**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diag. 4 IO-Link
<b>Description</b>	Displays the IO-Link event code for the currently active diagnostic message with the fourth highest priority.
<b>User interface</b>	0 to 65 535

---

**Diagnostic 5 IO-Link**

---

<b>Navigation</b>	 Diagnostics → Diagnostic list → Diag. 5 IO-Link
<b>Description</b>	Displays the IO-Link event code for the currently active diagnostic message with the fifth highest priority.
<b>User interface</b>	0 to 65 535

### 3.3 "Event logbook" submenu

Navigation  Diagnostics → Event logbook

#### Filter options

Navigation  Diagnostics → Event logbook → Filter options

Description Select the category of event notification to display in the event list.

Additional information:

The status signals F, C, S and M are categorized in accordance with VDI/VDE 2650 and NAMUR Recommendation NE 107.

Selection

- All
- Failure (F)
- Function check (C)
- Out of specification (S)
- Maintenance required (M)
- Information (I)

#### Clear event list

Navigation  Diagnostics → Event logbook → Clear event list

Description Deletes all entries from the events list. Once this function has been executed, the events list is empty and all the events are deleted.

Selection

- Cancel
- Clear data

### 3.4 "Simulation" submenu

Navigation  Diagnostics → Simulation

▶ Simulation

Assign simulation process variable	→  33
Process value	→  33
Device alarm simulation	→  34
Diagnostic event simulation	→  34

---

#### Assign simulation process variable

**Navigation**  Diagnostics → Simulation → Assign proc.var.

**Description** Select a process variable to activate the simulation.

**Selection**

- Off
- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*

**Additional information** *Description*  
 The display alternates between the measured value and a diagnostics message of the "function check" category (C) when simulation is active.

---

#### Process value

**Navigation**  Diagnostics → Simulation → Process value

**Description** Enter the process value to simulate.  
 The unit is set in the "System units" menu.

**User entry** Signed floating-point number

---

\* Visibility depends on order options or device settings

---

**Device alarm simulation**

---

**Navigation**

 Diagnostics → Simulation → Dev. alarm sim.

**Description**

Switch the device alarm simulation on or off.

While simulation is in progress, a diagnostic message of the Function Check (C) category is displayed.

**Selection**

- Off
- On

---

**Diagnostic event simulation**

---

**Navigation**

 Diagnostics → Simulation → Diagnostic event

**Description**

Select the diagnostic event to simulate.

**Selection**

Off

### 3.5 "Heartbeat Technology" submenu

The **Heartbeat Technology** submenu (→  35) is only available with the optional "Heartbeat Verification + Monitoring" application package.

- Order code for: Application package
- Option: EB "Heartbeat Verification + Monitoring"

Detailed information and all descriptions of the device parameters of the application package are available in the "Heartbeat Verification + Monitoring" Special Documentation

*Navigation*

Diagnostics → Heartbeat Techn.

▶ Heartbeat Technology

### 3.6 "Diagnostic settings" submenu

Navigation  Diagnostics → Diag. settings

▶ Diagnostic settings

▶ Properties →  36

▶ Diagnostic configuration →  36

#### 3.6.1 "Properties" submenu

Navigation  Diagnostics → Diag. settings → Properties

▶ Properties

Alarm delay →  36

---

#### Alarm delay

**Navigation**  Diagnostics → Diag. settings → Properties → Alarm delay

**Description** Enter a delay to suppress momentarily pending diagnostic messages.  
 Only applies to diagnostic events that allow for a delay before the diagnostic message is generated.

**User entry** 0 to 60 s

#### 3.6.2 "Diagnostic configuration" submenu

Navigation  Diagnostics → Diag. settings → Diag. config.

▶ Diagnostic configuration

▶ Sensor →  37

▶ Electronics →  37

▶ Process →  40

### "Sensor" submenu

*Navigation*        Diagnostics → Diag. settings → Diag. config. → Sensor

---

### Assign behavior of diagnostic no. 043

**Navigation**       Diagnostics → Diag. settings → Diag. config. → Sensor → Diagnostic no. 043

**Description**      Select behavior for diagnostic event "043 Sensor short circuit detected".

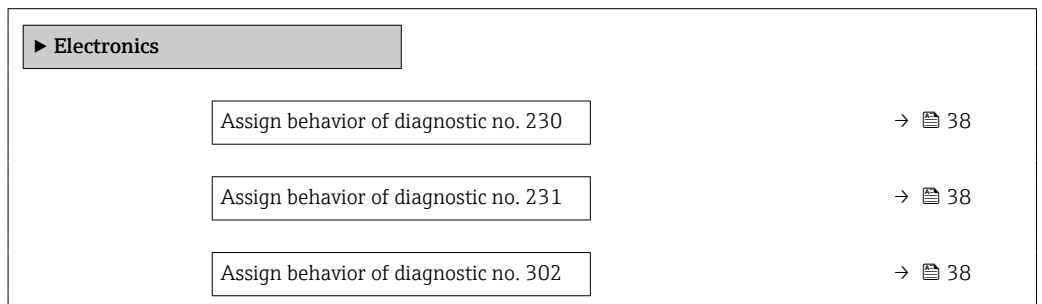

- Selection**
- Off
  - Alarm
  - Warning
  - Logbook entry only

**Additional information**      *Selection*

- **Off** option  
The diagnostic event is ignored and no diagnostic message is generated or logged.
- **Alarm** option  
The device stops measuring. The signal outputs and totalizers assume the specified alarm condition. A diagnostic message is generated.
- **Warning** option  
The device continues measuring. The signal outputs and totalizers are not affected. A diagnostic message is generated.
- **Logbook entry only** option  
The device continues measuring. The diagnostic message is only displayed in the "Event logbook" submenu and does not alternate with the standard operational information displayed.

### "Electronics" submenu

*Navigation*        Diagnostics → Diag. settings → Diag. config. → Electronics

Assign behavior of diagnostic no. 376	→  38
Assign behavior of diagnostic no. 377	→  39

---

### Assign behavior of diagnostic no. 230

---

<b>Navigation</b>	 Diagnostics → Diag. settings → Diag. config. → Electronics → Diagnostic no. 230
<b>Description</b>	Select behavior for diagnostic event "230 Date/time incorrect".
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Alarm</li> <li>■ Warning</li> <li>■ Logbook entry only</li> </ul>

---

### Assign behavior of diagnostic no. 231

---

<b>Navigation</b>	 Diagnostics → Diag. settings → Diag. config. → Electronics → Diagnostic no. 231
<b>Description</b>	Select behavior for diagnostic event "231 Date/time not available".
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Alarm</li> <li>■ Warning</li> <li>■ Logbook entry only</li> </ul>

---

### Assign behavior of diagnostic no. 302

---

<b>Navigation</b>	 Diagnostics → Diag. settings → Diag. config. → Electronics → Diagnostic no. 302
<b>Description</b>	Select behavior for diagnostic event "302 Device verification active".
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Off</li> <li>■ Warning</li> <li>■ Logbook entry only</li> </ul>

---

### Assign behavior of diagnostic no. 376

---

<b>Navigation</b>	 Diagnostics → Diag. settings → Diag. config. → Electronics → Diagnostic no. 376
<b>Description</b>	Select behavior for diagnostic event "376 Sensor electronics (ISEM) faulty".

