

ASP Station 2000

Parametrierung mit dem "Quick-Setup"

Inbetriebname als Up-Down Programmierung

Hier Probenahmeverfahren einstellen!

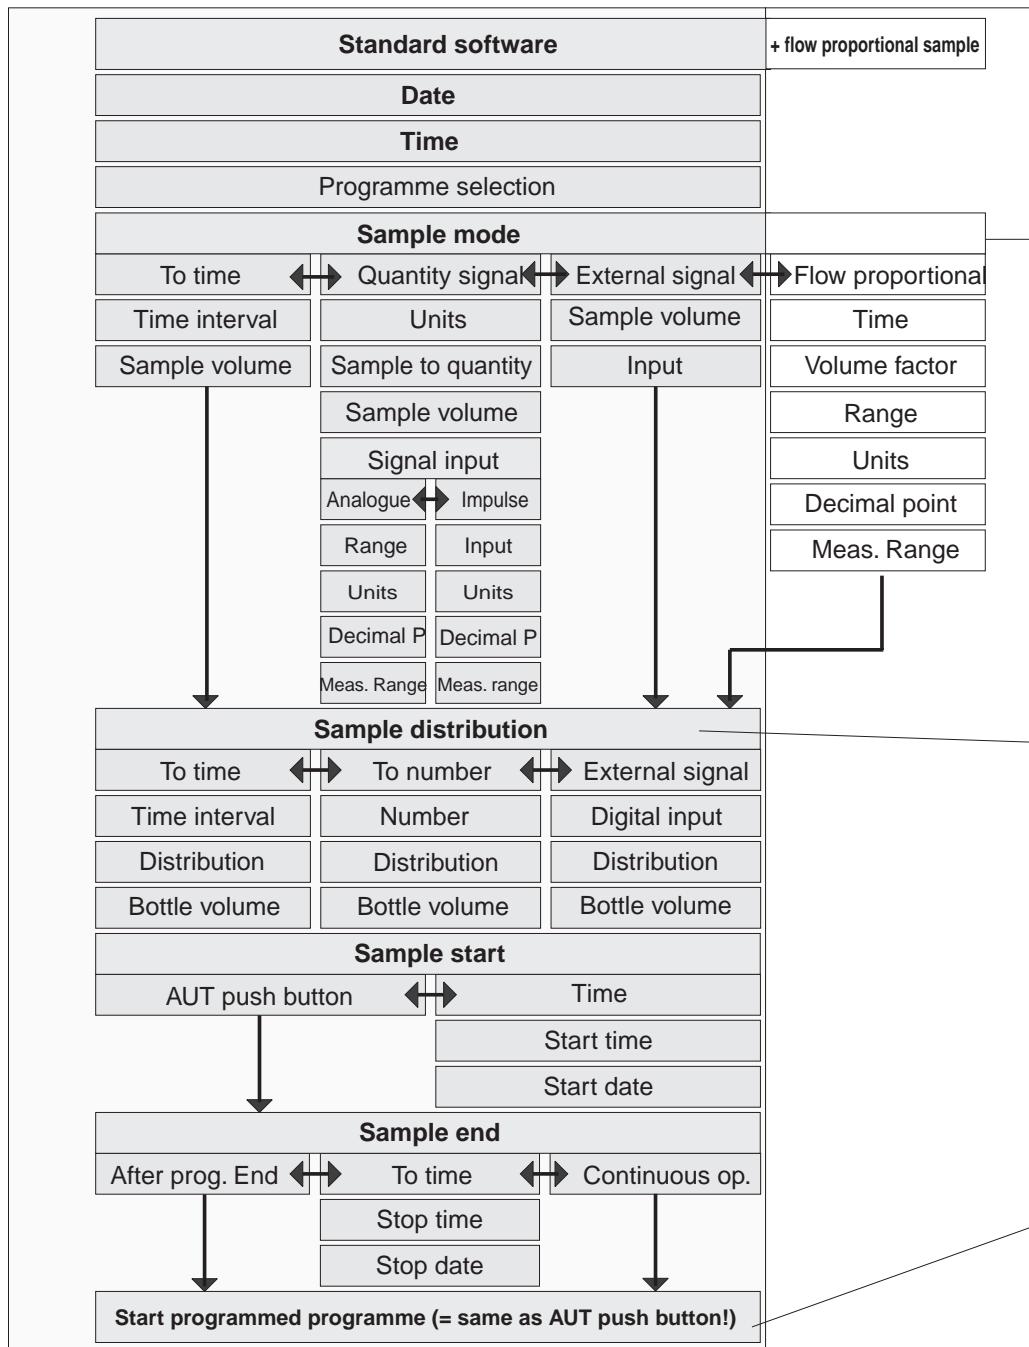

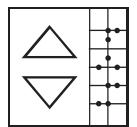

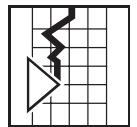

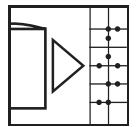

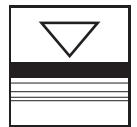

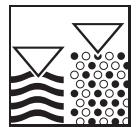

Im "Quick-Setup" können Probenahmeprogramme erstellt und gestartet werden. Der "Quick-Setup" ist eine Ergänzung zum Standard Setup. Im "Quick-Setup" eingegebene Werte werden automatisch in die entsprechenden Hauptprogramme übernommen (und umgekehrt). Für Parameter, die im "Quick-Setup" nicht berücksichtigt sind, werden automatisch Werkseinstellungen implementiert (z.B.: "Shots=1").

Der "Quick-Setup" ist ein Untermenü des Setup. Der "Quick-Setup" kann wie folgt aufgerufen werden:

- Gerät einschalten mit ON
- im Hauptmenü nach rechts scrollen
- Setup auswählen
- Quick-Setup auswählen.

Hier Verteilerbetrieb einstellen!

Sofortiger Start des Programms

ASP Station 2000**Setting up using “Quick set up“**

**Commissioning
using Up-Down
programming**

**Here set up
sampling mode!**

**Here set up
distribution mode!**

**Immediate programme
start**

Using the “Quick-Setup” sampling programmes can be created and started.

“Quick-Setup” is an extension to the Standard setting up. Values set up in “Quick-Setup” are automatically accepted into the relative main programme (and visa versa).

Parameters that are not seen or set up in “Quick-Setup” are automatically set to the factory default values (e.g.: “Shots=1”).

