Safety instructions for electrical apparatus for explosion-hazardous areas

Endress+Hauser
People for Process Automation

Soliphant M
FTM50, FTM51, FTM52

Associated Documentation

This document is an integral part of the following Operating Instructions:
KA00229F/00, KA00230F/00

The Operating Instructions which are supplied and correspond to the device type apply.

Supplementary Documentation

Explosion-protection brochure:
CP00021Z/11

Designation

Explanation of the labelling and type of protection can be found in the explosion protection brochure.

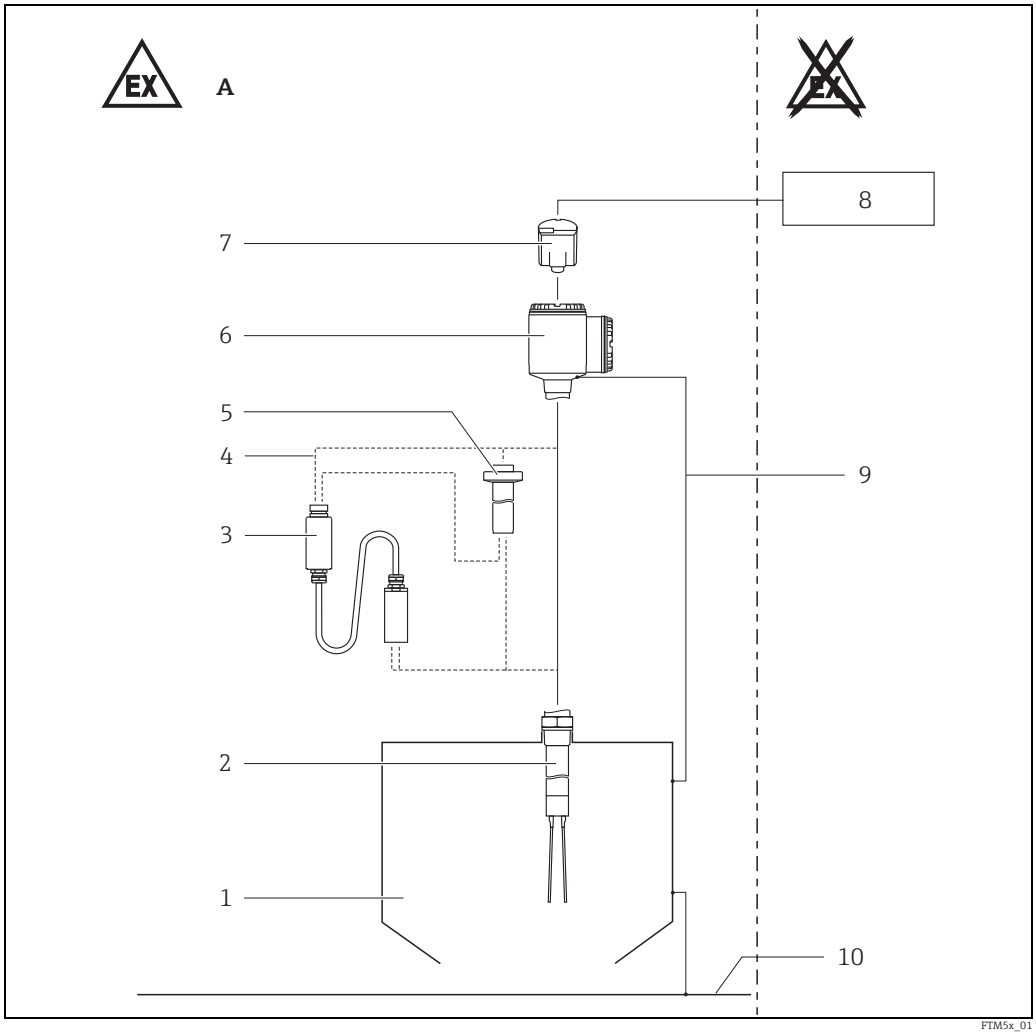
ABNT NBR IEC 60079-26:2008
ABNT NBR IEC 60079-31:2011

Safety instructions: General

- Do not open the connection or electronics compartments under voltage in an explosive atmosphere.
- Waiting time before opening the electronics compartment after switching off the power supply: 17 min.
- Avoid electrostatic charging:
  - Of plastic surfaces (e.g. housing, sensor element, special varnishing , attached additional plates, ..)
  - Of isolated capacities (e.g. isolated metallic plates)

Safety instructions: Installation



1

A *Zone 1, Zone 20, Zone 21*

1 *Tank, hazardous area Zone 0, Zone 1, Zone 20*
2 *Version:*
- *FTM50*
- *FTM51*
- *FTM52*

3 *Separate installation (optional)*
4 *[Ex ia] circuit*
5 *Temperature spacer (optional at 150 °C)*
6 *Housing:*
- *F13, Aluminium (Ex d only)*
- *F27, Stainless steel (Ex d only)*
- *T13, Aluminium (Ex d, Ex de) with separate connection compartment*

7 *Electronic insert:*
- *FEM51*
- *FEM52*
- *FEM54*
- *FEM55*

8 *Supply unit*
9 *Potential equalization*
10 *Local potential equalization*

- Comply with the installation and safety instructions in the Operating Instructions.
- Install the device according to the manufacturer's instructions and any other valid standards and regulations.
- Pay attention to the maximum process conditions according to the manufacturer's Operating Instructions. At high medium temperatures: note flange pressure load capacity as a factor of temperature.
- Connect the device using suitable cable and wire entries or using piping systems of protection type "Pressure-tight Enclosure (Ex d)".
- To maintain the ingress protection IP66/67 of the housing, install the housing cover and cable glands correctly. Close unused entry glands with approved (Ex d) sealing plugs.
- Install the device to exclude any mechanical damage or friction during the application. Pay particular attention to flow conditions and tank fittings.
- Support extension tube of Soliphant M FTM51 if a dynamic load is expected.
- Install the device to exclude impact and friction sparks on the aluminium housing.
- Only install the devices in media for which the wetted materials have sufficient durability; e.g. process connection seal (→ Technical Information TI00392F).
- Use a process connection seal that meets the materials compatibility and temperature requirements.
- When connecting the cables, ensure there is adequate strain relief at place of installation.
- Protect the connecting cable between the separate housing and the level sensor from tension and friction (e.g. due to electrostatic charge from medium flow).

Safety instructions: Zone 0/1

- No danger of ignition arises from the sensor parts of Soliphant M FTM50 and FTM51 approved for Zone 0 if they are operated under non-atmospheric pressures and temperatures.
  Permissible medium temperatures for operation in accordance with manufacturer's specifications: dependent on ambient temperature; → 🖹 5, "Temperature tables".
- Permissible pressures for operation in accordance with manufacturer's specifications: pe = −1 bar…+25 bar, dependent on process connection; → manufacturer's Operating Instructions.