<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Off</li> <li>■ Alarm</li> <li>■ Warning</li> <li>■ Logbook entry only</li> </ul>
<b>Additional information</b>	<p><i>Selection</i></p> <ul style="list-style-type: none"> <li>■ <b>Off</b> option The diagnostic event is ignored and no diagnostic message is generated or logged.</li> <li>■ <b>Alarm</b> option The device stops measuring. The signal outputs and totalizers assume the specified alarm condition. A diagnostic message is generated.</li> <li>■ <b>Warning</b> option The device continues measuring. The signal outputs and totalizers are not affected. A diagnostic message is generated.</li> <li>■ <b>Logbook entry only</b> option The device continues measuring. The diagnostic message is only displayed in the "Event logbook" submenu and does not alternate with the standard operational information displayed.</li> </ul>

---

### Assign behavior of diagnostic no. 377

<b>Navigation</b>	Diagnostics → Diag. settings → Diag. config. → Electronics → Diagnostic no. 377
<b>Description</b>	Select behavior for diagnostic event "377 Electrode signal integrity".
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Off</li> <li>■ Alarm</li> <li>■ Warning</li> <li>■ Logbook entry only</li> </ul>
<b>Additional information</b>	<p><i>Selection</i></p> <ul style="list-style-type: none"> <li>■ <b>Off</b> option The diagnostic event is ignored and no diagnostic message is generated or logged.</li> <li>■ <b>Alarm</b> option The device stops measuring. The signal outputs and totalizers assume the specified alarm condition. A diagnostic message is generated.</li> <li>■ <b>Warning</b> option The device continues measuring. The signal outputs and totalizers are not affected. A diagnostic message is generated.</li> <li>■ <b>Logbook entry only</b> option The device continues measuring. The diagnostic message is only displayed in the "Event logbook" submenu and does not alternate with the standard operational information displayed.</li> </ul>

**"Process" submenu**

Navigation  Diagnostics → Diag. settings → Diag. config. → Process

▶ Process

Assign behavior of diagnostic no. 832	→  40
Assign behavior of diagnostic no. 833	→  41
Assign behavior of diagnostic no. 834	→  41
Assign behavior of diagnostic no. 835	→  42
Assign behavior of diagnostic no. 842	→  42
Assign behavior of diagnostic no. 937	→  43
Assign behavior of diagnostic no. 938	→  43
Assign behavior of diagnostic no. 961	→  44
Assign behavior of diagnostic no. 962	→  44

**Assign behavior of diagnostic no. 832**

**Navigation**

 Diagnostics → Diag. settings → Diag. config. → Process → Diagnostic no. 832

**Description**

Select behavior for diagnostic event "832 Sensor electronics temperature too high".

**Selection**

- Off
- Alarm
- Warning
- Logbook entry only

**Additional information**

*Selection*

- **Off** option  
The diagnostic event is ignored and no diagnostic message is generated or logged.
- **Alarm** option  
The device stops measuring. The signal outputs and totalizers assume the specified alarm condition. A diagnostic message is generated.
- **Warning** option  
The device continues measuring. The signal outputs and totalizers are not affected. A diagnostic message is generated.
- **Logbook entry only** option  
The device continues measuring. The diagnostic message is only displayed in the "Event logbook" submenu and does not alternate with the standard operational information displayed.

---

**Assign behavior of diagnostic no. 833**

<b>Navigation</b>	Diagnostics → Diag. settings → Diag. config. → Process → Diagnostic no. 833
<b>Description</b>	Select behavior for diagnostic event "833 Sensor electronics temperature too low".
<b>Selection</b>	<ul style="list-style-type: none"> <li>▪ Off</li> <li>▪ Alarm</li> <li>▪ Warning</li> <li>▪ Logbook entry only</li> </ul>
<b>Additional information</b>	<p><i>Selection</i></p> <ul style="list-style-type: none"> <li>▪ <b>Off</b> option The diagnostic event is ignored and no diagnostic message is generated or logged.</li> <li>▪ <b>Alarm</b> option The device stops measuring. ## 4 "Application" menu

Targeted optimization to the application – comprehensive device settings from sensor technology to system integration for optimum application adaptation.

Navigation  Application

<b>Application</b>	
▶ Measured values	→ 45
▶ System units	→ 49
▶ Totalizers	→ 53
▶ Sensor	→ 58
▶ IO-Link	→ 69

### 4.1 "Measured values" submenu

Navigation  Application → Measured values

<b>▶ Measured values</b>	
Mass flow	→ 45
Volume flow	→ 46
Conductivity	→ 46
Corrected conductivity	→ 46
Temperature	→ 47
▶ Totalizer	→ 47

---

#### Mass flow

---

**Navigation**  Application → Measured values → Mass flow

**Description** Displays the mass flow calculated.  
The unit is set in the "System units" menu.

**User interface** Signed floating-point number

**Additional information**  The IO-Link interface only offers the **kg/s** option.

---

## Volume flow

---

**Navigation**  Application → Measured values → Volume flow

**Description** Displays the volume flow measured.  
The unit is set in the "System units" menu.

**User interface** Signed floating-point number

**Additional information**  The IO-Link interface only offers the **m<sup>3</sup>/h** option.

---

## Conductivity

---

**Navigation**  Application → Measured values → Conductivity

**Prerequisite** Conductivity measurement is switched on in the **Conductivity measurement** parameter (→  59).

 Conductivity measurement is only optionally available: Under order code for "Functionality", option D (enhanced transmitter) and order code for "Sensor option", option CX (conductivity measurement)

**Description** Displays the conductivity measured.  
The unit is set in the "System units" menu.

**User interface** Positive floating-point number

**Additional information**  The IO-Link interface only offers the **S/m** option.

---

## Corrected conductivity

---

**Navigation**  Application → Measured values → CorrConductivity

**Prerequisite** Conductivity measurement is switched on in the **Conductivity measurement** parameter (→  59).

 Conductivity measurement is only optionally available: Under order code for "Functionality", option D (extended transmitter) and order code for "Sensor option", option CX (conductivity measurement)

**Description** Displays the conductivity measured compensated for temperature.  
The unit is set in the "System units" menu.