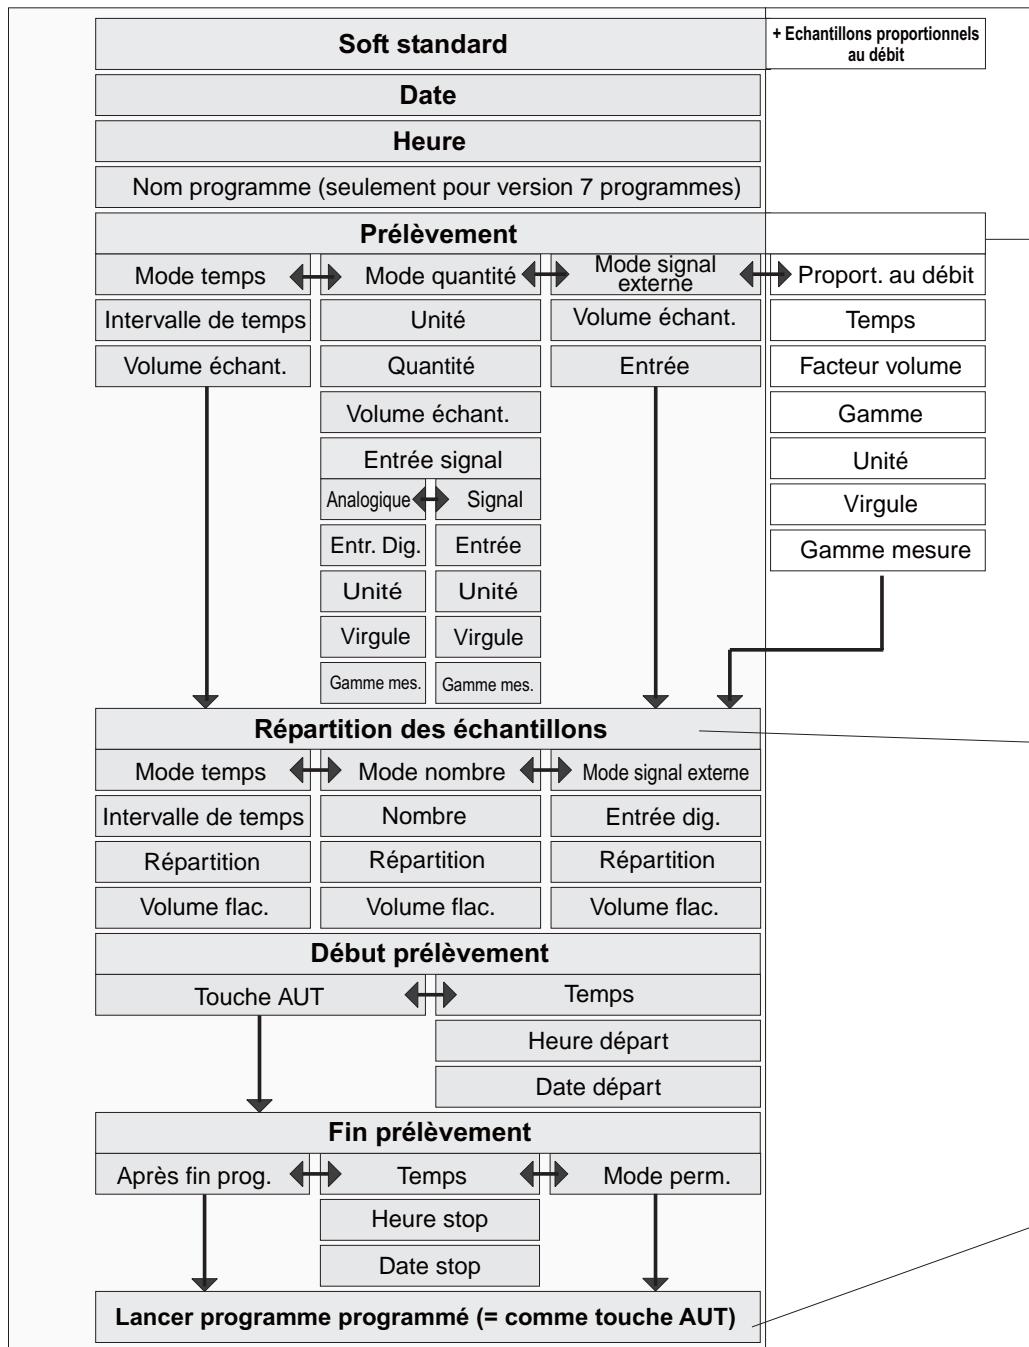

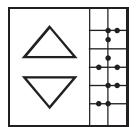

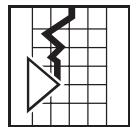

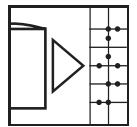

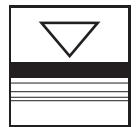

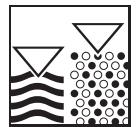

“Quick-Setup” is a sub menu of the “Setup” menu.

“Quick-Setup” can be started as follows:

- Switch unit on with ON.
- Scroll the main menu bar right using the arrows.
- Select “Setup”.
- Select “Quick-Setup”.

ASP Station 2000

Configuration avec le “Quick Setup”

Mise en service comme programmation up-down

Régler ici la procédure de prélèvement

Régler ici le mode de répartition

Début immédiat du programme

Dans le Quick Setup il est possible de définir des programmes de prélèvement et de les lancer. Le Quick Setup est un complément au Setup standard.

