### RTD thermometer with screw-in thread for challenging applications

- Class A accuracy
- Mineral insulated replaceable insert
- With thermowell and extension neck

#### Application

TST187 RTD thermometer range covers a wide variety of market needs worldwide. Typical application can be found in the chemical and pharmaceutical industry, food, water and waste water and power plants. Preferred applications are in vessels or in pipes, where requirements are short response time and mechanical strength.

#### Function

TST187 RTD thermometer assembly includes a replaceable insert in mineral insulated cable which is protected by a thermowell with process connection G $\frac{1}{2}$ " or  $\frac{1}{2}$ " NPT. The terminal head is according to DIN 43729, form B, and is thermally uncoupled by an extension neck. The insert is available either with flying leads for head transmitter mounting or with terminal block.

<b>Measurement range:</b> -50... +400 °C (-58... +752 °F)	<b>Accuracy:</b> Pt100 class A
<b>Immersion length :</b> mm: 120, 160, 250, 400 (Ø 9) Inch: 4.7, 6.3, 9.9, 15.8 (Ø 0.35)	<b>Response time:</b> ≤ 18 s (T <sub>50</sub> ); ≤ 55 s (T <sub>90</sub> )
<b>Operating conditions:</b> 50 bar at +20 °C (725 PSI at +68 °F) 1 bar at +400 °C (14.5 PSI at +752 °F)	

#### Application example

Pipe installation:

- at elbows, against the flow
- in smaller pipes, leant against the flow
- perpendicular to the flow

#### Electrical connection