**User interface** Positive floating-point number

**Temperature**

**Navigation**  Application → Measured values → Temperature

**Prerequisite** Temperature measurement is only optionally available for Promag H 10 (5HBB): Under order code for "Functionality", option D (enhanced transmitter) and order code for "Sensor option", option CI (fluid temperature measurement)

**Description** Displays the medium temperature measured.  
The unit is set in the "System units" menu.

**User interface** Positive floating-point number

**Additional information**  The IO-Link interface only offers the °C option.

**4.1.1 "Totalizer" submenu**

*Navigation*   Application → Measured values → Totalizer

**Totalizer value**

**Navigation**  Application → Measured values → Totalizer → Tot. 1 to n value

**Prerequisite** A process variable has been selected in the **Assign process variable** parameter in the **Totalizer 1 to n** submenu.

<b>Description</b>	<p>Displays the totalizer counter since the last reset.</p> <p>This parameter can only display figures up to 7 digits. If the counter exceeds this range, the overflow is displayed in the "Totalizer overflow " parameter.</p> <p>Example:</p> <p>Value of "Totalizer value" parameter: 1,968,457 m<sup>3</sup></p> <p>Value of "Totalizer overflow " parameter: <math>1 \times 10^7</math> (1 overflow) = 10,000,000 m<sup>3</sup></p> <p>Counter (total): 11,968,457 m<sup>3</sup></p> <p>In the event of a fault condition, the totalizer behaves as specified in the "Totalizer failure behavior" parameter.</p>
<b>User interface</b>	Signed floating-point number
<b>Additional information</b>	<p> Totalizer 1 is permanently set to volume flow and cannot be changed. Totalizers 2 and 3 can be changed.</p>

---

**Totalizer overflow**

<b>Navigation</b>	<p> Application → Measured values → Totalizer → Tot. 1 to n overflow</p>
<b>Prerequisite</b>	A process variable has been selected in the <b>Assign process variable</b> parameter in the <b>Totalizer 1 to n</b> submenu.
<b>Description</b>	Displays the number of overflows for the totalizer counter ("Totalizer value" parameter).
<b>User interface</b>	-32 000.0 to 32 000.0

- MS/m

**Additional information**

The IO-Link interface only offers the unit **S/m** option.

### 4.3 "Totalizers" submenu

Navigation   Application → Totalizers

▶ Totalizers		
▶ Totalizer handling		→  53
▶ Totalizer 1 to n		→  53

#### 4.3.1 "Totalizer handling" submenu

Navigation   Application → Totalizers → Totalizer

▶ Totalizer handling		
Reset all totalizers		→  53

---

#### Reset all totalizers

---

**Navigation**

 Application → Totalizers → Totalizer → Reset all tot.

**Description**

Reset all totalizers to "0" and restart the totalizers. The counter readings are not logged prior to the reset.

**Selection**

- Cancel
- Reset + totalize

#### 4.3.2 "Totalizer 1 to n" submenu

Navigation   Application → Totalizers → Totalizer 1 to n

▶ Totalizer 1 to n		
Assign process variable 1 to n		→  54
Process variable unit 1 to n		→  54
Totalizer 1 to n operation mode		→  55
Totalizer 1 to n control		→  56

Preset value 1 to n	→  56
Totalizer 1 to n failure behavior	→  57

---

### Assign process variable

**Navigation**

 Application → Totalizers → Totalizer 1 to n → AssignVariab. 1 to n

**Description**

Select a process variable to activate the totalizer.  
If the process variable is changed or the totalizer deactivated, the totalizer is reset to "0".

**Selection**

- Off
- Volume flow
- Mass flow

**Additional information**

 Totalizer 1 is permanently set to **Volume flow** option and cannot be changed. Totalizers 2 and 3 can be changed.

---

### Process variable unit

**Navigation**

 Application → Totalizers → Totalizer 1 to n → VariableUnit 1 to n

**Prerequisite**

A process variable has been selected in the **Assign process variable** parameter in the **Totalizer 1 to n** submenu.

**Description**

Select the unit for the process variable of the totalizer.

**Selection**

*Other units*

None \*

\* Visibility depends on order options or device settings

**Additional information***Description*

The unit is selected separately for each totalizer. The unit is independent of the option selected in the **System units** submenu (→  8).

*Options*

The selection is dependent on the process variable selected in the **Assign process variable** parameter (→  13).

- The IO-Link interface only offers the **kg** option, **m<sup>3</sup>** option and **Nm<sup>3</sup>** option.
- Totalizer 1 is permanently set to **Volume flow** option and cannot be changed. Totalizers 2 and 3 can be changed.

**Totalizer operation mode****Navigation**

 Application → Totalizers → Totalizer 1 to n → Operat. mode 1 to n

**Prerequisite**

A process variable has been selected in the **Assign process variable** parameter in the **Totalizer 1 to n** submenu.

**Description**

Select the totalizer operation mode, e.g. only totalize forward flow or only totalize reverse flow.

**Selection**

- Net
- Forward
- Reverse

---

<b>Additional information</b>	<i>Selection</i> <ul style="list-style-type: none"> <li>■ <b>Net</b> option The flow values in the forward and reverse flow directions are totalized and netted against each other. Net flow is recorded in the flow direction.</li> <li>■ <b>Forward</b> option Only the flow in the forward flow direction is totalized.</li> <li>■ <b>Reverse</b> option Only the flow in the reverse flow direction is totalized (= reverse flow quantity).</li> </ul>
-------------------------------	--

---

## Totalizer control

---

<b>Navigation</b>	 Application → Totalizers → Totalizer 1 to n → Tot. 1 to n control
<b>Prerequisite</b>	A process variable has been selected in the <b>Assign process variable</b> parameter in the <b>Totalizer 1 to n</b> submenu.
<b>Description</b>	Operate the totalizer.
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Totalize</li> <li>■ Reset + hold</li> <li>■ Preset + hold</li> <li>■ Reset + totalize</li> <li>■ Hold</li> </ul>
<b>Additional information</b>	<i>Selection</i> <ul style="list-style-type: none"> <li>■ <b>Totalize</b> option The totalizer is started or continues running.</li> <li>■ <b>Reset + hold</b> option The totalizer is reset to "0" and stopped.</li> <li>■ <b>Preset + hold</b> option The totalizer is stopped and set to the start value specified in the "Preset value " parameter.</li> <li>■ <b>Reset + totalize</b> option The totalizer is reset to "0" and restarted.</li> <li>■ <b>Hold</b> option The totalizer is stopped.</li> </ul>

---

## Preset value

---

<b>Navigation</b>	 Application → Totalizers → Totalizer 1 to n → Preset value 1 to n
<b>Prerequisite</b>	A process variable has been selected in the <b>Assign process variable</b> parameter in the <b>Totalizer 1 to n</b> submenu.
<b>Description</b>	Specify a start value for the totalizer.
<b>User entry</b>	Signed floating-point number