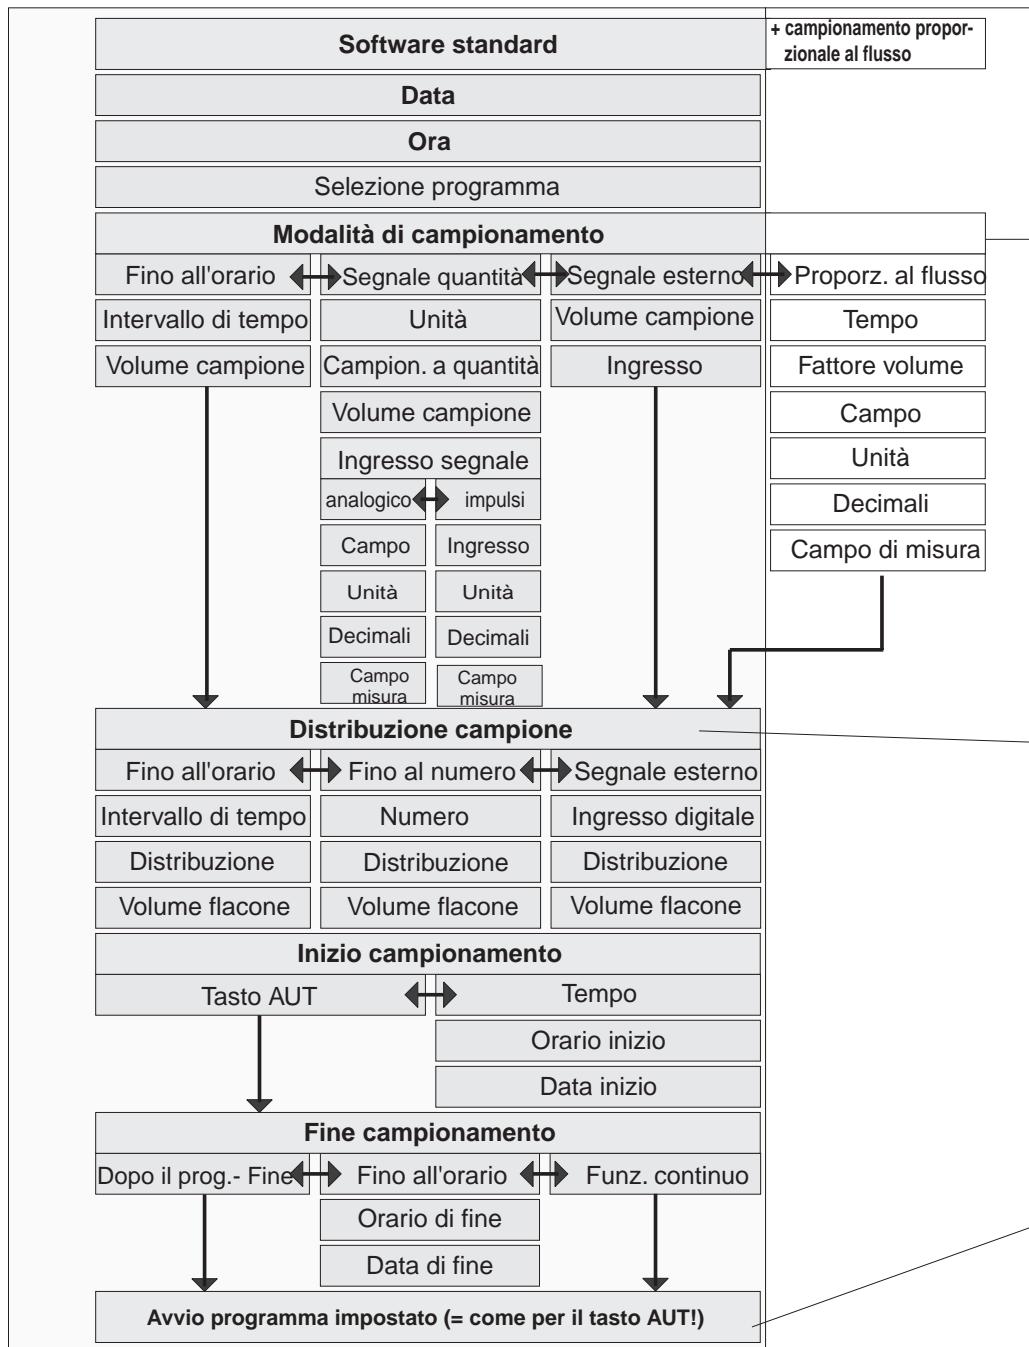

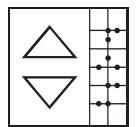

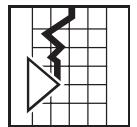

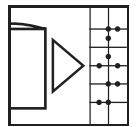

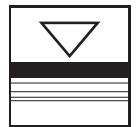

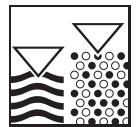

Les valeurs entrées dans le Quick Setup sont automatiquement reprises dans les programmes principaux correspondants (et inversement).

Les paramètres qui ne sont pas pris en compte dans le Quick Setup sont automatiquement remplacés par les valeurs par défaut (par ex. prélèvement continu = 1").

Le Quick-Setup est un sous-menu du Setup.

Le QuickSetup peut être interrogé comme suit :

- Mettre l'appareil sur ON
- Dans le menu principal, dérouler vers la droite
- Sélectionner Setup
- Sélectionner Quick Setup

ASP Station 2000**Impostazione con l'uso di "Quick set up"**

**Messa in servizio
con l'uso della
programmazione
dall'alto verso il basso**

**Impostare qui la
modalità di
campionamento!**

**Impostare qui la
modalità di
distribuzione!**

**Avvio immediato
programma**

Usando "Quick-Setup" è possibile creare ed avviare programmi di campionamento.

"Quick-Setup" è un'opzione aggiuntiva della funzione standard di impostazione.

I valori impostati in "Quick-Setup" vengono accettati automaticamente nel programma principale corrispondente (e viceversa).

I parametri non visibili o che non sono stati impostati in "Quick-Setup" vengono impostati automaticamente con i rispettivi valori di default (p.e.: "Nr. prelievi=1").

"Quick-Setup" è un sottomenu del menu di "Setup".

"Quick-Setup" può essere avviato nel modo seguente:

- Accendere l'unità con ON.
- Far scorrere la barra del menu principale verso destra usando le frecce.
- Selezionare "Setup".
- Selezionare "Quick-Setup".