<b>Additional information</b>	<p><i>Description</i></p> <p>The unit of the selected process variable is specified for the totalizer in the <b>Unit totalizer</b> parameter (→  13).</p> <p><i>Example</i></p> <p>This configuration is suitable for applications such as iterative filling processes with a fixed batch quantity.</p>
-------------------------------	--

---

**Totalizer failure behavior**

<b>Navigation</b>	 Application → Totalizers → Totalizer 1 to n → FailureBehav. 1 to n
<b>Prerequisite</b>	A process variable has been selected in the <b>Assign process variable</b> parameter in the <b>Totalizer 1 to n</b> submenu.
<b>Description</b>	Specify how the totalizer should behave in the event of a device alarm.
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Hold</li> <li>■ Continue</li> <li>■ Last valid value + continue</li> </ul>
<b>Additional information</b>	<p><i>Selection</i></p> <ul style="list-style-type: none"> <li>■ <b>Hold</b> option The totalizer is stopped in the event of a device alarm.</li> <li>■ <b>Continue</b> option The totalizer continues to totalize based on the current value measured; the device alarm is ignored.</li> <li>■ <b>Last valid value + continue</b> option The totalizer continues to totalize based on the last valid value measured before the device alarm occurred.</li> </ul>

## 4.4 "Sensor" submenu

Navigation  Application → Sensor

▶ Sensor	
▶ Process parameters	→  58
▶ Low flow cutoff	→  61
▶ Empty pipe detection	→  62
▶ Sensor adjustment	→  64
▶ Calibration	→  65
▶ Electrode cleaning cycle	→  66

### 4.4.1 "Process parameters" submenu

Navigation  Application → Sensor → Process param.

▶ Process parameters	
Flow damping	→  59
Flow override	→  59
Conductivity measurement	→  59
Conductivity temperature coefficient	→  60
Conductivity damping time	→  60
Temperature damping time	→  60
Fixed density	→  61

---

**Flow damping**
**Navigation**

Application → Sensor → Process param. → Flow damping

**Description**

Enter value for damping of the flow measured value in order to reduce the variability of the flow measured value when exposed to interference.

Additional information:

The depth of the flow filter is determined by this setting. As the filter depth increases, so does the reaction time of the device.

- Value = 0: No damping. Damping of 0 is not recommended, as the measuring signal is then so noisy that it is almost impossible to perform a measurement.

- Value > 0: Damping increases

Optimal damping depends on the measuring period.

Damping impacts the following measuring device variables:

- Outputs
- Low flow cutoff
- Totalizers

**User entry**

0 to 15

---

**Flow override**
**Navigation**

Application → Sensor → Process param. → Flow override

**Description**

Reports the flow rate as zero until flow override is deactivated. Can be used for example when cleaning the pipeline.

**Selection**

- Off
- On

**Additional information**

*Selection*

**"On" option**

Activates flow override and the diagnostic message "453 Flow override active" is generated.

Values reported:

Flow variables: Zero

Other process variables: As measured

Totalizers: Stop totalizing

---

**Conductivity measurement**
**Navigation**

Application → Sensor → Process param. → Conduct. measur.

**Prerequisite**

Conductivity measurement is only optionally available: Under order code for "Functionality", option D (extended transmitter) and order code for "Sensor option", option CX (conductivity measurement)

**Description**

Switch conductivity measurement on or off. To be able to measure conductivity, the medium must have a minimum conductivity of 5 µS/cm.

- Selection**
- Off
  - On

---

### Conductivity temperature coefficient

---

- Navigation**  Application → Sensor → Process param. → Cond. temp.coeff
- Prerequisite** Conductivity measurement is switched on in the **Conductivity measurement** parameter (→  59).
-  Conductivity measurement is only optionally available: Under order code for "Functionality", option D (extended transmitter) and order code for "Sensor option", option CX (conductivity measurement)
- Description** Enter the temperature coefficient to calculate the corrected conductivity.
- User entry** Signed floating-point number

---

### Conductivity damping time

---

- Navigation**  Application → Sensor → Process param. → ConductDampTime
- Prerequisite** Conductivity measurement is switched on in the **Conductivity measurement** parameter (→  59).
-  Conductivity measurement is only optionally available: Under order code for "Functionality", option D (extended transmitter) and order code for "Sensor option", option CX (conductivity measurement)
- Description** Enter time constant for conductivity damping (PT1 element):  
 - Value = 0: No damping  
 - Value > 0: Damping increases
- Additional information:  
 Damping is implemented by means of a proportional transmission behavior with first order delay (PT1 element).
- User entry** 0 to 999.9 s

---

### Temperature damping time

---

- Navigation**  Application → Sensor → Process param. → TempDampingTime
- Prerequisite** Temperature measurement is only optionally available for Promag H 10 (5HBB): Under order code for "Functionality", option D (extended transmitter) and order code for "Sensor option", option CI (medium temperature measurement)
- Description** Enter time constant for damping the temperature value.

**User entry** 0 to 999.9 s

---

### Fixed density

---

**Navigation**  Application → Sensor → Process param. → Fixed density

**Description** Enter a fixed value for the density.  
The unit is set in the " " menu.

**User entry** Positive floating-point number

## 4.4.2 "Low flow cutoff" submenu

*Navigation*   Application → Sensor → Low flow cutoff

▶ **Low flow cutoff**

Low flow cutoff	→  61
On value low flow cutoff	→  62
Off value low flow cutoff	→  62

---

### Low flow cutoff

---

**Navigation**  Application → Sensor → Low flow cutoff → Low flow cutoff

**Description** Select a process variable for low flow cutoff to activate low flow cutoff.

**Selection**

- Off
- Volume flow
- Mass flow

**Additional information** Description

A0012887

- Q* Flow
- t* Time
- H* Hysteresis
- A* Low flow cut off active
- 1* Low flow cut off is activated
- 2* Low flow cut off is deactivated
- 3* On-value entered
- 4* Off-value entered

**On value low flow cutoff**

**Navigation** Application → Sensor → Low flow cutoff → On value

**Description** Enter on value to switch on low flow cutoff.  
 Value = 0: No low flow cutoff  
 Value > 0: Low flow cutoff is activated

**User entry** Positive floating-point number

**Off value low flow cutoff**

**Navigation** Application → Sensor → Low flow cutoff → Off value

**Description** Enter off value to switch off low flow cutoff. The off value is entered as a positive hysteresis with respect to the on value.

**User entry** 0 to 100.0 %

**4.4.3 "Empty pipe detection" submenu**

*Navigation* Application → Sensor → Empty pipe det.

▶ Empty pipe detection

Empty pipe detection	→  63
New adjustment	→  63

Empty pipe adjust value	→ 63
Full pipe adjust value	→ 64
Measured value EPD	→ 64

**Empty pipe detection**

**Navigation**

Application → Sensor → Empty pipe det. → Empty pipe det.

**Description**

Switch empty pipe detection on or off. Switch on empty pipe detection to detect a partially filled or empty measuring tube.

**Selection**

- Off
- On

**New adjustment**

**Navigation**

Application → Sensor → Empty pipe det. → New adjustment

**Description**

Select empty pipe or full pipe adjustment to perform a new adjustment. To adjust empty pipe detection, perform the empty pipe adjustment first and then the full pipe adjustment.

Additional information:

The measuring device is pre-adjusted at production using water (approx. 300 µS/cm). For liquids that deviate from this conductivity, a new empty pipe and full pipe adjustment must be performed on site.

**Selection**

- Cancel
- Empty pipe adjust
- Full pipe adjust

**Empty pipe adjust value**

**Navigation**

Application → Sensor → Empty pipe det. → Empty pipe value

**Description**

Displays adjustment value when the measuring tube is empty.

NOTE

Users logged on in the Service role have write access!

**User interface**

Positive floating-point number

**Full pipe adjust value**

- Navigation** Application → Sensor → Empty pipe det. → Full pipe value
- Description** Displays adjustment value when the measuring tube is full.  
NOTE  
Users logged on in the Service role have write access!
- User interface** Positive floating-point number

**Measured value EPD**

- Navigation** Application → Sensor → Empty pipe det. → Meas. value EPD
- Description** Displays the value currently measured for empty pipe detection.
- User interface** Positive floating-point number

**4.4.4 "Sensor adjustment" submenu**

*Navigation* Application → Sensor → Sensor adjustm.

▶ **Sensor adjustment**

Installation direction	→  64
Integration time	→  65
Measuring period	→  65

**Installation direction**

- Navigation** Application → Sensor → Sensor adjustm. → Install. direct.
- Description** Select the sign of the flow direction.
- Selection**
  - Forward flow
  - Reverse flow

**Integration time**

<b>Navigation</b>	Application → Sensor → Sensor adjustm. → Integration time
<b>Description</b>	<p>Displays the duration of an integration cycle.</p> <p>Users logged on in the Service role have write access.</p>
<b>User interface</b>	1 to 65 ms

**Measuring period**

<b>Navigation</b>	Application → Sensor → Sensor adjustm. → Measuring period
<b>Description</b>	<p>Displays the duration of a full measuring period.</p> <p>The measuring period is the time span over which a magnetic field is produced to create a measuring point.</p> <p>Users logged on in the Service role have write access.</p>
<b>User interface</b>	0 to 1 000 ms

**4.4.5 "Calibration" submenu**

*Navigation*      Application → Sensor → Calibration

▶ Calibration

Nominal diameter	→  65
Calibration factor	→  66
Zero point	→  66
Conductivity calibration factor	→  66

**Nominal diameter**

<b>Navigation</b>	Application → Sensor → Calibration → Nominal diameter
<b>Description</b>	Displays the nominal diameter of the sensor.
<b>User interface</b>	Character string comprising numbers, letters and special characters

**Calibration factor**

<b>Navigation</b>	 Application → Sensor → Calibration → Cal. factor
<b>Description</b>	Displays the current calibration factor for the sensor. The factory setting for the calibration factor can be found on the sensor's nameplate.
<b>User interface</b>	Positive floating-point number

**Zero point**

<b>Navigation</b>	 Application → Sensor → Calibration → Zero point
<b>Description</b>	Displays the zero point correction value for the sensor. Users logged on in the Service role have write access.
<b>User interface</b>	Signed floating-point number

**Conductivity calibration factor**

<b>Navigation</b>	 Application → Sensor → Calibration → Cond. cal. fact.
<b>Prerequisite</b>	Conductivity measurement is switched on in the <b>Conductivity measurement</b> parameter (→  59).  Conductivity measurement is only optionally available: Under order code for "Functionality", option D (extended transmitter) and order code for "Sensor option", option CX (conductivity measurement)
<b>Description</b>	Displays the calibration factor for conductivity measurement. Users logged on in the Service role have write access.
<b>User interface</b>	0.01 to 10 000

**4.4.6 "Electrode cleaning cycle" submenu**

*Navigation*   Application → Sensor → Elec. clean cycl

▶ Electrode cleaning cycle

Electrode cleaning cycle	→  67
ECC duration	→  67

ECC recovery time	→ 67
ECC interval	→ 67
ECC polarity	→ 68

**Electrode cleaning cycle**

- Navigation** Application → Sensor → Elec. clean cycl → Elec. clean cycl
- Description** Switch electrode cleaning on or off.
- Selection**
- Off
  - On

**ECC duration**

- Navigation** Application → Sensor → Elec. clean cycl → ECC duration
- Description** Specify the duration of the cleaning phase for the cycle. Diagnostic message "530 Electrode cleaning active" is displayed until the cleaning phase and recovery phase are both complete.
- User entry** 0.01 to 30 s

**ECC recovery time**

- Navigation** Application → Sensor → Elec. clean cycl → ECC recov. time
- Description** Specify the maximum timespan for recovery after the cleaning phase has completed to prevent interference with the signal outputs. The output signal values will be frozen for the duration of the recovery, unless flow measurement can resume beforehand. If the timespan specified is not sufficient for recovery, diagnostic message "512 ECC recovery time exceeded" is generated.
- User entry** 1 to 600 s

**ECC interval**

- Navigation** Application → Sensor → Elec. clean cycl → ECC interval
- Description** Specify the duration of the interval between one cleaning cycle and the next.

---

**User entry**                      0.5 to 168 h

---

**ECC polarity**

---

**Navigation**                            Application → Sensor → Elec. clean cycl → ECC polarity

**Description**                      Displays the setting for the electrode cleaning polarity. The polarity depends on the material of the electrodes.

**User interface**

- Positive
- Negative

**Additional information**                      *User interface*

- **Positive** option  
For tantalum, Alloy C22, or stainless steel electrodes
- **Negative** option  
For platinum electrodes

## 4.5 "IO-Link" submenu

Navigation  Application → IO-Link

▶ IO-Link

Application specific tag	→  70
Function tag	→  70
Location tag	→  70

---

### Vendor name

<b>Navigation</b>	 Application → IO-Link → Vendor name
<b>Description</b>	Displays the manufacturer.
<b>User interface</b>	Character string comprising numbers, letters and special characters

---

### Product name

<b>Navigation</b>	 Application → IO-Link → Product name
<b>Description</b>	Displays the name of the transmitter.
<b>User interface</b>	Character string comprising numbers, letters and special characters

---

### Device ID

<b>Navigation</b>	 Application → IO-Link → Device ID
<b>Description</b>	Displays the device ID registered with the IO-Link Community.
<b>User interface</b>	Positive integer

Product ID	
<b>Navigation</b>	 Application → IO-Link → Product ID
<b>Description</b>	Displays the product root.
<b>User interface</b>	Character string comprising numbers, letters and special characters
Application specific tag 	
<b>Navigation</b>	 Application → IO-Link → Application tag
<b>Description</b>	Enter the tag of the application in which the device is used, e.g. the designation of the production process or step (max. 32 characters).
<b>User entry</b>	Character string comprising numbers, letters and special characters (32)
Function tag 	
<b>Navigation</b>	 Application → IO-Link → Function tag
<b>Description</b>	Enter the tag of the function the device performs in the application (max. 32 characters).
<b>User entry</b>	Character string comprising numbers, letters and special characters (32)
Location tag 	
<b>Navigation</b>	 Application → IO-Link → Location tag
<b>Description</b>	Enter the tag of the device location in the plant (max. 32 characters).
<b>User entry</b>	Character string comprising numbers, letters and special characters (32)

## 5 "System" menu

Overall device management and security settings – management of system settings and adaption to operational requirements.

*Navigation*  System

System	
▶ Device management	→  72
▶ User management	→  74
▶ Connectivity	→  77
▶ Date/time	→  78
▶ Information	→  80
▶ Display	→  85
▶ Software configuration	→  89

## 5.1 "Device management" submenu

Navigation  System → Device manag.

▶ Device management	
Device tag	→  72
Locking status	→  72
Configuration counter	→  73
Device reset	→  73

---

### Device tag

**Navigation**  System → Device manag. → Device tag

**Description** Displays the name for the measuring point.

**User entry** Character string comprising numbers, letters and special characters (32)

---

### Locking status

**Navigation**  System → Device manag. → Locking status

**Description** Indicates the write protection with the highest priority that is currently active.

**User interface**

- Hardware locked
- **Temporarily locked** option (e.g. during IO-Link block configuration or parameter upload)

**Additional information** 

- The DIP switch is on the back of the display.
- While a block parameterization or the DataStorage mechanism is active via the IO-Link communication, the **Temporarily locked** option becomes active.

---

**Configuration counter**

---

<b>Navigation</b>	 System → Device manag. → Config. counter
<b>Description</b>	<p>Displays the counter for the number of times the device configuration has changed.</p> <p>If the value for a static parameter changes, the counter increments by 1. This is to enable tracking different parameter versions.</p> <p>When multiple parameters are changed simultaneously, e.g. when loading a configuration file into the device from an external source such as FieldCare, the counter may increment.</p> <p>The counter cannot be reset. Nor is it reset to a default value on performing a device reset. Once the counter has incremented to 65535, it restarts at 1.</p>
<b>User interface</b>	0 to 65 535

---

**Device reset**

---

<b>Navigation</b>	 System → Device manag. → Device reset
<b>Description</b>	Reset the device configuration - either entirely or in part - to a defined state.
<b>Selection</b>	<ul style="list-style-type: none"> <li>■ Cancel</li> <li>■ To delivery settings</li> <li>■ Restart device</li> <li>■ Restore S-DAT backup *</li> <li>■ Create T-DAT backup</li> <li>■ Restore T-DAT backup *</li> </ul>
<b>Additional information</b>	<p><i>Selection</i></p> <ul style="list-style-type: none"> <li>■ <b>To delivery settings</b> option Every parameter for which a customer-specific default setting was ordered is reset to the customer-specific value. All other parameters are reset to the factory setting.</li> <li>■ <b>Restart device</b> option The restart resets every parameter with data stored in volatile memory (RAM) to the factory setting (e.g. measured value data). The device configuration remains unchanged.</li> <li>■ <b>Restore S-DAT backup</b> option Restores the data that is saved on the S-DAT. This function can be used to resolve the memory issue "083 Memory content inconsistent" or to restore the S-DAT data when a new S-DAT has been installed.</li> <li>■ <b>Create T-DAT backup</b> option Creates T-DAT backup.</li> <li>■ <b>Restore T-DAT backup</b> option Restores the data saved on the T-DAT. This function can be used to resolve the memory issue "283 Memory content inconsistent" or to restore the T-DAT data when a new T-DAT has been installed.</li> </ul>

---

\* Visibility depends on order options or device settings

## 5.2 "User management" submenu

Navigation  System → User manag.

### User role

**Navigation**  System → User manag. → User role

**Description** Displays the role the user is currently logged on in.  
 The role determines the user's access rights for the parameters. Until a "Maintenance" code has been set in the "Define Maintenance code" parameter, all users are automatically logged on in the "Maintenance" role. Once the "Maintenance" code has been set, all users are automatically logged on in the "Operator" role. The access rights can be changed via the "Enter access code" parameter.

**User interface**

- Operator
- Maintenance
- Service
- Production
- Development

**Additional information** *User interface*

- **Operator** option  
 Provides only read access to parameters.
- **Maintenance** option  
 Provides read and write access to parameters.  
 For some parameters, the user must be logged on in the Service role to obtain write access.
- **Service** option  
 Provides read and write access to Service parameters.

**Enter access code**

---

<b>Navigation</b>	 System → User manag. → Ent. access code
<b>Description</b>	For users logged on in the Operator role, enter the Maintenance code to change the access status to Maintenance and disable write protection of parameters. For users logged on in the Maintenance role, enter the Service code to change the access status to Service and enable read and write access to Service parameters.
<b>User entry</b>	Max. 16-digit character string comprising numbers, letters and special characters

---

**Reset Maintenance code**

---

<b>Navigation</b>	 System → User manag. → Reset Maint code
<b>Description</b>	Enter the code provided by Endress+Hauser Technical Support to reset the Maintenance code.
<b>User entry</b>	Character string comprising numbers, letters and special characters (32)

### 5.2.1 "Define Maintenance code" wizard

Complete this wizard to specify an access code for the Maintenance role.

*Navigation*  System → User manag. → Def. Maint. code

▶ Define Maintenance code

Define Maintenance code	→  76
Confirm Maintenance code	→  76

---

#### Define Maintenance code

**Navigation**  System → User manag. → Def. Maint. code → Def. Maint. code

**Description** Specify an access code that is required to obtain the access rights for the Maintenance role.

**User entry** 0 to 9 999

---

#### Confirm Maintenance code

**Navigation**  System → User manag. → Def. Maint. code → Conf. Maint code

**Description** Confirm the access code entered for the Maintenance role.

**User entry** 0 to 9 999

### 5.3 "Connectivity" submenu

Navigation   System → Connectivity

#### 5.3.1 "Bluetooth configuration" submenu

Navigation   System → Connectivity → Bluetooth conf.

---

#### Bluetooth

**Navigation**  System → Connectivity → Bluetooth conf. → Bluetooth

**Description** Enable or disable Bluetooth.

- Selection**
- Enable
  - Disable
  - Not available \*

---

#### Communication established

**Navigation**  System → Connectivity → Bluetooth conf. → Communi. establ.

- User interface**
- No
  - Yes

---

\* Visibility depends on order options or device settings

## 5.4 "Date / Time" submenu

Navigation   System → Date / Time

▶ **Date/time**

Set date/time	→  78
Time format	→  78
Time zone	→  78

---

### Set date/time

**Navigation**  System → Date/time → Set date/time

**Description** Set the date and local time. Every time the date or time is changed, a logbook entry is created.

**User entry** Date and time

---

### Time format

**Navigation**  System → Date/time → Time format

**Description** Select the time format.

**Selection**

- 24 h
- 12 h AM/PM

---

### Time zone

**Navigation**  System → Date/time → Time zone

**Description** Select the time zone. Every time the time zone is changed, a logbook entry is created.

## 5.5 "Information" submenu

Navigation  System → Information

▶ Information	
▶ Device	→  80
▶ Sensor electronic module (ISEM)	→  83
▶ Display module	→  83

### 5.5.1 "Device" submenu

Navigation  System → Information → Device

▶ Device	
Device name	→  80
Device tag	→  81
Serial number	→  81
Order code	→  81
Firmware version	→  81
Extended order code 1	→  82
Extended order code 2	→  82
Extended order code 3	→  82
ENP version	→  82
Manufacturer	→  83

---

#### Device name

---

#### Navigation

 System → Information → Device → Device name

#### Description

Displays the name of the transmitter. The transmitter name is also provided on the nameplate of the transmitter.

#### User interface

Character string comprising numbers, letters and special characters

Device tag	
<b>Navigation</b>	 System → Information → Device → Device tag
<b>Description</b>	Displays the name for the measuring point.
<b>User entry</b>	Character string comprising numbers, letters and special characters (32)
Serial number	
<b>Navigation</b>	 System → Information → Device → Serial number
<b>Description</b>	<p>Displays the serial number of the measuring device. The serial number is also provided on the nameplate of the sensor and of the transmitter.</p> <p>The serial number can also be used to retrieve further device-related information and documentation via the Operations app or the Device Viewer on the Endress+Hauser website.</p>
<b>User interface</b>	Character string comprising numbers, letters and special characters
Order code	
<b>Navigation</b>	 System → Information → Device → Order code
<b>Description</b>	<p>Displays the device order code.</p> <p>The order code is used for instance to order a replacement or spare device or to verify that the device features specified on the order form match the shipping note.</p>
<b>User interface</b>	Character string comprising numbers, letters and special characters
Firmware version	
<b>Navigation</b>	 System → Information → Device → Firmware version
<b>Description</b>	Displays the device firmware version installed.
<b>User interface</b>	Character string comprising numbers, letters and special characters

Extended order code 1 	
<b>Navigation</b>	 System → Information → Device → Ext. order cd. 1
<b>Description</b>	<p>Displays the first, second and/or third part of the extended order code.</p> <p>Due to character length restrictions, the extended order code is split into a maximum of 3 parameters. The extended order code indicates for each feature in the product structure the selected option, thereby uniquely identifying the device model.</p> <p>The extended order code can also be found on the nameplate.</p>
<b>User interface</b>	Character string comprising numbers, letters and special characters
Extended order code 2 	
<b>Navigation</b>	 System → Information → Device → Ext. order cd. 2
<b>Description</b>	<p>Displays the first, second and/or third part of the extended order code.</p> <p>Due to character length restrictions, the extended order code is split into a maximum of 3 parameters. The extended order code indicates for each feature in the product structure the selected option, thereby uniquely identifying the device model.</p> <p>The extended order code can also be found on the nameplate.</p>
<b>User interface</b>	Character string comprising numbers, letters and special characters
Extended order code 3 	
<b>Navigation</b>	 System → Information → Device → Ext. order cd. 3
<b>Description</b>	<p>Displays the first, second and/or third part of the extended order code.</p> <p>Due to character length restrictions, the extended order code is split into a maximum of 3 parameters. The extended order code indicates for each feature in the product structure the selected option, thereby uniquely identifying the device model.</p> <p>The extended order code can also be found on the nameplate.</p>
<b>User interface</b>	Character string comprising numbers, letters and special characters
ENP version	
<b>Navigation</b>	 System → Information → Device → ENP version
<b>Description</b>	Displays the version of the electronic nameplate (ENP).
<b>User interface</b>	Character string comprising numbers, letters and special characters

---

**Manufacturer**

---

<b>Navigation</b>	 System → Information → Device → Manufacturer
<b>Description</b>	Displays the manufacturer.
<b>User interface</b>	Character string comprising numbers, letters and special characters

### 5.5.2 "Sensor electronic module (ISEM)" submenu

*Navigation*   System → Information → Sens. electronic

---

**Firmware version**

---

<b>Navigation</b>	 System → Information → Sens. electronic → Firmware version
<b>Description</b>	Displays the firmware version of the module.
<b>User interface</b>	Positive integer

### 5.5.3 "Display module" submenu

*Navigation*   System → Information → Display module

---

**Firmware version**

---

<b>Navigation</b>	 System → Information → Display module → Firmware version
<b>Description</b>	Displays the firmware version of the module.

**User interface**

Positive integer

## 5.6 "Display" submenu

Navigation  System → Display

► Display	
Language	→  85

---

\* Visibility depends on order options or device settings

- ภาษาไทย (Thai) \*
- tiếng Việt (Vietnamese) \*
- čeština (Czech)

---

**Value 1 display**
**Navigation**

System → Display → Value 1 display

**Description**

Select the measured value to display in the first position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

**Value 2 display**
**Navigation**

System → Display → Value 2 display

**Description**

Select the measured value to display in the second position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- None
- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

\* Visibility depends on order options or device settings

---

**Value 3 display**

---

**Navigation**

System → Display → Value 3 display

**Description**

Select the measured value to display in the third position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- None
- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

**Value 4 display**

---

**Navigation**

System → Display → Value 4 display

**Description**

Select the measured value to display in the fourth position on the local display.  
The unit is set in the "System units" menu.

**Selection**

- None
- Volume flow
- Mass flow
- Conductivity \*
- Corrected conductivity \*
- Temperature \*
- Totalizer 1
- Totalizer 2
- Totalizer 3
- Noise \*
- Coil current shot time \*

---

\* Visibility depends on order options or device settings

---

**Display damping**

---

**Navigation**  System → Display → Display damping

**Description** Enter a time constant to set the reaction time of the display to fluctuations in the measured value (PT1 element).  
The smaller the time constant, the faster the display reacts to fluctuations in the measured value.  
If the time constant is set to 0, damping is deactivated.

**User entry** 0.0 to 999.9 s

---

**Rotation display**

---

**Navigation**  System → Display → Rotation display

**Description** Select rotation angle of the display text to optimize local display readability.

**Selection**

- Auto
- 0 degree
- 90 degree
- 180 degree
- 270 degree

---

**Brightness**

---

**Navigation**  System → Display → Brightness

**Description** Adjust brightness.

**User entry** 0 to 100 %

---

**Color scheme**

---

**Navigation**  System → Display → Color scheme

**Description** Select the preferred color scheme.

**Selection**

- Light
- Dark

## 5.7 "Software configuration" submenu

*Navigation*  System → Software config.

---

### Activate SW option

**Navigation**  System → Software config. → Activate SW opt.

**Description** Enter application package code or code of the functionality ordered separately to activate it.

Additional information:

- If a measuring device was ordered with an add-on software option, the activation code is programmed into the measuring device ex factory.
- After entering the activation code: Check whether the new software option is displayed in the "Software option overview" parameter and therefore active.

NOTE

If an invalid code is entered the software options that have already been activated are invalidated!

Before entering a new activation code: Create a record of the existing activation code.

**User entry** Positive integer

---

### Software option overview

**Navigation**  System → Software config. → SW option overv.

**Description** Displays all software options included in the order ex factory or ordered at a later date that have been enabled via the operating interface.

If a new software option is not displayed after entering the activation code, the code entered was inaccurate or invalid. In this case, contact the appropriate Endress+Hauser sales organization for assistance.

**User interface**

- Extended HistoROM
- Heartbeat Verification
- Heartbeat Monitoring

## 6 Explanation of abbreviated units

### 6.1 SI units

Process variable	Units	Explanation
Density	g/cm <sup>3</sup> , g/m <sup>3</sup>	Gram/volume unit
	kg/dm <sup>3</sup> , kg/l, kg/m <sup>3</sup>	Kilogram/volume unit
	SD4°C, SD15°C, SD20°C	Specific density: The specific density is the ratio of the density of the fluid to the density of water at a water temperature of 4 °C (39 °F), 15 °C (59 °F), 20 °C (68 °F).
	SG4°C, SG15°C, SG20°C	Specific gravity: The specific gravity is the ratio of the density of the fluid to the density of water at a water temperature of 4 °C (39 °F), 15 °C (59 °F), 20 °C (68 °F).
Mass	g, kg, t	Gram, kilogram, metric ton
Mass flow	g/s, g/min, g/h, g/d	Gram/time unit
	kg/s, kg/min, kg/h, kg/d	Kilogram/time unit
	t/s, t/min, t/h, t/d	Metric ton/time unit
Temperature	°C, K	Celsius, Kelvin
Volume	cm <sup>3</sup> , dm <sup>3</sup> , m <sup>3</sup>	Cubic centimeter, cubic decimeter, cubic meter
	ml, l, hl, Ml Mega	Milliliter, liter, hectoliter, megaliter
Time	s, m, h, d, y	Second, minute, hour, day, year

### 6.2 US units

Process variable	Units	Explanation
Density	lb/ft <sup>3</sup> , lb/gal (us)	Pound/cubic foot, pound/gallon
	lb/bbl (us;liq.), lb/bbl (us;beer), lb/bbl (us;oil), lb/bbl (us;tank)	Pound/volume unit
Mass	oz, lb, STon	Ounce, pound, standard ton
Mass flow	oz/s, oz/min, oz/h, oz/d	Ounce/time unit
	lb/s, lb/min, lb/h, lb/d	Pound/time unit
	STon/s, STon/min, STon/h, STon/d	Standard ton/time unit
Temperature	°F, °R	Fahrenheit, Rankine
Volume	af	Acre foot
	ft <sup>3</sup>	Cubic foot
	fl oz (us), gal (us), kgal (us), Mgal (us)	Fluid ounce, gallon, kilogallon, million gallon
	bbl (us;liq.), bbl (us;beer), bbl (us;oil), bbl (us;tank)	Barrel (normal liquids), barrel (beer), barrel (petrochemicals), barrel (filling tanks)
Volume flow	af/s, af/min, af/h, af/d	Acre foot/time unit
	ft <sup>3</sup> /s, ft <sup>3</sup> /min, ft <sup>3</sup> /h, ft <sup>3</sup> /d	Cubic foot/time unit
	fl oz/s (us), fl oz/min (us), fl oz/h (us), fl oz/d (us)	Fluid ounce/time unit
	gal/s (us), gal/min (us), gal/h (us), gal/d (us)	Gallon/time unit
	kgal/s (us), kgal/min (us), kgal/h (us), kgal/d (us)	Kilogallon/time unit

Process variable	Units	Explanation
	Mgal/s (us), Mgal/min (us), Mgal/h (us), Mgal/d (us)	Million gallon/time unit
	bbbl/s (us;liq.), bbl/min (us;liq.), bbl/h (us;liq.), bbl/d (us;liq.)	Barrel/time unit (normal liquids) Normal liquids: 31.5 gal/bbl
	bbbl/s (us;beer), bbl/min (us;beer), bbl/h (us;beer), bbl/d (us;beer)	Barrel /time unit (beer) Beer: 31.0 gal/bbl
	bbbl/s (us;oil), bbl/min (us;oil), bbl/h (us;oil), bbl/d (us;oil)	Barrel/time unit (petrochemicals) Petrochemicals: 42.0 gal/bbl
	bbbl/s (us;tank), bbl/min (us;tank), bbl/h (us;tank), bbl/d (us;tank)	Barrel/time unit (filling tank) Filling tanks: 55.0 gal/bbl
Time	s, m, h, d, y	Second, minute, hour, day, year
	am, pm	Ante meridiem ( before midday), post meridiem (after midday)

### 6.3 Imperial units

Process variable	Units	Explanation
Density	lb/gal (imp), lb/bbl (imp;beer), lb/bbl (imp;oil)	Pound/volume unit
Volume	gal (imp), Mgal (imp)	Gallon, mega gallon
	bbl (imp;beer), bbl (imp;oil)	Barrel (beer), barrel (petrochemicals)
Volume flow	gal/s (imp), gal/min (imp), gal/h (imp), gal/d (imp)	Gallon/time unit
	Mgal/s (imp), Mgal/min (imp), Mgal/h (imp), Mgal/d (imp)	Mega gallon/time unit
	bbbl/s (imp;beer), bbl/min (imp;beer), bbl/h (imp;beer), bbl/d (imp;beer)	Barrel /time unit (beer) Beer: 36.0 gal/bbl
	bbbl/s (imp;oil), bbl/min (imp;oil), bbl/h (imp;oil), bbl/d (imp;oil)	Barrel/time unit (petrochemicals) Petrochemicals: 34.97 gal/bbl
Time	s, m, h, d, y	Second, minute, hour, day, year
	am, pm	Ante meridiem ( before midday), post meridiem (after midday)
